EDUCATION

LEARN Academy 2018
Full stack web development bootcamp
teaching Javascript, React, Ruby on Rails
and PostgreSQL

University of Oregon 2014 - 2017
Coursework in Statistics, Economics,
Mathematics, Business Administration
and Political Science

EXPERIENCE

Piedmont Grocery, Oakland, CA 8/2021 - Current
Meat Cutter

Working in meat department in a fast paced and popular grocery store where we have to rely on each other during busy times to ensure top quality and customer satisfaction.

Yataimura Maru, Portland, OR 3/2019 - 3/2020
Head Chef

Managed front and back end of house by encouraging collaborative and supportive work in fast paced environment to ensure best customer and employee experience.

Tutti, San Diego, CA 8/2018 - 1/2019
Web Developer Internship

Collaborated with web developers as Full Stack Web Developer to build pages in React Native program to build an Alpha version of a mobile app that helped musicians find rehearsal spaces.

Options Trading, San Diego, CA 6/2013 - 8/2013
Data Analyst Internship

Worked closely with two professional stock traders to analyze hedge funds and use data collected to forecast and inform investment decisions.

PROJECTS

Close Roast 7/2018 - 8/2018
closeroast.herokuapp.com

Created a project built on React, Ruby on Rails, and a PostgreSQL database to create an interface for coffee enthusiasts to find coffee shops nearby. We did this by implementing the Yelp API to bring in coffee shops so user could save them to their profile and/or get directions.

Appartment 6/2018 - 8/2018

Pair programmed a full stack web application built with a React front end and a Ruby on Rails back end using a PostgreSQL database. Used bootstrap to create styling components. Also included user authentication to create a secure site that protected passwords. We used authorization to only allow certain users to use specific CRUD operations to 'create' and 'destroy' postings.
