Practical Approach

Allsteel partnered with Chris Adamick to approach furniture with practicality in mind. The result is a functional collection featuring wide arms, tapered oval legs, and subtle frame design.

Modern Design

Parallel brings modern design and domestic appeal to collaboration spaces. Seating, sofas, and tables also serve as versatile lounge solutions within reception areas.

A Blank Canvas

The modern functionality of Parallel adapts to a variety of spaces. Create character by choosing from an array of upholstery options and a channeled design.

Functional Design

Parallel is a modern soft seating collection that is as useful as it is beautiful, consisting of traditional club chairs and sofas complemented by modular lounge pieces. Whether it's being used for a short-term wait in the reception area, or as a landing spot for away-from-desk laptop work, Parallel supports the various postures in the modern-day office.

Subtle Details

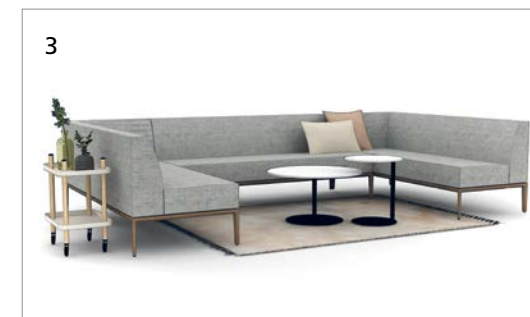

Chairs and sofa are available with channeled upholstery.

Wide arms allow a comfortable surface for working.

Tapered oval legs are available in multiple finishes.

1 Welcome space can be a more traditional space creating a micro-environment or a casual lounge area.

3 Lounge seating promotes comfortable conversations that help build connections or encourage sharing of important insights and project challenges.

5 Workspaces are including multi-purpose spaces designed to accommodate a variety of uses and groups of people.

2 Work has become much more collaborative, many new settings must support a variety of group work activities.

4 To create functional meeting spaces a range of seating postures should be provided.

6 A space that's the hub of activity has to do a lot of things, allowing people to come together to share ideas and be productive in many different ways.
