smart business partner

Unified Cloud Connection

From the MFD's control panel, you can upload to or print from various cloud-based services. Apps for these services can be installed on the MFD via Sharp's Application Portal, and update alerts ensure that you're always using the latest versions. Single sign-on gives you easy access to your chosen cloud services—no need to re-enter credentials each time you reconnect to the same service. The MFD also supports Microsoft Entra ID, a secure cloud-based service for managing identities and controlling device access. Token-based authentication gives you safe and easy access to any Microsoft service with a single login.

Solid Security

The BP-71M55 has multiple levels of security to keep the device—and your precious data—secure. When booting up, the MFD checks for any anomalies in the BIOS firmware. If it finds a problem, it aborts the startup and launches an automatic BIOS recovery. If there are other firmware-related issues, the MFD will attempt recovery to protect the system.

Link Mobile Devices

Mobile devices installed with the Sharpdesk Mobile application can connect directly to the MFD for printing or downloading scanned data. The MFD also supports AirPrint and the Sharp Print Service Plugin. It's a smoother way to get the job done.

Online Firmware Updates

The MFD's firmware can be automatically updated—without the need for service operation—via a firmware update service. That way you're always using the latest system for your MFD.

My Folder Print

With the My Folder Print feature, print jobs are saved on the BP-71M55 in a personal folder that's like a private mailbox. A folder is created automatically based on information from the PC that sent the print job. Before printing out a document, you can preview print data at the MFD's control panel and avoid printing errors or mix-ups.

Eco-friendly Design

Sharp has applied its advanced eco technologies across all areas of the MFD. Designed for energy efficiency, the MFD boasts an impressively low ENERGY STAR® TEC value. The MFD's main body is made from approximately 50% recycled plastic, and its packaging uses recyclable paper-based materials instead of polystyrene foam.

10.1-inch Full-flat Touchscreen

With a variety of functions accessible via simple, intuitive icons, MFD operation is smooth and easy. The control panel shows the state of your MFD, displaying current operation and notifications for things like paper, toner, and maintenance.

High-performance DSPF

The DSPF (duplex single pass feeder) scans both pages of two-sided documents in one pass—in batches of up to 300 sheets. With scanning speeds of up to 300 opm* (two-sided), the MFD is quick to finish even large jobs. The DSPF stops automatically when sheets are not fed in straight. And with the right option, it can also stop when two or more sheets are fed at once. A dedicated business card feeder on the DSPF scans batches of up to 150 cards.

Smart Scanning

Simply tap the Auto Set button and the MFD will automatically determine the optimal resolution, gradation, and compression rate for your scan jobs. It also automatically reorients pages right side up and corrects any skewed sheets.

All the Needed Finishing Options

The BP-71M55 meets all common office needs with a variety of finishing options—from stapling to punching to folding. You get seamless output from printing to finishing.

*Originals per minute; when feeding A4 sheets.

PROFESSIONAL-QUALITY IN-LINE FINISHING OPTIONS

A range of finishing options work to automate time-consuming finishing tasks. Options are available to suit a variety of workplaces and applications.
