Module Contents

- General Psychology I
- General Psychology II
- Social Psychology
- Industrial Psychology
- Organizational Psychology

Learning Outcomes**Concepts in Psychology**

On successful completion, students will be able to

- understand psychology as a science and to be able to distinguish it from other disciplines in terms of content.
- classify psychology as a scientific and research discipline, and grasp selected fundamentals of psychology.
- know essential concepts of psychology in terms of their relevance to business psychology.
- build knowledge of the central concepts and theories of psychology that are essential for understanding the subject area of business psychology.
- integrate approaches, methods and instruments of psychology into everyday business life.
- discuss questions of psychology with regard to human behavior, thinking and feeling and apply it in the context of companies.

Concepts in Psychology

Course Code: DLMWPWKP01_E

Study Level	Language of Instruction and Examination	Contact Hours	CP	Admission Requirements
MA	English		5	none

Course Description

This course provides students from other disciplines with a core understanding of the fundamental concepts of psychology. The content of the course provides both the basis for understanding psychology as a science and the essential theories and knowledge that are essential for classifying and applying issues in business psychology. Students learn the fundamentals and core content of the scientific discipline of psychology. They gain a comprehensive understanding of essential psychological research areas and fields of application that have connection and relevance to business psychology. In this way, students build up a basic knowledge that enables them to adopt the perspective of business psychology issues in the further course of their studies and to build up and expand their knowledge in this area on a sound basis.

Course Outcomes

On successful completion, students will be able to

- understand psychology as a science and to be able to distinguish it from other disciplines in terms of content.
- classify psychology as a scientific and research discipline, and grasp selected fundamentals of psychology.
- know essential concepts of psychology in terms of their relevance to business psychology.
- build knowledge of the central concepts and theories of psychology that are essential for understanding the subject area of business psychology.
- integrate approaches, methods and instruments of psychology into everyday business life.
- discuss questions of psychology with regard to human behavior, thinking and feeling and apply it in the context of companies.

Contents

1. General Psychology I
 - 1.1 Perception
 - 1.2 Memory
 - 1.3 Cognition

2. General Psychology II
 - 2.1 Learning
 - 2.2 Motivation
 - 2.3 Emotion
3. Social Psychology
 - 3.1 The Power of the Social
 - 3.2 Social Influence
 - 3.3 Conflict, Aggression and Cooperation
 - 3.4 Selected Social Psychological Theories
 - 3.5 Prosocial Behavior, Helping Behavior and Altruism
4. Industrial Psychology
 - 4.1 Basics of Industrial Psychology
 - 4.2 Concepts and Methods of Work Analysis and Evaluation
 - 4.3 Concepts and Methods of Work Motivation and Satisfaction
 - 4.4 Concepts and Methods of Workplace Design
 - 4.5 Work and Health
5. Organizational Psychology
 - 5.1 Fundamentals of Organizational Psychology and Structure
 - 5.2 Organizational Culture and Climate
 - 5.3 Interaction and Communication in Organizations
 - 5.4 Conflicts in Organizations
 - 5.5 Mergers & Acquisitions

Module Contents

- Personality - Construct and Theories
- Methods for Personality Research
- Trait Approaches and Models
- Specific Personality Constructs
- Personality Development
- Personality Disorders and Characteristics
- Forms of Therapy for the Treatment of Disorders

Learning Outcomes**Personality Psychology**

On successful completion, students will be able to

- classify the construct of personality within the framework of psychology.
- describe and consider the construct of personality in a differentiated way.
- deal specifically with the characteristics and focus points of various personality theories.
- understand and reflect on different theoretical approaches regarding description, explanation and change of human personality.
- consider the instruments of personality research in a differentiated way and to discuss their possible applications depending on the respective research question.
- evaluate the importance of intelligence, creativity, competences and competencies from a personality-psychological perspective.
- recognize central disturbance patterns and behavioral abnormalities of the personality.

Personality Psychology

Course Code: DLMWPWPOE01_E

Study Level	Language of Instruction and Examination	Contact Hours	CP	Admission Requirements
MA	English		5	none

Course Description

The human being in the economic and entrepreneurial environment is the central subject area of industrial and organizational psychology. It deals with the research, analysis and understanding of the behavior, thinking, feeling and experience of people in this context. People perceive other people's behavior and their own experience and behavior through the subjective lens of everyday life. They have ideas about how a person's personality is made up, how personality develops and look for explanations for conspicuous behavior and personalities. People want to understand the reason for others behaving in extreme ways. Through the course, even students without prior psychological knowledge will gain access to the construct of personality as well as methodological-theoretical knowledge of its assessment. It highlights the factors for the development of personality and addresses the recognition and causes of behavioral problems. In addition, an understanding of the importance of mental health in connection with work is built up as well as essential concepts of mental health in work are highlighted.

Course Outcomes

On successful completion, students will be able to

- classify the construct of personality within the framework of psychology.
- describe and consider the construct of personality in a differentiated way.
- deal specifically with the characteristics and focus points of various personality theories.
- understand and reflect on different theoretical approaches regarding description, explanation and change of human personality.
- consider the instruments of personality research in a differentiated way and to discuss their possible applications depending on the respective research question.
- evaluate the importance of intelligence, creativity, competences and competencies from a personality-psychological perspective.
- recognize central disturbance patterns and behavioral abnormalities of the personality.

Contents

1. Personality - Construct and Theories
 - 1.1 Definition
 - 1.2 Psychoanalytic Approach
 - 1.3 Humanistic Approach
 - 1.4 Learning Theory Approach
 - 1.5 Cognitive Approach
2. Methods for Personality Research
 - 2.1 Self-Assessment and Description by Others
 - 2.2 Questionnaire
 - 2.3 Behavioral Observation and Behavioral Assessment
 - 2.4 Test Procedure
3. Trait Approaches and Models
 - 3.1 Temperament
 - 3.2 Trait Model
 - 3.3 Five-Factor Model of Personality
 - 3.4 Practical Application: NEO-FFI and NEO-PI-R
4. Specific Personality Constructs
 - 4.1 The Self
 - 4.2 Intelligence
 - 4.3 Creativity
 - 4.4 Competences and Competencies
5. Personality Development
 - 5.1 Genetic and Environmental Influences
 - 5.2 Stability and Changeability
6. Personality Disorders and Characteristics
 - 6.1 Mental Disorders
 - 6.2 Personality Disorders
7. Forms of Therapy for the Treatment of Disorders
 - 7.1 Psychotherapy
 - 7.2 Behavioral Therapy
 - 7.3 Cognitive Therapy
 - 7.4 Humanistic Therapy

Module Contents

- Social science and research paradigms
- Case study research
- Specific topics of qualitative research
- Advanced issues of qualitative research conceptualization and data analysis
- Underlying assumptions of quantitative research: concepts and consequences
- Evaluation research

Learning Outcomes**Advanced Research Methods**

On successful completion, students will be able to

- understand and apply scientific methodologies in conducting empirical research.
- plan, design, and prepare research proposals.
- differentiate between different types of case studies, select and apply different data collection strategies.
- plan, conduct, and analyze case studies and surveys.
- scientifically analyze quantitative and qualitative data.
- conduct evaluation research to determine quality of research.

