This Month at School

In this month, We measured the classroom with unconventional objects and converted the measurements into metric units. It was fun!

In Math class, we learned about fractions and how we can multiply, divide, and add them. As part of the class, we created our own fraction pizza and made toppings.

Kindergarten Open Day

Kindergarten students and parents were invited to an Open Day held on 4th of September. The parents had the opportunity to have a tour, meet our amazing teachers and have their questions answered. The open Day further assisted students with the transition process, connected the students with their teachers and helped them to have a positive start.

Kindergarten Celebrating Saudi National Day

Kindergarten Students also celebrated Saudi National Day on 23rd September, the day held series of enjoyable and educational activities to reinforce the bonds of love, brotherhood and Unity between UAE and Saudi Arabia. The students have created flags, banners and performed traditional songs and dances that expressed the love of celebrating the Saudi National Day

Kindergarten Healthy Lifestyle Campaign

In Al Ain American School, we believe that “Good health is the best wealth”. With this, we ensure to teach students beyond to their academical aspect to mold life-long and healthy learners. Our Kindergarteners showed explicit support with our Healthy Lifestyle Campaign which started this month.

Healthy lifestyle is not only concerned with the avoidance of illness, yet it is also about improving aspects of social, mental and physical well-being in order to enjoy more aspects of life.

A healthy lifestyle is being achieved one-step at a time. AAS Kindergarten will be having more awareness activities as we continue our Healthy Lifestyle Campaign and we encourage our dear parents to support us for us to have healthy learners.

Kindergarten Healthy Lifestyle Campaign

Having a healthy lifestyle, it is also important to do regular exercise. We're incorporating physical activity across the curriculum in fun and creative ways. AAS kindergarteners enjoy fun morning exercises along with Physical Education classes intended to improve students' gross motor skills.

Maintaining good personal hygiene is also part of the school's Healthy Lifestyle Campaign. We're encouraging every student to maintain good personal hygiene by hand washing and brushing teeth. With our awareness activities, students learn the importance of having good personal hygiene in their personal and social development, and can ensure a longer life.

Primary Department

Science is the process that takes us from confusion to understanding. Grade 1-3 Little Scientists in Al Ain American School learned this month about Science Tools with lots of engagement and curiosity, students used their five senses, applied the Scientific methods and the Inquiry skills to discover more information about their world! They applied their knowledge in observations, measuring, comparing, conducting investigations and doing experiments.

The great philosopher Aristotle once said, “for the things we have to learn before we can do them, we learn by doing them.” In Al Ain American School learning is fun by having firsthand experiences. Our students enjoyed their Science Investigations through fun-filled experiments such as the “Pepper- Soap Experiment and temperature measurement Experiment” using Science tools and different available materials. Through these personalized learning experiences, inquiry skills to solve a problem were developed and learning has become for enjoyable and memorable for our students.

Learning is fun by having firsthand experiences. Our students enjoyed their Science Investigations through fun-filled experiments using Science tools and different materials.

Primary Department

Together everyone achieves more, teaching our students the benefits of working together is one of the important skills that we insist on our students to have.

Our students are applying the 21st century skills, communicating and collaborating, solving problems, and thinking critically. We encourage our students to never say “I can’t” but they always say “I will try” because we believe that mistakes allow thinking to happen

Collaborative learning helps in developing students’ social and communication skills. It involves students working in pairs or small groups to discuss concepts or find solutions to problems. Students in AAS enjoyed doing activities with their partners and groups. Activities like brainstorming, talk partners, think-pair-share and more are just some of the collaborative works that our students carry through this month. Through these activities, students had the opportunities to develop rapport among them, worked actively engaged and become responsible which lead to deeper learning of the lessons.

Primary Department

1

2

The numerous activities to make learning enjoyable were welcomed enthusiastically by students. In addition, manipulatives and concrete items helped students understand mathematical ideas regarding numbers more quickly, which made the sessions appear simpler to them. Moreover, students use visual organizers to condense their thoughts before composing the writing assignment. The pupils' mutual interest in their teachers' activities impressed the teachers.

3

Reading is the gateway for children that makes all other learning possible. AAS students spent time this month reading their first story, writing their first narrative text and illustrating it.

In Al Ain American School we believe in Dr. Seuss's words "The more that you read, the more things you will know. The more that you learn the more places you'll Go".

Primary Department

Our students' health and wellbeing are highly valued. For this significant reason, AAS has launched its annual healthy life style campaign to raise our students' awareness and highlight the importance of adopting healthy lifestyle.

