

MAJOR PROJECT PACIFIC WERRIBEE

Formely known as Werribee Plaza, the Pacific Werribee shopping centre recently underwent a major re-development. To cater for the large increase in customers to the complex Stoddart Infrastructure, in conjunction with PTV, provided a comprehensive range of transport-focused shelters and furniture to the project. Stoddart not only supplied several off-the-shelf products but also developed a high-impact, aesthetic, large-coverage feature structure based on the successful Stoddart Infrastructure Wellington shelter.

As well as providing a functional waiting area, and helping direct foot traffic towards the bus interchange, patron safety and comfort have been maximised with ample overhead protection from the elements, high output lighting, integrated loud-speakers, and durable, vandal-resistant construction.
