Inspiring
Spaces

Designing Intentionally

Thoughtfully designed spaces are the foundation of work culture and user experience. The physical workplace is an embodiment of a company's values and the people that work within it. It is where individuals and teams thrive, whether working together or alone, to achieve business goals and build community.

With a blank canvas, you can create various spaces for teamwork, socializing, and focused work. Allsteel offers high-performing architectural solutions to meet your needs.

This collection of Idea Starters provides a visual representation showcasing the importance of supporting individuals, teams, and the organization through typologies we refer to as solo, team, community, and living in beta. Allsteel Architectural Products can inspire your space and are just the beginning of what can be created.

Our Approach

Human-Centric

Offering comfortable, healthy, and productive work environments. Holding strong sustainability initiatives with a better portfolio, impact, and experience for the people and the planet.

Co-Solutioning

Working together alongside the dealer and client, creating winning solutions. Moving to a place where strategy can meet product application while being executed and scaled with technical design.

Versatile Design

Cohesive furniture and wall solutions aligning with market trends. Product designs, materials, and partnership brands that are adaptable and meet the needs of the changing workplace.

Aspect™

Aspect demountable walls seamlessly blend the simplicity of a storefront solution with the efficiency of stick-built construction, creating sophisticated environments.

Embodying a minimalist aesthetic, the portfolio features a streamlined look with all-glass surfaces and subtle trim lines.

Aspect walls use 1/2" frameless glass and specialized gasketing to effectively block and contain sound.

Key features:

- Minimal Aesthetic
- Single-Source Vendor
- Strong Acoustic Performer

This comprehensive solution includes trim, glass, doors, and hardware, backed by a reliable warranty and swift turnaround due to Allsteel's domestic manufacturing.

Products

Beyond®

Beyond demountable walls offer a wide breadth of seamless solutions, ensuring uniformity across your project. With an expanded product family, Beyond also offers Beyond Freestanding and Beyond Viz for unique solutioning.

Choose from a variety of door types, hardware, and materials to tailor your space to your specific needs. Beyond is crafted to meet your design needs and enhance experience.

The installation process is streamlined with fully unitized, factory assembled panels and a scissor-lift leveling mechanism, reducing design complexity and minimizing disruption.

Key features:

- Ease of Installation
- Design Flexibility
- Manage Change

These walls feature frameless, framed, and solid panel types; integrated technology options; and pre-engineered brackets for furniture integration, resulting in extensive design possibilities.

Solo

Intentionally arrange environments in open and closed areas for varying solo activities.

Nurturing an environment for problem solving starts with designing an environment that works with its user. Creating spaces that uniquely support solo activities can reduce distractions, boost concentration, and inspire innovation. Architectural Products that harmonize with user needs create endless possibilities, solving problems with people, not just for them.

Heads-Down Hotspot

Touchdown

Implement shared touchdown spaces adjacent to workstations and offices for individuals to tuck away for focus time.

- 1 Effectively block and contain sounds with Aspect and its uniquely engineered gasketing within the trim.
- 2 Sleek frameless glass allows for natural light and visibility to enhance culture and wellbeing.
- 3 Pair with cohesive Allsteel furniture for a holistic solution.

Team

Thoughtfully design shared spaces that enable collaboration and innovation within the organization.

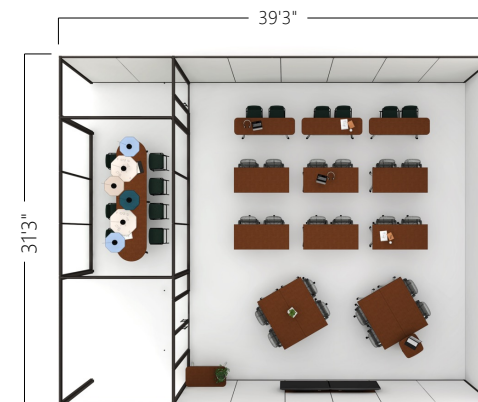

Fostering a sense of unity begins with designing spaces that support collective effort and synergy. By creating an environment that encourages mentoring, collaboration, and communication, we build team environments that promote positive work culture and long-term commitment.

Architectural Products that align with team dynamics can transform how groups work together.

Learning and Development

Training Room

Design your space with demountable walls that support learning, development, and mentoring.

