

HBF Textiles has taken proactive steps to remove PFAS—a harmful “forever chemical”—from the standard product range. Starting in 2024, all new and future products will be manufactured without PFAS. For previously released products containing PFAS, we have established a detailed transition plan per SKU. As stock of each SKU diminishes, replacements are sourced without PFAS.

Our website now offers a filter option to easily identify the increasing number of "PFAS-Free" products, reflecting our commitment to the environment and our ongoing effort to make our entire product line free of PFAS. For inquiries or requests for specific patterns with PFAS-Free inventory, please contact hbftextilesservice@hbf.com.

Notice Regarding PFAS used in some Performance Coatings for Oil Resistance:

Q: What is PFAS?

A: The per-and polyfluoroalkyl substances (PFAS) are a group of chemicals used to make fluoropolymer coatings and products that resist heat, oil, stains, grease, and water. Fluoropolymer coatings can be in a variety of products. Also sometimes referred to as "forever-chemicals" they do not break down.

Q: Why are PFAS important to know about?

A: Multiple state and federal entities, including the EPA, are moving to prohibit the sale and use of PFAS products. (Some states like California and Maine have already signed laws with states like Colorado giving deadlines of 2025).

PFAS exist in some performance coatings applied to textiles wherever oil resistance is desired, however there are new developments for PFAS-Free stain resistant and water-resistant performance coatings. Oil resistance is not a characteristic of PFAS-Free performance coatings.

HBF Textiles is actively working to eliminate PFAS from our supply chain. All New Launches are PFAS-Free.

Please see below for Pattern information regarding which textiles included a PFAS Performance Coating, and which do not include those coatings.