Advanced Research Methods

Course Code: DLMARM01

Study Level	Language of Instruction and Examination	Contact Hours	CP	Admission Requirements
MA	English		5	none

Course Description

Advanced research methods, specifically business research, is scientific inquiry that attempts to uncover new information which helps a business improve performance, maximizing shareholder value while adhering to ethical and moral compliance standards. Managers seeking to conduct empirical research must maintain validity, reliability, and trustworthiness when utilizing scientific methodologies in order to produce meaningful and actionable results. Research proposals are typically written prior to conducting research, which have a certain structure, enabling the researcher to properly plan, conduct, and analyze case studies and surveys. Different data collection strategies are used to collect both qualitative and quantitative data, depending on the research proposal goals. Managers utilize their understanding of research methodologies to accurately assess the quality of research.

Course Outcomes

On successful completion, students will be able to

- understand and apply scientific methodologies in conducting empirical research.
- plan, design, and prepare research proposals.
- differentiate between different types of case studies, select and apply different data collection strategies.
- plan, conduct, and analyze case studies and surveys.
- scientifically analyze quantitative and qualitative data.
- conduct evaluation research to determine quality of research.

Contents

1. Theoretical Background: Social Science and Research Paradigms
 - 1.1 What is a Paradigm?
 - 1.2 Empiricism
 - 1.3 Critical Rationalism
 - 1.4 Epistemological Anarchism
 - 1.5 Structural Functionalism
 - 1.6 Symbolic Interactionism
 - 1.7 Ethnomethodology

2. Case Study Research
 - 2.1 Types of Case Study Research
 - 2.2 Maintaining Quality in Case Study Research
 - 2.3 Case Study Design
 - 2.4 Implementing Case Studies
 - 2.5 Analyzing Case Studies
3. Specific Topics of Qualitative Research
 - 3.1 Idea Generation
 - 3.2 Critical Incident Technique
 - 3.3 Understanding Communication: Discourse Analysis
 - 3.4 Perceiving Perception: Interpretive Phenomenological Analysis
4. Advanced Issues of Qualitative Research Conceptualizing and Data Analysis
 - 4.1 Measurement Theory
 - 4.2 Index and Scale Construction
 - 4.3 Types of Scale Construction
 - 4.4 The Problem of Nonresponse and Missing Data
 - 4.5 Implications of IT for Research Strategies
5. Underlying Assumptions of Quantitative Research: Concepts and Consequences
 - 5.1 Classical Test Theory
 - 5.2 Probabilistic Test Theory
 - 5.3 Advanced Topics of Test Theory
6. Evaluation Research
 - 6.1 What is Evaluation Research?
 - 6.2 Types of Evaluation Research
 - 6.3 Meta-Analysis
 - 6.4 Meta-Evaluation

Applied Statistics

Course Code: MMET02-01_E

Study Level	Language of Instruction and Examination	Contact Hours	CP	Admission Requirements
MA	English		5	none

Course Description

In everyday working life, enormous amounts of data are continuously generated, for example in production processes, customer data or population statistics. In this context, the field of statistics is a useful discipline that enables the user to analyze and evaluate this data in order to get to the information content of the underlying data. This information can make a valuable contribution to the control or optimization of underlying processes and knowledge, or help to support strategic or social decisions. Methods of descriptive and inferential statistics are considered in uni-, bi- and multivariate ways and discussed with reference to probability theory.

Course Outcomes

On successful completion, students will be able to

- recognize and explain the role and importance of statistical methods in practical decision-making processes.
- understand the relevance of data to answer empirical questions.
- apply statistical methods in the overall context of concrete problems.
- solve statistical problems by using special statistical software.

Contents

1. Basics
 - 1.1 Descriptive statistics
 - 1.2 Closing statistics
 - 1.3 Probability calculation
2. Bivariate analyses
 - 2.1 Crosstabulations
 - 2.2 Mean comparison test
 - 2.3 Correlations
3. Probability distributions
 - 3.1 Random variables and their distributions
 - 3.2 Normal distribution
 - 3.3 t distribution

4. Statistical estimation methods
 - 4.1 Point estimation
 - 4.2 Interval estimation
5. Hypothesis Testing
 - 5.1 Expected value with known standard deviation (z-test)
 - 5.2 Expected value with unknown standard deviation (t-test)
6. Simple Linear Regression*
 - 6.1 Conceptual considerations
 - 6.2 Regression line
 - 6.3 Quality assessment
 - 6.4 Applications

Psychology in Media and Communications

Course Code: DLMWPMKP01_E

Study Level	Language of Instruction and Examination	Contact Hours	CP	Admission Requirements
MA	English		5	none

Course Description

In today's information society, media and technologies associated with it are of central importance for people's work, consumption and leisure behavior. The social significance of media is constantly increasing and the technological development, especially of computer-based media, is progressing continuously. The course takes a closer look at the influence of media on people and the resulting effects. It imparts knowledge on human media usage behavior. Information intake, media effects and the resulting behavior are considered as well as different media channels and actions preceding media use as well as the accompanying cognitions and emotions. Students will learn about models of media effectiveness and media socialization as well as how people form judgements in connection with the communication of media messages. In addition, the course deals with psychologically and socially important topics such as the connection between media and violence as well as media and emotions. Mobile communication and communication in social media play an important role as well. In order to build up a sound understanding of media psychology it is essential to deal with the field of communication itself since it is spread via media and forms its central subject area. Communication is an everyday topic and seems to be taken for granted without questioning it. Only in the case of misunderstandings and failures the question arises in which situation which communication channel is used and how communication can be improved. There is no area in which communication processes are not necessary and in which the requirements for shaping communicative processes change rapidly and continuously. Therefore, competence in this area forms the basis for successful communication. This is taught in the course. The course also looks at the various forms of interpersonal communication with the associated models and theories as well as the levels and structures on which they are based. It includes selected concepts of communication with regard to their application in the context of industrial and organizational psychology at the interface between people and companies. Studies and use cases are also taken into account.

Course Outcomes

On successful completion, students will be able to

- describe the subject area of communication and media psychology and to name its foundations.
- understand selected concepts of communication and the cognitive processing of media messages.
- classify the role of media and communication psychology in the context of industrial and organizational psychology.
- evaluate the principles of the psychological preconditions of successful and disturbed communication.
- design communication in a target and user-oriented way.
- evaluate, control and optimize communication and communication processes.
- shape and assess the psychological impact of media environments.