- 1 Integrated technology on Beyond walls enables information sharing for effective collaboration.
- 2 Intentionally design floorplates for adjacent meeting and debriefing space.
- 3 Furnish your space with a layout that can be easily rearranged to support the unique needs of the users.

Living in Beta

Create a workplace design that supports the work of today and anticipates the work of tomorrow.

Designing with a spatial kit-of-parts that can be installed and reconfigured allows for flexibility and adaptability as functional needs change. Using Beyond panels creates infinite spaces to unleash your inspiration with agile spaces. Adaptive workspaces support growth in business, maximizing functionality. Choose products that as your organization changes the space is ready to change with you.

Technology and the ever-evolving business dynamics have impacted how and where we work. Workplaces should be designed to evolve with changing worker needs and expectations. Using a spatial kit-of-parts design strategy allows you to design with a Living in Beta philosophy.

A beta program's process is a long-term solution that incorporates the same milestones as a typical project but goes further by planning a cadence of future check-ins and mini refreshes. Using reconfigurable and demountable solutioning allows for multiple design options installed within a space.

Key Benefits:

- Sustainable Solutioning
- Scalable Circularity
- Infinite Reconfigurability

Living in Beta is about user experience and optimization. Demountable walls save time for interior design time and provide cost-effective, sustainable solutions compared to traditional construction. Living in Beta with demountable walls provides a positive impact on users, the design process, and the workplace ecosystem.

One Kit, Infinite Spaces

Private and Collaborative Areas

Configuration 1

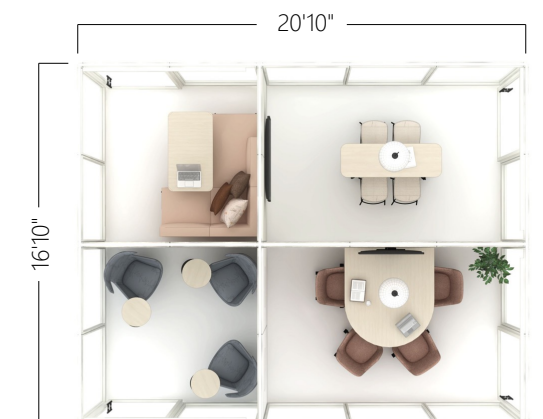

This application provides private offices, team areas, and booths. Enclosed rooms support both individual and group work, balancing solo and community.

Office and Lounge Flexibility

Configuration 2

By removing two interior walls, the space adapts to different team sizes and workstyles. This configuration allows for multi-purpose spaces and more informal postures.

One Kit, Infinite Spaces

Huddle and Conference Environment

Configuration 3

By removing an additional interior wall, this layout supports larger gatherings and enhances group collaboration, complemented by two adjacent huddle rooms.

Semi-Open Dynamic

Configuration 4

When exterior walls come down, an open collaboration area is created, defined by a central wall. Dynamic and interactive teams thrive here.

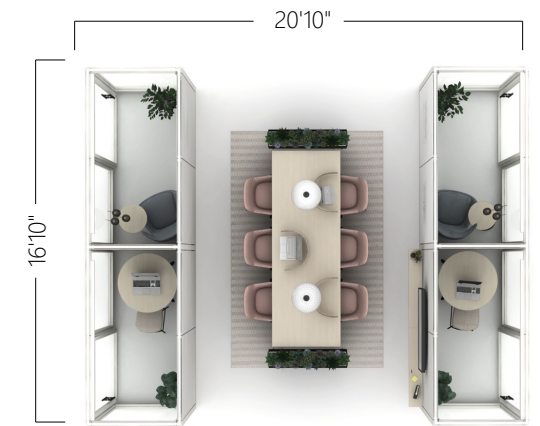

One Kit, Infinite Spaces

Focal Workstation Zone

Configuration 5

Opening an aisle for heads-down spaces and adjacent work zones provides privacy in an open setting, catering to those needing minimal distractions.

Ultimate Community Corridor

Configuration 6

Exterior walls create an active corridor for team collaboration and ample storage. Surrounding walls anchor agile seating for spontaneous or planned interactions.

Designed to do more.

Transforming spaces for the better, in a collaborative and human-centric way, for real people and their ambitions.
