## Beyond smart work

smart **b**usiness **p**artner

# More than just smart solutions

Sharp's document business has been leading the way for over 50 years. In that time, we have adapted smartly to meet evolving needs and changing work styles. Our current lineup of document solutions caters to almost any office or business—covering everything from basic print and copy needs to high-speed, high-volume production.

As working styles continue to evolve, people expect to connect with each other from any location, at any time—and with peace of mind. That's why our Multi-Function Devices and Printers are built to ensure seamless and secure connection. Sharp uses the latest technology to boost productivity and improve business operations, while keeping sustainability front of mind. It all points to a better future for business and society.

## Smart

Using the latest technology to complete tasks efficiently, while interacting seamlessly across time and space—that's the key to maximum value.

## Secure

Information is vital to any business and must be safeguarded with the utmost security—that's the key to driving business.

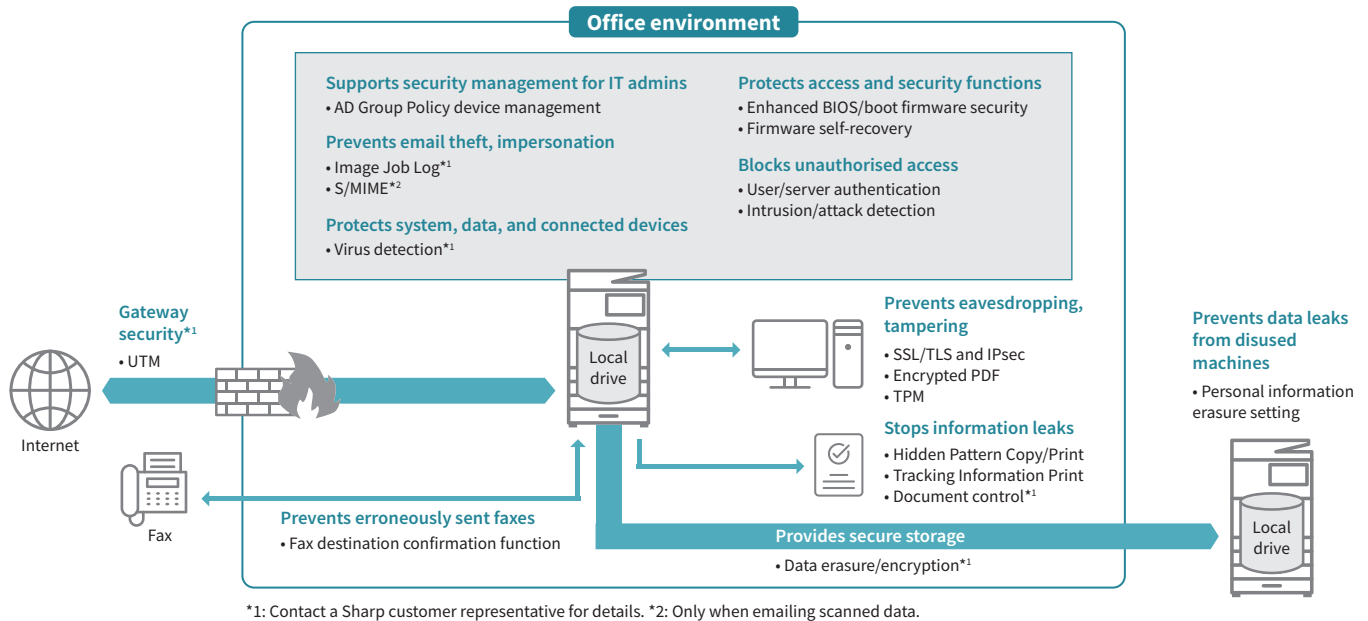

## Eco-friendly

Doing our part for the environment by conserving energy and resources is essential in any workplace—that's the key to a sustainable future.

