**ANSI/BIFMA e3-2014e  
LEVEL Furniture  
Sustainability Standard  
Certification**

A majority of HBF’s products have met the necessary qualifications to achieve LEVEL® certification. LEVEL® is the multi-attribute sustainability certification based on the ANSI/BIFMA e3 Furniture Sustainability Standard. The standard and certification were created to deliver the most open and transparent means of evaluating and communicating the environmental and social impacts of furniture products in the built environment. Taking into account a company’s social actions, energy usage, material selection and human and ecosystem health impacts, LEVEL® addresses how a product is sustainable from multiple perspectives. The organization, facilities, and products are audited on an annual basis to ensure ongoing compliance and improvement.

With LEVEL®, customers can make informed choices about sustainable commercial office furniture. The LEVEL® mark identifies that a product has been vetted by an independent third party certifier and its numeric marking of 1, 2, or 3 indicates the threshold of certification the product has achieved. A majority of HBF’s seating, occasional tables, and conference lines are LEVEL® certified. Please download the certificates from our product pages for the complete details. For more information about the ANSI/BIFMA LEVEL® standard, visit [www.levelcertified.org](http://www.levelcertified.org).

**ANSI/BIFMA Performance  
Standards**

Our seating products meet or exceed ANSI/BIFMA weight performance standards of 275 lbs. (124.7 kg.) unless otherwise noted.

**Indoor Advantage™  
Gold Certified**

All HBF seating products are Indoor Advantage™ Gold certified.

SCS Global Services, a reputable third-party certification and assessment body of environmental, sustainability and safety claims since 1984, has developed internationally recognized standards and certification programs to assist businesses with improving their environmental efforts, social accountability and product performance.

The advantages of holding Indoor Air Quality certification are substantial: in addition to improving indoor working environments and meeting qualifications for the LEED-CI EQ 4.5 credit for office furniture as well as the BIFMA Standard for Low-Emitting Office Furniture Systems & Seating M-7.1, there is the added assurance of knowing that the company’s entire breadth of products is held to such rigorous standards.

Wood owes its inherent beauty to variations in color, grain, and texture; therefore, these variations are not considered defects. Due to the natural color and grain variances of wood substance the final finish color, texture and grain may vary from one furniture piece to another even though they are finished at the same time. Exposure to light and the aging process will cause changes in surface color of natural wood products. Light finishes on wood products do not mask the natural characteristics of wood. HBF does not guarantee the exact matching of grain, pattern and color.

An upcharge of **5% Net** COM per seating unit, with a minimum upcharge of **\$500 Net** per order, will apply for any custom wood finish.
