# TAILORED SOLUTIONS ORDERING INFORMATION

## PRODUCT MODIFICATIONS

Modifications include structural and dimensional modifications to existing product and Dual Fabric Applications, when standard model is not available.

The HON Company, at its own discretion, may modify standard products to meet specific needs. Product specials can be requested on HON brand product only.

List prices contained in published list pricers are for standard catalog items only. Changes or alterations to catalog items other than those listed as catalog options are subject to additional charges. Pricing will only be furnished upon approval of the special request.

Requests to have the product produced in more than one fabric (e.g., fabric on the seat is different than the fabric on the back), are considered a Dual Fabric Applications request and follow the Product Modification request process within the Community.

## SPECIAL LAMINATES

Special laminates include requests for laminates not available as part of The HON Company's standard offering. Requests for special laminates are subject to manufacturing approval and minimum order quantities. The HON Company approved special laminates will be subject to a designated upcharge per unit.

Requests for special laminates should be submitted through the Community. Pricing will only be furnished upon approval of the special request.

## SPECIAL PAINTS

- The HON Company's paint matching equipment can match almost any color, excluding some metallic and whites.
- Special paint requests must be submitted on the Community.
- In order to request a paint sample, the customer must have a minimum order of 10 like product units. Any requests with less than that amount will not be processed.
  - For each new paint request, there will be a \$250 net charge. A sample of the exact color desired is required for matching and approval. The HON Company will match the color and provide a production sample for the customer to review and approve.

- Once written approval is received by The HON Company, the request will be approved.
- Each unique color or finish combination incurs a designated upcharge per color per order (all standard discounts/competitive project pricing applies).

**Special note:** Some special colors could fall outside of this program due to production costs or not meeting The HON Company's quality standards. The HON Company may apply additional charges to some colors which are costly to apply, and refuse some orders on colors that cannot meet The HON Company's high-quality standards. The HON Company will notify the customer upon completion of The HON Company's evaluation if a change in price is required or rejection of the order.

## DISCONTINUED PRODUCT

Requests for discontinued product require engineering evaluation, safety review, and testing to current standards prior to approval. Many discontinued products are not available for order. Requests for discontinued products should be submitted through the Community.

## LEAD TIMES FOR SPECIALS PRODUCT

Lead times on orders containing specials are subject to production capacity and material availability. When possible, the customer should order special products separately to avoid extended lead times for standard products. Extended lead times will be noted on Compass.

## CHANGES TO SPECIALS PRODUCT

A special model will be provided for each approved special item to process orders. Once an order is placed, no changes or cancellations can be made to the order without approval from Tailored Solutions.

## CONTACT TAILORED SOLUTIONS

Phone: 800.833.3964 and listen for Tailored Solutions offering on the menu.

Email: HONSpecials@honcompany.com

# CUSTOMER'S OWN MATERIAL ORDERING INFORMATION

## CUSTOMER'S OWN MATERIAL (COM) PROGRAM

Customer's Own Material (COM) is a request to use fabrics not available as part of HON's standard fabric offering. Manufacture to Supply (MTS) and Dealer to Supply (DTS) are the two ordering methods. The HON Company has partnered with fabric manufacturers to provide competitive pricing and selection through the MTS program. MTS will be the standard offering unless The HON Company is unable to procure the fabric. If there is a DTS request submitted, The HON Company will advise at the time of the request if DTS is available.

## CUSTOMER WARRANTY EXCLUSION

The HON Company shall have no responsibility for the condition, quality, value, performance, physical properties, or any other aspects of the COM.

The HON Company shall have no liability for any damages, injuries, or losses to the customer or to any third party that shall be caused by any COM or product modification, and the customer shall hold The HON Company harmless for all liability.

The HON Company assumes no responsibility for the overall appearance, flammability, normal durability, colorfastness, or any other quality of the COM or product modification after its application on a HON product beyond normal quality standards. The HON Company reserves the right to reject a COM fabric if the quality of the COM is not satisfactory for the product. Should this occur, the customer will be notified with an explanation of the issue.

The HON Company is not responsible for fabric that has become obsolete at the COM supplier, that is of poor quality, or that is delivered late to The HON Company from the COM supplier. The HON Company is not responsible for excess yardage created by DTS orders or yardage not attached to an order and reserves the right to dispose of the excess fabric.

As a standard HON does not pattern match any standard, partnership or COM fabric, therefore pattern match is not applicable under warranty. If pattern match is needed please submit a Tailored Solutions request or contact HON Customer Support/Tailored Solutions once your COM has been approved.

## COM TESTING

As a result of recent legal requirements, The HON Company will need to obtain specific information from the fabric supplier about treatments and chemicals used in the fabric. To the extent the supplier is unwilling or unable to provide the necessary information, which could extend the testing lead time of the request.

To check if a COM has been tested previously, utilize the COM Search Tool on the Website > Design Resources > Textiles & Finishes section using the following information:

- COM Supplier's Name
- Fabric Pattern Name
- Color Name
- If the COM fabric has been tested and previously approved, the COM will not need to be re-tested unless testing standards have changed, fabric is to be used on a different series, or direction of the fabric has changed from what was previously approved. Please note that Panel product must be approved for each model and color.
- If the pattern has previously been tested and approved, but not in the specific requested color, the customer will need to request an order code for that color only. No further testing will be necessary since the pattern has already been approved.

If the fabric has not previously been tested, the customer must enter the COM request on the Website > Textiles & Finishes > COM Search Tool.

Complete the Supplier Name, Pattern, and Color drop-down fields. For quicker results in these fields, type the first letter of the (supplier, pattern, color) name and, when done, click Add and then Submit. (Multiple series can be added to the same request if they are the same supplier, pattern, and color.)

An email will be sent to the requestor stating the COM Request was successfully submitted. Up to four emails could be received: submitted, in testing, testing materials requested, and final approval/denial with price grade and fabric code. The testing process takes approximately 48 hours.

COM yardage in the pricer is shown as pattern cut only.

## COM TESTING — FLAMMABILITY TESTING INFORMATION

The customer is responsible for ensuring that the COM fabric is certified to meet all flame-retardant requirements. All COM seating fabric must, at minimum, meet CAL 117 requirements. If the customer requires the chair be tested to meet the fire safety standards of CAL 133, additional testing and information is required.

## MTS COM

As previously mentioned, MTS is the primary COM method.

If the COM fabric has not been tested, a COM request must be submitted on the Website.

For MTS orders, The HON Company will procure fabric needed for production. Should The HON Company not be able to obtain fabric yardage, the customer will be contacted.

# CUSTOMER'S OWN MATERIAL ORDERING INFORMATION

When testing has been completed, the customer will be notified by the COM team of the test results. If the COM is approved, The HON Company will provide a COM tracking order code for MTS. That tracking code is required on the order in place of the standard fabric code.

If approved, MTS product will be assigned an appropriate fabric grade for pricing. The pricing can be found on the Website > Design Resources > Textiles & Finishes. (All standard discounts/competitive project pricing applies).

Written COM price quotes are valid for 90 days after the issue date.

## DTS COM

DTS COM is only available if the COM fabric cannot be procured by The HON Company. If the fabric can be procured by The HON Company, the customer will be contacted to switch to MTS or cancel the request.

If your fabric is not listed as approved, and it is not a Partnership fabric you may request a "Dealer to Supply" code. Select the "Request COM Test" link on the COM Search website. Complete the Supplier Name, Pattern, and Color drop-down fields. For quicker results in these fields, type the first letter of the (supplier, pattern, color) name and, when done, click Add and then Submit. (Multiple series can be added to the same request if they are the same supplier, pattern, and color.)

An email will be sent to the requestor stating the COM Request was successfully submitted. Up to four emails could be received: submitted, in testing, testing materials requested, and final approval/denial with price grade and fabric code. It's rare actual test yardage is required. Testing is mainly done by reviewing the attributes of the fabric. The testing process takes approximately 48 hours.

If the COM has not been tested, a COM request must be submitted on the Website > Design Resources > Textiles & Finishes.

When testing has been completed, the customer will be notified by the COM team of the test results. If the COM is approved, The HON Company will provide a COM tracking order code. That tracking code is required on the order in the place of the standard fabric code.

DTS product is priced at the following grades (all standard discounts/competitive project pricing applies):

- Chairs are a Grade 4
- Panel product is a Grade D

Written COM price quotes are valid for 90 days after the issue date.

## COM LEAD TIME

Ship dates will be based on fabric receipt and The HON Company's standard lead time. All fabric must be properly tagged and shipped to the appropriate producing location (provided in the approval email).

- Specific to DTS orders, COM orders will not receive a ship (acknowledged) date until The HON Company has the fabric in its possession for production.
- Specific to DTS orders, the customer may send the required yardage for the order to the address listed on the approval email to arrive no sooner than 4 weeks in advance of the acknowledgment date.

HON will make every effort to locate mis-directed COM shipments on behalf of the customer. However, The HON Company will not be responsible for any COM received without a tracking number or incorrectly shipped by the fabric vendor to an incorrect producing facility.

## COM ORDERING INFORMATION

The following information must appear on or accompany the product purchase order:

- Approval tracking number and the customer's purchase order number
- COM supplier, pattern, and color name/number

The packing list for the COM must include the following information when The HON Company receives the shipment for production:

- Dealer or Wholesaler Name
- Purchase order number submitted to The HON Company
- Fabric name
- Yardage shipped
- Approval ordering code

Specific to DTS orders; the customer should send only the amount needed for the order. Excess yardage or yardage not tied to an order will be disposed of at The HON Company.

## CHANGES TO COM PRODUCT

Once a COM product is ordered, no changes or cancellations can be made to the COM product without approval from the HON COM team.

## HON BRANDED, PARTNERSHIP AND COM PATTERN MATCH

- Pattern matching provides alignment of patterns or stripes across individual chair surfaces. Additional yardage may be required depending on pattern repeat. If Pattern Match is needed, please contact HON Customer Support/Tailored Solutions.
- Chair to Chair Pattern Match provides identical pattern alignment from unit to unit and is available with an upcharge. Chair to Chair Pattern Match is reviewed on a case by case basis as several factors are reviewed to determine additional yardage required, including repeat and pattern direction. If Chair to Chair Pattern Match is needed, please contact HON Customer Support/Tailored Solutions.

The HON Company has established paint grades to allow customers flexibility and ease in doing business with HON. HON has three paint grades P1, P2, and P3.

## P1 PAINT COLORS

HON has established P1 paints which are available on a majority of core products.

## P2 PAINT COLORS

Please see individual pricer pages for eligible series and upcharges for P2 paints. P2 paints are listed in the pricer pages under the column P2. Upcharges vary by product (all standard discounts/competitive project pricing applies). No minimum quantity required.

## P3 PAINT COLORS

Please see individual pricer pages for eligible series and upcharges for P3 paints. P3 paints are listed in the pricer pages under the column P3. Upcharges vary by product (all standard discounts/competitive project pricing applies). No minimum quantity required.

## SPECIAL PAINT COLORS (P4-P6)

With The HON Company's state of the art color matching equipment just about any color can be matched, excluding some metallic and whites. A sample of the exact color desired is required for matching and approval.

- For each newly requested paint, a net fee of \$250 will be charged to cover costs associated with the matching process.
- For existing, previously matched paints, there is no matching fee, however there is a \$100 net fee for sample panels required for the approval process. Refer to MyProjects on the HON Portal for a list of approved special paints.

For all special paint requests, HON will send a production sample for the customer to review and approve. Once the signed paint sample is received at HON the order can be entered. Upcharges vary by product (all standard discounts/competitive project pricing applies). A quantity of 10 like-model minimum order is required for special paints. For complete program details, access Tailored Solutions on the Website at [hon.com](http://hon.com).

Some special colors could fall outside of this program due to production costs or not meeting HON quality standards. The HON Company may apply additional charges to some colors which are costly to apply, and deny some orders on colors that cannot meet our high-quality standards. We will notify the customer upon completion of our evaluation if a change in price is required or if the request is denied.

# HON OPEN LINE LAMINATE PROGRAM

The Open Line Laminate (OLL) program makes it even easier for a customer to tailor their HON product for a custom look. Select HON furniture products accommodate hundreds of graded-in high-pressure laminates (HPL) from the leading laminate manufacturers' open lines.

Laminates that are currently available in the program can be viewed in specification tools.

Requests to add laminates to the standard specials program can be submitted through the CET Specials Integration tool as well as Community.

Matching edge options are not available offered for laminates in the OLL program. When selecting a laminate please select an edge option from the HON standard offering. If a matching edge is required a modification request can be submitted through the CET Specials Integration tool as well as Community.

The OLL program is available with the following HON products and series:

- Abound® Hard-Surface Tiles
- Birk™ Tables
- Build™ Tables
- Coordinate™ Worksurfaces
- Gallery Panels
- Huddle Tables
- Preside® Tops
- Sculpt™/Occasional Tables
- SmartLink® Value Teacher Desk
- Systems Worksurfaces
- Tangram™
- Universal Screens

Due to manufacturing techniques, materials, quality issues of varying laminates, and minimum order quantities, some product exclusions will apply and some requests may be declined.

Extended lead times may apply on orders containing special laminates.

Contact the Tailored Products Group for questions or additional information regarding pre-approved laminates and pricing.

# ENVIRONMENTAL STATEMENT

We continually reevaluate our purpose and processes, from fostering transparency and circularity in our supply chain to empowering our members to do and be better. We do it so the environments you create will be safer, more socially responsible, and more sustainable.

We've pursued product certifications to help communicate our commitment to developing sustainable products.

## Clearing the air.

In 2006, The HON Company became one of the first office furniture manufacturer to have products certified under the Indoor Advantage™ program. Virtually all manufactured products emit chemical compounds into the air. Indoor Advantage™ certification helps assure customers that certified products will help improve the air quality within their offices and workspaces.

Developed by SCS Global Services, Indoor Advantage™ evaluates products against indoor air quality standards, like ANSI/BIFMA Furniture Emissions Standard, M7.1/X7.1 and CDPH Standard Method v1.1. The ANSI/BIFMA X7.1 standard allows manufacturers to test individual components, as well as complete products for emissions from volatile organic compounds (VOCs). This allows us to identify problematic materials and phase them out of our products.

Indoor Advantage™ certified products meet the LEED and WELL criteria for low-emitting materials.