## SEAMLESS SECURITY

With advancements in information technology come threats such as computer viruses, information leaks, and unauthorised access. Dealing with these wide-ranging threats is one of the most pressing issues for business today—which is why MFDs should be treated the same as other IT equipment. Sharp MFDs reduce all sorts of security risks by, for example, blocking unauthorised access and preventing information leaks from printouts or storage media. Now's the time to build a safer and more secure business environment with a Sharp MFD.

### BIOS/Boot Firmware Security

When booting up, the MFD checks for any anomalies in the BIOS/boot firmware. If it finds a problem, it aborts the startup and launches an automatic BIOS recovery\*. If there are other firmware-related issues, the MFD will attempt recovery to protect the system.

### Virus Detection\*

Using the Bitdefender scan engine, the MFD defends against virus attacks on itself and connected devices. It scans for viruses and prevents the MFD from transmitting them to other devices like laptops and PCs.

\*Requires optional BP-VD10L

### Online Firmware Updates

The MFD's firmware can be remotely updated—without the need for service operation—via Sharp's firmware update service, so you're always using the latest system for your MFD.

### AD Group Policy Device Management

Group Policy enables centralised management of Windows PC settings within an Active Directory (AD) domain. System administrators can use it to simultaneously configure printer, proxy, and security settings for users and PCs.

#### Server Authentication

The MFD supports external server authentication functions such as LDAP and Active Directory. With centralised management of multiple user credentials, system administrators can track usage of multiple MFDs.

#### Microsoft Entra ID

The MFD supports Microsoft Entra ID, a secure cloud-based service for managing identities and controlling device access. Token-based authentication gives you safe and easy access to Microsoft services.

#### Image Job Log\*

This function creates and externally stores an image file (PDF) and a log file (XML) for each job. This helps identify unauthorised use of the MFD.

\*Contact a Sharp customer representative for details on activating this function.

#### S/MIME\*

The MFD supports email encryption and digital signatures. Sending emails in encrypted format keeps data from leaking. It also prevents someone from masquerading as the sender or altering the content of an email.

\*Only when emailing scanned data.

#### Data Encryption / Automatic Erasure\*

Job data is encrypted before being saved to the MFD's internal storage. Once the data is output or sent, it is automatically erased.

\*Contact a Sharp customer representative for details on activating this function.

#### SSL/TLS

SSL/TLS certificates encrypt transmitted data to prevent leakage and tampering, while ensuring that data is transmitted privately.

#### Trusted Platform Module

TPM is an industry-standard chip that uses cryptoprocessor technology to protect hardware such as MFD hard drives.

#### Document Control

This function prevents unauthorised use of confidential documents\* by embedding copy-prevention data in them.

\*May not work with certain types of paper, documents (such as those with a lot of photos), or MFD settings. Contact a Sharp customer representative for details.

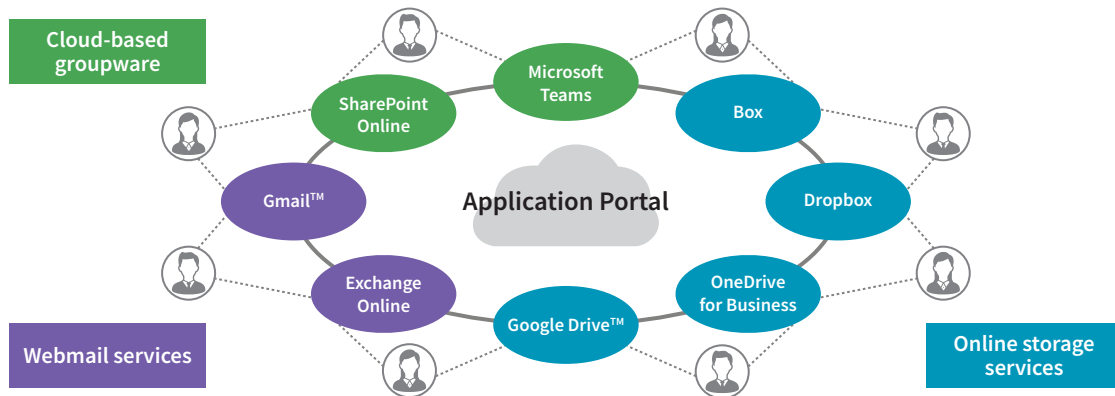

Requires optional BP-FR12UL

#### Personal Information Erasure

Personal information and other data can be erased when it's time to replace the MFD, preventing the leakage of confidential information.