الطعام الصحي

تم شرح درس مسعودة السلحفاة واستخلاص ما تعلمناه من القصة وهو تجنب تناول الأطعمة الغير صحية وأكل أطعمة صحية مفيدة للجسم .
قام الطلاب بعمل وجبة صحية للإفطار وكل طالب اختار طعامه المفضل كانت الأجواء مناسبة للعمل وساعدت على جذب انتباه الطلاب وبيان فائدة بعض الأطعمة مما أثار شهية الطلاب للأكل .
أظهر الطلاب تفاعلاً إيجابياً في أجواء تملؤها المتعة والمرح .

Math Activity

The students participated in the M.E.S. (Math, English, and Sport) Activity. They competed to solve mental math questions. They had a lot of fun while they were trying to pass different sport challenges to reach the math board and solve the questions to be able to go back and give a chance to the other members in the team to participate, and once the relay was completed the team would win!

اللغة العربية

تم شرح درس حكاية وطن من خلال العرض المسرحي داخل الفصل

- كانت الأجواء حماسية خلال العرض وساعدت على جذب انتباه الطلاب واستيعابهم السريع للمراحل التاريخية الهامة التي مرّت بها دولة الإمارات العربية المتحدة وصولاً إلى إعلان الاتحاد
أظهر الطلاب تفاعلاً إيجابياً في أجواء تملؤها المتعة والمرح

Science

At Al Ain American School we believe that students learn by observing, experimenting, problem solving, exploring and building.

Science
is FUN!

Grade 8 boys are demonstrating the river system to see how water flows in a river and takes away soil particles which come in its way.

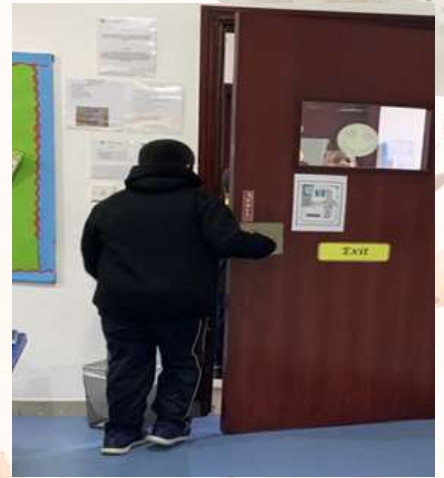

English

Oops... Hamed is going out but no....

It's just an act...

G5B students are playing charades in learning the new set of vocabulary words.

