

Risk Based Compliance Monitoring Under the FCA

Course outline and objectives

Today, Compliance managers are under more pressure than ever to make sure they are targeting risks, and resources, as effectively as possible and adapting their monitoring to the changing regulatory environment. Yet despite their best efforts, many firms continue to face action or have significant failures of controls. Monitoring is too often approached as a mechanistic task focused on rote compliance, not the “outcomes” on which the FCA is focused.

With extensive use of practical EXAMPLES throughout the course, attending will help Compliance and Monitoring professionals identify the principal compliance risks in their business and design and execute a risk based compliance monitoring plan accordingly.

Who will benefit?

This focused workshop has been designed to help less experienced **Compliance** and **Monitoring** staff develop their capabilities and skills and for more seasoned Compliance Managers to refresh and update their approach. It will also be of benefit to **Risk** and **Audit** professionals who wish to improve their knowledge of compliance risk management.

Training approach

The course programme will comprise a blend of trainer presentations, group discussion, practical examples and case studies. There will be ample opportunity for questions, experience sharing and networking. All course materials (and at face-to-face events, refreshments and lunch) will be provided.

Dates and Fees

Face to Face (London)

30 March 2023

09:30 to 16:30

£849 + VAT

Live Online

12 & 13 July 2023

09:30 to 12:45 each day

£745 + VAT

Attending this practical course will help you:

1. **Demonstrate the effectiveness of your** controls to the regulator
2. Effectively **identify, categorise and prioritise compliance risks**
3. Explore the **use of Key Indicators** for risks and controls
4. Examine **monitoring techniques** (desk based, exception reporting, systems, visits) and know how to select the most appropriate option
5. Determine **when to escalate** issues and change monitoring levels
6. **Construct a comprehensive compliance monitoring plan** that will prioritise risks and drive out resource requirements, leveraging FCA tools like the "Conduct Risk Framework/Journey"
7. **Tailor your reporting** to different groups to make sure critical messages are received and understood
8. **Keep your programme up to date:** respond to monitoring results emerging regulatory hot spots
9. Develop both your **technical monitoring and 'softer' skills set:** establishing credibility, obtaining buy-in, managing resistance

Course Leader

Gary Pitts has over 25 years of compliance experience in the UK and overseas, including spells in regulation, asset management, investment banking and as managing partner of a boutique financial services house. He was a director of Cayman and Luxembourg domiciled hedge funds, as well as regulated companies in the UK and South African has been an FSA/FCA registered person in Controlled Functions 10 and/or 11 since 2001.

He now runs his own governance and regulatory consultancy: Tetractys Partners LLP. Gary is a regular conference speaker and author of technical articles on compliance related topics and sits on the regulatory advisory group of the Journal of Securities Operations and Custody. He brings a combination of compliance and commercial experience, in terms of both practical implementation and Board level oversight, to the training he delivers.

Course Programme

Session	Aim	Content
The risk based monitoring approach	<i>To establish a common understanding of this term</i>	<ul style="list-style-type: none"> Definitions of risk and compliance risk The requirements for risk management Responsibilities of Risk, Audit and Compliance compared – drawing the boundaries
