

Central tracking and visibility system for programs and projects

Background

British business and consumer financial services organization

Products include savings accounts, mortgages, motor finance as well as business banking products

Challenge

Rapid growth has highlighted the need for standardized operations, centralized governance visibility and tracking

Opportunity to improve the consistency, quality and accessibility of business information and rationalize reporting processes

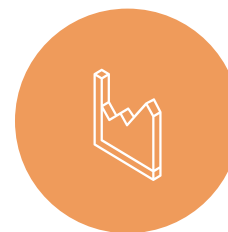

Solution

i-nexus for Continuous Improvement Initial Deployment package

Product deployment consulting services

Product training services

Product configuration services

Benefits

Single source of truth ensuring all programs, projects and process improvements are consistently executed

Standardized automated reporting enables robust decision making based on real-time KPIs

Platform for continuous improving operational processes

Workflows and electronic signatures accelerate approvals

“We researched the market and selected i-nexus to create a central change governance framework in order to support our strategy and growth. This has allowed us to benefit from efficient reporting which provides consistent business information across the Group.”

Nikki Tyler, Head of Change
