

Halton® **MobiChef**

Halton[®] MobiChef

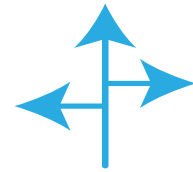

Whether you're catering an event, setting up a pop-up kitchen, or enhancing your restaurant's capabilities, the Halton MobiChef is the ultimate solution for versatile and high-performance cooking. This state-of-the-art, plug-and-play mobile cooking station is engineered to meet the demands of high-output cooking with unparalleled efficiency and autonomy, transforming any space into a vibrant culinary hub.

Plug & Play

High Efficiency

Flexible &
Adaptable

Capture Jet Technology

MobiChef features the latest patented Capture Jet™ technology, which uses air curtains on the top and sides to contain cooking vapors and direct them to an advanced filtration unit. This technology reduces the required exhaust airflow, making the recycling unit compact, efficient, and quiet.

1. Mechanical 2 stage primary filtration comprising Halton's KSA cyclonic filters

2. Disposable secondary pleated filters (EU5, F5 class)

3. ESP filter (Electrostatic Precipitator)

4. Absolute filters HEPA (efficiency >95% DOP on 0,3 µm particles)

5. Double stage carbon and chemical filters

6. Final stage carbon impregnated filter
