Admix™

# An Adaptive Solution for Collaboration

Designed for collaboration, Admix tables seamlessly adapt to evolving workplace needs. They offer an array of designs and configuration options to accommodate a variety of workspaces. Admix affords designers the capability to define angles conducive to their spatial layouts, harmonizing with their technological requirements to create tailored office environments.

## A Comprehensive Series

Admix offers a wide range of table options and tabletop shapes for any space, from project tables that fit into training spaces, console tables that fit into collaborative areas, and more.

## Endless Optionality

Unlike traditional tables with unused space underneath and limited aesthetics, Admix tables feature open designs that enhance visual appeal, customizable paint, and laminate options for any design aesthetic. With footrests for support, users can comfortably work together in various postures.

Admix offers four height options to create a tiered height space for all your workplace needs.

IN-PERSON VIEW

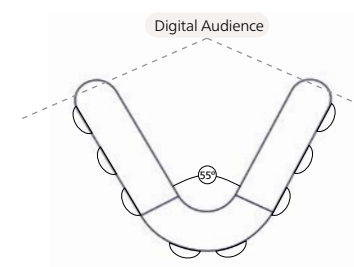

REMOTE ATTENDEE VIEW

# The Equitable Hybrid Experience

Traditionally, meetings with in-person and remote attendees take place at conference tables with hybrid capabilities affixed and the camera facing straight, missing participants sitting in proximity. Admix caters to any room layout by offering connector pieces in multiple sizes that give users the choice of a wide or narrow V-Media table, providing an easy sight-of-line to all participants. This innovative solution removes the idea of hierarchy, promotes inclusion and equity in the workplace, and ensures every member has a seat at the table.

# Tailor Your Space

Admix tables help meetings flow smoothly by providing adjustable bases, integrated wire management, and home-base accessories. With bag hooks, desk mats, and accessory trays, attendees have a place to put their belongings and identify their space during extended meetings.

## Effortless Mobility

Admix provides telescoping legs and a wheelbarrow feature, adding more seats to the table while allowing seamless transition between different applications. The legs go in or out to accommodate the user's needs, and the wheelbarrow feature offers casters and glides so tables can be effortlessly rearranged.