Contents

1. Subject Area of Communication Psychology
 - 1.1 Definition of Communication
 - 1.2 Areas of Application of Communication Psychology
 - 1.3 Communication Models
 - 1.4 Axioms of Communication
2. Basics of Communication Psychology
 - 2.1 Levels of Communication
 - 2.2 Perceptual Channels and Representational Systems
 - 2.3 Well-formulated and Brain-friendly Goals
 - 2.4 Metamodel of language
3. Special Concepts of Communication
 - 3.1 Non-violent Communication
 - 3.2 Transactional Analysis
 - 3.3 The message Square - Four Sides of a Message (Schulz von Thun)
 - 3.4 Limbic Model
4. Media Psychology
 - 4.1 Subject Area of Media Psychology
 - 4.2 Role of Communication in the Media
 - 4.3 Psychology of Media Communication

5. Basics of Media Psychology
 - 5.1 Media Use and Media Reception
 - 5.2 Media Channels and Media Choice
 - 5.3 Media Impact
 - 5.4 Media Socialization
6. Cognitive Processing of Media Messages
 - 6.1 Attention Processes and Cognitive Processes of Information Intake
 - 6.2 Information Processing
 - 6.3 Social Cognition and Judgment
 - 6.4 Cognitive Effect of Media
7. Immersion in Medial Worlds
 - 7.1 Psychological Effect of Computer Games
 - 7.2 Psychological Effect of Virtual Worlds
 - 7.3 Psychological Effect of Mobile Communication
 - 7.4 Psychological effect of Social Media
8. Special Medial Fields of Action
 - 8.1 Media and Emotions
 - 8.2 Media and Violence/Aggression
 - 8.3 Media and Prosocial Behavior
 - 8.4 Media and Pornography

Business Ethics and Corporate Governance

Course Code: DLMBAEBECG01

Study Level	Language of Instruction and Examination	Contact Hours	CP	Admission Requirements
MBA	English		5	None

Course Description

Within the framework of the course "Business Ethics and Corporate Governance", the students prepare a written assignment for which they have to select one out of a variety of topics proposed in the Learning Management System. Students are required to demonstrate their capacity to link business ethics and corporate governance, both theoretically and based on an example from business practice. The students show the ability to familiarize themselves with the topic, to link scientific theory and entrepreneurial practice and to present their findings in a structured systematic way.

Course Outcomes

On successful completion, students will be able to

- explain the most important concepts and definitions of business ethics.
- distinguish important theories of business ethics.
- implement business ethics concepts in business practice.
- explain different understandings of corporate governance.
- highlight the influences of business ethics on corporate governance.
- discuss the relationship between business ethics and corporate governance on the basis of a term paper using an example from business practice.

Contents

1. Introduction to Business Ethics and Corporate Governance
 - 1.1 Basic Terms and Definitions in Business Ethics
 - 1.2 Basic Terms and Definitions in Corporate Governance
 - 1.3 The Link between Business Ethics and Corporate Governance
2. Ethics Theories
 - 2.1 Ethics Theories
 - 2.2 Comparison between Deontology and Utilitarianism
 - 2.3 Business Ethics Concepts evolving from Ethics Theories

3. Business Ethics Problem Areas and Solutions
 - 3.1 Categorization of Ethical Problems in Business
 - 3.2 Components of a Corporate Ethics Program
 - 3.3 Ethics Implementation in Business Practice
4. Basic Perspectives of Corporate Governance
 - 4.1 Important Terms and Definitions of Corporate Governance
 - 4.2 Approaches to Corporate Governance
 - 4.3 The Concept of Control
5. Monitoring Concepts for Corporate Governance
 - 5.1 Governance Mechanisms
 - 5.2 Governance Systems
 - 5.3 Corporate Governance Codes
6. Combining Business Ethics and Corporate Governance
 - 6.1 Linking Business Ethics and Corporate Governance
 - 6.2 Developing an Ethically Oriented Corporate Governance
 - 6.3 Leadership in the Context of Ethical Corporate Governance

Interview and Communication Techniques

Course Code: DLMWPGUK01_E

Study Level	Language of Instruction and Examination	Contact Hours	CP	Admission Requirements
MA	English		5	none

Course Description

Good communication skills are the key to professional success. To achieve professional goals, you have to be convincing in conversations. Only those who really understand their conversation partners and are also understood by them, will achieve a good result more quickly. To achieve this, it is essential to be prepared, especially for difficult conversations, and to have a toolbox of different conversation techniques at your disposal, so that can be used in a targeted manner to make constructive communication possible. In addition to certain means of communication, this also requires special techniques and methods. Knowledge and understanding of the psychological and human aspects of the use of communication techniques and the conduct of discussions are an important basis for the success of discussions in the context of business psychology. The course also addresses difficult and critical discussion situations as well as communication with specific target groups. Students learn about different communication styles, communication techniques as well as the phases of conducting discussions in order to specifically prepare for and conduct discussions with other team members as well as external partners. You will learn how to better adapt to your conversation partners and act accordingly in order to achieve good results for both sides.

Course Outcomes

On successful completion, students will be able to

- place the importance of the areas of communication techniques and interviewing in the overall context of business psychology,
- identify goals and forms of communication and interviewing in the context of business psychology,
- use and apply means, methods and instruments of communication and conversation in the context of business psychology,
- identify and understand purposeful communication and conversation management techniques against the backdrop of difficult and deadlocked situations,
- explain and develop appropriate measures of communication and conversation,
- discuss and uncover problems of communication and conversation and suggest alternative approaches.

Contents

1. Forms of Communication
 - 1.1 Mutual Influence through Communication
 - 1.2 Verbal Communication
 - 1.3 Paraverbal Communication
 - 1.4 Nonverbal Communication
 - 1.5 Extraverbal Communication
 - 1.6 Intrapersonal vs. Interpersonal Communication
2. Means of Communication
 - 2.1 Communication Styles
 - 2.2 Rhetoric
 - 2.3 Special Forms of Communication: Rapport, Pacing and Calibration
 - 2.4 Presuppositions and Submodalities
3. Communication Techniques
 - 3.1 You vs. Me Messages
 - 3.2 Paraphrase
 - 3.3 Questioning Techniques and Methods
 - 3.4 Reframing
 - 3.5 Chunking as a Questioning Technique
 - 3.6 Change of Perspective
4. Communication with Specific Groups
 - 4.1 Communication in the Organization
 - 4.2 Communication with Colleagues, Team Members and Superiors
 - 4.3 Communication with Customers
 - 4.4 Communication with Service Providers
 - 4.5 Communication with the Public
 - 4.6 Communication with Journalists
5. Conversation Management
 - 5.1 Factual and Relationship Level
 - 5.2 Conversation Goals and Position
 - 5.3 Argumentation Strategy
 - 5.4 Conversation Planning and Structuring
 - 5.5 Conversation Setup and Control
 - 5.6 Conversation Analysis

6. Special Features of the Conversation
 - 6.1 Shaping the Relationship Level
 - 6.2 Conversation Traps and Conversation Disorders
 - 6.3 Recognize and Master Critical Conversation Situations
 - 6.4 Feedback Rules
7. Dealing with Difficult Conversation Situations
 - 7.1 Acting in Deadlocked Situations
 - 7.2 Dealing with Resistance
 - 7.3 Personal Aspects in Conversations

Module Contents

The focus of the course is on the necessity of introducing agility and creative working methods to companies. The topics include the fundamentals of agility, the process models of creativity as well as the different types of intellectual tools. These key aspects depend on the individually required skills to find solutions to satisfy customer requirements. Students will thus be able to guide innovation teams and accompany them in their process of finding new ways and solutions with appropriate process and methodological knowledge. On the basis of practical contributions from companies that have already introduced and do successfully live agility, the parameters, which are relevant and critical for success, are illuminated. This gives students a wide-ranging insight into the opportunities and possibilities of an agile thinking and acting organization.

