## **Telehealth: Emerging Legal and Regulatory Issues**

Objectives:

1. The learner will be able to discuss emerging technologies in the health care encounter.
2. The learner will be able to discuss the standards of care for telehealth visits.
3. The learner will develop an understanding of legal issues arising from the telehealth industry.

### **Mary Kate McGrath, Esquire**

**Shareholder; Chair, Telehealth and Telemedicine Practice Group – Marshall Dennehey**

Mary Kate serves as the chair of the firm's Telehealth and Telemedicine Practice Group. She has extensive experience in the defense of health care providers, hospitals, health systems, rehabilitation centers and skilled nursing facilities from the onset of a client's involvement in a case through the appellate level. Mary Kate helps her clients understand and comply with evolving legal standards, in order to reduce exposure and mitigate risk as they incorporate technology into their medical practice. She also handles compliance matters, including defending and advising health care clients regarding government payment programs, electronic discovery and privacy matters.

### **Adam J. Fulginiti, Esquire**

**Shareholder – Marshall Dennehey**

Adam concentrates his practice in medical malpractice, and has defended a variety of health care providers, including physicians, nurses, group practices, nursing homes and hospitals. In addition to this practice, Adam has experience handling matters involving social services, where he represents a number of foster care and adoption agencies, along with local residential treatment facilities. Adam is a member of the firm's Telehealth and Telemedicine Practice Group, helping clients navigate the intersection of health care, technology and the law.