## CONNECT ANYTIME, ANYWHERE

As flexible work styles become more common, teams need easy access to both digital and paper-based information—wherever they are. Sharp MFDs help streamline collaboration by letting you quickly scan documents and upload them to cloud services for sharing. Swiftly linking the MFD with mobile devices makes it easy to access files and keep workflows moving. Now's the time for smart information sharing, with a Sharp MFD.

### Cloud Storage Connection

From the MFD's control panel, you can upload to or print from various cloud-based services\*. Whether you're in the office or on the go, you can easily access and share information quickly. Smooth data sharing across your organisation leads to more efficient operations. Apps for these services can be installed on the MFD via Sharp's Application Portal, and update alerts ensure that you're always using the latest versions. Single sign-on gives you easy access to your chosen cloud services—no need to re-enter credentials each time you reconnect to the same service.

\*Contact a Sharp customer representative for details.

### Mobile Print\*

Sharp MFDs and printers support popular mobile printing services such as AirPrint and Sharp Print Service Plugin.

\*Contact a Sharp customer representative for details. BP-56C/BP-51C series requires optional MX-PK13L

### Sharpdesk Mobile

Mobile devices installed with this print/scan app can connect directly to the MFD for printing or downloading scanned data. To connect, simply hold your mobile device over the MFD's NFC tag or scan the MFD's QR Code.

Some functions may require optional equipment, depending on the MFD model.

## SMOOTHER ADMIN WORKFLOW

Sharp MFDs make life easier for system administrators by supporting a range of management tasks. The seamless functionality of our MFDs brings a new level of control and convenience. Along with connection to mobile devices and external cloud services, Sharp MFDs boast an array of smart functions to boost your workflow.

### Print Release\*

This lets you send documents to the main MFD, which acts as a server and stores them for printing out from any other compatible MFD on the network. This function comes in handy when the main MFD is in use or under maintenance, letting you finish your job with minimal waiting.

\*Contact a Sharp customer representative for details on the recommended maximum.

### Remote Operation\*

Using the Sharp Remote Front Panel feature, helpdesk and admin staff can access and control the Sharp MFD from a remote PC workstation.

\*Requires VNC application.

### Microsoft Print Platform

The MFD supports Microsoft Modern Print Platform including Universal Print\* and driverless printing with the Sharp Print Support Application (PSA).

\*BP-56C/ BP-51C series requires optional MX-PK13L

### Sharp OSA (Open Systems Architecture)

Linking MFD functions with third-party applications automates entire tasks, covering everything from input and processing to output, and boosting work efficiency.

\*BP-56C/ BP-51C series requires optional BP-AM10L and/or BP-AM11L

# STREAMLINE DAILY OFFICE TASKS

When you're on the go and away from your usual desk, there are only so many paper documents you can keep on hand. To solve this problem, use an MFD to scan paper-based documents into digitised form. That way, they're easy to share with others working remotely. The MFD also lets you use text from paper documents as digital data. Now's the time to improve efficiency by embracing new ways of working.

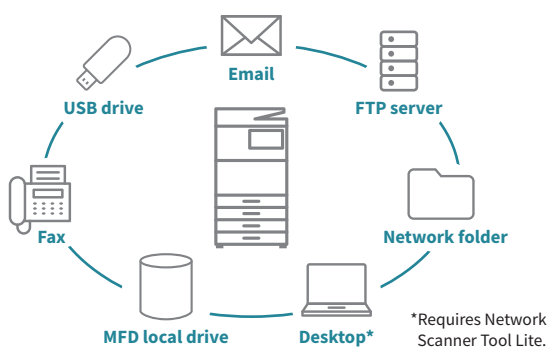

## Easy Scanning

Tap on the LCD touchscreen's Auto Set button to have the MFD perform a host of actions automatically. It can skip blank pages in a multi-page document or reorient pages mixed in upside down\*. The MFD also uses AI and image-processing technology to automatically determine the optimal resolution, gradation, and compression rate for your scan jobs.

