ABOUT ME

Computer Engineering student with **practical experience in full-stack web development**, including **frontend development with React, HTML, CSS, Tailwind CSS, JavaScript and Next.js**, as well as **backend development using Node.js, Express, MongoDB, Python, and Django**. **Skilled in creating RESTful APIs, integrating frontend with backend**, and building responsive, user-friendly interfaces.

EDUCATION

Bachelor of Computer Engineering

Sagarmatha Engineering College, Tribhuvan University, Expected Graduation: 2026

TECHNICAL SKILLS

Frontend: HTML, CSS, Tailwind CSS, JavaScript, React, React Router, TanStack Query/React Query, Next.js

Backend: Node.js, Express, MongoDB, Next.js, Python, Django

Tools: Git, GitHub, VS Code

Soft Skills: Communication, Teamwork, Problem-Solving

PROJECTS

Orynt | [Demo](#)

Designed and developed a modern, responsive user interface using **Figma** and implemented it with **Next.js** and **Tailwind CSS**. Built reusable components, optimized page performance, and created smooth UI animations for an engaging user experience. Integrated APIs to enable dynamic content rendering and ensured clean, scalable code architecture that supports future feature expansion.

EasyPR | [Demo](#)

Contributed to the ongoing development and optimization of **EasyPRwire.com**, a professional press release distribution platform. Built responsive, high-performance user interfaces using **Next.js** and **Tailwind CSS**, integrated dynamic APIs, and implemented SEO-friendly structures. Improved the UI/UX through design refinement, performance tuning, and accessibility enhancements. Also responsible for platform maintenance, feature development, and ensuring smooth deployment workflows.

Full-Stack Web Projects | [Demo](#)

Various projects demonstrating frontend (**React, Tailwind CSS**) and backend fundamentals (**Node.js, Express, MongoDB**). Focused on applying learned skills to real-world web development tasks, including creating **RESTful APIs, dynamic routing**, and **responsive UI design**.

Yoga Assistant | [Yoga-Assistant](#)

College Major Project: Developed a system for Yoga Pose Detection and Correction using Python, HTML, and CSS. Handled dataset preprocessing and integration of ML models with a web interface. **Delivered a user-friendly platform for interactive yoga guidance.**
