# HBF and HBF Textiles 2023

The new interpretation of HBF's flagship showroom—developed through a collaboration with Alda Ly Architecture (ALA) and T Clifton Design—layers vibrant, amenities-driven product applications that deliver a space that is both inspiring and inclusive. The new HBF showroom features an array of HBF's signature furniture and textiles in an open plan setting that allows for more social interaction and experiential delight: a business club aesthetic that combines the planning tactics of Work Geometry with the design vocabulary of third spaces. The result is a flexible space where guests and colleagues can collaborate productively while also enjoying healthful ergonomics and psychological well-being.

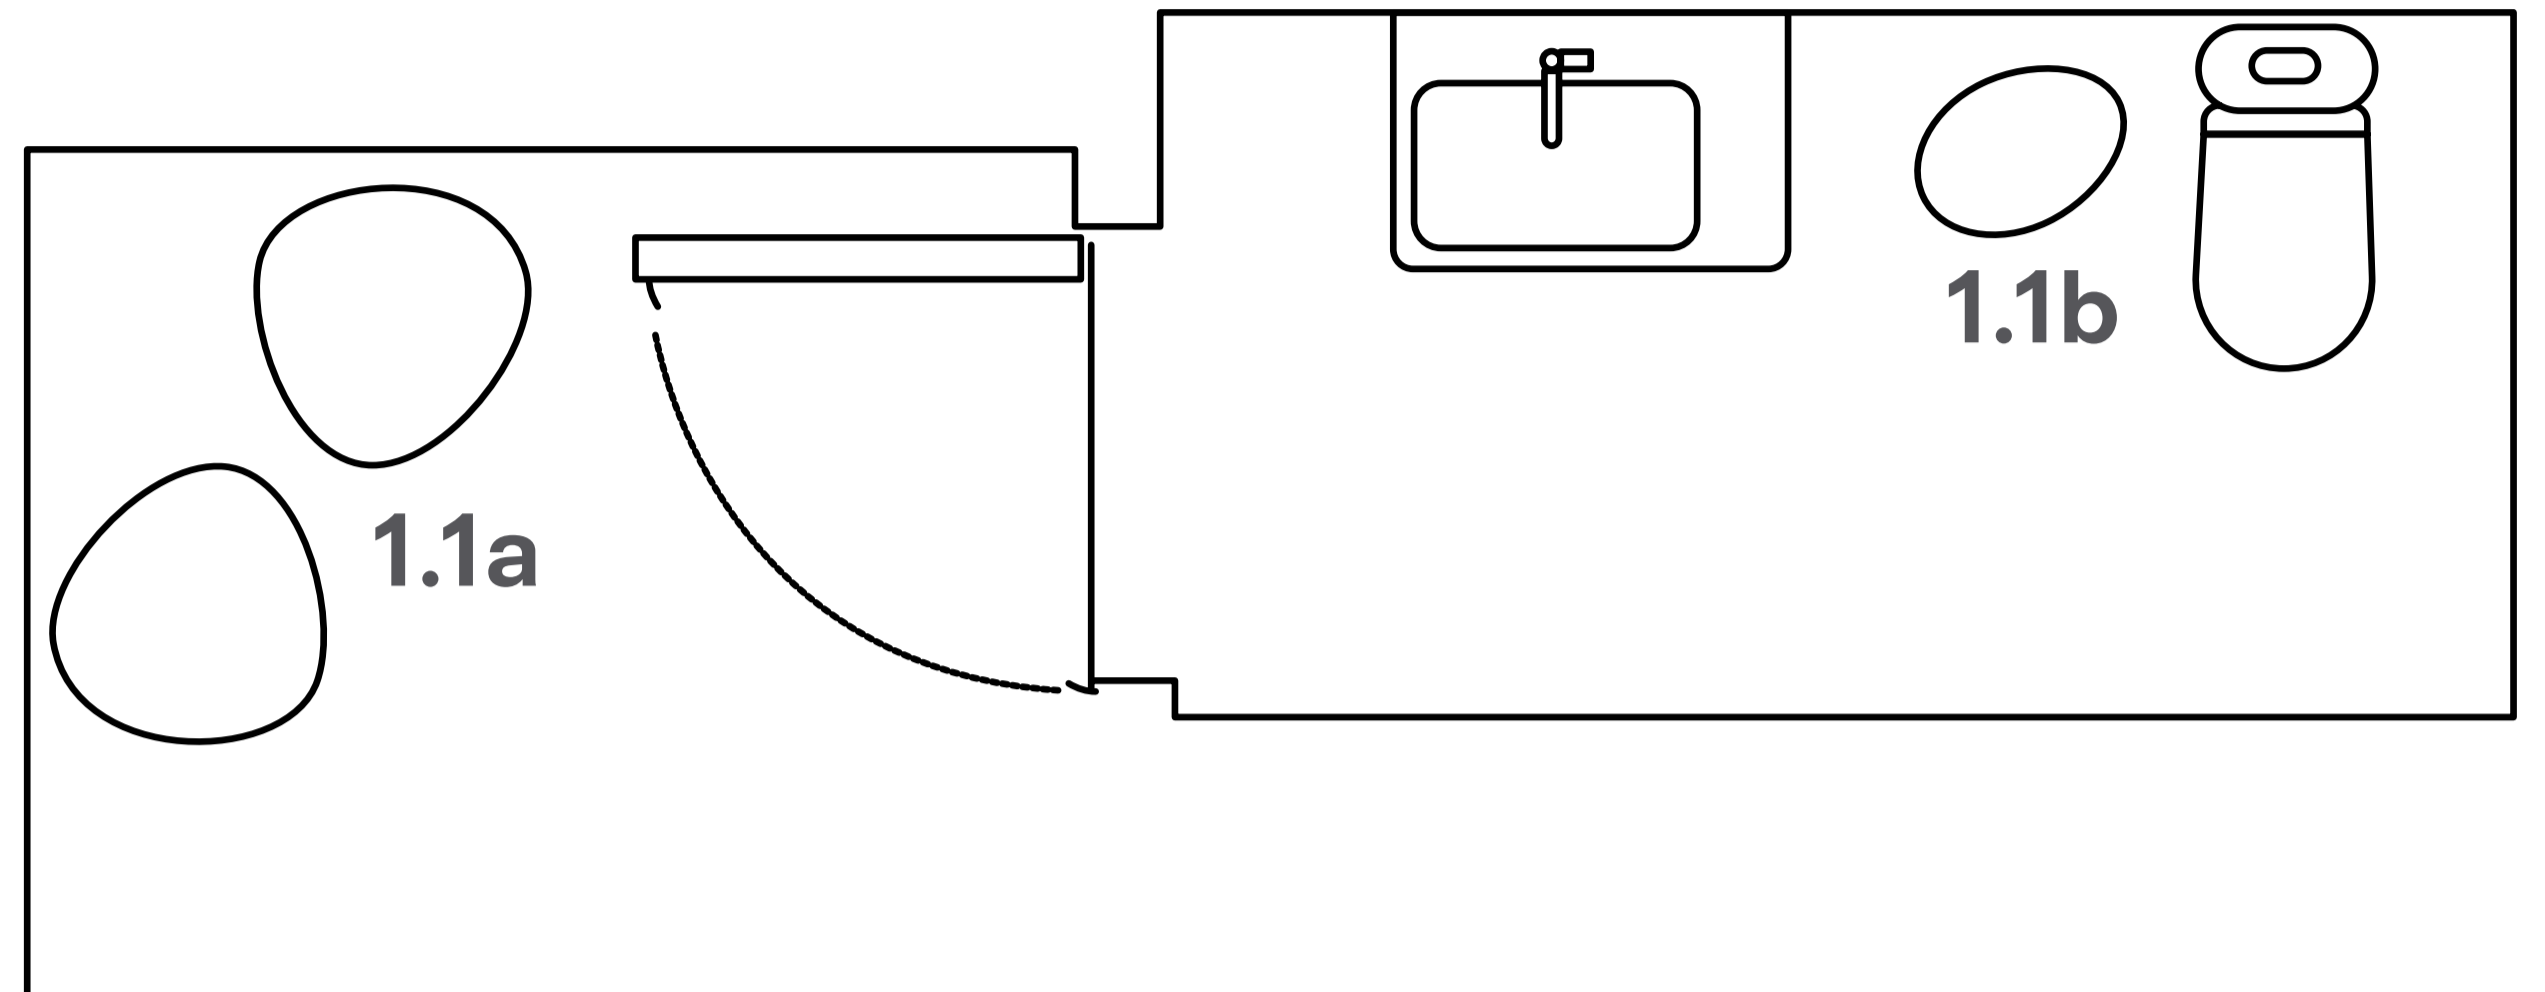

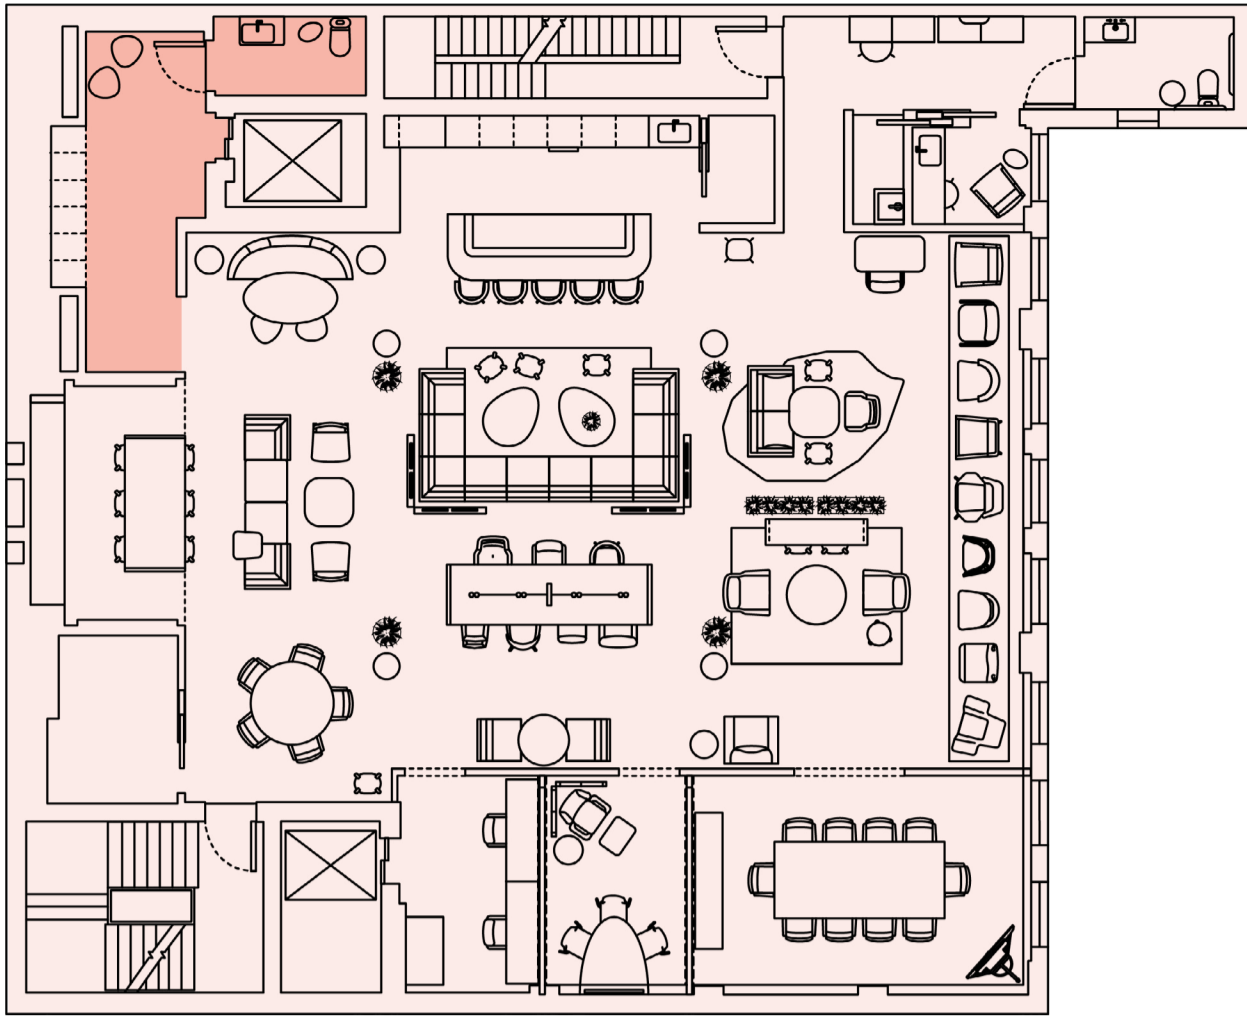

Welcome to HBF's new home, where purposeful interactions are engineered through inspiring design.
