

# What's *Out* for Spring

*and what to opt into instead*

## *Opt Out:* Heels as you know them

The classic black high heel as you've always known it. The rounded toe, heavy vamp, Pretty Woman era pump will always be iconic, but right now it reads more dated than deliberate. It can feel a little expected, a little stiff, and not quite aligned with how modern women want to move through the world.

## *Opt In:* The V-Shaped Vamp

The V-shaped vamp heel, as seen at Chanel, Totême, Balenciaga, Khaite, and Jil Sander. The sharper V elongates the leg, softens the foot, and instantly modernizes your silhouette. It feels elegant, architectural, and quietly sexy, all while being far more comfortable and wearable than the heels of the past.