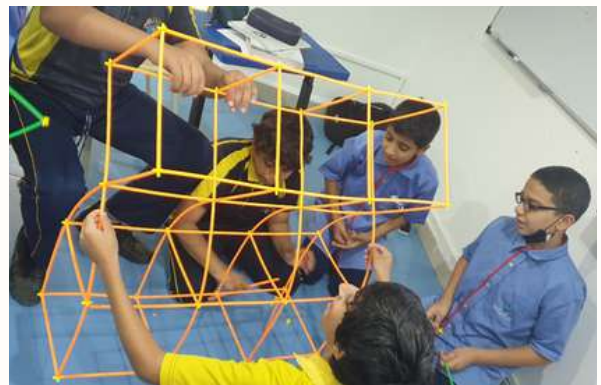

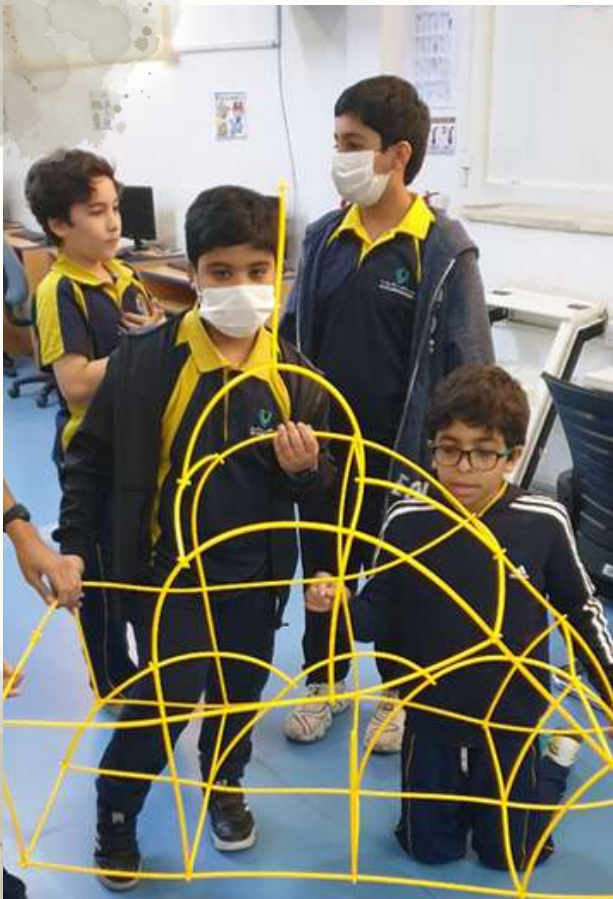

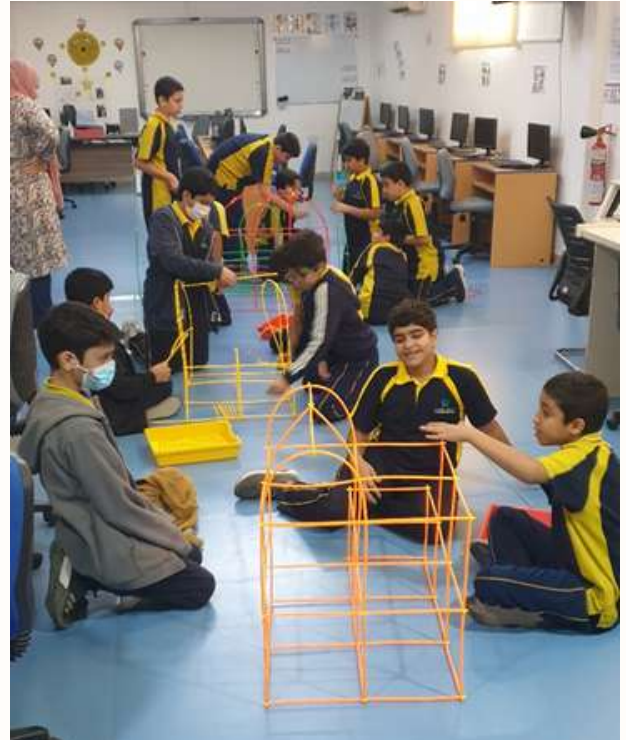

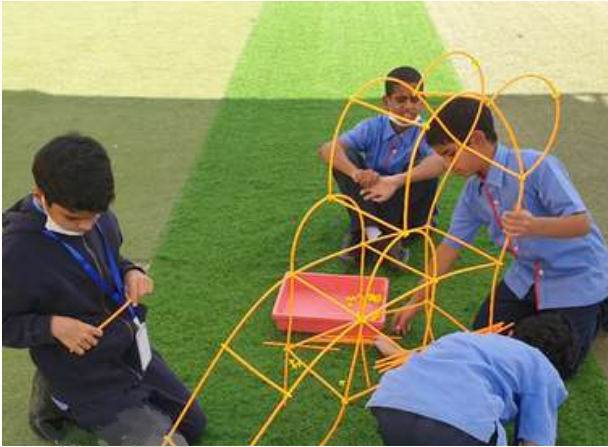

Why Charades....

It strengthens vocabulary,
Develops non-verbal skills and it's so much
FUN!!!

Innovation

Students building structures of different shapes, all the while learning how different shapes can have different strengths. Working together in groups building team work and cooperation, all the while having fun while learning.

G7B Art Class

Who else is excited about this year's arts class? Yes! We will be holding an art lesson again with many activities for you to do. Don't forget to apply for some competitions too. There are competitions for drawing and coloring.

Grade7B in an art lesson were introduced to Zentangle Art and the different types of fonts.

They used different styles of animal drawing using Zentangle Art

Morning Activity

P.E, English & Math

Students engaging in the morning assembly everyday and every Thursday with different activities combined with some other subjects like (Mathematics , English, ICT,.....)

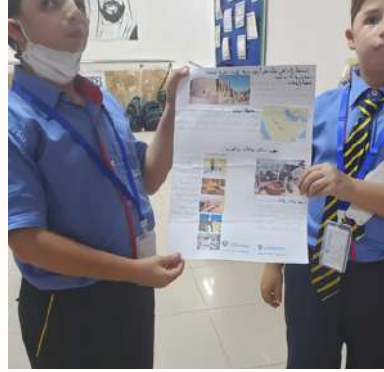

Saudi Arabia
National Day
celebration

الدراسات الإجتماعية

الأمن الوطني
أجهزة الأمن الداخلية والخارجية
دولة الإمارات العربية المتحدة

حاضرة ماجان ودلمون

حياة البدوي
دولة الإمارات العربية المتحدة

التربية الأخلاقية

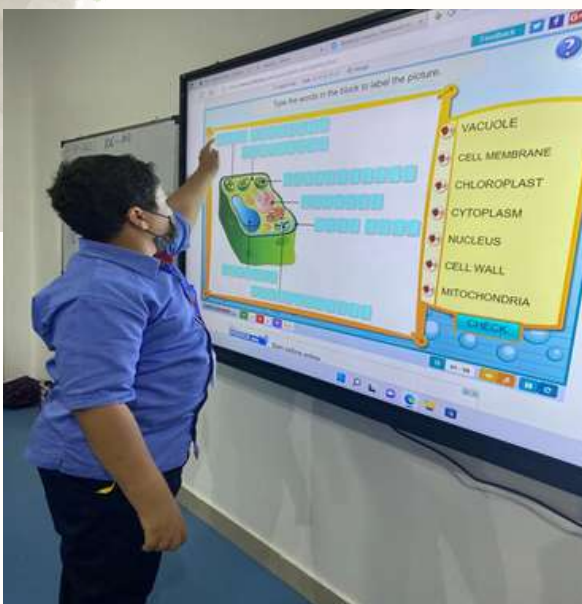

تجهيز البورصات للبيئة الصفية

Science

Our grade 5 had a lot of fun this month learning about Cells

Different problem solving and collaborative learning techniques, helped our students to achieve their learning goals.