Indoor Advantage™ offers two levels of certification, including Indoor Advantage™ and Indoor Advantage™ Gold.

## On the LEVEL®.

LEVEL®, the certification program for the BIFMA e3 Sustainability Standard, was developed in response to increasing demand for proof that manufacturers were living up to their environmental claims. LEVEL® is a multi-attribute sustainability certification label for products that have met criteria in four categories of impact: Materials, Energy and Atmosphere, Human and Ecosystem Health, and Social Responsibility.

HON's products are certified to LEVEL 2 and LEVEL 3, the highest achievement. BIFMA LEVEL 2 and LEVEL 3 certified products can contribute to LEED and WELL projects.

## Evaluating Our Impacts.

HON has begun studying the impacts our products have on the environment through lifecycle assessments and creating Environmental Product Declarations (EPDs). EPDs provide an understandable report of a product's environmental impact throughout its life cycle; including raw material extraction and processing, product assembly, distribution and use, and end-of-life.

Products that meet these specifications are identified throughout this publication with the following icons:

Certified SCS Indoor Advantage™

LEVEL® certified to the BIFMA e3 Sustainability Standard

    - Choosing the storage solution to go under desks, credenzas, and returns.

## WORKSURFACES

- Available in a variety of shapes and sizes.
- Scratch-, stain-, and spill-resistant laminate over durable 1½" solid core high performance particleboard; resists warping.
- An external support channel, for attachment under worksurfaces, is required for all unsupported spans — a distance in which there is not a vertical support (point of contact) between the underside of the worksurface and the floor — greater than 54"W.
- For tri-oval and beaded edge options on tops with horizontal grain, there is a shaped profile on the user and approach sides, and a flat edge on the ends.
- For tri-oval and beaded edge options on tops with vertical grain, there is a shaped profile on the user side and a flat edge on the approach side and the ends.
- Grommets are an option and require specification. If grommets are selected, grommets come in a pre-determined location.

- Must be specified with support components; for pedestal, end panel, column, and leg options, see “Components — Supports” listings.

## SUPPORTS

- For use with rectangle, bow, bullet, and extended corner worksurfaces.
- Available in 28½" and 41"H.
- Adjustable hex glides allow floor-standing units to be easily leveled, without lifting, to compensate for uneven floors; glides have 1¼" adjustable range on most components; 2" on O-legs.
- Bottom of laminate end panels are edgebanded for added strength and to seal out moisture.

## FOR 29½"H WORKSURFACES

- Specify from a broad assortment of solutions, including —
  - Modular Pedestals
  - Laminate end panels (must be used in conjunction with a laminate modesty panel)
  - Laminate L-shaped end panels
  - Laminate T-shaped end panels

  - 4½" diameter metal column
  - 2" square metal post leg

## FOR 42"H WORKSURFACES

- 42", fixed standing-height workstations give users the option of changing postures from sitting to standing throughout the day to help achieve their wellness goals.
- Specify supports from —
  - Modular Pedestals
  - Laminate end panels (must be used in conjunction with a laminate modesty panel)
  - Laminate L-shaped end panels
  - Metal O-legs

# CONCINNITY™ COMPONENTS — SUPPORTS

## SUPPORT STORAGE PEDESTALS — 28½”H

- Non-handed, interchangeable design reconfigures easily.
- For use with component top and modesty/back panels or pedestal top and back panels.
  - Pedestals are not fully enclosed and require a component top/worksurface and modesty/back panel or a pedestal back, both of which must be ordered separately.
  - Pedestal’s front and side panels are finished.
- The pedestal depth dimension is less than the like-size depth of the component top, to accommodate addition of a modesty/back panel.
  - 29½”D pedestals can be used under 30” or 36”D worksurfaces; 23½”D pedestals can be used under 24” or 30”D worksurfaces.
  - When specifying a 29½”D pedestal with ¾” modesty panel under a 36”D worksurface, or a 23½”D pedestal with a ¾” modesty panel under a 30”D worksurface, there will be a 6” approach side overhang.
- Bottom of side panels are edgebanded for added strength and to seal out moisture.
- Drawers:
  - Operate on steel ball-bearing suspensions to ensure smooth, quiet, long-lasting operation; full extension allows easy access to contents.
  - Fronts are edgebanded on all four sides.
  - Feature 5-sided construction for added strength and easy alignment or replacement of drawer fronts.

- Interchangeable core removable locks are located on front of all modular storage products, except the storage cabinet.
- Finish of lock is determined by, and aligned with, the handle finish specified.
- Locks feature a removable cylinder that can be interchanged as needed; allows users to access all furniture pieces in an office with a single key for convenience and security. Makes re-keying quick and easy. Keyed alike cores must be ordered separately by specification of the key number (removable lock core kit models available in Black [model HF23B] or Satin [model HF23S]).
- Ship fully assembled.
- Chassis and drawer front colors are specified separately; can be selected with common woodgrain or solid laminate color, or with different, complementary chassis and drawer/door colors.
- See chart on page 50 for cord management options. If the pedestal grommet option is chosen, two cutouts, one per end/side panel, each with a black plastic cap, are included.

## SUPPORT STORAGE PEDESTALS — 41”H STANDING-HEIGHT

- Same as above except — not to be used freestanding; top and back are not enclosed.
  - Rear of pedestal can be enclosed with a full, 40¾”H back panel or with a 27⅞”H modesty panel combined with a lower, 13”H pedestal back component. Pedestal back and modesty panel must be ordered separately.

NOTES: See chart on page 50 for cord management options.

- When grommets are specified for 30"D and 36"D rectangle worksurfaces, pre-drilled holes will not be included for a 4½" diameter support column.

**NOTES:**

- Grain direction on all rectangle worksurfaces runs horizontal (side-to-side) except as follows: 30"W - 36"W - 42"W - 48"W - 54"W - 60"W x 24"D tops can be specified with horizontal (side-to-side) or vertical (front-to-back) grain.
- 42"W and 48"W x 20"D tops are available with vertical (front-to-back) grain only.
- For standing-height requirements, use worksurface with 41"H O-leg, end panel, L-shaped end panel, or pedestal supports.
- For mobile desks and tables, use post leg with casters.
- If using worksurfaces with Coordinate™ Height Adjustable Bases, an External Stiffener must be used.
- Attachment of above privacy screen models requires a minimum 1" clear space/overhang on the underside of worksurface.
- Worksurfaces used with Coordinate™ Height Adjustable Bases should have 1" perimeter gap on each side to provide clearance between other furniture. Failure to do so risks injury or product damage (not covered by warranty).
- When using end panels or O-legs with 84", 90", or 96"W worksurfaces, interior weight-bearing support components are required to minimize worksurface deflection.
- Attachment of above/below privacy screen models requires a minimum 2" clear space/overhang on the underside of the worksurface.
- Steel external support channel can be attached to the underside of worksurfaces that are subjected to heavier loads. Channel is recommended to provide extra support on unsupported spans of 54"W or greater or per user preference. Ordered separately from worksurface.
- If using a 54"W or 60"W floating modesty panel, it is not necessary to specify an external support channel.
- When using an external support channel under the worksurface, the depth clearance for center drawers and keyboard platforms decreases by 8".
- See "External Channel (Recommended Use)" chart on page 45.

NOTES: Can be used in a host of applications, including as a desk, credenza, return, bridge, stationary or mobile table surface, in U- or L-shaped configurations, as part of a work wall layout with an island extension, or with the height adjustable electric base. The conference overhang dimension on the approach side of worksurfaces varies depending on the supports and modesty panels specified. Top can be positioned with a cantilevered conference overhang on one end when used with select worksurface supports, including an O-leg or 9½"W modular pedestal. For return applications in which there is an unsupported span wider than 54", such as a 72"W x 24"D worksurface supported by a 15¾"W modular pedestal (= 56¼") or a 60"W x 24"D worksurface supported by a 1½" thick end panel (= 58⅞"), use internal support panel model HNL11SUPP. For bridges wider than 54", use internal support panel HNL11SUPP. When using a 30"W, 36"W, 42"W, or 48"W rectangle worksurface as a bridge, no support legs are needed. When specifying a 84"W, 90"W, or 96"W worksurface, cannot use two O-legs for the supports. In these applications, the maximum number of supports that can be an O-leg is one; must choose from a 15¾" or wider modular pedestal for use as the additional support component. For applications requiring connection to an adjoining worksurface, two flat brackets are included with 24"D and 20"D worksurfaces that are ≤48"W; one flat bracket is included with 24"D worksurfaces that are ≥54"W. Underside of worksurface includes pilot mounting holes for O-leg, 1½" thick laminate end panel, pedestals, and flat brackets. See chart on page 50 for cord management options.

ⓘ When grommets are specified for 30"D and 36"D rectangle worksurfaces, pre-drilled holes will not be included for attachment of a 4½" diameter support column.

**NOTES:**

- Grain direction on all rectangle worksurfaces runs horizontal (side-to-side) except as follows: 30"W - 36"W - 42"W - 48"W - 54"W - 60"W x 24"D tops can be specified with horizontal (side-to-side) or vertical (front-to-back) grain.
- 42"W and 48"W x 20"D tops are available with vertical (front-to-back) grain only.
- For standing-height requirements, use worksurface with 41"H O-leg, end panel, L-shaped end panel, or pedestal supports.
- For mobile desks and tables, use post leg with casters.
- ⓘ If using worksurfaces with Coordinate™ Height Adjustable Bases, an External Stiffener must be used.
- ⓘ Attachment of above privacy screen models requires a minimum 1" clear space/overhang on the underside of worksurface.
- ⓘ Worksurfaces used with Coordinate™ Height Adjustable Bases should have 1" perimeter gap on each side to provide clearance between other furniture. Failure to do so risks injury or product damage (not covered by warranty).

NOTES: For use in U- or L-shaped layouts. Includes top and long (47"D or 35"D) end panel components. Installation also requires modesty panel and either a 1½" thick end panel or 15¾" x 23⅜"D pedestal support for opposite end; both ordered separately. 72"W x 24/48"D or 48/24"D top is intended for use with 30/48"D or 48/30"D jetty peninsula to create a 2-piece "U" station with a curved cockpit on user's side. 72"W x 24/36"D or 36/24"D size is intended for use with 24"D returns or bridges. Underside of worksurface has pilot mounting holes for 1½" thick end panel and 15¾" x 23⅜"D modular pedestal. Edgebanding on the extended corner worksurface is profiled on the user's side and flat on the back (approach side) and ends. Grain direction runs horizontal (side-to-side).

ⓘ One flat bracket is packaged with each 48"D worksurface for applications requiring connection to a 48"D jetty peninsula. For 36"D extended corner worksurface, the flat bracket is shipped with the adjoining return or bridge. See chart on page 50 for cord management options. If grommet option is chosen, the worksurface component will match the color specified; the long end panel grommet color will be black.

**NOTES:**

- ⓘ When specifying an 84"W size, cannot use two O-legs; must use another type of support component such as a pedestal.
- ⓘ Steel external support channel can be attached to the underside of worksurfaces that are subjected to heavier loads. Channel is recommended to provide extra support on unsupported spans of 54"W or greater or per user preference. Ordered separately from worksurface.
- ⓘ If using a 54"W or 60"W floating modesty panel, it is not necessary to specify an external support channel.
- ⓘ When using an external support channel under the worksurface, the depth clearance for center drawers and keyboard platforms decreases by 8".
- ⓘ See "External Channel (Recommended Use)" chart on page 45.

NOTES: For use with modular worksurface and support components. Component is 3/4" thick. Full-to-floor sizes can be specified with or without grommet; see chart on page 50 for cord management options. For standing-height applications, a worksurface supported by 1 1/8" thick x 41"H laminate end panel(s) and/or 41"H support pedestal(s), the recommended modesty panel length extends 27 1/8" below the underside of the top, leaving 13" of wall access; 9 1/2" and 15 3/4" W x 13"H backs are available to enclose the balance of the pedestal back. Worksurfaces supported by a 1 1/8" thick x 41"H laminate end panel and 41"H support pedestal, or by two 41"H support pedestals, can be used with a 10" modesty panel to increase the amount of wall access, however in this application the pedestal(s) should be positioned against a wall, as there is not a 30 1/8"H panel to cover the back of the pedestal that is exposed below the modesty panel. The 10"H modesty panel is not recommended for use in a standing-height shell, where both supports are 41"H laminate end panels; for this solution use the 27 1/8"H modesty panel. For standing-height applications with the worksurface supported by 41"H O-legs or L-shaped end panels, use the appropriate floating modesty panel size.

**NOTES:**

- Provide approach-side kneespace privacy for user seated at desks, credenzas, returns, and bridges.
- Full-width laminate panel can be specified in 6" increments from 30"-96"W, and in full-length (27 1/8"H) or short (10"H).
- Formal, full-length, 27 1/8"H models extend from the underside of the worksurface to the floor.
- 10"H sizes allow quick and easy access to wall power outlets.
- 30"W and 36"W x 27 1/8"H are sized to serve as a modesty panel, or pedestal back for respective 30"W and 36"W support storage pedestal models.
- ❗ The full-width panel designs are specifically for use when the worksurface supports are two 1 1/8" thick end panels, two support storage pedestals, or one 1 1/8" thick end panel and one support storage pedestal; not for use with O-legs or L-shaped end panels.
- ❗ Full-length modesty panels not for use with height adjustable desks/shrouds.

NOTES: Horizontal interlocking rails are included; due to varying types of walls, installers are responsible for selecting and supplying the appropriate fasteners. Tackboard widths differ slightly from wall mounted storage cabinet widths. For applications where multiple wall mounted storage cabinets are placed side-by-side, the preferred tackboard solution may be to utilize a larger tackboard size. For example, H90057 = 75"W; H90056 = 68 3/4"W; H90055 = 62 1/4"W; H90054 = 56 3/4"W. For paper organizer tools, see pages 689-691.

This Specifying Guide is designed to walk you through the steps when choosing the Voi desks elements that will meet your particular workplace needs. From private office to open plan, there are endless combinations that will fit your style and need.

Regardless of the application, Voi presents an integrated, unified aesthetic for the entire workplace.

The step-by-step instructions make it easy to specify elements that personalize workspaces and achieve the right mix of functionality and style.

### Worksurface

- A variety of sizes meet a range of footprint requirements, from private offices to open plan areas.

