

A Year in Review

2022's Notable Textiles & Finishes

It was easier than ever to create a distinctive, durable space in 2022. Allsteel began the year with the offering of Supreen—our newest hardworking upholstery enhancement for both Oxford and Livi fabrics. This addition merges innovative woven and coated technology to create a unique, liquid-barrier textile that surpasses the performance of similar products. Supreen combines a composite material that retains the desirable aesthetic and softness of a woven fabric with the industrious performance of a coated textile, making it an ideal choice for busy—yet elegant—environments.

- Bleach cleanable
- Total liquid barrier
- Soft hand
- Clean of harmful chemicals

With thoughtful consideration of growing market needs and trends, Allsteel is also pleased to offer a variety of paint, laminate, color selections, and partnership fabrics as you continue to evolve your workspace in 2023.
