Stride®

Keep Pace with Your Environment

Each of us must connect, collaborate, be creative, and get more done in less time, and in a smaller space. With the ability to be as fluid as business requires, Stride creates a multitude of solutions from private office to open plan, and supports a range of individual workstyles within one cohesive platform.

Stride offers a comprehensive approach for building a better office environment.

Unique storage that cantilevers over the worksurface features a variety of stowage options, provides visual privacy, and defines the boundaries of each work area.

A Single Furniture Solution for One Functional Space

Utilize workspaces, storage, and space division and integrate power virtually anywhere to create unique and visually consistent work areas across the floorplan. Stride delivers a stunning degree of versatility and flexibility and can evolve to reflect changing organization needs.

Workstations

Stride panels for support and power distribution and gallery panels for easy-to-clean space division are the foundation for workstations in the open plan.

Private Offices

A workwall with open and enclosed storage creates an inviting space that functions like an office but feels more like home.

Reception

Enhance your reception area by pairing Stride countertops with stylish panels, crafting a warm and welcoming focal point for your space.

Open-plan workstations offer choice for separation, from desk-mounted screens to panels stacked up to 110 inches high for maximum privacy.

Extend the open-plan aesthetic into private offices with laminate-matching veneer and complementary storage for the busy executive.

Make a good first impression with a welcoming reception desk that serves as a productive home base for the office gatekeeper.

As Versatile as You Need it to Be

Because each Stride component was designed with every other component in mind, the entire collection works together seamlessly. Stride also works well with other products. When you pair complementary gallery panels, storage, and height-adjustable worksurfaces with Stride panels, workers have the freedom to work how they want throughout the day to maintain comfort and productivity. Create one-of-a-kind workspaces that suit the people who use them.

Stride panels with frameless glass and light-scale gallery panels and worksurface legs keep the look clean, lean, and bright. Shown with Approach™ storage.

Higher panels surrounding integrated height-adjustable worksurfaces give users privacy when standing. Shown with Approach storage.

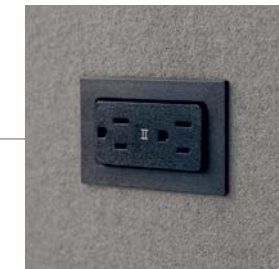

Full-height footed panels topped with low-profile glass provide maximum user privacy and separation. Shown with Stride storage.

A workwall of storage in the private office offers safekeeping for project work, archival materials, and personal belongings. Shown with Stride storage.

Power Play

With power every 7½ inches on the Stride panel, power access can be located exactly where it's needed most. Separate data cables from electrical within the frame using metal segment bars. Non-sequential tiles allow maintenance on power and data without deconstructing the entire workstation.

Integrated Power
Each tile accommodates two electrical receptacles (one on 24-inch-wide tile). Receptacles are available in multiple colors to coordinate with the fabric.

Top Trim
Easy access to lay-in data and phone cables.

Above Desktop
For powering everyday personal items, such as a phone, tablet, or laptop.

Below Desktop
For powering stationary workstation items, such as a task light or printer.

■ Power
■ Data

Base Pathway
Easy access to lay-in cables and additional power.

Visually and Functionally Dynamic

The smart, thoughtful options and details available within the Stride collection increase comfort, improve effectiveness, and add visual appeal. Personalize each space to address the different ways that people work.