### Accessories

- From layering shelves to storage cubes, markerboards and the box drawer organizer, Voi accessories allow personalization to meet individual needs.

### Above the Worksurface Storage

- Voi has many above the worksurface storage options that can be used in many applications: wall mounted, panel mounted, and conventional stack-on storage options are available to make an efficient use of vertical space.
- Choose from sliding door units or overhead cabinets with four doors.
- The O-leg can be used in stack-on storage applications to create a more contemporary look.
- The storage cube accessory can be used in the storage applications listed above.

### Below the Worksurface Storage

- A wide variety of conventional storage options are available: lateral files, bookcases, support bookcases, mobile pedestals, personal wardrobes, and storage towers.
- Many contemporary storage options are available: low credenzas and floor credenza work in conjunction with the worksurfaces to create layered surfaces that optimize space, different storage, staging, and display needs.
- Storage pieces can be specified in mixed materials and footed bases so you get exactly what you want.

### Support

- A combination of many supports can be used with the worksurfaces: O-leg, angled leg, end panel, pedestal, slim pedestal, support bookcase, lateral/multi file.
- O-legs work in many of the Voi desks applications and provide a light-scale, contemporary look.
- O-legs can be used in a variety of heights so surfaces can be layered.
- End panels are also available and provide a more conventional look.
- A variety of modular storage options can be specified based on your storage needs: box/box/file pedestal, file/file pedestal, slim profile pedestal, lateral files and multifiles.
- Angled legs, available in wood or painted steel, can add personality and a residential feel.

### Modesty Panel/Privacy Screens

- Full height, ½ height and floating modesty panel options are available to enhance privacy.
- Mixed material options are available in laminate and frosted translucent.
- Select the size that works with the supports.
- Above and Above/Below Privacy Screens are available to create an element of privacy in an open plan area.

- Laminate modesty panels to create a more conventional look.
- 54”W and 60”W Floating Modesty panels eliminate the need for an external channel.
- Above Privacy Screens provide a division between two worksurfaces and create a division of space in an open plan area.
- Modesty panels cannot be used as a support.
- See modesty panel chart to choose proper modesty size depending on support options.

4. Select Above the Worksurface Storage (Stack-on Storage) or Overhead Cabinets

**Tips**

- Select sliding or hinged doors.
- Specify O-leg separately for a contemporary look.
- Optional storage shelf works in conjunction with the O-leg design to provide additional storage space. Only works with 65”H O-legs.
- O-legs come in two sizes to make a 50”H or 65”H stack-on storage unit.
- Wall mount brackets carry a \$162 upcharge and are specified the model ordering logic.
- Use shared overhead and attachments in small footprint applications.
- Shared overhead must be ordered as left or right to determine open storage location.
- Shared overhead panel mount brackets and overhead post legs allow overhead to span over all panels systems or run down the spine wall, centered on top of the panel.
- Use the 65”H for a more conventional design. 65”H and 50”H aligns with Abound and Accelerate.
- Stack-on Storage must be placed over two full-height supports. Cannot be placed over non-supported sections such as returns using a flat bracket or tower-to-worksurface bracket.
- If the end panel conventional look is preferred, order the built-up stack-on storage models.
- There are two types of tackboards for use on Overhead Cabinet and Stack-on Storage.

## VOI® AND SYSTEMS INTEGRATION

### Worksurface Applications

Either Voi or Systems worksurfaces can be used with Voi in an open plan application. There are several support options:

- A. Completely panel supported.
- B. Combination of panel supported and another worksurface support such as:
  - Bookcase support
  - Pedestal (Brigade®, Flagship®, Contain®, or Voi®)
  - Systems open leg
  - Voi O-leg
  - End panel (Systems or Voi)
  - Tower to worksurface bracket
  - Support column
  - Systems round post leg
  - Voi post leg
- C. Freestanding:
  - Bookcase support
  - Two pedestals (Brigade®, Flagship®, Contain®, or Voi®)
  - Two Voi O-legs
  - One Voi O-leg and one Voi O-leg support for lower credenzas
  - Two end panels (metal or Voi)—requires metal or Voi modesty panel
  - Four (Two 2-Pack) Voi angled legs, wood or steel
  - Two Voi angled legs, steel and two Voi steel stanchion supports for low credenzas

### Additional application guidelines for worksurfaces:

- Systems worksurfaces are available with grommets or no grommets.
- When Voi lower credenzas are used along the spine wall and are placed adjacent to the wing wall, one electrical/data cutout on the wing wall will be blocked.
- When Voi credenzas are used along the wing wall and are placed adjacent to the spine wall, one electrical/data cutout on the spine wall will be blocked.
- When the Voi O-leg support for credenzas is used, it is recommended to also panel attach the worksurface with the worksurface anti-dislodgement bracket kit HWSA2.
- When the Voi O-leg support is used with panels, it is recommended to also panel attach the O-leg to the panel with the O-leg to panel bracket kit HLSPBL (left) and/or HLSPBR (right). This bracket will provide additional workstation rigidity.
- When the Voi end panel support is used with panels, it is recommended to use the end panel support with panel bracket model. This model will provide additional workstation rigidity.
- The worksurface to tower bracket kit, HSTB2W1, will work with Voi towers, Voi worksurfaces, and systems worksurfaces.
- Knife Edge surfaces are recommended to only use angled post legs as supports.
- Knife Edge worksurfaces are intended to be stand-alone. Surface gaps may occur if connecting to a panel or using return worksurfaces.

### Application Guidelines—Combination of Panel Supported and Another Worksurface Support

- For applications where 1) the worksurface is perpendicular to the spine wall; 2) the worksurface is panel supported off the spine wall; and 3) there are Voi credenzas placed under the worksurface along the spine: there is not enough clearance to use standard worksurface cantilevers to attach the worksurface to the spine. Use the worksurface anti-dislodgement bracket kit HWSA2 to panel attach the worksurface in lieu of cantilevers.

### Panel Mounted Stack-on Storage Applications

- The Voi stack-on storage cabinets can be used on Abound and Accelerate as panel mounted overheads.
- The sliding door stack-on storage units are available in 36", 42", 48" widths in addition to 60", 66", and 72" widths.
- The 4 door stack-on storage units are only available in 36", 42", 48", 60", 66", and 72" widths.
- The storage units require a storage to panel bracket kit, model HLSPMB. This model includes one left hand, one right hand, and one center bracket. The brackets are available in all P1 and P2 paint colors.
- The storage cabinets do not have off modular capabilities.
- For proper installation and support, the storage units must follow the following specification rules:
  - There should be a storage unit of the same construction on each side of a given panel.
  - The storage units on opposite sides of a given panel should be in the same location vertically and horizontally.
  - Only one storage unit per panel, per side.
  - The wing panel adjacent to the spine wall needs to be the same height as the spine wall.

- Worksurfaces are abrasion- and stain-resistant laminate over durable 1/8" solid core high performance particleboard: resists wrapping.
- There is one 3" grommet in 36"W and 42"W worksurfaces and two in 48"W-84"W worksurfaces.
- One flat bracket ships with each worksurface.
- When attaching tops to panels, refer to Systems section of this pricer.
- Square edge detail.
- When using a floating modesty panel or an external channel under the worksurface, the depth clearance for keyboard trays and center drawers decreases by 8". See accessory matrix in accessory section of the pricer.
- 3" Power Hub model HGRMTAC can be interchanged with 3" standard grommet.
- ! Voi® worksurfaces cannot be used with Abode™ Desks components.
- ! Grommets in worksurfaces must be specified. If grommets are specified, grommets come in predetermined location.
- ! Edgeband option only on all Voi worksurfaces. For edgeband options, see matrix on page 173.
- ! When specifying an 84" Worksurface, cannot use two O-legs, must use at least one additional support such as a pedestal or lateral file.
- ! When using a worksurface as a bridge, no additional supports are needed. One support is required for returns, two supports are required for desks and credenzas.
- ! Lateral file or multi files must be used with surfaces 24"D and 60"W or greater.
- ! Depending on your support combination, an external channel may be required for extra support on unsupported spans greater than 54"W. Please see the matrix on page 193 for more details.
- ! If using a 54"W or 60"W floating modesty, it is not necessary to spec an external channel.
- ! When attaching worksurfaces to panels, one or more of the following are required: anti-dislodgement brackets, end panel, support leg and/or cantilevers. Cantilevers and anti-dislodgement brackets must be ordered separately when attaching worksurfaces to panels.
- ! A return worksurface is considered 48"W or shorter. Longer returns cannot be supported by a flat bracket only.

## Desking With Tower Storage (Example Shown Below)

Recommended to align Workwall tiles with tower height and work your way down the wall.

## Desking Without Tower Storage

Recommended to mount Workwall tiles above worksurface and work your way up the wall.

## Without Desking or Storage

Floating application can be utilized in open wall environments such as conference rooms or collaboration spaces. Any size of tiles can be used to fit your space.

### STEP 1

- Specify desk.
- Please note differences in storage heights and low credenza heights.
- Standard worksurface height is 29½".
- Note the tower and overhead height differences between casegood series (see diagram on pages 227-228).

### STEP 2

- Understand your available wall dimension based on furniture selected or customer application (see matrix on pages 227-228).

### STEP 3

- Select tiles. See material on page 224 and dimensions on page 225.

### STEP 4

- Select accessories to add to tiles to create personalization for the user.

### NOTES:

- There is a 3/16" vertical reveal (Reveal 1) and a 3/16" horizontal reveal between tiles (Reveal 2). There is a 3/16" vertical reveal between towers and tiles (Reveal 3).
- Wall attachment method is Z-brackets (2 per tile).
  - i. Thickness is 7/8" from wall to front of tile (includes tile and hardware).
  - ii. Accessory Single Tool Rail + Accessories (7) + Floating Shelf add to depth dimension.
  - iii. Vertical mounting brackets come pre-installed on tile and hang on Z-brackets. Z-brackets are in two parts. The second part of the Z-bracket is attached to the wall in the field.
  - iv. Wall attachment not included due to different wall types and materials. Attachments must be provided by the installers.
- Wire management or television mounting brackets not included with tiles.

- For under-surface storage options, see pages 270-272.
- For additional components see pages 279-301.
- Tops and end panels are abrasion- and stain-resistant laminate over durable 1⅝" solid core high-performance particleboard; resists warping.
- Cord management grommets, for routing and hiding wires and cables, are located in the tops of desks and return shells.
- 3" round worksurface grommet can be replaced with optional Power Hub (model HGRMTAC) or Power/USB Hub (model HGRMTUSB2) to bring the ease of plug-and-play to the desktop. See page 697.
- Adjustable hex leveling glides allow floor-standing furniture to be easily leveled without lifting the unit; glides have ¾" adjustable range.
- For standing, 42"H shells, see page 259.

- Easy-care, scratch-, spill- and stain-resistant laminate over 1/8" solid core high-performance particleboard.
  - Grain direction on all worksurfaces runs horizontal.
  - One flat bracket (mounting plate) ships with each worksurface for applications requiring connection to an adjoining worksurface.
  - For standing-height requirements, use worksurface with 41"H laminate L-shaped end panel or metal O-leg.
  - For 30", 36", 42" and 48"W x 24"D mobile desks and tables, use post leg with casters model HMBPOST.C.

- ⓘ 84"W worksurfaces are for 29 1/2"H applications only (not 42"H) and require a T-support brace or other weight-bearing floor support to be positioned between the O-legs or L-shaped end panels.
- ⓘ Worksurfaces are subject to slight bowing. The magnitude of the deflection is dependent upon the weight, placement, and duration of the load.
- ⓘ When using a worksurface as a bridge, no additional supports are needed. One support is required for returns, two supports are required for desks and credenzas.

## WORKING WITH ABODE™ COMPONENTS

### Configurations

### End Panels and Support Legs

Each are available in two options: freestanding or panel mount. The only difference between the two options are the panel-mount models come with a left- or right-handed bracket to attach the support to a panel in a systems application.

The 11"D end panel is used to support peninsulas.

### Corner Desk Legs

Corner desk legs have a 90-degree bend and welded construction. The strong construction allows gussets or half-height modesty panels to be used with corner legs.

### Bridge Kits

Bridge kits include: two flat brackets, two modesty panel-to-end panel attachment brackets, and two tie straps. This kit is used when attaching a bridge unit between two rectangular worksurfaces.

There are some bridge instances where only half of a bridge kit is needed (e.g., using a bridge between a rectangular worksurface and a corner or peninsula). A return kit may be ordered for these instances.

### Support Column

Support columns are used to support one end of curvilinear worksurfaces. Includes column, worksurface bracket kit HWSA2, attaching hardware, and adjustable glides.

### Return Kits

Return kits include: one flat bracket, one modesty panel-to-end panel attachment bracket, and one tie strap. These are used when attaching a return to a primary desk. Return kits can also be used in some bridge applications — one example is shown below when using a peninsula.

### Desk-to-Panel Attachment Kits

Desk-to-panel attachment kits are used to connect a worksurface and modesty panel perpendicular to a panel of corresponding width. Opposing end of worksurface must be attached with an end panel, support leg, or corner leg mounted directly under this worksurface.

When using a corner or corner cove worksurface with the rear corner attached to a panel, and opposing end of worksurface is attached to a freestanding desk, use corner w/desk attachment kit. Hand of unit is determined from the user's side of the desk (right-hand unit attaches to right side of modesty).

## Corner w/Desk Panel Attachment Kit

Corner w/desk panel attachment kit connects the rear corner of a corner or corner cove worksurface and modesty panel to a panel when the opposing end of the worksurface shares a support leg with an adjacent freestanding desk and the support leg is mounted under the freestanding desk. Hand of unit is determined from the user's side of the desk (left-hand unit attaches to left side of modesty).

## Corner Worksurfaces

Corner worksurfaces accommodate 90-degree corner desk legs.

## In-Line Connections of Desks

Shared leg can be used at in-line connections to support adjacent rectangular desks.

## Pedestals and Storage

Pedestals must be ordered smaller than the depth of the worksurface. For example, 18" D peds should be used with 24" D worksurfaces. 18" D or 23" D pedestals can be used with 30" D worksurfaces. Using 18" D laterals or personal files provide additional storage options under 24" D worksurfaces.

