BP-90C80

Digital Full Colour Multifunctional System

A heavy-duty solution for colour printing on demand

High Productivity

The BP-90C80 delivers a fast output of 80 ppm^{*1}—even for paper as thick as 220 g/m². And if toner runs out during a print job, the MFD continues printing your documents while you change the toner cartridge.

On-screen System Information

The 15.4-inch full-flat touchscreen control panel shows the state of your MFD, displaying current operation and notifications for things like paper, toner, and maintenance.

Versatile Paper Handling

Handling a wide range of paper types and sizes, this MFD expands your possibilities for printing. Along with standard sizes up to SRA3/A3W, it can take extra-long and custom sizes. What's more, it handles paper thicknesses up to 360 g/m² as well as envelopes and other types of paper.

All the Needed Finishing Options

Finishing options are available for all your common needs—there's an inserter, a folding unit, a saddle stitch finisher, and a trimming module. These let you easily create professional-looking direct mail, handouts, booklets, brochures, and more.

Solid Security

The BP-90C80 has multiple levels of security to keep the device—and your precious data—secure.

Unified Cloud Connection^{*2}

You only need to sign in once to connect to multiple cloud services, such as Microsoft Teams, from the MFD. Applications can also be easily downloaded from the cloud. Updates are clearly displayed, so you're always using the latest version of services.

Superb Print Quality

The BP-90C80 supports 2,400 dpi writing resolution, so that fine lines and small text come out crisp and clear. For efficient front-to-back registration, the MFD automates adjustments of the vertical/horizontal ratio and position settings.

Full-bleed Printing

Edge-to-edge printing is available for both Windows and Mac printer drivers, with the MFD supporting A3 and A4 paper as well as paper up to 668 mm long. This helps you create eye-catching posters. And with the optional trimming module and saddle stitch finisher, you can also make full-bleed A4- and A5-size booklets.

Fiery[®] Server (option)

You can pair the MFD with a Fiery server—external or embedded—to manage a busy on-demand printing environment. For example, you could use the Sharp printer driver for standard text documents and the Fiery printer driver for graphic-rich documents. You need to register your paper settings only once—the settings on the Fiery server are automatically reflected on the Sharp MFD, and vice versa.

Eco-friendly Design

Despite its many functions, this MFD achieves superb energy efficiency. For example, the use of low-temperature-fusing toner results in vastly reduced energy consumption for the MFD.

High-performance DSPF

The DSPF (duplex single pass feeder) scans both pages of two-sided documents in one pass—in batches of up to 300 sheets. With scanning speeds of up to 280 opm^{*3} (two-sided), the MFD is quick to finish even large jobs.

^{*1}: A4, long-edge feeding. ^{*2}: Optional equipment is required. ^{*3}: Originals per minute; when feeding A4 sheets.

PROFESSIONAL-QUALITY PRINTING AND IN-LINE FINISHING OPTIONS

The MFD can be equipped to suit a variety of workplaces and applications. It supports full-bleed printing in all configurations. And you can choose finishing options to automate time-consuming finishing tasks.
