## Height-Adjustable Integration

### 1 Choose a Shape

**Top Options**

Choose your ideal fit from 3 different worksurface options.

**Single Worksurface**

For those who have limited space and only need a single seamless worksurface.

**Corner Cove**

For those who require more worksurface space and prefer a rounded corner.

**Worksurface with Return**

For those who need ample multitasking space and work best with an L-configuration.

### 2 Match to an Adjustable Base

**Base Options**

Designed without feet, which allows the base to be directly installed into the shroud or low credenza.

**HNLAB2SIL**

2-leg - 2 stage

**HNLAB3SIL**

3-leg - 2 stage

### 3 Integrate

**Credenza or Shroud**

Conceal your height-adjustable, foot-free base inside a low credenza or shroud for a beautifully streamlined aesthetic that offers a flexible full range of motion.

**Low Credenza**

Hide your height-adjustable base and wire management cords with a seamless back panel.

**Shroud**

Cover your height-adjustable base completely for a contemporary, cohesive look - optional grommets available for convenient cord routing.

### 4 You're in Control

**HAT Controls**

Sit tight or stand tall with a controller that best suits you and the way you work.

**Basic Up/Down**

Easily move your worksurface up and down with a fuss-free up/down button control.

**Memory**

Get the same up-down control with an added programming feature to help you adjust throughout the day.

**Paddle**

Keep it simple with a no-nonsense up/down control paddle.

**Foot Pedal**

Multitask with ease with a hands-free up/down foot pedal.