## Modesty Panels

The following are some general guidelines for Abode™ modesty panels:

- **Desk:** Modesty panel width is the same width as the worksurface
- **Return:** Modesty panel width is 6" greater than the width of the worksurface
- **Bridge connecting two rectangular worksurfaces:** Modesty panel width is 12" greater than the width of the bridge worksurface
- **Bridge connecting a rectangular worksurface and corner or peninsula:** Modesty panel width is 6" greater than the width of the worksurface
- **Corner connecting to an adjacent worksurface:** Modesty panel width is the same width as the worksurface.

## Stand-Alone Corner Modesty Panels

Stand-alone corner modesty panels are used only when one or both sides of a corner or corner cove worksurface are freestanding and NOT attached to another worksurface. Specify the width the same as the width of the worksurface.

## Gussets "G"

Gussets can be used in place of a modesty panel with desks 36" W to 60" W. Gussets can also be used with corner desk legs.

## STACKING FRAMES

Reminder: Panel frame top caps must be ordered separately. Please refer to page 351. Do not specify top caps when putting frameless glass on top of the panel frame or when using a countertop worksurface.

# ABOUND<sup>®</sup> FRAMES OVERVIEW

**Stacking connection** provides a solid metal-to-metal connection, allowing the stacking frame to accept hang-on components, per configuration guidelines.

## Construction and Features

Specifications—formed, steel vertical members, with tubular steel horizontal members are welded into a sturdy, structural panel frame. Panel frames are shipped with base pathway covers installed.

Tiles, Panel Top Caps, and Segment Bars are ordered separately.

Additional design and specification information available at [hon.com](http://hon.com).

# ABOUND® FRAMES OVERVIEW

## FRAME DIMENSIONS (ACTUAL)

**Depth:** 2 $\frac{5}{8}$ " (use 2 $\frac{3}{4}$ " to calculate intersections in length of panel run)

**Widths:** 24", 30", 36", 42", 48", 60"

**Heights\*:** Painted trim: 34 $\frac{1}{2}$ ", 42", 49 $\frac{1}{2}$ ", 57"H, 64 $\frac{1}{2}$ "

**Stacking Frames:** 15"H, 30"H

\*with levelers fully retracted

Stacking frames can be added to the top of any 35"H, 50"H or 65"H frame. Adding stacking frames to 42 $\frac{1}{2}$ "H and 57 $\frac{1}{2}$ "H frames is not recommended due to inconsistencies in segmentation. 15"H and 30"H stacking frames can be used to add up to 45" of additional height to a standard frame. Do not combine differing frame widths in a single stack.

**NOTE:** When stacking on 42 $\frac{1}{2}$ "H or 57 $\frac{1}{2}$ "H frames, panel slots will be off by  $\frac{1}{2}$ " compared to any other height panel. When stacking on 42 $\frac{1}{2}$ "H and 57 $\frac{1}{2}$ "H frames, hanging accessories will be  $\frac{1}{2}$ " off in height compared to accessories hanging on panels at any height other than 42 $\frac{1}{2}$ "H and 57 $\frac{1}{2}$ "H.

## BUILDING HORIZONTALLY WITH ABOUND FRAMES

**Important planning guidelines:** For adequate stability, one of two methods of stabilization must be adhered to:

### Method 1—Opposing returns:

A parent run must be a minimum of 48" and a maximum of 144" between return panels. The parent run must have a minimum of two return panels running in opposing directions on each end of run.

### Method 2—Single-sided

Spine Length:	90 degree connector	120 degree connector
48"-108"	72" total	84" total
110"-132"	84" total	96" total
134"-144"	96" total	108" total

# ABOUND<sup>®</sup> FRAMES OVERVIEW

## INTERSECTING CONNECTIONS

**“L”, “T”, “X”, “Y2” and “Y3” connector kits** are used when connecting frames at intersecting runs. For “L”, “T” and “X” connector kits, add 2¾” to the total length of the panel run for each intersection, whether located in the middle or at the end of the run.

**Wall starter kits** provide a means to affix a panel run to a permanent building wall. Kit adds 1½” to length of panel run.

**Segment bars** — horizontal cross members required between tile segments. Must be specified on each side of frame. One Segment Bar is needed for each reveal between tiles.

**Extended straight connector kit “S”** can be used to keep continuous runs dimensionally consistent with opposing panel runs which incorporate “T” or “X” intersections. (Add 2¾” to the length of the run for every extended straight connector used.)

## IN-LINE CONNECTIONS

**Direct connections** between same height frames in a continuous run are accomplished with provided hardware. There is no incremental increase in dimension along the run.

### END OF RUN

Finished end trim must be specified for the unconnected sides of panel frames. The Abound end trim adds ¾” to the length of the panel run. When adding a stacking frame, order finished end trim in the height that matches the stacking frame height. Move the end cap from the standard frame end trim to the stacking frame end trim.

### IN-LINE VARIABLE HEIGHT TRIM

In-line connections between different height panels require trim to cover the exposed frame of the taller panel. The bottom of the trim is contoured to match the profile of the frame top cap.

**Multiple-height connections** are accomplished by combining standard height panel connectors (35”H, 42½”H, 50”H, 57½”H, and 65”H) with shorter connectors (7”H, 15”H, 22”H, and 30”H). Start from the bottom-up — select the standard connector that corresponds to the height and connection type of the tallest panel, then use the shorter connectors for variable height and connector top cap trim. (See examples.)

**Example 1**  
1 ea. 50”H T-Connector  
1 ea. 15”H S-Connector

In variable height “T” connections — as shown above — you would use the connectors as indicated.

**Example 2**  
Connectors required:  
1-35”H “X”  
1-7”H “T”  
1-7”H “L”  
1-15”H “FT”

**Example 3**  
Connectors required:  
1-50”H “L”  
1-15”H Variable Height Trim over Connector

Example above represents Abound variable height “L” for 65” to 50” connection over connector.

### VARIABLE HEIGHT CONNECTION TRIM

L, X and T connections between different height panels require trim to cover the exposed frame of the taller panel. The bottom of the trim is flat to match the profile of the Universal Connector top cap. Models are designated as “Variable Height Finished End over Connector Trim”. For variable height connections in a Y configuration, contact the HON Product Solutions group.

### OPTIONAL STIFFENER SUPPORT

Stiffener supports can be used to provide additional rigidity to a panel when fabric tiles are on both sides of the frame. May also be used for routing power/data at non-standard heights.

\*Used on all products produced prior to July 2021.

# ABOUND<sup>®</sup> TILE OVERVIEW

About tiles come in a variety of styles.

\*Aesthetics of opposing tile surface and/or frame interior should be considered when selecting light-colored sheer materials.

# ABOUT® SPECIFYING/DESIGN GUIDE

## Tile Heights

Monolithic tiles are 5" shorter than frame heights to account for top trim and base raceway.

## Typical Tile Height Configurations

Segment bars are required between any two tiles — order separately based on tile configuration on each side of frame. Note: Most CAD specification programs will calculate quantity of segment bars required.

\*Additional tile combinations to those shown above are possible; heights above 65" require stacking frames - maximum height is 110".

To calculate the total height of tiles(s) required, deduct 5" (height of base/top trim) from the total nominal panel height.

**EXAMPLE:** 65"H Frame takes 2 30"H tiles.  $65 - 5 = 2 \times 30$  or  $45 + 15$

Tiles can be ordered in the size that matches the frame height plus the stacker height.

**EXAMPLE:** If you are using a 35"H frame plus a 30"H stacker, you can order 2 - 30"H tiles or 1 - 60"H tile.

Door panels include frame, 42"W door, hinges and attaching hardware. Two 7 1/2"W fabric tiles for the top of the door frame are required and ordered separately (HRVDO742T).

Sliding doors are available in 50", 65", and 80"H models and can mount to 30", 36", 42", and 48"W panels. The doors provide a 36"W opening and are 42"W, nominally. The doors ship non-handed. A Mounting Bracket Kit must be ordered for each door corresponding to the mounting panel's width (30", 36", 42", or 48"W).

Hard-surface Tiles include tile and Custom Bracket Kit.

# ABOUND® SYSTEMS

## Electrical and Data

### About String-in Capacity

Openings in frame sides permit electrical data and communication cables to be run between frames in Abound. Using tackable acoustical tiles, the beltline pathway accommodates up to 62 cables (.25" dia) or 46 cables with electrical components installed.

DO NOT run electrical equipment or extension cords through cable openings in frame sides. Use beltline or base-mounted electrical system for all electrical supply.

Cables can enter/exit panel through underside of base pathway at juncture between frames. Openings are sized as follows (in sq. in.):

Straight connection	6.0
"S" Extended Straight Connection	10.0
"L" 90° Connection	8.9
"T" Connection	15.9
"X" Connection	17.9
"Y" Connection	—

### Vertical Capacity

#### Vertical Capacity Through Panel Frames

When leveling glides are fully retracted, panel-to-floor clearance is 7/16". This may affect the volume of cabling that can be fed into the frame from the bottom of the pathway.

- A 60% fill ratio is achievable; however, when electrical components are installed in the beltline area, cabling capacity through the beltline area will be limited to approximately 45% fill ratio.

NOTES: For models 54"W-96"W, glass can span multiple panel widths. See suggested panel sizes by glass width above.

**NOTES:**

- Tile is a single-pane, 3/8" laminated safety glass.
- Available in clear or frosted glass.
- New top cap ships with Frameless Glass which fits around the glass insert.
- Frameless Glass can span multiple panels with one piece of glass.
- Lamination is in the center of the glass, making both clear and frosted glass a writable surface with dry-erase markers.
- ⚠ Glass tiles have a Class A fire rating.
- ⚠ Frameless Glass can only be used on the top of panels. Glass integrates into top cap trim.
- ⚠ Power and data cords cannot lay in the top of panel frames when using frameless glass.
- ⚠ Variable height trim for Frameless Glass must be ordered when using panel heights one step up; see page 360.
- ⚠ Cannot hang or stack on top of Frameless Glass.
- ⚠ Abound® power pole cannot be used with Frameless Glass. Freestanding power pole HH870070 can be used at the end of run or one panel needs to be specified without Frameless Glass for ceiling in-feed to enter the panel.

# ACCELERATE® PANELS OVERVIEW

## INTERSECTING CONNECTIONS

**“L”, “T” and “X” connector kits** are used when connecting frames at intersecting runs. For “L”, “T” and “X” connector kits, add 2¼” to the total length of the panel run for each intersection, whether located in the middle or at the end of the run.

**Wall starter kits** provide a means to affix a panel run to a permanent building wall. Kit adds ⅞” to length of panel run.

## STACKING PANELS

Stackers add 15” to the height of the base panel and can be ordered separately or as part of the panel model, see pages 387 and 390.

When adding stackers to an existing panel, a new connector must be ordered, to the tallest panel height.

Please note that Stacking Panels are not to be used freestanding and must match the panel width of the panel it is stacking on.

Cannot use a stacking panel on a Top Tier Glass Panel model.

Stackers ship with pins to connect stacker to post connector for added rigidity.

Stackers can be stacked up to 80”H on a base panel. Overheads can be placed on the first stacker only, up to 65”H. Voi overheads are not to be placed on stackers.

<b>Top View</b>			
Panel		Panel	
←		←	2¼"
Panel	<b>S</b>	Panel	

**Extended straight connector kit “S”** can be used to keep continuous runs dimensionally consistent with opposing panel runs which incorporate “T” or “X” intersections. (Add 2¼” to the length of the run for every extended straight connector used.)

## IN-LINE CONNECTIONS

There is no incremental increase in dimension along the panel run when using an in-line connector kit.

### END OF RUN

Finished end trim must be specified for the unconnected sides of panel. When adding a stacking panel, order finished end trim in the height that matches the total stacked height. Move the end cap from the standard frame end trim to the stacking frame end trim.

Accelerate® frameless glass is single pane, ⅜” thick laminate safety glass, available in clear or frosted glass.

Frameless glass is not allowed on top of glass stackers or glass header panels and hanging or stacking on frameless glass is not permitted.

Frameless glass can span multiple panels with one piece of glass, creating a clean, seamless look.

**IN-LINE VARIABLE HEIGHT TRIM**  
In-line connections between different height panels require trim to cover the exposed frame of the taller panel.

### VARIABLE HEIGHT CONNECTOR TRIM

L, X and T connections between different height panels require trim to cover the exposed connector. The bottom of the trim is flat to match the profile of the top cap. Models are designated as “Variable Height Connector Trim”. For variable height connections in a Y configuration, contact the Accelerate Specials Department.

**Multiple-height connections** are accomplished by combining standard height panel connectors (35”H, 42”H, 50”H and 65”H) with shorter trim kits (7”H, 15”H, 22”H and 30”H). Start from the top-down — select the standard connector that corresponds to the height and connection type of the tallest panel. (See examples.)

# ACCELERATE® PANELS OVERVIEW

## Example 1

Connectors required:  
1-50"H "T" Connector  
2-15"H Connector VH Kit  
2-35"H End Trim  
1-65"H End Trim

In variable height "T" connections — as shown above — you would use the connectors as indicated.

## Example 2

Connectors required:  
1-50"H "X" Connector  
2-7½"H Connector VH Kit  
2-50"H End Trim  
2-42"H End Trim

## Example 3

Connectors required:  
1-65"H "T" Connector  
1-15"H Connector VH Kit  
1-22½"H Connector VH Kit  
1-65"H End Trim  
1-50"H End Trim  
1-42"H End Trim

Example above represents Accelerate variable height "L" for 65" to 50".

## TOP CAPS

Top caps must be specified as a separate model from the panel. Top caps can span more than one panel when panels are connected in an in-line.

# ACCELERATE® WORKING WITH PANELS

## PANELS

- Accelerate® Panels are 2½” thick and available in 4 heights / 8 widths.

**NOTE:** Actual panel height varies depending on position of levelers.

The center of the duplex is always 12” from the end of the panel on all Accelerate® panels.

### Design:

- Slots allow hanging worksurfaces and hang-on units, in 1” increments.
- Panels standard with two adjustable leveling glides.
- No panel creep.
- Meets or exceeds ANSI/BIFMA Standards.

### Top Tier and Stacking Panels

- Available in tackable fabric as well as clear and frosted glass.
- Select from a full height panel/top tier panels or stackers.
- Stackers can be stacked up to 80”H on a base panel.
- Overheads can be placed on the first stacker only, up to 65”H. Voi overheads are not to be placed on stackers.