\*Reorienting upside-down pages requires OCR functionality.

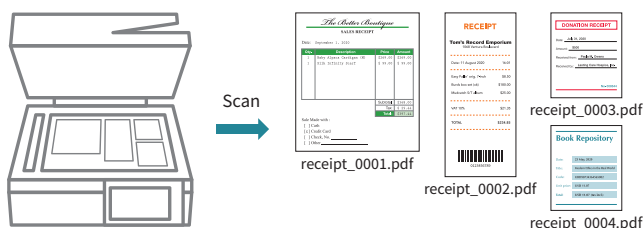

## Scan Destinations

Scanned documents can be distributed in a number of ways, depending on the purpose, workflow, or network environment.

## Multicrop / Image Crop

Multiple receipts, photos, and other items can be scanned all at once, with each one saved as a separate file. This helps you streamline the filing of receipts and bills. The MFD can also crop photos from documents such as magazine pages and save them as individual files.

## OCR

OCR (optical character recognition) capability on the MFD lets you convert a scanned document into a searchable PDF file or into an editable Office Open XML (pptx, xlsx, docx) file.

\*BP-56C/ BP-51C series requires optional MX-EB20L.

## Business Card Management

The MFD reads the contact details on a business card via OCR\*<sup>1</sup> and then exports these to your chosen contact management system. A dedicated business card feeder on the DSPF\*<sup>2</sup> easily scans batches of up to 150 cards.

\*1: BP-56C/ BP-51C series requires optional MX-EB20L

\*2: Available on BP-71C/ BP-56C series

## USB Direct Scan

You can scan documents directly to a USB drive inserted into the MFD.

## USB Direct Print\*<sup>1</sup>

Insert a USB drive into the MFD and a command screen will automatically pop up on the LCD. Right away you can print files from the USB drive—which are displayed as thumbnails\*<sup>2</sup>.

\*1: For BP-56C/ BP-51C series, direct printing of PDF files requires optional MX-PK13L

\*2: For BP-56C/ BP-51C series, thumbnail previews of Microsoft Office files (pptx, xlsx, docx) requires optional MX-PU10L

## My Folder Print

With the My Folder Print feature, print jobs are saved on the MFD in a personal folder that's like a private mailbox. A folder is created automatically based on information from the PC that sent the print job. There's no need for special settings, such as user registration by the administrator. Before printing out a document, you can preview print data at the MFD's control panel and avoid printing errors or mix-ups.

## Office Direct Print\*

Print common Microsoft Office files without using a PC. With the MFD, you can print a Word, Excel, or PowerPoint file directly from a mobile device, cloud service, USB drive, or file server.

\*The actual printout may look different from what is displayed on the computer screen. This function is enabled via Qualcomm® DirectOffice™ technology.

For BP-56C/ BP-51C series, direct printing of Microsoft Office files (pptx, xlsx, docx) requires optional MX-PU10L

# EVEN MORE FLEXIBILITY

Work styles are changing, and offices are going paper-less. But businesses still need paper documents. And companies often need to produce flyers, direct mail, and business proposals in-house. With a Sharp MFD, creating professional-looking documents is a breeze. Now's the time to make a Sharp MFD a reliable partner in your office.

## Saddle Stitch Finisher

This unit automates time-consuming tasks such as stapling, saddle-stitch binding, hole punching, and folding. It can also trim the edges of saddle-stitched documents to a beautifully consistent finish. You get seamless output—from printing to finishing—of leaflets, brochures, business proposals, and office meeting materials.

Note: Stapling requires a separate stapler, and hole punching and trim functions each require a separate module option.