English

Activity Title: Spelling Test Celebration Tunnel
Reason: How much fun we had celebrating our success in the spelling test by running through a human tunnel!!!!

Feelings: This activity influenced our learning and cognitive functions by instilling excitement and motivation to succeed in upcoming tests!

After analyzing the main topic of their lesson “Quilt of a country”, we enjoyed making a big quilt from paper scraps representing the diversity and uniqueness of our country. The activity is linked to idea “Quilt of a Country” that represents America as a diverse community and we linked that notion to our own beloved country, UAE. We enjoyed making a big colorful quilt and put it on the door of our classroom to celebrate the uniqueness and variation of our country. We also prepared presentations about the main ideas of the text and made inferences based on reasoning the facts and details that the author provided in the text.

أهمية اللغة العربية

بسم الله الرحمن الرحيم

إن أول كلمة في خطاب الله تعالى لخير أمة أخرجت للناس **(اقرأ)**، منها بدأنا وإليها نعود، فهي مفتاح العلم، وأداة الإصلاح والصلاح والفهم. قال عمر بن الخطاب رضى الله عنه: "تعلموا العربية، فإنها تثبت العقل، وتزيد في المروءة"، وقال ذات مرة لأبي موسى الأشعري: "أما بعد، فتفقهوا في السنة، وتفقهوا في العربية، وأعربوا القرآن، فإنه عروة".

ولقد شاء الله عز وجل لهذه اللغة السريفة أن تكون لغة السرعة والثقافة والحضارة، تتلى بها الآيات، ويزكى بها الناس، وصلة وصل بين الحاضر والماضي لهذه الأمة، وكذا المستقبل. إنها لغة القرآن الكريم، الذي حفظها من الضياع، ونهى ما علق بها من غريب اللفظ، ومدها بأسباب القوة، وكما قيل :

وسياج عزتها هو القرآن

لغة تكفل ربها بخلودها

وإن من حب النبي صلى الله عليه وسلم حب اللغة العربية، والاهتمام بها، ورجم الله الإمام الثعالبي حيث قال: "من أحب الله أحب رسوله المصطفى صلى الله عليه وسلم، ومن أحب النبي العربي أحب العرب، ومن أحب العرب أحب اللغة العربية، ومن أحب العربية عني بها، وثابروا عليها، وصرف همته إليها".

وها هو أبو بكر البلاقلاني يقول: "واعلم أن هذا علم سريفاً المحل، عظيم المكان، قليل الطلاب، ضعيف الأصحاب، وهو أدق من السحر، وأهول من البحر...".

يحق لنا أن نفخر بلغتنا، ولكن ينبغي أن يكون من مظاهر فخرونا واعزازنا؛ إغناؤها بالإبداع في كل صنوف المعرفة ومجالاتها، فهذا يعزّز من حيويتها، ومن عالميتها، ويجعلها أكثر فاعلية في مسار الوعي الإنساني.

Happy Programmers' Day!

Computers, technology and software make the modern world go around – but for every piece of clever software, there's a programmer (and often teams of programmers) behind the scenes, solving problems with clever code, cloud security solutions, and intense development projects. Spare a thought for these digital pioneers on Programmers' Day!

Programmers' Day is celebrated on the 256th day of the year – chosen because this is the number of distinct values that can be represented with an eight-bit byte, and the highest power of two which is less than 365.

Lots of people celebrate this day on January 7th, which seems to be the original (though unofficial) date for the celebration. In 2009, however, the government of Russia declared the day to be a professional holiday, and set the date as September 13th (Sept 12th on leap years)

Math Song

The MATH song

This not a letter , this is a song ..

Why do you hate Math , what is wrong ?

Some times you dont find X, sometimes Y ?

But that is not a reason for you to cry .

Look into the problem , Understand the rule

Apply it again , then MATH looks cool.

Plants need light and water to grow ..

MATH needs practice and logic to flow.

MATH helps you measure in meters and ounces

Because MATH is the MOTHER of all SCIENCES

If you are good at MATH, you will be the best

Pls dont forget, **on 29-SEP is your MATH TEST**

by Mr.Logic
