

**CORRAL**  
Gap Screen

## Gap Screen

The Gap Screen is both porous and opaque, qualities that enable it to serve opposite purposes at the same time. Gap Screen's modularity gives it the flexibility to define a space through various levels of transparency: Hanging on leather loops from a slender metal frame, geometric felt hangings make Gap visually lightweight while providing robust space division, ample storage or whiteboards.

As the most pared down member of our space division family, Gap Screen is a dynamic and dimensional partition solution that allows you to fill the gaps with functional storage and usable space, maximizing utility with a minimum of space. Add a personal touch by selecting any RAL color frame finish to compliment the wood components.

**Start with the frame.**

Building out your Gap Screen starts with selecting a frame that is 66"L. This can be free-standing or nest with other modules for a longer run.

**Add your panels.**

Gap Screen allows you to create a dimensional division of space that adds texture and material to interestingly partition one space from another. Whether Gap Screen is purely aesthetic or meant to offer some privacy, PET panels add acoustic properties and an element of interest. PET finishes are available in light, medium and dark grey.

### Add your storage.

Gap Screen is a partition with that little something extra. Stick with the simple beauty of hanging panels or fill in the gaps with storage to enhance Gap Screen's functionality.

### Mind the Gap.

Gap Screen creates a partition that is layered to add function and visual interest.

Fill Gap Screen with storage, let it be a display of shapes and materials or even a simple framed platform for your favorite philodendron.

## Set the example.

Here's an example of how Gap Screen comes together.

Shown here is common configuration combining storage, a hanging PET panel, and a fixed whiteboard.

Allow your Gap Screen to stand alone at 66" L or nest them together and allow 33" of Gap Screen to nestle into an adjacent configuration for added functionality and to divide larger environments.

\*note: PET is made from recycled water bottles! It has a strong sustainable story as it's made from 100% recycled content and can be recycled at the end of its life-cycle. Though acoustic and tackable, PET will leave a bit of memory.

PET panel shapes give you flexibility to customize your Gap Screen and break up the linear plane.

Front

Storage infills maximize partition utility.

Whiteboard panels are fixed, giving you a sturdy and streamlined solution to collaboration.

Back

Customize the frame color to incorporate branding or a fun pop.

## Finishing touches.

Once you've selected your modules, select your finishes for the frame, wood components and PET panels.

- 1 Select any standard RAL color for the frame without any up-charge or minimum. This is a great opportunity to add your unique thumbprint to your design.
- 2 Next, specify your choice of wood: white oak, ash, maple, walnut.  
  
PET felt options are light, medium and dark grey.
- 3 Remember, your Gap Screen can be as simple as a stand-alone partition or a nested run of functional storage and panels! Leave frames empty to expose beauty in utility.

## Go Configure.

Gap Screen modules can be nested together to form a longer run of dimensional space division.

Separate modules apart to create micro-neighborhoods or cozy them up to one another to define larger areas and to add texture, storage or plant showcases. You can choose the right blend to suit your space.

## Gap Screen | Greatest Hits

Browse some of our most sought after configurations or create your very own.

### **Stow-Away.**

Add a 6-Cubby storage module to fill in the gaps with functional storage. Keep books, office supplies or personal items to keep workspaces clean and clear.

PET Quarter Round

3 Cubby

PET Full Panel with Radius

**The Low-Down.**

Perfect for when you just need a little bit of storage. Keep a low-profile with a 3-Cubby module to invite room for just the essentials.

Tall Bookcase

**Up-high.**

Maximize storage capabilities with our tall bookcase module. Add a PET panel for just the right amount of privacy as you move around the space. Frames add a faceted feel to case goods making this so much more than your average book case.

PET Quarter Notch

6 Cubby

PET Full Panel

**A Notch Above.**

Our notched panels create a faceted aesthetic to your Gap Screen. Cutaway PET offers a hint of transparency to keep a space light and airy while providing privacy to the perfect degrees.

**Green Screen.**

Gap Screen also offers a plinth to display your favorite green friends. Break-up indoor spaces with a slice of the outdoors by mixing sustainable PET with truly natural ones. Nothing quite like a chlorophyll infill.