Learning Outcomes

Project: Agile and Creative Methods

On successful completion, students will be able to

- name the relevant topics around agility and creative working methods.
- discuss the applicability of agility and creative working methods in the business-psychological context.
- apply the concepts covered.
- explain the importance, necessity and influence of agility and creative working methods against the background of current developments and to present these using examples.
- apply theoretically acquired knowledge to real case studies.
- implement the theories, methods and tools learned in business practice.
- scientifically investigate and process a selected topic from the field of agility and creative working methods.
- critically reflect, question, and discuss current problems of organizational change and ways of working in relation to agility and creative working methods.
- develop individual problem-solving processes and approaches in connection with agility and creative working methods, to elaborate possible solutions to the challenges of the associated organizational transformation as well as to apply the new methods and tools.

Project: Agile and Creative Methods

Course Code: DLMWPAKAM01_E

Study Level	Language of Instruction and Examination	Contact Hours	CP	Admission Requirements
MA	English		5	none

Course Description

The course deals with the necessity of transforming established organizational structures and working methods as well as with the sustainable embedding of agility, agile principles, and methods in companies. It addresses, amongst others, the following questions: How do companies shape transformations? How do they increase their level of agility in the organization? How can encrusted structures, rigid processes and departmental thinking be overcome? How does a company receive agility? How does one move an entire organization to rethink? The course addresses the importance of strategy, structure, process, leadership, methods, tools and culture in the context of the agile organization. It covers different creative work methods that are applied depending on the phase of the creative process. It enables to specifically support different thinking skills to create solutions for open-ended challenges to align with customer needs. Students discuss different process models and methods and apply them independently. They link their business-psychological, entrepreneurial knowledge with agile principles and tools. They critically reflect on their knowledge and experiences and question them.

Course Outcomes

On successful completion, students will be able to

- name the relevant topics around agility and creative working methods.
- discuss the applicability of agility and creative working methods in the business-psychological context.
- apply the concepts covered.
- explain the importance, necessity and influence of agility and creative working methods against the background of current developments and to present these using examples.
- apply theoretically acquired knowledge to real case studies.
- implement the theories, methods and tools learned in business practice.
- scientifically investigate and process a selected topic from the field of agility and creative working methods.
- critically reflect, question, and discuss current problems of organizational change and ways of working in relation to agility and creative working methods.
- develop individual problem-solving processes and approaches in connection with agility and creative working methods, to elaborate possible solutions to the challenges of the associated organizational transformation as well as to apply the new methods and tools.

Contents

- Amid of a turbulent, volatile economic and social environment, process- and project-organized organizational structures cannot keep pace with change and the associated requirements due to their rigid hierarchies and departmental thinking and acting. The continuing advance of digitalization and the entry of artificial intelligence into more and more areas require new forms of corporate organization and management. In order to survive on the market in the long term, companies have to keep coming up with new services and products. Traditional organizations focus very strongly on themselves. They think and act in pyramids and silos. Agility becomes necessary to survive in a world characterized by volatility, uncertainty, complexity and ambiguity (VUCA). Agile companies align their strategy with the customer and strive to maximize customer value. Hierarchical structures with a great deal of power at the top of the pyramid are being replaced by other organizational forms with distributed authority. The future will be defined by self-organized agile companies. For companies, agility and the associated creative working methods mean the ability to operate profitably in a competitive environment. This makes it possible to react more quickly to environmental changes and changing customer requirements. But how do agile, self-organized companies function and how do they innovate? This is what this course deals with.

International Assessment Methods

Course Code: DLMIOPIAM01

Study Level	Language of Instruction and Examination	Contact Hours	CP	Admission Requirements
MA	English		5	none

Course Description

With an increasingly globalized work force and a larger pool of able job applicants resulting from that, it becomes even more important to be able to select the most competent person for a vacant position. As a result, it is essential that decision makers of such role filling are capable of utilizing psychological assessment tools to their full functionality. Beyond this, maintenance of employee wellbeing is also taking on a more critical role, and similarly, appropriate understanding of relevant diagnostic tools becomes necessary. This course therefore aims to familiarize students with a range of diagnostic tools used on the international level, principally drawing on standardized tests from the UK and the US. Particular attention is given to tests of aptitude, intelligence and personality, as well as tests used to assess employee wellbeing. Beyond engaging with underpinning theory, students will learn how to carry out such standardized assessments and to analyze and interpret them for appropriate occupational decision making.

Course Outcomes

On successful completion, students will be able to

- describe the processes of psychological assessment for occupational aptitude at an international level.
- identify the range of core assessment tools available to assess performance, intelligence and personality.
- select diagnostic tools based on needs and carry out standardized assessments.
- use appropriate methods for diagnostic items and test analysis.
- interpret diagnostic outcomes and prepare psychological reports.
- assess the quality of psychological tests and use tools for quality enhancement.

Contents

1. The Diagnostic Process
 - 1.1 Foundations and Framework Conditions of Psychological Diagnostics
 - 1.2 Data Sources and Methods of Data Collection
 - 1.3 Principles of Multimodal Diagnostics
 - 1.4 Occupational Aptitude Diagnostics
 - 1.5 Screening and Matching
 - 1.6 Quality Criteria

2. Methods of Item and Test Analysis
 - 2.1 Classic Testing Theory
 - 2.2 Factor Analysis
 - 2.3 Profile Analysis
 - 2.4 Multitrait-Multimethod Matrix
3. Aptitude Testing
 - 3.1 Wisconsin Card Sorting Test
 - 3.2 Test of Everyday Attention (TEA)
 - 3.3 Wonderlic Contemporary Cognitive Ability Test
4. Intelligence Testing
 - 4.1 Stanford-Binet Intelligence Scale
 - 4.2 Wechsler Adult Intelligence Scale (WAIS)
5. Personality Testing
 - 5.1 Myers-Briggs Type Indicator (MBTI)
 - 5.2 16 Personality Factor Questionnaire
 - 5.3 SHL Occupational Personality Questionnaire
6. Occupational Health
 - 6.1 Maslach Burnout Inventory (MBI)
 - 6.2 Well-Being Index
 - 6.3 Occupational Depression Inventory (ODI)

Module Contents

- Foundations of professional leadership
- Leadership and motivation in the corporation
- Leadership and corporate culture
- Leadership and change management

Learning Outcomes

Leadership

On successful completion, students will be able to

- recognize underlying beliefs and attitudes towards leadership and compare the influence of various theories of leadership on the identification and development of leaders.
- recognize the impact of cultural environments on leadership, and understand the challenges and opportunities of cross-cultural management.
- outline the influence of social roles on leaders and employees, and assess the influence of roles types on the interactions between leaders and those they are leading.
- ,as a leader, support employees by drawing on empirical evidence to effectively meet the expectations of employees.
- recognize the roles and conflicting interests inherent to leadership positions and develop strategies to address locomotion and cohesion.
- discriminate between effective and non-effective methods for managing staff and organizational activities, and apply those techniques and tools in practice to maximize the satisfaction and effectiveness of staff.
- perform the various responsibilities delegated to a leader such as communicate with employees, lead planning activities, delegate tasks, and plan and lead controlling activities.
- create a plan to support employees through the process of change within an organization.
- assess personal leadership style using a variety of measures and evaluate leadership activities relative to transactional and transformational leadership styles.

