

METRO SHELVING CLEANING GUIDE

Store Safe to Serve Safe™.

OPEN WIRE SHELVING

Cleaning Steps

1. Remove all products.
2. Move shelving unit to outside area or area away from food products.
(Note: do not contaminate food product with cleaning chemicals.)
3. Hose shelving unit to loosen grime and dirt.
4. Use water, mild detergent and sponges to clean shelves.
5. Use brushes to clean between wires and remove stubborn residue.
6. Hose off unit again to remove cleaning chemicals and loose dirt.
7. Towel dry unit and move back to original location.
8. Place product back on shelf.

Estimated Cleaning Time
30 minutes, once a month = 6 hours per year
Labor Cost x 6 hours = cleaning cost per year

Product Examples
All wire shelving systems