### Stapling

3-hole punching

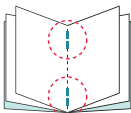

4-hole punching

4-hole wide punching

### Saddle Stitching

Saddle stitching

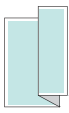

## Folding Unit\*<sup>1</sup>

This space-saving unit attaches to the MFD's paper output section. It automates various types of folds, such as Z-folds and C-folds, for efficient production of direct mail and other items. Install it together with a finisher\*<sup>2</sup> and you can even staple\*<sup>3</sup> Z-fold documents as well.

\*1: Optional BP-FD10

\*2: Optional BP-FN14/ FN16

\*3: Requires optional BP-FN16

Z-fold

C-fold

Accordion fold

Half-fold

## Stapleless Stapler / Manual Staple\*

Besides the conventional automated stapling function, the finisher offers two other ways to bind multi-page documents. You can either use the manual stapler to staple documents or the staple-free stapler to crimp the corners of pages together.

Stapleless stapling

\*Optional BP-FN16/ FN18

# Eco-friendly

## SUSTAINABLE DESIGN

Sharp MFDs are designed for a greener future. Our commitment to sustainability is there in our eco-friendly materials and energy-saving technologies. Eco innovations are applied across all areas of the MFD—from hardware and software to electrical systems and supplies. The result is a range of devices that support more energy-efficient workplace operations. Sharp MFDs reduce environmental impact without sacrificing performance.

### Eco Packaging

Sharp has reduced plastic waste by using recyclable corrugated cardboard instead of polystyrene foam for the MFD's packaging.

### 50% Recycled Plastic

Recycled plastic makes up approximately 50% of the total plastic used in the MFD main body. Using less new material helps to reduce the environmental impact of manufacturing.

### Eco-friendly Toner

This toner is able to fuse at low temperatures, resulting in reduced energy consumption.

### Energy-saving Mode

This MFD series has a low power consumption of only 0.3 W in network standby mode.

### Fusing Pad System

This swiftly reaches the specified temperature, allowing fast warm-up and energy efficiency.

### Eco Scan

The Eco Scan function saves energy by keeping the fusing system shut down during jobs that don't require its use.

### Eco Recommendation

This function suggests environmentally friendly settings before a print\*/copy command is executed from the control panel.

\* For printing Document Filing data and direct printing (FTP/SMB/USB).

### ENERGY STAR®

The MFD is ENERGY STAR® 3.2 qualified and RoHS compliant.

### Motion Sensor\*

The MFD stays in sleep mode until the built-in motion sensor detects your approach to the MFD and automatically wakes it up.

\* Available on BP-71C/ BP-61C series.

# DESIGNED FOR PEOPLE

People want function, print quality, and—last but not least—ease of use in an MFD. Being able to use an MFD stress-free can boost work efficiency and also cut down on costs. Sharp's pursuit of user-friendly product design and operability has resulted in MFDs that offer straightforward operation for anyone. Now's the time to let a Sharp MFD make your office comfortable and stress-free.

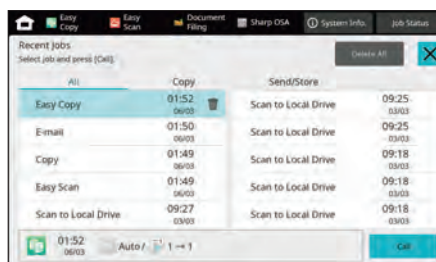

## 10.1-Inch Full-Flat Touchscreen

With a variety of functions accessible via simple, intuitive icons, MFD operation is smooth and easy. Customising the home screen has become easier than ever. The control panel can be tilted freely at various angles.

## Recent Job Recall

The 10 most recent jobs—like copying, faxing, and scanning—can be called up on the LCD screen and their settings displayed. You can then change the settings as you like and repeat those jobs.

## Duplex Single Pass Feeder\*

\*Available on BP-71C and BP-56C series.

