DESIGN FIRM: VCBO Architects

SQUARE FOOTAGE: 405,000 sq. ft.

NUMBER OF EMPLOYEES: 1500+ students,
70+ teachers

DEALER: Desks Inc. of Utah

PROJECT BUDGET: \$75M

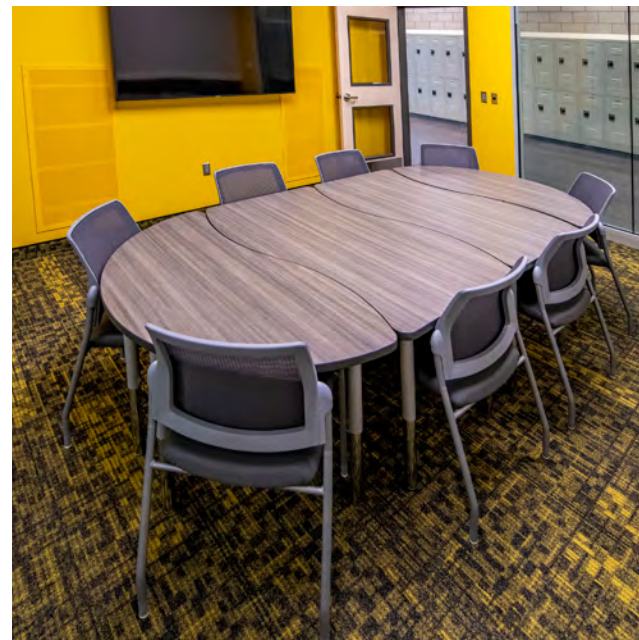

When the Davis School District made the decision to build a new high school in Farmington, UT, they were tasked with building and designing “the high school of the future.” They chose VCBO Architects to help them do just that.

So, exactly what does the high school of the future look like? According to VCBO principal architect, Jeanne Jackson, the Davis School District wanted “to create a place that’s flexible for the future, and that will help educate students to be great employees.” The collaboration with Desks Inc. of Utah and the HON Company resulted in creative “Zone Learning” concepts and elevated the educational environment.