Leadership

Course Code: DLMBLSE01

Study Level	Language of Instruction and Examination	Contact Hours	CP	Admission Requirements
MBA	English		5	None

Course Description

In today's knowledge-based society, employees are a firm's most valuable resource. A key responsibility of leadership is to develop the knowledge, expertise, and skills of employees. Good leadership is crucial for the continued success of a firm in the face of increasingly competitive markets. This course presents the necessary competencies of the leader in a modern, knowledge-based organization. Central questions raised by modern leadership theory are presented and discussed. In doing so, the course focuses on requirements and instruments of professional leadership, aspects of situational leadership, and leadership communication and interactions, both in the context of strategic management and change processes. The methodological and conceptual foundations of leadership are presented to students, along with empirical examples and best-practice principles, with the intent for students to master the challenges of enhancing the firm's most valuable asset—its employees—via professional and contemporary leadership practices.

Course Outcomes

On successful completion, students will be able to

- recognize underlying beliefs and attitudes towards leadership and compare the influence of various theories of leadership on the identification and development of leaders.
- recognize the impact of cultural environments on leadership, and understand the challenges and opportunities of cross-cultural management.
- outline the influence of social roles on leaders and employees, and assess the influence of roles types on the interactions between leaders and those they are leading.
- ,as a leader, support employees by drawing on empirical evidence to effectively meet the expectations of employees.
- recognize the roles and conflicting interests inherent to leadership positions and develop strategies to address locomotion and cohesion.
- discriminate between effective and non-effective methods for managing staff and organizational activities, and apply those techniques and tools in practice to maximize the satisfaction and effectiveness of staff.
- perform the various responsibilities delegated to a leader such as communicate with employees, lead planning activities, delegate tasks, and plan and lead controlling activities.
- create a plan to support employees through the process of change within an organization.
- assess personal leadership style using a variety of measures and evaluate leadership activities relative to transactional and transformational leadership styles.

Contents

1. An Overview of Leadership
 - 1.1 Leadership and Personality: Trait Theories
 - 1.2 Leadership as a Skill: Attribute and Behavior Theories
 - 1.3 Positive Reinforcement: Behavioral Theories
 - 1.4 Leadership Dependent on the Situation: Situational Approaches
 - 1.5 Situational and Contingency Theories
 - 1.6 Theory of Functional Leadership Behavior
 - 1.7 Integrated Psychological Theory
 - 1.8 Transactional and Transformative Leadership
 - 1.9 Leadership as an Emotionally Charged Process
 - 1.10 Neo-Emergent Theory
2. Leadership as a Social Role
 - 2.1 Roles and Groups
 - 2.2 Role Types
 - 2.3 Formal Conditions for Social Roles – Corporate Context Determining Roles in Organizations
 - 2.4 The Individual and The Group – Conforming and Deviating Behavior
 - 2.5 The Problems of Formalized Role Understanding and Self-Concept
3. Leadership from the Employee’s Perspective
 - 3.1 General Expectations for Managers
 - 3.2 Truthfulness and Authenticity
 - 3.3 Handling Conflicts Competently
 - 3.4 Conflicts in Groups
 - 3.5 Conflict Resolution Pattern According to Matzat
 - 3.6 Enthusiasm
 - 3.7 Ability to Cope with Pressure
 - 3.8 Assertiveness
 - 3.9 Empathy
 - 3.10 Expertise

4. Leadership from the Manager's Perspective
 - 4.1 Self-Concept as a Manager
 - 4.2 Locomotion and Cohesion
 - 4.3 Individual Problems and Learning Dimensions of Management Behavior
 - 4.4 The Concept of Human Nature and Its Influence on Management Behavior: Theories from Maslow, McGregor, and Herzberg
 - 4.5 Ambiguity Tolerance
5. Management Tools
 - 5.1 Management Tools - Definition
 - 5.2 Organizational Management Tools
 - 5.3 Personnel Management Tools
6. Managerial Functions
 - 6.1 Responsibilities of a Manager
 - 6.2 Communication
 - 6.3 Foundations of Interpersonal Communication
 - 6.4 Planning
 - 6.5 Setting Objectives
 - 6.6 Delegating
 - 6.7 Controlling
 - 6.8 Creating a Feedback Culture
7. Organizational Change
 - 7.1 Knowledge
 - 7.2 Cultural Value Change and Subjectification
 - 7.3 Globalization
 - 7.4 Technological Progress
 - 7.5 Change Management – Leadership in Times of Change
8. Successful Employee Management
 - 8.1 Measuring Leadership Style and Leadership Behavior
 - 8.2 Measuring Transactional and Transformational Leadership with the Multifactor Leadership Questionnaire (MLQ)
 - 8.3 Correlation of Leadership Behavior with Subjective and Objective Success Criteria
 - 8.4 Validation of Leadership Success Using Situational Factors
 - 8.5 Leadership Principles Guiding Leadership Behavior

Module Contents**Customer Relationship Marketing**

- Concept and Basics of Customer Relationship Marketing (CRM)
- Customer Relationship Strategies
- Customer Acquisition, Customer Retention and Customer Recovery
- Electronic Customer Relationship Marketing (eCRM)
- Operational and Analytical CRM Processes

International Consumer Behavior

- Consumer Behavior
- The Consumer Decision-Making Process
- Internal Influences on Consumer Behavior
- External Influences on Consumer Behavior
- International Consumer Behavior
- International Marketing Strategy and Consumer Behavior

Learning Outcomes**Customer Relationship Marketing**

On successful completion, students will be able to

- explain procedures for customer value-oriented analysis of strategic customer portfolios.
- understand the planning, implementation and control of value-oriented customer relationship strategies
- decide whether customer relationships should be systematically developed, deepened or actively terminated, taking into account the company, customer and competitive situation
- understand the high importance of the relational benefits, their brand- and personal determining factors as well as their value-enhancing character for the company.
- organize the structures and processes of relationship marketing with the help of modern business development in such a way that the contribution to value creation in the company is maximized.

International Consumer Behavior

On successful completion, students will be able to

- outline the purchase decision-making process undertaken by the consumer.
- describe the internal and external influences on the consumer decision-making processes.
- identify the different research methods available to companies to collect relevant data regarding their consumers and their behavior
- develop a plan to generate required market research data regarding consumer behavior and decision-making.
- be able to generate, analyze, interpret and report relevant data regarding consumers.
- present the key concepts characterizing international consumer behavior and discuss their impact on global marketing strategies.

Customer Relationship Marketing

Course Code: MWMA02_E

Study Level	Language of Instruction and Examination	Contact Hours	CP	Admission Requirements
MA	English		5	none

Course Description

The ability of a company to permanently bind customers to its products and/or services through systematic relationship marketing and to continuously increase customer lifetime value is one of the most value-adding activities in business practice. Customer relationship marketing comprises the development, intensification and securing of lasting and profitable customer relationships. With this understanding, the course provides basic orientation knowledge that is essential for understanding the complex CRM approach. In addition to a comprehensive explanation of the essential terms and interrelationships, management concepts are presented which can be used to design the individual phases of the customer relationship in a profitable and customer-oriented manner.