## PANEL SPECIFICATION AND INSTALLATION NOTES

### Definitions:

**Parent Panel Run** – Panels (or a single panel) configured in a straight line intended to divide space. It is usually longer than the panels used to stabilize it.

**Return Panels** – Panels attached to a parent run for the purpose of stabilizing it. Return panels may also have the effect of dividing space.

**Note:** Return panels must be no more than 30” lower than the maximum height of the parent panel run. When stacking, the maximum height allowed is 80”. This includes frameless glass. If attaching overhead storage, return panels must be the same height as parent run.

**Method 1: Opposing Returns**

**Method 2: Single-Sided**

A parent panel run must be a minimum of 4 feet and a maximum of 12 feet, and must have a minimum of two return panels extended in opposing directions on each side of the parent run.

**NOTES:**

- Specify connectors based on number and placement of panels.
- Connector posts are specified separately from connector straps — specify post to tallest panel and straps based on connection (see variable height example on straps page).
- Specify connector to fit height of tallest panel.
- Connectors are made of extruded aluminum.
- Straight Connector model HSCKTPS ships standard in bulk pack.
- Connector posts where power pole will enter need to be specified with single connector straps, model HECS1.

☉ In-line connector must be specified for all in-line connections.

☉ If adding to existing panels produced prior to 04/13/2016, please contact Customer Support for compatibility.

**NOTES:**

- Strengthened Connection Straps provide more rigidity to panel connections, especially when not tied into a station with a worksurface or storage, i.e., when Coordinate™ Height Adjustable bases are used or when using panels strictly to divide space without tying in other components.
- Connector strap type should be specified based on the tallest panel connection type. Connector straps and posts are specified separately.
- Lower height panels will connect with variable height trim.
- See examples below.
- Connector straps can be retrofitted on any existing Accelerate® stations that were produced from April 2016 to present.
- Will fit on existing connector posts — only straps would need to be specified.
- Single Straps (HECSI) are used when power poles enter at the connector post and in variable height applications where the tallest panel is a single and one or more panels is lower.

# EMPOWER® Step-by-Step Guide

## STEP 1: LEGS

U-leg or angled leg available for dual-sided, single-sided, and 120° applications. NOTE: Gallery Panels act as supports for fixed height Empower® and will replace the leg.

**Gallery Panels:** Specify your Empower®-specific Gallery Panel Kit along with your desired gallery panel from the “Gallery Panels” section. See pages 430-463.

## STEP 2: SUPPORT BEAMS

Support Beam(s) required for all worksurfaces. See page 414 for details.

## STEP 3: TROUGHS

Used to route electrical and data to the workstations. Must be installed in between all supports and match the width of the support beams.

## STEP 4: ELECTRICAL

Electrical components mount to the trough and mounting hardware is included with the trough model.

## STEP 5: WORKSURFACES

Select worksurfaces as appropriate for your application. Worksurface width should match beam size. Worksurface depth should match end leg size. See page 416 for details.

## STEP 6: OPTIONAL ACCESSORIES

**Screens:** Specify an Empower®-specific shared screen or select from several Universal Screens options (fixed above/below, up mount, side mount, front-to-back, sit-on-surface, top mount, modesty, and lateral organizer) to add privacy to your station. Above/below and modesty screens can be used on single-sided applications only.

**Collaborative Table:** Specify an Empower® Collaborative table at the end of a dual-sided Empower® Workstation.

# EMPOWER<sup>®</sup> ELECTRICAL SPECIFYING INFORMATION

**To Order:**

1. Determine which electrical system you will use after consulting your electrician and computer support personnel:

- **The Four-circuit system (4-Hot/2-Neutral/2-Ground)**
  - 3 + 1 option
  - 2 + 2 option
- **The Three-circuit system (3-Hot/3-Neutral/2-Ground)**

2. Determine location, quantity and circuit of duplexes.
3. Determine the appropriate choice and use of Isolated, Isolated/Dedicated and Separate Neutral circuits.
4. Specify appropriate Power Harnesses\* and Pass-Thru Cables.\*
5. Determine the location, quantity and type of Power In-feed needed.

\* Select Power Harness models (HH8712XX) and Pass-Thru Cables (HH8711XX) with the last two digits being the same as the associated worksurface width.

## Electrical System Options

The four-circuit, eight-wire electrical system is widely specified and trusted by hundreds of thousands of end-users. This proven system delivers four circuits for every power in-feed in either a 3 + 1 or 2 + 2 configuration. The isolated/dedicated circuits are ideal for sensitive computing equipment, while the common circuits are suitable for faxes, copiers, task lights and other peripherals.

Both the 3 + 1 and 2 + 2 systems use the same pre-wired components, making it easy to adjust as electrical needs change.

You can also choose a three-circuit, eight-wire system that has a dedicated neutral for every hot circuit. The three-circuit components have model numbers with an "A" suffix and appear in a gray box in this pricer.

### Four-circuit, 3 + 1 Receptacle Option

The 3 + 1 option is the electrical standard used by The HON Company for many years in most of their systems products. This wiring option provides three utility circuits plus an isolated/dedicated circuit for more sensitive equipment.

### Four-circuit, 2 + 2 Receptacle Option

The 2 + 2 option is a wiring option that provides two utility circuits and two isolated circuits for more extensive computer usage applications.

# EMPOWER<sup>®</sup> ELECTRICAL SPECIFYING INFORMATION

## Three-circuit, separate neutrals

The Three-circuit, separate neutrals configuration is a wiring option that provides separate neutrals for each of the three circuits. Two circuits share a common ground, and one circuit is isolated/dedicated. The three-circuit components have model numbers with an "A" suffix and appear in a gray box in this pricer.

Two 8-wire, 20 AMP (15 AMP Canadian) electrical systems are offered

(1) Circuit-2 (one of the 3 common circuits sharing a neutral wire) cannot be used with a single-phase building electrical supply.

### Notes:

- Four-circuit components and three-circuit components (with suffix "A") cannot be used together.
- Components of the two systems are keyed differently to prevent components of one system from being connected to components of another system.
- HON Cat. Nos. are printed on the UL labels, and components are color-coded to provide visual identification of the different components.
- Four-circuit components have black plastic parts.
- Three-circuit components have rust-colored terminal ends and receptacle backs are rust colored.

- Specify two Gallery panels in mid conditions, account for 3" gap for electrical passage.
- Order Gallery panel installation template (HSYSEMPGPIT) separately. One template required for every 30 Gallery panels.
- For mid conditions, Gallery panels must be specified on both sides of the bench. Gallery panel widths do not have to match on both sides.
- Min 35"H and Max 50"H
- For End Connection:
  - Min 48"W and Max 75"W for (22" Worksurface)
  - Min 60"W and Max 75"W for (28" Worksurface)
- For Mid Connection:
  - Min 23"W and Max 75"W for (22" Worksurface)
  - Min 29"W and Max 75"W for (28" Worksurface)

#### Single-Sided Applications

- Use HSYSEMPHAGPKIT1 for end conditions.
- Use HSYSEMPMHAGPKIT1 for mid conditions. One kit per Gallery panel required.
- Can be used with Gallery panels with or without glass.
- Installation template is not required for single-sided height adjustable applications.
- When using Gallery panels with single-sided applications, Gallery panels must be used at all end and mid locations.
- For added stability on single-sided applications, consider connecting storage to the end or mid Gallery panels.
- Must use a hole saw to cut a 2½" opening to route the power and data through the Gallery panel into the system. Recommend using grommet (HLFDGRMT) for a finished aesthetic.
- Min 35"H and Max 50"H
- Min 22"W and Max 42"W for (22" Worksurface)
- Min 28"W and Max 42"W for (28" Worksurface)

## Working with Abound®

### T-CONFIGURATION

- Provides privacy to one or both ends of the Abound® system in a dual-sided application.
- Single piece T-configurations connect using HRVCE connector kit. Split T-configurations connect using HRVCES connector kit.
- All T-configurations connect using HRVCE connector kit.
- When the system panel is higher than the Gallery Panel, a variable height system's trim must be specified to finish off the exposed frame.
- T-configuration can be used for off-modular planning. The HRVCE connector kit location must be field measured.
- Accommodate for 2<sup>5</sup>/<sub>8</sub>" frame thickness when planning with Abound® panel system.

### L-CONFIGURATION

- Provides privacy to one or both ends of the system in a single-sided application.
- L-configuration caps over the system panel.
- Due to the thickness of the Abound® panel L-configuration overhangs by approximately 3<sup>1</sup>/<sub>16</sub>" on both sides.
- Accommodate for 2<sup>5</sup>/<sub>8</sub>" frame thickness planning with Abound® panel system.
- All L-configuration Gallery Panels require the connector kit HRVCE to attach to the parent run.
- When the system panel is higher than the Gallery Panel, the variable height system's trim must be specified to finish off exposed frame.

### MID-CONFIGURATION (SINGLE-SIDED OR DUAL-SIDED)

- Mid-configuration panel does not overlap parent system panel.
- When specifying mid-configuration panels, one Gallery Panel "block and trim" kit (HRVCXXGP) is required to space the system panels out 1<sup>1</sup>/<sub>8</sub>". Kits include: Connector blocks, vertical trim, and a top cap.
- "Block and trim" models must match the height of the parent run.
- Specify one mid-connector kit (HRVCM) per Gallery Panel to attach to parent run. Gallery Panel and mid-connector kit attach over "block and trim" kit. Dual-sided application requires two connector kit models.
- When using a mid-configuration Gallery Panel, both panel frames in the spine must be of equal height.
- Mid-configuration Gallery Panel may exceed the height of the parent run by a maximum of 15".
- Trims can be painted to match the system panel trims.

# GALLERY PANELS

## Working with Accelerate®

### T-CONFIGURATION

- Provides privacy to one or both ends of the Accelerate® system in a dual-sided application.
- Use HEGPE connector kit for T-configurations without glass; HEGSFGA for configurations with glass.
- End Gallery Panels cannot be shorter than the spine panel.
- T-configuration can be used for off-modular planning. The HRVCE connector kit location must be field measured.
- Accommodate for 2½" frame thickness when planning with Accelerate® panel system.

### L-CONFIGURATION

- Provides privacy to one or both ends of the system in a single-sided application.
- L-configuration caps over the system panel.
- Due to the thickness of the Accelerate® panel L-configuration overhangs by approximately 7/8" on both sides.
- Accommodate for 2½" frame thickness planning with Accelerate® panel system.
- End Gallery Panels cannot be shorter than the spine panel.
- L-configurations both with and without glass connect with HEGPE connector kit.
- When using stackers on spine, fixed worksurfaces with cantilevers must be tied into Gallery Panels.
- End Gallery Panels cannot be shorter than the spine panel.

### MID-CONFIGURATION (SINGLE-SIDED OR DUAL-SIDED)

- Mid-configuration panel does not overlap parent system panel.
- When specifying mid-configuration panels, one Gallery Panel Mid Connector HEGMCXXX is required to space the system panels out 1½".
- Mid connector models must match the height of the parent run.
- Mid Connectors are available for single- and double-sided applications.
- When using a mid-configuration Gallery Panel, both panel frames in the spine must be of equal height.
- Mid-configuration Gallery Panel may vary in height from the parent run by a maximum of 15".

- Use HRVGLSK to connect to laminate storage or HRVGMSK for metal storage.
- To connect to worksurfaces use HSTB2W1 bracket when used in perpendicular to parent run or use standard systems cantilever brackets when used in parallel to parent run in panel systems.

## PANEL SYSTEMS

## Overview

### GALLERY-TO-GALLERY PANELS

- Gallery-to-Gallery Panels connect to other Gallery Panels and are available in L-, T-, and Non-symmetrical T-configurations.
- When specifying Gallery-to-Gallery Panels, the installation template HRVGTGG is required. The recommendation is one template for every 30 panels.
- Gallery-to-Gallery Panels must be of equal or lower height than the Standard Gallery Panel attached. The Gallery-to-Gallery Panel cannot be taller than the adjacent panel. If this is needed, please reach out to Tailored Solutions for a custom solution.
- Made of 1 $\frac{1}{8}$ " board with HPL laminate.
- Can be specified with matching or contrasting edge.
- Edgeband is 2mm ABS.
- Available in woodgrain and solid laminates.
- Woodgrain laminates can be specified with vertical grain up to 48"W.
- Gallery-to-Gallery Panel widths are available in 18", 24", 30", 36", 42", 48", 60"W, and 72" (T).
- Gallery Panels offer 2 $\frac{1}{2}$ " leveling capability.
- Overall heights line up with adjacent panel.
- Gallery-to-Gallery Panels cap over Standard Gallery Panels and are oversized by 1 $\frac{1}{8}$ " to maintain true interior dimensions.
- Available with or without the integrated glass option.
- Glass is specified separately. Use mid-connection glass.
- Gallery Panels for use with glass have separate model numbers.
- Gallery-to-Gallery Panels are secured with an inset flat bracket under a painted metal cover. Paint color is specifiable to blend in with laminate choice.
- L-panels are handed.
- Non-symmetrical T-panels vary in size on either side of the adjacent panel.
- Please adhere to all standard systems specification guidelines.
- Additional support is required after every 60" in Gallery Panel width (i.e., a storage or worksurface tie-in).

**NOTES:**

- When specifying Wing End of Run panels, the Gallery Panels are 3" wider to allow for the panel to cover the width of the spine.
- Mid-configuration creates 1½" space between the system panels. This gap matches the thickness of the Gallery Panel.
- Wing End of Run widths of 51", 63", and 75"W can be used as spanning end of run configurations.
- Gallery Panels come standard with two adjustable leveling glides.
- Gallery Panels require connectors to attach to the spine of the panel. See connectors on pages 459-460.
- Gallery Panels up to 60"W can specify vertical or horizontal woodgrain direction. Panels larger than 60"W will have horizontal woodgrain.
- ! Minimum panel length must be 50% of the Gallery Panel for stability.
- ! When system panel is higher than the Gallery Panel, system's variable height trim kit must be specified to finish off the exposed frame (Abound® only).
- ! Standard Gallery Panels can only connect to standard panel frames. Use Gallery-to-Gallery Panels to connect Standard Gallery Panels to other Gallery Panels.
- ! Gallery Panels longer than 60"W require a floor or storage support.
- ! 75"W Gallery Panels require use of Gallery Panel Stiffener model HRVGS7578.

