HON standard and partnership textile offerings are free of regulated PFAS, formaldehyde, and added flame retardants. Most textiles are also produced without antimicrobial treatments. Certain coated materials may contain vinyl. Customers selecting COM (Customer's Own Material) are responsible for confirming the chemical content of their supplied fabrics.

Furniture described herein meets the requirements for Health Care Without Harm/Practice Greenhealth's chemical criteria for furnishings and the legacy healthier hospitals initiative. Practice Greenhealth has not verified this information. Additional information may be found at practicegreenhealth.org.

*Please refer to page two of this document for clarification when selecting products to be certain that your selections meet the Health Care Without Harm/Practice Greenhealth guidance. Customer choices can impact product content. Fabric content available on hon.com or fabric supplier website. Subject to availability. Information is current as of March 2026.

HON PRODUCT SELECTION GUIDANCE

As of March 2026, HON products can meet Health Care Without Harm/Practice Greenhealth version 2.4 criteria by using the following guidance. Customer choice plays an important role in avoiding undesired chemicals and treatments. Furniture and options specified must meet all criteria below.

FORMALDEHYDE*

Most HON furniture is SCS Indoor Advantage Gold certified, meeting testing requirements for ANSI/BIFMA e3-2019 Furniture Sustainability Standard, Sections 7.6.1, 7.6.2, and 7.6.3. For a list of products with this certification, please view our Ecomedes site at hni.ecomedes.com.

PER AND POLY-FLUORINATED COMPOUNDS (PFAS)*

HON has removed all intentionally added PFAS from manufactured products. All fabrics do not contain regulated PFAS. Customers are responsible for their COM fabric content.

POLYVINYL CHLORIDE (PVC)*

To avoid PVC, avoid specifying a curved worksurface or gallery panel, as these can require PVC. Vinyl upholstery must be avoided.

Some small PVC parts and PVC edges make up less than 1% of the weight of a worksurface or table and therefore would still be accepted in Health Care Without Harm/Practice Greenhealth guidance. Electrical components may contain PVC but are also exempt from guidance.

ANTIMICROBIALS*

Antimicrobial-free fabrics are available. Customers are responsible for their COM fabric content.

FLAME RETARDANTS*

HON's manufactured products are free of flame retardants, but customers must select fabrics that are also free of flame retardants. Vinyl upholstery, some polyurethanes, and most high-performance textiles must be avoided. Customers are responsible for their COM fabric content.

*Please note that it is not feasible to provide laboratory testing data for every variation of product and material. HON has worked with our suppliers to determine whether the chemicals and treatments listed are included in products above the guideline threshold limits. Customers are responsible for the chemical content of COM fabrics. HON reserves the right to change materials without notice but will continue to meet Health Care Without Harm/Practice Greenhealth guidance. Please confirm conformance to criteria at the time of specification. For additional information, please contact HON Customer Support at: HONCustomerSupport@honcompany.com.