Course Outcomes

On successful completion, students will be able to

- explain procedures for customer value-oriented analysis of strategic customer portfolios.
- understand the planning, implementation and control of value-oriented customer relationship strategies
- decide whether customer relationships should be systematically developed, deepened or actively terminated, taking into account the company, customer and competitive situation
- understand the high importance of the relational benefits, their brand- and personal determining factors as well as their value-enhancing character for the company.
- organize the structures and processes of relationship marketing with the help of modern business development in such a way that the contribution to value creation in the company is maximized.

Contents

1. Concept and Basics of Customer Relationship Marketing (CRM)

International Consumer Behavior

Course Code: DLMBCBR01

Study Level	Language of Instruction and Examination	Contact Hours	CP	Admission Requirements
MA	English		5	none

Course Description

In a global economy characterized by greater competition, companies operating internationally need comprehensive market-driven strategies to survive in the market place. The course provides students with the relevant concepts for understanding the international environment of the company with focus on the demand side/the consumer. Students learn how differences in culture, economic systems, and political environments impact consumers' behavior in terms of decision-making in the fields of acquisition, consumption, and disposal of products, services, experiences, and ideas.

Course Outcomes

On successful completion, students will be able to

- outline the purchase decision-making process undertaken by the consumer.
- describe the internal and external influences on the consumer decision-making processes.
- identify the different research methods available to companies to collect relevant data regarding their consumers and their behavior
- develop a plan to generate required market research data regarding consumer behavior and decision-making.
- be able to generate, analyze, interpret and report relevant data regarding consumers.
- present the key concepts characterizing international consumer behavior and discuss their impact on global marketing strategies.

Contents

1. Consumer Behavior
 - 1.1 Consumer Behavior and International Marketing
 - 1.2 Consumer Decision-Making in the Marketplace
2. The Consumer Decision-Making Process
 - 2.1 The Pre-Purchase Stage
 - 2.2 The Purchase Stage
 - 2.3 The Post-Purchase Stage

3. Internal Influences on Consumer Behavior
 - 3.1 Motives and Motivation
 - 3.2 Perception
 - 3.3 Attitude
4. External Influences on Consumer Behavior
 - 4.1 Culture
 - 4.2 Subculture
 - 4.3 Groups and Families
5. International Consumer Behavior
 - 5.1 Cultural Dimensions
 - 5.2 The Influence of Social Media on Consumer Decision-Making
6. International Marketing Strategy and Consumer Behavior
 - 6.1 International Market Segmentation and Product Positioning
 - 6.2 Consumer Behavior and Product Strategy
 - 6.3 Consumer Behavior and Communication Strategy
 - 6.4 Consumer Behavior and Pricing Strategy
 - 6.5 Consumer Behavior and Distribution Strategy

- Special Features of International Employer Branding and Recruiting
- Application Examples and Best Practice on Employer Branding and Recruiting

Talent Management & HR Development

- Theoretical Models of Organizational Development
- Theoretical Models of Change Management
- Tools and Methods
- The Praxis of Talent Management and its Organizational Implementation
- The Process of Success Control
- Talent Management in International Companies – a comparative Analysis

Learning Outcomes

Employer Branding and Recruiting

On successful completion, students will be able to

- place the areas of employer branding and recruiting in the overall context of HR management.
- identify the goals, methods and instruments of employer branding and recruiting.
- comprehend the current specifics and the change of employer branding and recruiting.
- designate alternative ways of organizing employer branding and recruiting.
- explain the instruments and problems of measuring the success of employer branding and recruiting.
- explain the specifics of international employer branding and recruiting.
- reflect current application examples and best practices on employer branding and recruiting.

Talent Management & HR Development

On successful completion, students will be able to

- put talent management and HR development in the overall context of human resources management.
- define the ethical framework of talent management and HR development.
- explain the goals, methods and tools of talent management and HR development.
- identify the current challenges and changes of talent management and HR development both within the national as well as international context.
- understand the various ways of talent management and HR development.
- explain the tools that measure talent management and people development success, as well as the difficulties involved.
- describe specific examples as well as best practices of the application of talent management and HR development.

Employer Branding and Recruiting

Course Code: DLMEBR01_E

Study Level	Language of Instruction and Examination	Contact Hours	CP	Admission Requirements
MA	English		5	none

Course Description

Demographic change means that companies are being forced more than ever to position themselves on the labor market as attractive employers and to increasingly professionalize their recruiting activities. Only those organizations that succeed in securing access to qualified employees on the external labor market with employer branding tools will be successful in the long term. After the first contact with potential new employees, it is then very important to organize recruiting effectively and efficiently and to make a professional impression on applicants. This understanding is going to be presented to the students in the course and they will be given the necessary tools to implement employer branding and recruiting activities.

Course Outcomes

On successful completion, students will be able to

- place the areas of employer branding and recruiting in the overall context of HR management.
- identify the goals, methods and instruments of employer branding and recruiting.
- comprehend the current specifics and the change of employer branding and recruiting.
- designate alternative ways of organizing employer branding and recruiting.
- explain the instruments and problems of measuring the success of employer branding and recruiting.
- explain the specifics of international employer branding and recruiting.
- reflect current application examples and best practices on employer branding and recruiting.

Contents

Module Contents**Tools in Organizational Analysis**

- The Organization
- Organizational Research
- Organization Diagnostics
- Organization Analysis
- Practical application in specific areas

Change Management

- The context and meaning of change
- The change process
- Perspectives for understanding change
- Implementing change

Learning Outcomes

Tools in Organizational Analysis

On successful completion, students will be able to

- deal with the concept of organization in a differentiated way.
- evaluate the possibilities of organizational diagnostics.
- use selected instruments of organizational and team diagnosis.
- carry out, evaluate and reflect on organizational diagnostic measures.
- work on specific organizational analyses.

Change Management

On successful completion, students will be able to

- recognize common features of organizational change and anticipate some of the standard difficulties encountered when an organization engages in change processes.
- explain the importance of organizational change.
- develop a conceptual framework for planned and improvised organizational change, and differentiate between anticipated, emergent, and opportunity-based change.
- utilize and redesign formal organizational structures to facilitate change processes.
- recognize the role of informal organizational structures and identify key stakeholders to promote change processes.
- analyze the social networks that exist within an organization, map independencies and motives/interests, and plan how to distribute information and redesign work flows.
- differentiate between groups of stakeholders and identify the most suitable strategy to adopt with each group.
- recognize the role of the change leader as a political broker and build social capital through informal methods.
- utilize stories and symbols when communicating with others in an organization to maximize leverage as a cultural change leader.
- draw on empirical evidence to plan and implement change processes in an organization.

Tools in Organizational Analysis

Course Code: DLMWPWOAE01_E

Study Level	Language of Instruction and Examination	Contact Hours	CP	Admission Requirements
MA	English		5	none

Course Description

Organizations are more than ever like living organisms, which due to external changes must also change internally and adapt to new conditions. This course deals with a differentiated view of entrepreneurially oriented organizations, their goals, possible strategies, their function and performance. It sheds light on the possibilities of organizational research and its fields of research, in order to then address the goals, possibilities and fields of application of the diagnosis of organizations. Various methods and instruments of organizational diagnosis are presented with the aim of using them in the organizational analysis process. This enables students to initiate and implement change measures on the basis of diagnostic instruments and to evaluate such measures. The course also deals with the practical application of topics that arise in everyday business life, such as the analysis of change management processes, of careers and in connection with risk assessment in the acquisition of companies or company investments (due diligence). In this way, students are taught the spectrum and possible applications of the measures and methods of a targeted organizational analysis through diagnostic measures.