**NOTES:**

- Gallery-to-Gallery Panels connect to other Gallery Panels and are available in L-, T-, and Non-symmetrical T-configurations.
- When specifying Gallery-to-Gallery Panels, the installation template (HRVGTGG) is required. The recommendation is one template for every 30 panels. Templates are reusable.
- Gallery-to-Gallery Panels must be of equal or lower height than the Standard Gallery Panel attached. The Gallery-to-Gallery Panel cannot be taller than the adjacent panel. If this is needed, please reach out to Tailored Solutions for a custom solution.
- Made of 1½" board with HPL laminate.
- Non-symmetric T-panels vary in size on either side of the adjacent panel.
- Woodgrain laminates can be specified with vertical grain up to 48"W. Horizontal grain is available on all sizes.
- Gallery Panels offer 2½" leveling capability.
- Overall heights line up with adjacent panel.
- Gallery-to-Gallery Panels cap over Standard Gallery Panels and are oversized by 1/8" to maintain true interior dimensions.
- Available with or without the integrated glass option.
- Glass specified separately, see 7½"H Gallery Glass on pages 457-458.
- Gallery Panels for use with glass have separate model numbers.
- Gallery-to-Gallery Panels are secured with an inset flat bracket under a painted metal cover.

# GRAVITATION™ POWER BEAM ORDERING INFORMATION

## Gravitation™ Ordering Checklist

When specifying Gravitation™ Power Beams for your workspace, follow the ordering checklist below to ensure full functionality.

- Beams (HBEAM48, 60, or 72).
- Legs to go with beams based on how the beams will be connected (HBLEG23).
- Electrical Harnesses, Receptacles, and In-feeds.
- Specify connectors, power hubs, and/or power poles (HBEORH23, HBEORT23, HBILNH23, HBCONU, etc.).
- Port Covers (for any power/data ports left unused).
- Metal, fabric, and PET screens and acrylic, fabric, and laminate modesties available.

### General Rules:

- Generally, a rail should be supported by two feet.
- If a rail connects DIRECTLY to another rail, it can share a foot.
  - 2 rails connected would have 3 feet instead of 4.
- When using the universal connector to change directions, feet are not shared between rails in the same “plane”.
  - However, rails going perpendicular to the main line will skip the foot next to the universal connector.

ⓘ When two rails share a leg, the leg is centered between the legs in the “outer slot”. When the leg is positioned **at the end of a run of rails** (i.e., the rail doesn’t connect to another rail), the leg will be inset 1/8” from the end of the rail, not the end cap, in the “inner slot”.

## Cable Capacity

- The Power Rail housing allows continuous voice and data lines to run without interruption.
- Lay-in is provided for environments where systems furniture or cabling are subject to frequent change.
- Lower cavity allows for 6 voice/data cables (1/4” diameter).
- Upper cavity lay-in allows 6 voice/data cables (1/4” diameter).

  - 2 ports for electrical and 2 ports for data are provided on each side of the rail, total of 8 ports.
  - Electrical in-feed can also be accomplished through an electrical knockout (not data) in the face of the rail using a base in-feed.
  - Beam height when installed is 23"H. This height aligns with the Empower® height adjustable trough. Gravitation™ and Coordinate™ can be used as single-sided height adjustable benching.
  - 2-Pack metal port covers specified separately to cover unused power/data ports.
  - Electrical harnesses, duplexes, and power feeds ordered separately.
  - Leveling capability of 1/4" internal to rail for clean aesthetic.
- ❗ With in-line connections between beams, one leg can be shared. Requires one more leg than the number of beams.
  - ❗ Specify paint; not available in Putty (L), Platinum Metallic (T1), and Champagne Metallic (T4).
  - ❗ When two rails share a leg, the leg is centered between the legs in the "outer slot". When the leg is positioned **at the end of a run of rails** (i.e., the rail doesn't connect to another rail), the leg will be inset 1/8" from the end of the rail, not the end cap, in the "inner slot".

**Power Beam End Cap**

---------	---	-----	------	-------	-------

**NOTES:**

- Power can enter into the beam from the floor, wall, or ceiling.
- When using the power pole, please note attachment to beam is up to the installer, as well as field-cutting the power pole to access power and data wires.
- End caps have integral knockout ports with plastic grommets to allow for power/data in-feed (without sharp edges).
- End caps add 1" to the length of the run.

# SYSTEMS OVERHEAD AND SHELVES SPECIFYING

## SPECIFICATION GUIDELINES

In a panel run, only two overhead storage cabinets or open storage shelves are recommended per panel side. When suspending overhead storage off-module only one storage unit per panel side is allowed.

**When overhead storage units are suspended from stacking frames, the following guidelines should be adhered to:**

A maximum of two overhead storage units can be suspended from each side of stacking frames on any given panel.

**Overhead Storage cabinets** and the **Open Shelf** can also be mounted to a maximum height of 65"H on all systems. Voi overheads not to be mounted on Accelerate stackers.

No limitation to the number of units on structural frames when units are spaced 12" apart and when the run is supported with return panels of equal height to the spine wall on each side of storage shelves or overhead storage cabinets.

**Storage shelf and overhead width** must correspond with width of panel(s). It is possible to span two panels when combined panel width equals cabinet or shelf width.

**Overhead Cabinets** can be mounted on a panel equal to or up to 18" narrower than cabinet.

Not applicable for ETA overheads, Voi overheads, and shelves.

# ABOUND® Electrical and Data

Abound® features capabilities for cable management, including electrical, voice, and data. The 8-wire electrical system can be integrated at base pathway and beltline. The open structure of the frame allows voice and data cables to be routed both vertically and horizontally.

## THE ABOUND ELECTRICAL SYSTEMS

Abound offers a choice of three electrical systems:

- Four-circuit, 3 + 1
- Four-circuit, 2 + 2
- Three-circuit, separate neutrals

All three systems utilize an 8-wire electrical system, rated at 20 amps per circuit (15 amps Canadian). See pages 486-487 for a detailed explanation of each electrical system.

Abound frames and electrical components are UL Listed. Electrical components are also CSA certified.

Installation and use of the electrical system, the number of receptacles used on a given circuit and connections to the building power supply should be in compliance with all local and national electrical codes.

**Caution: Electrical equipment cords or extension cords MUST NOT BE ROUTED through cable openings in frame sides.**

Abound's electrical harnesses are UL listed and are considered raceways themselves as defined by the National Electrical Code. This means there is no separation requirement between the electrical harnesses and communications cables per Sec. 800-52 of the National Electrical Code. Communication cables may be placed next to Abound's electrical components without a metal septum and will still meet the guidelines of the Telecommunications Industry Association for separation of power and data.

## IN-FEEDS

**Power in-feed cables** deliver power from building to system. In-feed cables are housed in conduit to separate electrical system from communications and data lines.

**Integrated power and communications poles** provide capacity for routing power supply directly through the top of any structural or stacking frame using same width trim/connector kit in place of top cap. Avoid glass or translucent tiles in upper position of frames with integrated power poles. Power pole has a cavity on each side of a center septum. When using a ceiling power in-feed, consider that the in-feed must connect into an electrical harness located in an adjacent panel. (See pages 488-489 for cable capacity.)

**Ceiling power in-feed** connects to a prewired electrical harness in the beltline or base pathway, traverses through an adjacent panel and terminates in the junction box at the top of the integrated power pole. For use with integrated power pole models HEP65 and HEP35. No portion of the flex cable can be exposed after installation.

**Sealtight base pathway power in-feed** attaches to a receptacle opening at the base pathway. A heavy rubber sheathing shields conduit, allowing in-feed to be exposed.

**Hardwire (New York Code) power in-feed** (model H871400) is used when local electrical codes require hardwire entry. When used in 24"W, 30"W and 36"W panels, power can be routed only in one direction. When used in 42", 48"W and 60"W panels, an electrical pass-thru cable or harness for that panel width can be used to route power back in the opposite direction. Unit must connect to a power or pass-thru harness positioned in the base pathway area of an adjacent panel. Customer to furnish all cabling and wiring from power entry to power source. Junction box can be positioned at any duplex receptacle location.

## HARDWARE (CHICAGO CODE) JUNCTION BOX

Wiring harnesses and snap connectors are not allowed in Chicago — base pathways must be comprised of all metallic components. Concealed mounting is the only option at beltline. For the base pathway, junction box (model HH873500) clips directly into receptacle locations. Customer must furnish conduit, wiring, standard duplex receptacles with metal covers for the beltline and designer-type receptacles for the base pathway. Power entry can be routed from the ceiling, via an Abound power pole, or from the floor into a junction box (model HH873500).

# ABOUND<sup>®</sup> Electrical and Data

## POWER

**Power blocks** on electrical power harness and pass-thru harness accept duplex receptacles.

**Electrical power harnesses** are used to distribute power in panels. Abound electrical can be located at base pathway or beltline only. Connectors at both ends of power harnesses allow power distribution in either direction.

**Electrical pass-thru harnesses** have capacity to handle one duplex receptacle on each side of the panel when exposed.

A 60" pass-thru harness can be used to jump up to a single duplex receptacle per side at beltline and connecting to a power harness at base pathway.

Electrical power harnesses and pass-thru cables cannot be routed at 90° at beltline once frames are connected to connector blocks.

**Electrical pass-thru cables** distribute power through any panel where receptacles are not required. Cable length cannot be stretched.

**Electrical jumper cables** connect power from base pathway or beltline to a harness located on any horizontal member as needed. Jumper cable plugs into power block end of electrical power harness or electrical pass-thru harness.

Model HH871366 is 66" to jump up to 30 inches vertically – base pathway to beltline or beltline to base pathway.

Jumper can also be used from beltline to adjacent beltline at 90° juncture.

## POWER BLOCKS

**Base pathway mounting:** Power blocks snap directly onto brackets in base pathway area.

**Beltline electrical mounting:** For ported receptacles at beltline mount power blocks onto Electrical Mounting Brackets which screw into the panel frame. Electrical Mounting Brackets must be ordered separately. Data/Electrical Port Tiles must be used where exposed receptacles will be located.

## RECEPTACLES

**Duplex receptacles** snap into power blocks of power harnesses or pass-through harnesses. Duplexes are available in multiple colors. Each receptacle is labeled to indicate which circuit it will be connected to.

**OPTIONAL STIFFENER SUPPORT**  
Stiffener supports can be used to provide additional rigidity to a panel when fabric tiles are on both sides of the frame. May also be used for routing power/data at non-standard heights.

**All electrical power harnesses and pass-thru harnesses** will stretch 3½", allowing them to span "T" and "X" intersections and "S" extended straight connections.

# ACCELERATE® Electrical and Data

Accelerate® features capabilities for cable management, including electrical, voice, and data. The 8-wire electrical system can be integrated at base pathway. See Systems electrical pages 499-504 for electrical models to be used with Accelerate® Systems products. See page 350 for Abound® frame horizontal and vertical wire capacity and page 489 for base pathway capacity.

# ACCELERATE® Electrical and Data

## THE ACCELERATE ELECTRICAL SYSTEMS

Accelerate offers a choice of three electrical systems:

- Four-circuit, 3 + 1
- Four-circuit, 2 + 2
- Three-circuit, separate neutrals

All three systems utilize an 8-wire electrical system, rated at 20 amps per circuit (15 amps Canadian). See pages 486-487 for a detailed explanation of each electrical system.

Accelerate panels and electrical components are UL Listed. Electrical components are also CSA certified.

Installation and use of the electrical system, the number of receptacles used on a given circuit and connections to the building power supply should be in compliance with all local and national electrical codes.

**Caution: Electrical equipment cords or extension cords MUST NOT BE ROUTED through cable openings in frame sides.**

Accelerate's electrical harnesses are UL listed and are considered raceways themselves as defined by the National Electrical Code. This means there is no separation requirement between the electrical harnesses and communications cables per Sec. 800-52 of the National Electrical Code. Communication cables may be placed next to Accelerate's electrical components without a metal septum and will still meet the guidelines of the Telecommunications Industry Association for separation of power and data.

## IN-FEEDS

**Power in-feed cables** deliver power from building to system. In-feed cables are housed in conduit to separate electrical system from communications and data lines.

**Integrated power and communications poles** provide capacity for routing power supply directly through the top of any connector. For use with integrated power pole models HECPP. No portion of the flex cable can be exposed after installation.

**Sealtight base pathway power in-feed** attaches to a receptacle opening at the base pathway. A heavy rubber sheathing shields conduit, allowing in-feed to be exposed.

**Hardwire (New York Code) power in-feed** (model H871400) is used when local electrical codes require hardwire entry. When used in 24"W, 30"W and 36"W panels, power can be routed only in one direction. When used in 42", 48"W and 60"W panels, an electrical pass-thru cable or harness for that panel width can be used to route power back in the opposite direction. Unit must connect to a power or pass-thru harness positioned in the base pathway area of an adjacent panel. Customer to furnish all cabling and wiring from power entry to power source. Junction box can be positioned at any duplex receptacle location.

## HARDWARE (CHICAGO CODE) JUNCTION BOX

Wiring harnesses and snap connectors are not allowed in Chicago — base pathways must be comprised of all metallic components. Concealed mounting is the only option at beltline. For the base pathway, junction box (model HH871500) clips directly into receptacle locations. Customer must furnish conduit, wiring, standard duplex receptacles with metal covers for the beltline and designer-type receptacles for the base pathway. Power entry can be routed from the ceiling, via an Accelerate power pole, or from the floor into a junction box (model HH871500). See Systems electrical pages 499-504 for electrical models to be used with Accelerate® Systems products.

## DUPLEX RECEPTACLES

For Duplex Receptacle models that can be used on Accelerate® panel systems, please see page 502.

All Systems electrical components can be found on pages 499-504.

### LIGHTING

**Task lights** can be recessed under storage cabinets or storage shelves.

Task lights in four sizes are available to correspond to cabinet or shelf width. They have 9' power cords in black, connected in the right rear corner. All models feature LED light strip for improved light quality. Task lights with a fused plug to meet Chicago electrical code are also available.

**Recommendation:** Provide a separate circuit for task lights for proper long-term operation without RF interference to computers that may be in use.