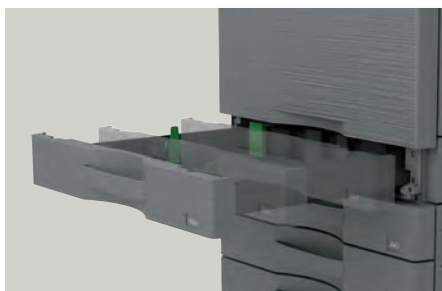

- **LED Signal** This LED signals that your document is placed correctly and is ready to scan.
- **LED Alert** This LED lights up and reminds you to retrieve your document after scanning.
- **See-Through Tray** Part of the DSPF tray is see-through, making it easier to see your scanned documents.

## Soft Close Trays

The paper trays\* have a soft-close mechanism that minimises vibration and lets you close the trays silently and smoothly with just a soft push.

\*Main unit tray and trays on optional BP-DE14/ DE15 (top tray only on BP-DE15).

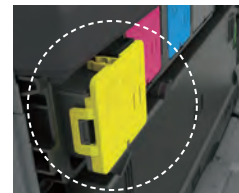

## Blends into Office Space

The MFD features a dark, subdued colour scheme that makes stains less noticeable and complements any office space.

## Automatic Toner Cartridge Eject Function

This function expels completely empty cartridges in preparation for replacement. The cartridge is replaced only after all the toner has been consumed, thereby ensuring efficient use of toner. Because you can tell at a glance when cartridges are empty, they are fast and easy to replace.

## Continuous Run\*

Thanks to an intermediate toner hopper, if toner runs out during a print job, the MFD will continue printing your documents while you change the toner cartridge, ensuring that productivity won't miss a beat.

\*Available on BP-71C65/ 71C55.

# SHARP COLOUR CONSISTENCY SYSTEM

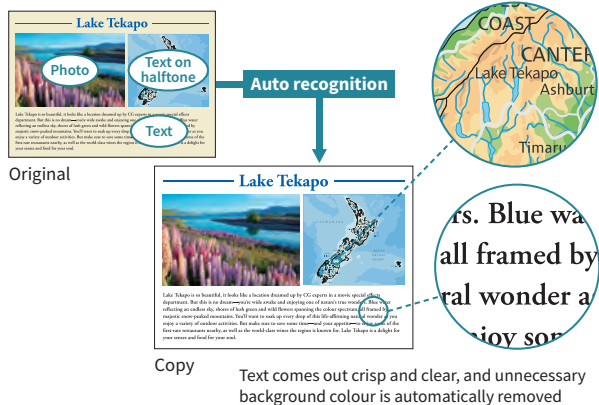

The innovative technology in Sharp MFDs delivers superior performance and image quality across the full range. Text and graphics are accurately reproduced using Adobe PostScript 3™, and Advance auto-calibration using an image density sensor maintains consistent image quality, to ensure colour output is always at peak performance.

## Easy, High-Quality Copying and Scanning

Auto Colour Mode provides fully automated copying and scanning in both colour and B/W. The MFD first determines whether a page is colour or B/W. It then analyses page contents to distinguish between different components (such as photos, text, and text on halftone backgrounds) and selects the appropriate mode. It uses machine learning to optimally reproduce text and images. Finally, it automatically removes unnecessary background colour\*.

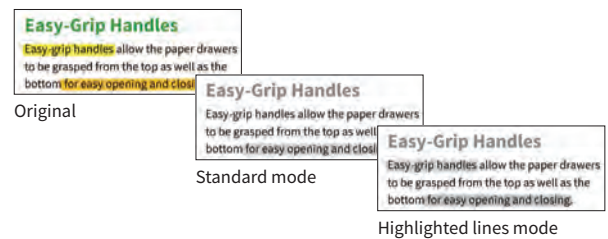

\*May not work depending on the colour of the background or type of document.

### Auto Colour Mode

## Copying Originals with Highlighted Lines

Highlighter markings on a document are usually hard to reproduce. But with the MFD, they turn out clearly visible in copies.

## Pantone Support\*

Pantone Licensing offers unprecedented levels of colour fidelity with the Pantone Matching System

\* BP-56C/ BP-51C series requires optional MX-PK13L.
