# Dove by Kevin Stark

Designed by Kevin Stark for HBF, the Dove seating series seamlessly combines comfort and support at the conference table, effortlessly complementing the executive office environment. Drawing inspiration from the feminine form, this adaptable chair integrates into a variety of design schemes, making it a versatile addition to any office or boardroom setting. The Dove seating series is characterized by a flowing profile and meticulous attention to detail, embodying an exquisite design aesthetic that captivates from every perspective.

### HBF Design Legacy

Over the course of 30 years with HBF, Kevin Stark has overseen all aspects of design development and branding strategy as Vice President of Design. He also conceived a number of Best of NeoCon award-winning furniture pieces, including his Eiffel Occasional Table Series, Canterbury Series, and Cadre Series. Stark's work forms an important part of HBF's design legacy, which has been characterized by classic modernism throughout its history

Dove Mid Back and High Back Group

## Dove Dimensions

Dove effortlessly blends graceful curves with a subtly tapered, wedge-shaped back, enhancing its design appeal from any perspective. The polished aluminum base and arms add a touch of sleekness to the construction details. For added flexibility, Dove offers optional adjustable arms in black urethane. The silhouette is delicately flowing, exuding a subtle feminine charm through its curves.

- MID BACK FROM 37" - 42"
- HIGH BACK FROM 41" - 46"
- SEAT WIDTH IS 19"

The seat height is adjustable from 17.75 - 22.75 for mid back and high back options.

# Construction Overview

Engineered to excel as the perfect executive seating solution, Dove showcases a refined, sculpted profile and ultimate seating that prioritize optimal support and comfort.

**Back** - Mid and high back chairs feature dual density, energy-absorbing foam that provides the ultimate in seating comfort and lumbar support.

**Base** - Visually lightweight yet ultra sturdy, Dove's base offers a strong foundation to support the rest of the chair and its upholstery. Dove is available in two caster options: medium double wheel or soft double wheel. This innovative series features a polished aluminum base.

**Seat** - Dove's seat dimensions at approximately 19" provides comfort and support. Unique and precise stitching detail and 'dimple' effect on the seat and lower back add to Dove's signature look and feel.

**Arms** - The Dove series features streamlined arm caps inspired by the shape and size of the Apple mouse. Arm cap options include a polished arm with urethane or upholstered arm cap. An adjustable urethane arm cap version is also available.

**Synchro Tilt Seating Mechanism** - Dove's synchro tilt system is designed to cater to individual user preferences, offering a variable recline angle for enhanced comfort and improved leg circulation during regular desk use. The back reclines at a 2:1 ratio to the seat angle, allowing users to relax while maintaining the seat cushion relatively level with the floor height.

## SUMMARY OF CONTROLS

**Tilt Tension Knob** - The adjustable Tilt Tension Knob allows each user to set the chair at just the right amount of rocking motion for all heights and sizes.

**Seat Height Lever Control** - Regulates height of chair relative to floor. Optimizes support for the buttocks, thighs, and lower back when feet are flat on the floor and the lower legs are at a 90-degree angle relative to the upper legs.

**Tilt Back Lock** - Allows the seat tilt to be locked in an upright position for "engaged" work or reclined for a more "relaxed" work experience.

# Finishes

## ARM & BASE OPTIONS

Standard jewel-like polished aluminum with a black urethane arm cap or adjustable urethane arm cap ideal for higher-use areas. An optional HBF Textiles upholstered arm cap for Dove chairs features meticulous tailoring and attention to detail.

## UPHOLSTERY

Dove offers versatile upholstery options with a range of HBF Textiles, encompassing solid colors, woven patterns, and full-grain leathers. Notably, blind stitch details adorn the back when opting for upholstery or coated fabrics. For a personalized touch, a single contrasting welt and arm cap adds an additional layer of customization.

## WELT AND UPHOLSTERED ARM CAP

When specifying custom contrasting welt and arm cap, only the same coated fabric or leather can be used.

The contrasting welt and arm cap minimum will require 3 yards of coated fabric or 45 sq ft. / 1 full hide of leather per chair. This minimum amount yields the equivalent of 20 chairs. To reduce waste, it is our recommendation that a minimum of 10 chairs with contrasting welt and arm cap is ordered.

Please submit a Dual Applications Form when selecting a combination of textiles or leathers.

## CASTERS

The standard double wheel medium casters provide maximum load capacity and work well on carpet, while the soft casters are ideal in hard flooring surface environments.
