

Allsteel Unveils Expansion of Gunlocke Stratawood™ Reconstituted Wood Veneer Collection

Chicago, IL. April 8, 2024 – Allsteel announces Gunlocke's expansion of the Stratawood™ reconstituted wood veneer collection. Gunlocke, a leader in genuine wood veneer craftsmanship, introduces two new grain patterns and an array of twenty exquisite finishes, further enhancing visual continuity between natural cut veneer and laminates

Crafted with a focus on sustainability and sophistication, the Stratawood collection is sourced from FSC certified trees, ensuring a commitment to responsible forestry practices, without compromising on quality. By harnessing the potential of rapidly renewable, plantation-grown trees, Gunlocke has created a product that minimizes environmental impact through responsible growth, sourcing, and replenishment processes.

The expanded Stratawood collection will initially be available exclusively for the Silea™ desking and casegoods and Briefing™ tables collections. Additionally, the collection complements Gunlocke's existing range of natural veneers, offering endless possibilities for customization and design versatility.