### LED TASK LIGHTS

No finish specification required. Attaches magnetically to underside of overhead storage, or attaches with provided screws.

Occupancy sensor attaches to a single or starter LED light and will automatically turn the light off after no motion is detected for 30 minutes.

Just like all the LED light models, the occupancy sensor features a soft-touch on/off switch. LED task lights have a lifetime of 50,000 hours and have a dimmer feature that allows the user to adjust the amount of light output.

Daisy chain options are available. To use the daisy chain application, must start with model HLED17A or HLED31A.

### VOICE/DATA RECEPTACLES

Abound not only provides space for large volumes of voice and data cables, it also offers several means of mounting commercially available voice and data components.

Commercially available modular data faceplates can be mounted in vacant base receptacle openings or can be mounted in data/electrical port tiles above or below the worksurface.

**Cable management troughs** attach to worksurfaces with provided screws. The graphite metal troughs are designed with cord access cut outs. These cut outs give users access to inside the trough without having to detach it from the worksurface.

# SYSTEMS ELECTRICAL SPECIFYING INFORMATION

**To Order:**

1. Determine which electrical system you will use after consulting your electrician and computer support personnel:

- **The Four-circuit system (4-Hot/2-Neutral/2-Ground)**
  - 3 + 1 option
  - 2 + 2 option
- **The Three-circuit system (3-Hot/3-Neutral/2-Ground)**

2. Determine location, quantity and circuit of duplexes.
3. Determine the appropriate choice and use of Isolated, Isolated/Dedicated and Separate Neutral circuits.
4. Specify appropriate Power Harnesses\* and Pass-Thru Cables.\*
5. Determine the location, quantity and type of Power In-feed needed.

\* Select Power Harness models (HH8712XX) and Pass-Thru Cables (HH8711XX) with the last two digits being 1" (or 2") smaller than the associate panel width.

## Electrical System Options

The four-circuit, eight-wire electrical system is widely specified and trusted by hundreds of thousands of end-users. This proven system delivers four circuits for every power in-feed in either a 3 + 1 or 2 + 2 configuration. The isolated/dedicated circuits are ideal for sensitive computing equipment, while the common circuits are suitable for faxes, copiers, task lights and other peripherals.

Both the 3 + 1 and 2 + 2 systems use the same pre-wired components, making it easy to adjust as electrical needs change.

You can also choose a three-circuit, eight-wire system that has a dedicated neutral for every hot circuit. The three-circuit components have model numbers with an "A" suffix and appear in a gray box in this pricer.

### Four-circuit, 3 + 1 Receptacle Option

The 3 + 1 option is the electrical standard used by The HON Company for many years in most of their systems products. This wiring option provides three utility circuits plus an isolated/dedicated circuit for more sensitive equipment.

### Four-circuit, 2 + 2 Receptacle Option

The 2 + 2 option is a wiring option that provides two utility circuits and two isolated circuits for more extensive computer usage applications.

# SYSTEMS ELECTRICAL SPECIFYING INFORMATION

## Three-circuit, separate neutrals

The Three-circuit, separate neutrals configuration is a wiring option that provides separate neutrals for each of the three circuits. Two circuits share a common ground, and one circuit is isolated/dedicated. The three-circuit components have model numbers with an "A" suffix and appear in a gray box in this pricer.

Two 8-wire, 20 AMP (15 AMP Canadian) electrical systems are offered

### Notes:

- Four-circuit components and three-circuit components (with suffix "A") cannot be used together.
- Components of the two systems are keyed differently to prevent components of one system from being connected to components of another system.
- HON Cat. Nos. are printed on the UL labels, and components are color-coded to provide visual identification of the different components.
- Four-circuit components have black plastic parts.
- Three-circuit components have rust-colored terminal ends and receptacle backs are rust colored.

# WORKING WITH CABLE MANAGEMENT

## Base Pathway Receptacle Locations

## Abound® Lay-in Cable Capacity

The top and base pathway allow continuous voice and data lines to run through and between panels without interruption. Lay-in is provided for environments where systems furniture or cabling are subject to frequent change. All capacities are for Cat 6 cable with a 0.25" diameter.

End View  
8 cables  
Top pathway accepts up to 8 voice/data cables (.25" dia.).

## Circuit Usage

### Strategy 1

#### Circuits to Equipment

Assign specific uses for each of the circuits:

- For example, in a four-circuit system:
  - Circuit 1* – Calculators, fans, etc.
  - Circuit 2* – Task lights (could be wired to wall switch)
  - Circuit 3* – Computer monitors
  - Circuit 4* – CPUs

### Strategy 2

#### Circuits to Workstations

Assign specific workstations to each of the three available circuits. Use circuit 4 for power-sensitive electronic equipment.

**Placement of pedestals and lateral files** may render some duplex locations inaccessible. Pedestal placement may also affect compatibility with pull-up receptacles.

## Abound® Lay-In Cable Capacity

Top View  
3 cables  
Variable height junctions accept up to 3 voice/data cables (.25" dia.).

## Abound® Cable Capacity

56 cables

Abound® base pathway accepts up to 56 voice/data cables (.25" dia.) (6.03 sq. in.) at 60% fill.

16 cables

When electrical system shares base pathway, the cable capacity in Abound is reduced to 16 cables (2.25 sq. in.). Cable quantities listed are at 60% fill ratio.

## Accelerate® Cable Capacity

56 cables

Accelerate® base pathway accepts up to 56 voice/data cables (.25" dia.) (6.27 sq. in.) at 60% fill.

12 cables

When the electrical system shares the base pathway, the cable capacity in Accelerate® is reduced to 12 cables (.25" dia.) (2.03 sq. in.) at 60% fill ratio.

66 cables with power

**Cable capacity of the power pole**, in addition to electrical in-feed is 2.79 sq. in. on one side and 2.91 sq. in. on the other for a total capacity of 66 cables with power of .25" diameter.

25 cables with power

**Integrated Power Pole:** 2" x 2" overall, 3.3" interior accommodates a total of 25 cables with power of .25" diameter. Available in two heights: 6'6" or 13', the power pole connects via the universal connector and the overall height is the sum of the connector and the power pole. Constructed of aluminum with a powder coat paint finish in the specified color. Power pole requires a Ceiling In-Feed.

**Ceiling In-Feeds:** UL listed as raceways. This means the electrical components are completely shielded and meet any requirements for separation of electrical components and communications cables per Section 800-52 of the National Electrical Code.

## Working with Worksurfaces and Supports

Worksurfaces are 1½" thick with particle-board core and with top surfaces finished in high-pressure laminate. Bottom surfaces are covered with a backer sheet.

Worksurface bracket kits support worksurface by attaching to an adjacent return panel the same width as the worksurface depth. Brackets allow one end of a worksurface to be supported by a panel return.

Cantilever brackets can be inserted into panel reveals in 1" vertical increments. Left or right handed. One size is used for both 24"D and 30"D worksurfaces. 18" Cantilever brackets are used for 18"D worksurfaces. DO NOT USE cantilever brackets at the end of a worksurface where no return panel is positioned or in worksurface runs longer than 72"W.

Wire management grommets are standard in most worksurfaces (unless "no grommet" worksurfaces selected).

Corner worksurfaces optimize use of space, and provide a convenient location for computer and monitor.

Flat brackets can be used to connect one worksurface perpendicular to another worksurface.

End-panel supports are used at the end of a run when no return panel is present. Straight worksurfaces adjacent to 120° connections must be supported by full end panels. Leveling glides provide 2¾" of adjustment.

Support legs are used to support worksurfaces only in a shared position.

**Primary worksurfaces** are available in 18", 24" and 30" depths. Nominal worksurface width is equal to nominal panel width. Other support hardware is ordered separately.

**Corner worksurfaces** with woodgrain laminate have grain direction diagonal to adjacent worksurfaces. All other support hardware is ordered separately.

**Wire management grommets** are standard in most worksurfaces. Worksurfaces less than 48"W have one grommet centered on edge of worksurface. Rectangular worksurfaces over 42"W have two grommets. Peninsulas have one grommet. Corner Worksurfaces have one grommet (one on each back edge). D-Shaped worksurfaces and countertops do not have grommets.

**Edgeband** is available on laminate tops in standard colors (customer specified) to match or complement solid, patterned, or woodgrain laminates.

## Working with Worksurfaces and Supports

**Optional width worksurfaces** are available for use with panel runs having a TEE or Extended Straight connection.

**Worksurfaces** can be configured at 29 1/2" with end-panel supports and support legs, or at various heights on 1" increments using specific product configurations.

**Worksurface support options include:**

- Open leg models
- Support column
- Flat brackets
- Worksurface bracket kit
- Cantilever bracket
- Universal support leg
- End-panel support
- Freestanding pedestal

**Other worksurface supports include:**

- Support columns
- External channel supports
- Support pedestals
- Pedestals with panel-to-pedestal bracket
- Desking freestanding shared leg

**Support Guidelines:**

- Unsupported panel runs greater than 72"W need floor support for improved stability.
- Worksurface bracket kit should be used to tie panels to worksurfaces for added stability.
- A panel run without a return needs a floor support.
- Unsupported worksurface spans of 60"W-84"W require an external worksurface support channel. It is recommended for 48"W-60"W.
- Cantilevers only to be used on worksurface runs 48"W or less.

**Worksurface bracket kit** allows one end of a worksurface to be supported by a return panel. Return panel width must be the same as the depth of the worksurface.

**Flat brackets** can be used to connect one worksurface perpendicular to another worksurface.

**Cantilever brackets** are left or right handed. They can be inserted into panel reveals in 1" vertical increments. One size is used for both 24" and 30"D worksurfaces. 18" Cantilever brackets are used for 18"D worksurfaces. Both left and right brackets are required in shared applications.

**Important:** Do not use cantilever brackets at the end of a worksurface where no 90° return panel is positioned.

- Do not use to support worksurfaces from which a hanging pedestal is suspended, or which a peninsula worksurface is attached.
- Do not use to support worksurfaces supported with permanent wall hanger kit.

**Universal support legs** are used to support worksurfaces only in a shared position.

**End-panel supports** are used in place of return panels at the end of worksurface runs. Straight worksurfaces adjacent to 120° connections must be supported by full end panels. End-panel supports are ordered for right- or left-handed application. Leveling glides provide 1/2" of adjustment.

# SYSTEMS

## Working with Worksurfaces and Supports

**Open Leg** models are used to support various worksurface configurations and include attaching hardware and leveling glides.

**D-Shaped, Peninsula and Jetty worksurfaces** require support columns (ordered separately).

**Countertops** are available in straight or corner configurations.

**Corner shelves** are available in Edgeband. Attachment brackets are included.

- Unsupported worksurface spans of 60"W-84"W require an external worksurface support channel. It is recommended for 48"W-60"W.

- Storage Cabinets with doors are standard with a factory installed core removable lock located on the underside of the cabinet.
- All units feature an anti-dislodgement device.
- Accepts under cabinet lighting.
- ETA overheads and shelves ship flat packed.
- Only one installer is needed to assemble an ETA overhead on a panel (all sizes).
- Attachment brackets are attached to the back of the unit (included).
- ETA overheads and shelves are slightly less deep than built-up models. Please note when using next to built-up models.
- Order overhead and shelf to match the width of panel being used.
- Units install directly onto panel frame verticals or to wall hanger kits.

❗ Keyed alike cores must be ordered separately — see page 673.

# OVERVIEW OF PERSONAL STORAGE AND PEDESTALS

## LATERAL FILES

### Advantages:

a) The most efficient means of conventional filing; b) Ideal for active filing in workstations, where higher volume capacity is necessary and retrieval is frequent

### Considerations:

2-drawer steel lateral files fit under standard-height worksurfaces when using panel systems.

## VERTICAL FILES

### Advantages:

a) Economical; b) The most widely used filing method; c) requires minimal floor space

### Considerations:

Vertical files are best suited for long-term storage, where retrieval is less frequent. For larger banks of files, lateral files are more space-efficient than vertical files.

## BOOKCASES

### Advantages:

a) These units are ideal for binders, reference books or other items; b) Available with your choice of fixed or movable shelves

### Considerations:

If working with panel systems, it is more attractive to specify units that are lower than the panel height.

## FILING TECHNIQUES

Type	Standing Files	Hanging Files
Advantages	Inexpensive. Uses existing file folders.	Easier organization and identification of the file folders. Files viewed from top. Remaining files hold their place when folders are removed. Easier to re-stock.
Requirements	Follower block or Dividers	Hangrails or high-drawer sides
Can be used in	<ul style="list-style-type: none"> <li>Vertical files (front-to-back only)</li> <li>Lateral files (side-to-side only in drawers)</li> <li>Shelf files (side-to-side only)</li> </ul>	<ul style="list-style-type: none"> <li>Vertical files (front-to-back only)</li> <li>Lateral files (front-to-back or side-to-side in drawers)</li> </ul>

# CONTAIN® DIGITAL LOCK SPECIFICATIONS

## Digital Keypad Lock Specification Information for Contain® Pedestals, Credenzas, Personal Files, Lateral Files, and Towers

Right-Hand Keypad Lock

Left-Hand Keypad Lock

The digital keypad lock option helps modernize the workspace by eliminating the need to carry physical keys. The digital lock feature provides an alternative to standard lock and key, allowing users to simply input a code to unlock their Contain® storage unit. The digital keypad also supports shared applications where workstations or storage units support multiple users. These locks ship in “shared mode” by default; shared mode indicates that the lock will “forget” the paired 4-digit code after the lock is opened, allowing the unit to be used by multiple users.

❗ Order at least one Programming Key and Manager Key per install.

### Digital Keypad Locks:

- Offered on all Contain® pedestal and undermount models.
- Ship factory installed.
- Offered in a brushed nickel finish.
- Digital keypad lock requires input of a user-selected 4-digit code.
- Digital keypad locks are powered using 2 premium lithium CR2032 batteries.
- Battery life is dependent on the frequency of operation but can last up to 5-7 years.
- **Every digital keypad installation site will require one Programming Key and at least one Manager Key, sold separately.**

### Programming Key

- A Programming Key is a device used to initialize locks out of factory default mode and register Manager Keys to the locks.
- Only one Programming Key should be specified per installation site because multiple Programming Keys are not compatible with each other.
- Add-on digital lock orders should be programmed with the original Programming Key.
- Programming Key is the same key as Contain® Digilocks and can work across both Contain® and Fuse™.

