

MSDs reduction

Complys®  
*The bridge chair for everyone*

Bridge +

Chair

Bridge

Color shown: Silvertex mole and birch

Easier moving of residents • Makes transfers easier • Quick cleaning

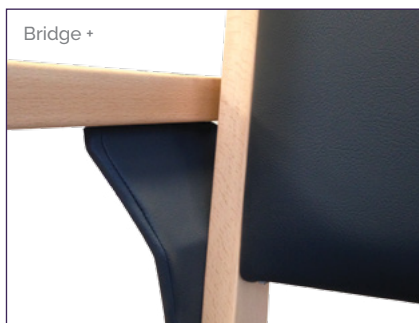

## Ergonomically designed to improve lives

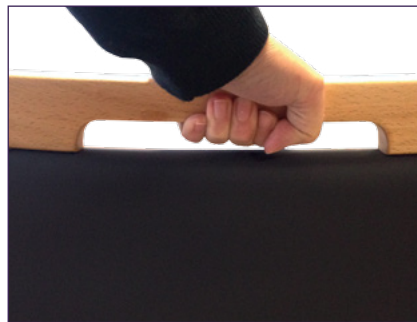

Complys® is an easily-movable bridge chair that can be **stacked** for storage.

With so many colors, coatings and wood finishes, Complys® is a sophisticated and elegant range of chairs and bridges.

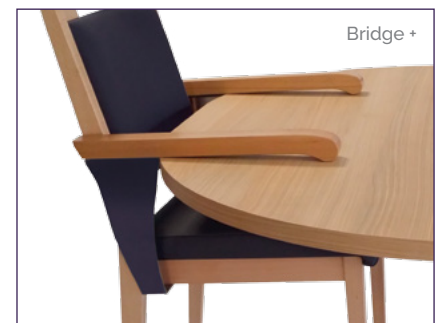

The addition of an ergonomic handle on the back provides an easy and safe handling, very useful for moving of residents.

Quality finishes

Ergonomic handle

Can be placed on the table for floor care

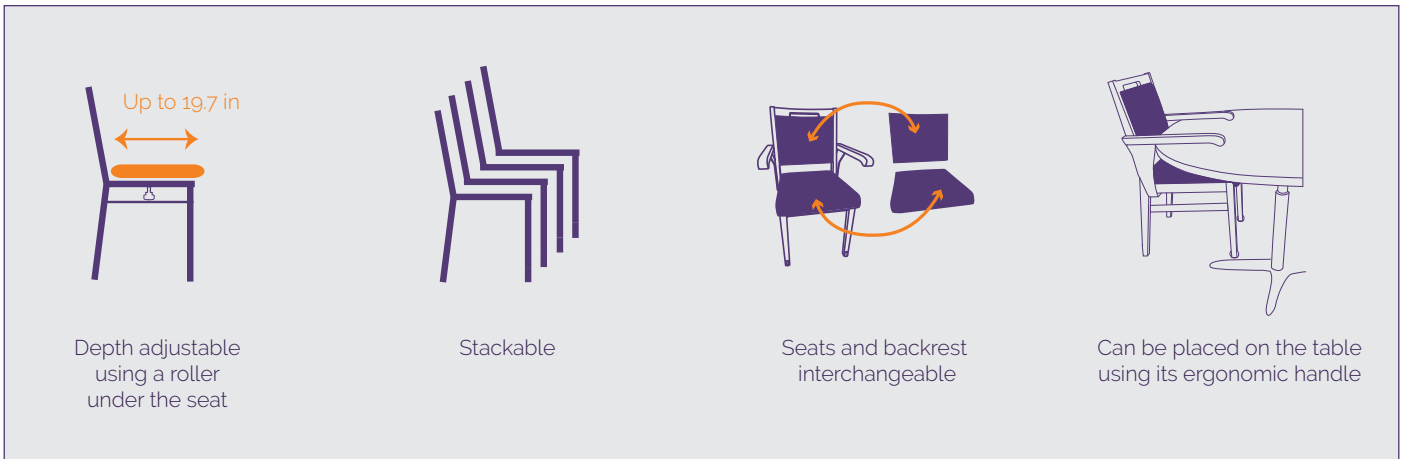

**Bridge +**, filled with sliding armrests reduces MSDs and helps support people with decreasing independence:

- The bridge **can be lifted** with one arm and knee (makes cleaning easier)
- Prevents **contact between the seat** and the top of the table
- **Reduces MSDs**
- Can be used like a «trolley» to **move residents**
- Adapts to all body sizes with a **wide seating area**, whose depth can be adjusted
- The **sliding armrests** are also useful when **transferring residents** from a wheelchair to a chair

MSDs are considerably reduced.

The **coasting** has been tested to withstand extensive handling, friction and **frequent cleaning** (excluding abrasive products or products containing solvents\*).