Course Outcomes

On successful completion, students will be able to

- deal with the concept of organization in a differentiated way.
- evaluate the possibilities of organizational diagnostics.
- use selected instruments of organizational and team diagnosis.
- carry out, evaluate and reflect on organizational diagnostic measures.
- work on specific organizational analyses.

Contents

1. The Organization
 - 1.1 The concept of organization
 - 1.2 Goals and strategies of an organization
 - 1.3 Function and performance of organizations
 - 1.4 Role of people in organizations
 - 1.5 Differences between organizations

2. Organizational Research
 - 2.1 Perspectives of organizational research
 - 2.2 Fields of research
 - 2.3 Empirical research on organizations
3. Organization Diagnostics
 - 3.1 Definition and goals of organizational diagnostics
 - 3.2 Fields of application of surgical diagnostics
 - 3.3 The Organizational Diagnosis as a Management Tool
 - 3.4 Target groups of organizational diagnostic findings
 - 3.5 Selected instruments of team and organization diagnosis
4. Organization Analysis
 - 4.1 The organizational analysis
 - 4.2 Preliminary considerations and analysis process
 - 4.3 Conception and operationalization
 - 4.4 Data collection methods
 - 4.5 Survey and evaluation
 - 4.6 Presentation of the analysis and reflection
5. Practical application in specific areas
 - 5.1 Analysis of change processes
 - 5.2 Network analysis
 - 5.3 Analysis of careers in organizations
 - 5.4 Organizational Analysis and Due Diligence

Change Management

Course Code: DLMBCM01

Study Level	Language of Instruction and Examination	Contact Hours	CP	Admission Requirements
MA	English		5	none

Course Description

We live in a world characterized by constant change. This affects not only individuals but also organizations. Even successful organizations need to constantly reinvent themselves in order to remain successful. This course presents a discussion of change in relation to the complexities of organizational life, with an emphasis on applying theory to actual practice. Organizational change is an international phenomenon and the course includes many international case examples. With a focus on organizational change as opposed to personal change and/or entrepreneurship, this course has a distinctly different focus from the related modules “Leadership” and “Innovation and Entrepreneurship.” The first part of the course considers the nature of change and different change models. The second part focuses on how different perspectives complement one another and can be used to better understand, analyze, and diagnose change processes. The course deals with issues of structure, culture, and politics. In the later part of the course, the implementation of change is considered in detail. Given that many change processes fail, this part is an important learning component to complement an in-depth understanding of change.

Course Outcomes

On successful completion, students will be able to

- recognize common features of organizational change and anticipate some of the standard difficulties encountered when an organization engages in change processes.
- explain the importance of organizational change.
- develop a conceptual framework for planned and improvised organizational change, and differentiate between anticipated, emergent, and opportunity-based change.
- utilize and redesign formal organizational structures to facilitate change processes.
- recognize the role of informal organizational structures and identify key stakeholders to promote change processes.
- analyze the social networks that exist within an organization, map independencies and motives/interests, and plan how to distribute information and redesign work flows.
- differentiate between groups of stakeholders and identify the most suitable strategy to adopt with each group.
- recognize the role of the change leader as a political broker and build social capital through informal methods.
- utilize stories and symbols when communicating with others in an organization to maximize leverage as a cultural change leader.
- draw on empirical evidence to plan and implement change processes in an organization.

Contents

1. Organizational Change
 - 1.1 What is Organizational Change About?
 - 1.2 Organizational Change is Ubiquitous
 - 1.3 Change is Difficult
2. Change Management
 - 2.1 The Context of Organizational Change
 - 2.2 Planned Versus Improvisational Change Management
 - 2.3 The Congruence Model of Change
3. Designing Structure
 - 3.1 Formal Structure in Organizations
 - 3.2 Grouping
 - 3.3 Linking
 - 3.4 The Change Leader as an Architect
4. Social Networks
 - 4.1 What are Social Networks?
 - 4.2 Key Terms of Social Network Analysis
 - 4.3 Unique Characteristics of Social Networks
 - 4.4 Social Networks and Organizational Change
5. Politics
 - 5.1 Organizations as Political Arena
 - 5.2 Politics and Change
 - 5.3 The Importance of a Political Perspective on Change
6. Sense-Making
 - 6.1 Organizational Culture
 - 6.2 Sense-Making in Organizations
 - 6.3 The Change Leader as Shaman
7. Change Implementation
 - 7.1 How to Implement Change Successfully
 - 7.2 Four Perspectives on Change

Occupational and Organizational Psychology

Course Code: DLMWPAOP01_E

Study Level	Language of Instruction and Examination	Contact Hours	CP	Admission Requirements
MA	English		5	none

Course Description

The way people work together in organizations is currently being decisively influenced by the digital transformation. This has far-reaching effects on the way work is done. Formal and informal processes of interaction and communication are influenced by this. The course Occupational and Organizational Psychology deals with the subject area, concepts and methods of work and organizational design. It focuses on the positive design of work processes and also looks at the impact of work in terms of the experience and actions of organizational members. The course provides students with tools that enable them to analyze, evaluate and design in the field of work and organizational psychology.

Course Outcomes

On successful completion, students will be able to

- classify industrial and organizational psychology as a subfield of business psychology.
- outline methodological approaches to labor analysis.
- recognize the need for organizations to transform into agile organizations and to name and apply their principles.
- see organizational development as a systematic process and to reflect it accordingly.
- initiate, implement and reflect on change processes in organizations.
- understand the impact of artificial intelligence and robotics on work and help design appropriate human-machine interaction measures from the perspective of industrial and organizational psychology to maintain a humane way of working.
- accompany corporate mergers from an organizational psychology perspective with appropriate measures.
- conduct active sourcing-based recruitment based on data and modern recruiting tools.
- operate contemporary measures of employee development and leadership development.
- implement performance appraisal procedures and be able to perform job performance evaluations.
- take on tasks in the areas of management and human resource leadership.

