PROPERTY DEVELOPMENT

Delivering Meaningful Change

ADW Architects wanted to develop a space that would reinforce their brand while meeting their functional and future growth needs.

Fostering New Behavior

The new collaborative environment provides both formal and informal meeting spaces, offering employees the choice of where and how they wish to meet and work together. Workspaces and meeting areas were carefully planned to make the most of the large exterior windows, allowing everyone access to ample daylight and relaxing tree canopy views throughout the day.
