

Tyler

Tyler by HBF Design Studio

The Tyler chair designed by HBF Design Studio is a new expression in executive seating—and one that fuses a timeless form with forward-thinking elements. A study in body inclusivity, Tyler is developed with surprising considerations and exacting details: its generous seat and wide back envelops the user, allowing for thoughtful accommodation of many types of physiques with a supportive embrace. In a constantly evolving world, Tyler is essential for any office environment that values comfort and flexibility.

Tyler Mid Back and High Back Group

Tyler High Back with Polished Aluminum Arm

Tyler for All

Tyler is a versatile, universally adaptable seating solution that provides optimal ergonomic support for various body types. Designed with an emphasis on gracious curves, a wider seat and backrest, along with a taller back than other executive seating solutions on the market, Tyler is as conscientious as it is comfortable.

- MID BACK FROM 39" - 43¼"
- HIGH BACK FROM 43½" - 47¾"
- SEAT WIDTH IS 20¼"

The seat height is adjustable from 16¾" - 21" for mid back and high back options.

Tyler High Back with Polished Aluminum Arm

Construction Overview

Tyler is designed to be the ideal executive seating option, with a streamlined, sculpted profile and generous dimensions for optimal support and comfort.

Back - The injection-molded foam back creates a bespoke seating experience for most body types. Tyler offers one of the tallest high back office chairs on the market, with an integrated headrest for optimal head support.

Base - Visually lightweight yet ultra sturdy, Tyler's base offers a strong foundation to support the rest of the chair and its upholstery. Tyler is available in two caster options: medium double wheel or soft double wheel.

Seat - Tyler's wider seat dimensions at approximately 20¼" provides greater comfort and inclusivity.

Arms - The Tyler chair with arms offers a more tailored look, ideal for arm resting. The Tyler armless chair is well-suited for the modern, minimalist office. With a small footprint and clean lines, it maximizes floor space and fits into any office design scheme.

Synchro Tilt Seating Mechanism - Tyler's synchro tilt system gives users a variable angle of recline for improved comfort and circulation to the legs during normal desk use. The back reclines at a 2:1 ratio to seat angle, allowing users to relax while keeping the seat cushion relatively level with floor height.

SUMMARY OF CONTROLS

Tilt Tension Knob - The adjustable Tilt Tension Knob allows each user to set the chair at just the right amount of rocking motion for all heights and sizes.

Seat Height Lever Control - Regulates height of chair relative to floor. Optimizes support for the buttocks, thighs, and lower back when feet are flat on the floor and the lower legs are at a 90-degree angle relative to the upper legs.

Tilt Back Lock - Allows the seat tilt to be locked in an upright position for "engaged" work or reclined for a more "relaxed" work experience.

Finishes

ARM & BASE OPTIONS

Tyler's aluminum arm and base options are polished to a high shine, giving it a sleek appearance. The Solar Black powder-coated option offers a 5% matte sheen for sophistication and performance.

UPHOLSTERY

The Tyler chair is a flexible addition to any office and boardroom, with its ability to fit into many different design schemes. It can be upholstered in a variety of HBF Textiles, which include solid colors, woven patterns, and full-grain leathers. The seat and back upholstery can be specified as matching textile choices or contrasting for mixed materiality.

CASTERS

The standard double wheel medium casters provide maximum load capacity and work well on carpet, while the soft casters are ideal in hard flooring surface environments.

Product Warranty

With a firm belief in quality and reliability, HBF offers a 12-year warranty on all products and a 5-year warranty on operational parts—one of the most generous warranties in the industry today.

- 12 YEARS ON ALL PRODUCTS
- 5 YEARS ON OPERATIONAL PARTS
