

Network and Systems Administrator

Sharp Corporation of Australia sells electronic office equipment and consumer electronics.

Today, Sharp products are sold in 140 countries. There are 27 manufacturing operations, 29 sales companies and two representative offices in 26 countries.

About this role

The Network and Systems Administrator is responsible for maintaining our system infrastructure, including switches, routers and firewalls, installing and rebuilding existing servers. We are looking for an all-rounder who knows networking, servers, web development and who will provide 2nd Level desktop support. This is an opportunity to learn the business and grow with Sharp.

You will maintain, upgrade and provide support for clients' software, hardware, and networks. You will diagnose and resolve problems quickly and be able to easily communicate technical concerns and solutions to audiences with varying degrees of technical knowledge. The role includes network troubleshooting and resolution of network connectivity issues, analysing the current network structure and making recommendations to MIS Manager on how to improve operations.

To be successful in your application, you will have 3-4 years' experience in a similar role and be able to demonstrate strong technical skills in the following areas:

- Windows Server (2008 R2 - 2019)
- Virtualisation technology using Hyper-V and VMWare
- Administration of Exchange Servers (on-premise, online and hybrid)
- Microsoft365 deployment, administration, perform migrations from various platforms and management
- Network equipment (Firewall, Routers, Switches) Configuration and Deployment
- Configuring and setting up of printers
- Deploying and Managing Windows 10
- Internal and External DNS Management
- Working knowledge of LOB involving databases would be highly advantageous

We are looking for someone who has:

- Excellent problem solving and trouble shooting skills
- the ability to work well in teams or autonomously without supervision
- Excellent verbal and written communication
- Strong focus on providing excellent customer service
- Industry or vendor certifications in any of above requirements (MCSA, CCNA, etc)
- Experience with Ticketing Systems
- SQL Server experience
- Web development

A vehicle and Driver's License would be useful
