	For 72½"H Panels	HEC72PXN	9 Ⓢ	0.9	\$138	\$147	\$164
For 80"H Panels	HEC80PXN	9 Ⓢ	0.9	\$145	\$154	\$171	

**NOTES:**

- Specify connectors based on number and placement of panels.
- Connector posts are specified separately from connector straps — specify post to tallest panel and straps based on connection (see variable height example on straps page).
- Specify connector to fit height of tallest panel.
- Connectors are made of extruded aluminum.
- Straight Connector model HSCKTPS ships standard in bulk pack.
- Connector posts where power pole will enter need to be specified with single connector straps, model HECS1.

ⓘ In-line connector must be specified for all in-line connections.

ⓘ If adding to existing panels produced prior to 04/13/2016, please contact Customer Support for compatibility.

	Single Connector Strap	HECSI	1.9	0.2	\$15
	In-line Connector NOTES: No need to specify finish. SPECIFYING EXAMPLE: HSCKTPS.X	HSCKTPS	0.5	0.1	\$19

**NOTES:**

- Strengthened Connection Straps provide more rigidity to panel connections, especially when not tied into a station with a worksurface or storage, i.e., when Coordinate™ Height Adjustable bases are used or when using panels strictly to divide space without tying in other components.
- Connector strap type should be specified based on the tallest panel connection type. Connector straps and posts are specified separately.
- Lower height panels will connect with variable height trim.
- See examples below.
- Connector straps can be retrofitted on any existing Accelerate® stations that were produced from April 2016 to present.
- Will fit on existing connector posts — only straps would need to be specified.
- Single Straps (HECSI) are used when power poles enter at the connector post and in variable height applications where the tallest panel is a single and one or more panels is lower.
