Comfort that lasts and lasts and, well, lasts.

Hour after hour, day after day, the ergonomic Trooper stands up to different body types, tasks that take people in and out of their seats, and offices that include everything from work boots to wing tips, and toolboxes to briefcases. But the Trooper isn’t just the trusty workhorse you’ve grown to depend on, it’s a chair to keep you wrapped in comfort for as long as you’re wrapped up in your work.

**Work Chair**
- Designed to perform in any environment, the Trooper offers customized comfort through a wide variety of control choices.
- Active ergonomics for those who don’t just sit around. Designed primarily for individuals who balance computing with other activities.
- Synchro-tilt opens the angle between legs and torso for better circulation.
- Five-position lock lets the user secure a desired posture or tilt freely.
- Side-mounted adjustable tension modifies the level of resistance to suit the user.
- Seat slides forward or backward to provide comfort and support.

**Large and Tall Work Chair**
- Generously proportioned to keep the large and tall worker comfortable all day long.
- Asynchronous tilt: A high-performance tilt, designed for computer-intensive environments.
- Multi-functional mechanism allows independent positioning and locking of back and seat angles.
- Easy-to-use tilt and recline allows the user to fine tune how they sit.
- Adjustable tension provides the level of resistance to suit the user.
- Seat slides forward or backward to provide comfort and support.

**Work Stool**
- Intended for areas where you need a little boost. Recommended for bank tellers, lab technicians, or anyone who works at standing height workstations.
- Forward angle transfers some of the user’s body weight to the floor to improve circulation while maintaining constant back support.

**Knee-Tilt**
- A simple solution for virtually any application and a variety of chairs.
- Seat tilt with weight loss off the spine and improves circulation to the legs.
- Adjustable tension modifies the level of resistance or suit the user.
- Tilts back allows chair to sit freely or be secured in an upright position.

But the Trooper isn’t just the trusty workhorse you’ve grown to depend on, it’s a chair to keep you wrapped in comfort for as long as you’re wrapped up in your work.

### Trooper

**Control & Features by Model**

- **Forward Angle**
  - Transfers some of the user’s body weight to the floor to improve circulation

- **Knee-Tilt**
  - With upright lock takes weight off the spine and increases circulation to the legs
  - Adjustable tension modifies the level of resistance to suit the user
  - Tilt lock allows chair to sit freely or be secured in an upright position

- **Synchro-Tilt**
  - Opens the angle between legs and torso for better circulation
  - Five-position lock lets the user secure a desired posture or tilt freely
  - Side mounted adjustable tension modifies the level of resistance to suit the user
  - Seat slides forward or backward to provide comfort and support

- **Asynchronous Tilt**
  - A high-performance chair, designed for computer-intensive environments.
  - Multifunctional mechanism allows independent positioning and locking of back and seat angles
  - Forward angle transfers some of the user’s body weight to the floor to improve circulation
  - Tilt lock allows the chair to tilt freely or be secured in an upright position

- **Large and Tall Work Chair**
  - Generously proportioned to keep the large and tall worker comfortable all day long

### Degrees of Control

A wide range of adjustability for different tasks and applications.

- **Asynchronous Tilt**
  - A high-performance chair, designed for computer-intensive environments.
  - Multifunctional mechanism allows independent positioning and locking of back and seat angles.
  - Forward angle transfers some of the user’s body weight to the floor to improve circulation.

- **Knee-Tilt**
  - With upright lock takes weight off the spine and increases circulation to the legs.
  - Adjustable tension modifies the level of resistance to suit the user.
  - Tilt lock allows chair to sit freely or be secured in an upright position.

- **Synchro-Tilt**
  - Opens the angle between legs and torso for better circulation.
  - Five-position lock lets the user secure a desired posture or tilt freely.
  - Side mounted adjustable tension modifies the level of resistance to suit the user.
  - Seat slides forward or backward to provide comfort and support.

### Work Chair

- **Back Angle**
  - Adjusts angle of back relative to the seat.

- **Back Height**
  - Provides custom lumbar support.

- **Seat Depth**
  - Adjusts the depth of the seat to accommodate different leg lengths.

- **Tilt Tension**
  - Increases or decreases the amount of back resistance provided when reclining the chair.

- **Tilt Lock**
  - Allows the user to lock the chair in any angle position.

### Work Stool

- **Seat Angle**
  - Allows user to independently position and lock the seat angle relative to the floor.

- **Seat Height**
  - Enables the seat to adjust to the preferred height.

- **Back Angle**
  - Adjusts angle of back relative to the seat.

- **Back Height**
  - Provides custom lumbar support.

- **Seat Depth**
  - Adjusts the depth of the seat to accommodate different leg lengths.

- **Tilt Tension**
  - Increases or decreases the amount of back resistance provided when reclining the chair.

- **Tilt Lock**
  - Allows the user to lock the chair in any angle position.

- **Arm Height**
  - Adjusts the height of the armrests to suit the user.

- **Arm Width**
  - Adjusts the width of the armrests based on body size, task, and personal preference.
Solid-frame construction formed with custom 14-gauge continuous seam-welded steel tubing to endure a lifetime of use.

Arms crafted with rigid die-cast aluminum uprights are as durable as they are functional.

High-tensile fiber-reinforced nylon base with optimized rib structure coupled with 60mm high-impact dual wheel casters offer strong support and easy mobility.

Urethane-coated soft-touch knobs are comfortable and easy to use.

It stands up to a whole lot of sitting down.

Large and Tall Work Chair
- Generously proportioned to keep the large and tall worker comfortable all day long.

Degrees of Control

A wide range of adjustability for different tasks and applications.

Knee-Tilt
- A simple solution for virtually any application and a variety of jobs.
- Knee tilt shifts user's lower body weight to the floor and increases circulation to the legs.
- Adjustable tension modifies the level of resistance to suit the user.
- Tilt lock allows chair to tilt freely or be secured in an upright position.

Trooper

Control & Features by Model

- Asynchronous Tilt: A high-performance chair, designed for computer-intensive environments.
  - Multifunctional mechanism allows independent positioning and locking of back and seat angles.
  - Easy-tilt and self-stowing allow user to lie back and relax as they sit.
  - Adjustable tension modifies the level of resistance to suit the user.
  - Forward angle transfers some of the user's body weight to the floor to improve circulation.

- Synchro-Tilt: Active ergonomics for those who don't stop at standing. Designed primarily for individuals who balance computing with other activities.
  - Synchro-Tilt opens the angle between legs and torso for better circulation.
  - Forward weight transfer allows the user to achieve a desired posture or fully recline.
  - Side-mounted adjustable tension adjusts the level of resistance to suit the user.
  - Seat slide function is balanced to provide comfort and support.

- Comfort that lasts and lasts and, well, lasts. Hour after hour, day after day, the ergonomic Trooper stands up to different body types, tasks that take people in and out of their seats, and offices that include everything from work boots to wing tips, and toolboxes to briefcases. But the Trooper isn’t just the trusty workhorse you’ve grown to depend on, it’s a chair to keep you wrapped in comfort for as long as you’re wrapped up in your work.