### Manager Key

- A Manager Key is used to bypass a locked unit; this operates as the “master key” and it is recommended that building facilitators have at least one Manager Key.
- Up to 6 Manager Keys may be registered to each lock.
- Manager Keys provide external power to locks in case of battery failure.

# CONTAIN® DIGITAL LOCK SPECIFICATIONS

## Digital Keypad & RFID Lock Specification Information for Contain® Lockers

Keypad Lock Pull

RFID Lock Pull

The digital keypad and RFID lock options support applications where workstations or storage areas are shared by multiple users. This is an alternative to a standard lock and key. This feature facilitates the use of storage by multiple users through eliminating the need to keep and hand-off physical keys. These locks ship in “shared mode” by default; shared mode indicates that the lock will “forget” the paired 4-digit code or RFID badge after the lock is opened, allowing the unit to be used by multiple users.

❗ Order at least one Programming Key and Manager Key per install.

### Digital Keypad & RFID Locks:

- Offered on Contain® lockers.
- Ship factory installed.
- Integral Pull/Lock design replaces a specified pull on eLock models.
- Offered in a polished silver finish.
- Digital keypad lock requires input of a user-selected 4-digit code.
- RFID lock requires a compatible RFID card or sticker.
- Digital keypad locks and RFID locks are powered using 4 premium AA batteries.
- Battery life is dependent on the frequency of operation but can last up to 5-7 years.

RFID locks require user to present a compatible RFID card or sticker to the lock in order to gain access. This is the same technology as “badge” systems that allows employers to grant employees with cards that can be scanned to gain access to entrances and buildings. HON locks *may or may not be* compatible with these existing badge systems.

- For existing RFID badge system compatibility, badges must operate on a 13.56 MHz frequency with both iClass (ISO 15693) and Mifare (ISO 14443).
- If existing badge system is not compatible with 13.56 MHz frequency, compatible RFID badges or RFID stickers are sold separately as an accessory model.

RFID lockers are available in Shared Use and can not be assigned a specific RFID card to permanently access the lock. Instead, the lock is assigned to the last RFID card that was used to lock it. Once a card is used to lock the unit, only that card can then be used to unlock it. After it is unlocked, the lock will then be unassigned until the next RFID card is used to lock it. Similar to how normal gym lockers would work.

RFID Lock Pull

RFID Cards

### Digital Lock Accessory Models (page 591)

- RFID-compatible cards and stickers are sold as accessory models in increments of 5, 25, or 100.
- RFID cards are plain white and have a lanyard cut.
- RFID stickers are plain white, approximately 1” in diameter and may be added to the back of an existing badge or employee identification card.
- **Every digital keypad or RFID installation site will require one Programming Key and at least one Manager Key, sold separately.**

### Programming Key

- A Programming Key is a device used to initialize locks out of factory default mode and register Manager Keys to the locks.
- Only one Programming Key should be specified per installation site because multiple Programming Keys are not compatible with each other.

# FUSE™ DIGITAL LOCK SPECIFICATIONS

## Digital Keypad Lock Specification Information for Fuse™ Pedestals

Keypad Lock

The digital keypad lock option helps modernize the workspace by eliminating the need to carry physical keys. The digital lock feature provides an alternative to standard lock and key, allowing users to simply input a code to unlock their Fuse™ storage unit. The digital keypad also supports shared applications where workstations or storage units support multiple users. These locks ship in “shared mode” by default; shared mode indicates that the lock will “forget” the paired 4-digit code after the lock is opened, allowing the unit to be used by multiple users.

❗ Order at least one Programming Key and Manager Key per install.

### Digital Keypad Locks:

- Offered on all Fuse™ pedestal and undermount models.
- Ship factory installed.
- Offered in a brushed nickel finish.
- Digital keypad lock requires input of a user-selected 4-digit code.
- Digital keypad locks are powered using 2 premium lithium CR2032 batteries.
- Battery life is dependent on the frequency of operation but can last up to 5-7 years.
- **Every digital keypad installation site will require one Programming Key and at least one Manager Key, sold separately.**

### Programming Key

- A Programming Key is a device used to initialize locks out of factory default mode and register Manager Keys to the locks.
- Only one Programming Key should be specified per installation site because multiple Programming Keys are not compatible with each other.
- Add-on digital lock orders should be programmed with the original Programming Key.
- Programming Key is the same key as Contain® Digilocks and can work across both Contain® and Fuse™.

### Manager Key

- A Manager Key is used to bypass a locked unit; this operates as the “master key” and it is recommended that building facilitators have at least one Manager Key.
- Up to 6 Manager Keys may be registered to each lock.
- Manager Keys provide external power to locks in case of battery failure.

# STORAGE ISLANDS SPECIFYING GUIDE

## Top

Available in single depth (18") or double depth (36") surface.

- Select dimensionality based on configuration and the number of undersurface units being spanned.

## End Panel

Specified in both 18"D and 36"D applications to conceal the sides of storage units.

## Septum

Specified only in double depth (36") applications. Laminate septum designed to cover the back of storage units and create a clean countertop application. Septum must be connected to end panels or an adjacent septum.

## Back

Specified only in 18"D configurations to conceal the back of storage units.

## Specifying Islands Top

1. Select top depth.
  - Single (18") or double (36")
2. Select desired Islands configuration.
  - Top only
  - Top + End Panels
  - Top + End Panels + Back or Septum
3. Determine top width.
  - Identify the number of side-to-side storage units the top will cover. This number represents the number of **spans**.

\* Note: Front-to-back units do not factor into number of spans. Although top or end panels accept a septum, it is not required to add septum based on application.

## Specifying End Panels, Back, or Septum

4. Identify storage units Islands will wrap. This determines correct height.
  - Contain® Height = 40<sup>4</sup>/<sub>8</sub>"
  - Flagship®/Brigade® Height = 38<sup>4</sup>/<sub>8</sub>"
5. Specify additional components to complete your Islands configuration.
  - End panels, back, or septum
  - The width and number of units spanned on the septum must match the width and number of units spanned on the top.

## Peninsula Applications

Specify an O-Leg or laminate return panel to create an open span collaboration space.

\* Note: Under-surface storage must support at least one side of the open span.

O-Leg

Return Panel

## O-Leg & Return Panel

Specified to support open span top in Islands peninsula configuration.

# STORAGE ISLANDS SPECIFYING GUIDE

## WORKING WITH STORAGE ISLANDS WITH CONTAIN® OR FLAGSHIP®/BRIGADE® PRODUCT LINES

Storage Islands come in 2" height variances designed to be used with Contain® or Flagship®/Brigade® product lines. Worksurfaces and end supports are made of 1¼" particleboard with 2mm edgeband and laminate on both sides of all surfaces. Center septums are made of ¾" particleboard with 0.5mm edgeband and laminate on both sides.

Width

Depth

	Depths
18"D No Back, No End Panels	18.19
18"D No Back, With End Panels	18.44
18"D Back and End Panels	19.455
36"D No Back, No End Panels	36.69
36"D End Panels	

End Panel Sizes		
	Depths	Height
18"D No Back, Contain®	18.19	40.8
18"D No Back, Flagship®		38.8
18"D With Back, Contain®	19.20	40.8
18"D With Back, Flagship®		38.8
36"D End Panels, Contain®	36.44	40.8
36"D End Panels, Flagship®		38.8

### Countertop Application

- When specifying a countertop application, the end of a septum cannot be left open. The septum must connect to an end panel or adjacent septum.

### Peninsula Application

- Peninsula applications can only be completed with 36"D worksurfaces and end panels.
- Back-to-back storage specified without an end panel will result in an ~3/8" gap between storage units.
- In a peninsula application, one end of the worksurface must be supported by undersurface storage. The opposing end can be supported with an O-leg or laminate end panel.

- Unsupported surface runs greater than 54"W require the installation of an external stiffener.
- External stiffener extends 1½" below the worksurface.
- For 36"W surfaces, 2 external stiffeners are needed on the underneath side of the worksurface.

	Width Sizes						
	S1	S2	S3	S4	S5	S6	S7
No End Panels	84.00"	S1 + 0.125	S1 + 0.25	S1 + 0.375	S1 + 0.5	S1 + 0.625	S1 + 0.75
1 End Panel	85.372"						
2 End Panels	86.744"						

\*S1 spans a single storage unit, which is noted at the end of the model number. Start with the S1 number displayed in the table above. Depending on your Islands configuration, the top width increases accordingly based on the 2 factors below.

- The number of end panels you attach to the worksurface.
- The number of side-to-side storage units the surface spans.

#### NOTES:

- Use the width of the worksurface you select. Models correspond to the correct surface width.
- Span represents the total number of side-to-side units. Front-to-back units do not factor into number of units spanned.

# INTERLINK IQ ELECTRICAL

## Specification guide for IQ Electrical on Training tables

Determine table width, the type of power access being used (3" grommet or 4x8 pop-up) and the desired number per table (Columns 1, 2 or 3). The table will then identify the type and quantity of components needed per table along with the maximum table run. Note that this is in addition to the Power base in-feed which is needed for each run. For example, a 48"W table with two 3" power grommets per table will require (1) HQH5-3 harness and (1) HQH1-3 harness per table with a maximum run of four tables.

# 4-TRAC HARDWIRE ELECTRICAL SYSTEM

## 4-Trac Electrical System

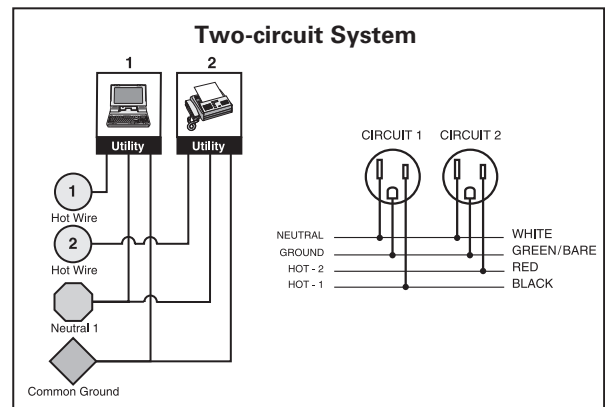

The 4-Trac Electrical System is a UL-recognized Manufactured Wiring System that seamlessly passes power from one worksurface to another. This low-profile non-sequential electrical system allows tables to be “daisy-chained” together in any desired order and allows users to reconfigure quickly due to simple connectable/disconnectable links.

- Meets requirements of UL 183 and National Electric Code Article 604
- 4-Wires, 2-circuits, 20 Amps each (Circuit 1 and Circuit 2 only)
- 13 Duplex Receptacles per circuit, 26, 15 Amp Duplex receptacle per power in-feed
- Electrical system attaches directly to underside of worksurface with included brackets
- Up to twelve tables can be linked together

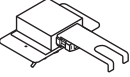

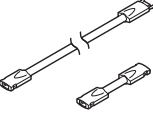

## Steps for Electrical Specifications:

- Determine how many rows of tables are needed and order the following:
  - One HMAPLATE per row (or power in-feed)
  - One HMAPOWER48 per row (or power in-feed)
- Order one power harness per table in each row
  - For 1-6 tables in a row (see illustration 1)
    - Order Circuit 1 Power Harnesses (ex. If powering six 24x60 tables order six sets of HMAPOWER60)
  - For 7-12 tables in a row (see illustration 1)
    - Order Circuit 1 Power Harness for first six tables and Circuit 2 Power Harness for remaining tables (ex. If powering eight 24x60 tables, order six sets of HMAPOWER60 and two sets of HMAPOWER602)
- Order one set of ganging hardware per table (ex. HMAGANG)
- Determine which accessories are needed:
  - Power Hub model HGRMTAC — to access power at worksurface.
  - Data Grommet model HGRMTDATA — to access data at worksurface.
  - Wire Management strips model HBTMS — for vertical and horizontal wire management.

# INFORMATION ON ORDERING PARTS

When parts are needed to repair HON products, the following guidelines should be followed to expedite the process.

1. Warranty orders are submitted on the Website at hon.com via the Quick Claim tool.
2. There are no discounts applied to parts. Pricing quoted is the net value. Parts pricing is subject to change without notice.
3. For a part not covered by warranty applicable shipping charges will apply.
4. All keys are \$6.00 each plus a shipping and handling fee of \$3.00 per shipping location.
5. Parts may be paid for with an approved credit card. Approved Cards: MasterCard, VISA and American Express.
6. Payment terms for invoiced parts are Net 30 days.
7. Due to short leadtimes on parts, no changes will be accepted after the order has been placed.
8. When placing a **warranty** parts order:

**If the product is under warranty, the product serial number must be provided.** Most finished goods products have a serial number placed on them at the factory. The label containing the serial number is located:

**Vertical Files** — right side of the uppermost drawer

**Lateral Files** — left side of the uppermost drawer or shelf

**Desk Towers** — outside of top drawer

**Desks, Credenzas, & Returns** — on the outside, kneespace side of the top drawer. Fully extend the drawer to find it.

**Desks, Credenzas, Corner Units, Bridges, Peninsulas & Returns without drawers** — underside of top

**Tables and Stands** — underside of the top

**Table Trucks** — underside of side rail

**Cabinets & Bookcases** — left inner side of the case

**Modular Component Top and Backs** — underside of top

**Modular End Panels** — top inside surface

**Reception Stations** — top inside surface of back panel

**Organizers** — top inside surface of left end panel near back panel

**Vertical Paper Manager** — back panel inside surface near top

**Pedestals** — bottom drawer right side exterior

**Seating** — underside of the seat

**Panels** — underside of the top cap

**Hutches, Storage Units, Overhead Storage** — underside of the shelf

**Hanging Bookshelves** — underside of shelf

NOTE: Removal of the serial number tag from the product voids the warranty.

#### **An important note regarding Product Serial Numbers:**

HON desks, tables, chairs, files and systems components are tagged with a serial number. This number helps us identify *when and where your product was made*, and to identify and correct the root causes for the problem. **NEITHER THE DEALER NOR THE CONSUMER SHOULD REMOVE THIS TAG UNDER ANY CIRCUMSTANCES.** To do so immediately voids your Warranty coverage for that particular item *and prevents us from further identifying it.* Instead, please transcribe the number and call your Dealer.
