TECHNOLOGY

Delivering Meaningful Change

BAM Technologies wanted their new space to feature flexible, user-customizable workstations to allow employees the choice to work how they prefer. A modern color palette with a blend of neutrals and pops of color announces their brand with style.

Fostering New Behavior

The new space offers fully adjustable worksurfaces for all employees, encouraging healthy posture changes and movement throughout the day. Nearby break-out collaboration areas support impromptu conversations and small group meetings, promoting idea-sharing and brainstorming.