Contents

1. Industrial and Organizational Psychology and its Impact
 - 1.1 Subject Area of Industrial and Organizational Psychology
 - 1.2 Fields of Investigation and Tasks of Industrial and Organizational Psychology
 - 1.3 Human Images in Industrial and Organizational Psychology
 - 1.4 Work Activity and Personality Development
 - 1.5 Load and Stress
 - 1.6 Life Domain Balance

2. Work Analysis and Evaluation
 - 2.1 Methodical Approaches of the Work Analysis
 - 2.2 Procedure for Work Analyses
 - 2.3 Selected Methods of Work Analysis

3. Work Design Concepts
 - 3.1 Sociotechnical System Design
 - 3.2 Concepts of Action and Activity Theory
 - 3.3 Motivation Theoretical Approaches
 - 3.4 Work Design Strategies

4. New Forms of Work
 - 4.1 Need for Holistic Restructuring
 - 4.2 Artificial Intelligence and Automation
 - 4.3 Human-Machine Interaction
 - 4.4 Robotics Integration
 - 4.5 User-Oriented Dialog Design

5. Agile Organization
 - 5.1 Characteristics of Agile Organization
 - 5.2 Strategic Change Processes
 - 5.3 Principles and Procedure in the Agile Environment
 - 5.4 Agile Frameworks
 - 5.5 Job Aids

6. Organizational Development (OE) as a Process
 - 6.1 Impact of Societal and Organizational Conditions on Organizational Development
 - 6.2 Systemic Principles for the Design of Organizational Development Processes
 - 6.3 Foundations of an Evolutionary Organization
 - 6.4 Integral Process and Consulting Model
 - 6.5 Change of Existing Organizations
 - 6.6 Reflection of Change Processes
7. Mergers & Acquisitions: Mergers and Corporate Takeovers
 - 7.1 Organizational Preconditions
 - 7.2 Psychological Processes
 - 7.3 Culture Change
 - 7.4 Coaching as an Organizational Development Strategy
8. Recruitment
 - 8.1 Digital Recruiting Transformation
 - 8.2 Models and Processes
 - 8.3 Social Recruiting
 - 8.4 Recruiting Tools
 - 8.5 Active Sourcing and Intelligent Use of Data
 - 8.6 Touchpoints in the Application Process
9. Human Resources Development
 - 9.1 Potential Analysis and Diagnosis of Development Needs
 - 9.2 Development Planning
 - 9.3 High Performance Management
 - 9.4 Leadership Developments and Bimodal Leadership
 - 9.5 Transfer Protection
10. Performance Evaluation
 - 10.1 Goals of the Performance Assessment
 - 10.2 Assessment Procedure Based on the OKR Method
 - 10.3 Target Agreement and Commitment
 - 10.4 Performance Evaluation

Coaching and Consulting

Course Code: DLMWPCUB01_E

Study Level	Language of Instruction and Examination	Contact Hours	CP	Admission Requirements
MA	English		5	none

Course Description

The aim of the course is for students to understand "consulting" and "coaching" as two separate services and to understand the different settings and approaches. They will learn about the different roles of a consultant and a coach and be able to implement the respective processes in practice in a structured manner. The course offers the opportunity to look at the two approaches in a differentiated way and to distinguish the respective process phases from each other. Particularly in the context of coaching, students are enabled to distinguish between different forms of coaching. The students will be taught when which coaching method is used with which instruments. Based on selected questions and small practical sequences, individual interventions will be applied and discussed. Reference is made to current topics in the fields of "coaching" and "consulting"; these are explained in depth.

Course Outcomes

On successful completion, students will be able to

- consider the topics "coaching" and "consulting" differentiated from each other.
- explain the relevance of consulting and coaching in an economic context.
- weigh up the extent to which the method of consulting or coaching should be used depending on the occasion.
- distinguish different coaching approaches from each other.
- apply the acquired knowledge and methodological skills based on different questions.
- apply selected consulting and coaching methods in practice.

Contents

1. Consulting as a System
 - 1.1 Tasks and Consulting Areas of Management Consultancies
 - 1.2 Advantages and Benefits of Management Consulting
 - 1.3 Role of the Management Consultancy and the Management Consultant
 - 1.4 Expert Consulting versus Process Consulting
 - 1.5 System Boundary between Consultant and Client
 - 1.6 Performance and Technologies of Management Consultancies

2. Consulting Process
 - 2.1 Contractual Issues and Order Clarification
 - 2.2 Analysis
 - 2.3 Conception
 - 2.4 Implementation
 - 2.5 Evaluation
 - 2.6 Completion of the Consultation Process
 - 2.7 Special Feature: Emotional Intelligence in the Consulting Process
3. Diagnostic Methods in the Context of Counselling
 - 3.1 Construct Interview in General
 - 3.2 Observation
 - 3.3 Key figures
 - 3.4 From the Diagnosis to the (Consulting) Concept
4. Selected Consulting Methods for Specific Situations
 - 4.1 Stakeholder Analysis and Target Definition
 - 4.2 Idea Generation
 - 4.3 Information Gathering
 - 4.4 Enterprise Modelling
 - 4.5 Situation Assessment and Decision
5. Coaching
 - 5.1 Demarcation: Consulting - Coaching - Therapy
 - 5.2 Role of the Coach
 - 5.3 Occasions and Topics for Coaching
 - 5.4 Effect of Coaching
 - 5.5 Advantages and Benefits of Coaching
6. Coaching Process
 - 6.1 Orientation and Order Clarification
 - 6.2 Diagnosis, Objectives and Intervention Planning
 - 6.3 Solution and Transfer
 - 6.4 Evaluation

7. Business Coaching
 - 7.1 Definition and Differentiation: Business Coaching - Systemic Coaching - Personality-Oriented Coaching
 - 7.2 Qualities and Skills of a Coach
 - 7.3 Process Design and Procedure Business Coaching
 - 7.4 Methods and Selected Instruments
8. Systemic Coaching
 - 8.1 Peculiarities and Characteristics of Systemic Questioning
 - 8.2 Process Design and Procedure of Systemic Coaching
 - 8.3 Methods and Selected Instruments
9. Personality Oriented Coaching
 - 9.1 Specifics and Characteristics - Working with the Inner World of the Client
 - 9.2 Process Design and Procedure of Personality-Oriented Coaching
 - 9.3 Selected Methods and Instruments

Quantitative Research Methods

Course Code: DLMWPQFM01_E

Study Level	Language of Instruction and Examination	Contact Hours	CP	Admission Requirements
MA	English		5	none

Course Description

Thanks to agile development methods, significantly shorter development cycles are possible because potential customers can be directly involved in the development of new product concepts. In order to be able to transparently present customer opinions with innovative methods and to profit from them, a sound know-how of quantitative research methods is indispensable. This module offers a practice-oriented deepening of the topic starting with sample selection and different survey methods up to the construction of questionnaires. The focus of this course is on contemporary survey methods of online market research via social networks or web-based questionnaire surveys. Finally, the students deal with different possibilities of evaluation, visualization and presentation of quantitative data. In this context, the focus is on the target group-specific presentation of collected results in written and oral form.

Course Outcomes

On successful completion, students will be able to

- outline important features of quantitative research methods in the philosophy of science.
- design, conduct and evaluate a psychological market research project
- explain different forms of questioning.
- describe selected new technologies in the context of the online survey and to be able to use them in a targeted manner. This includes both the computer-assisted recruitment of the sample and the implementation and evaluation of the written survey.
- apply the basics of (online) questionnaire construction in practice.
- prepare and deliver a target group specific presentation in written and oral form.

Contents

1. Basics of Quantitative Research Methods
 - 1.1 Psychological Market Research: Subject Matter and Practical Examples
 - 1.2 Communication with Clients: Expectations, Involvement, Recommendations for Action
 - 1.3 Communication with Investigators
 - 1.4 Procedure of a Psychological Market Research Project
 - 1.5 Discuss Potential Advantages and Disadvantages of Online Research.

2. Measurement Specification: Operationalization
 - 2.1 Selection of Samples I: randomized
 - 2.2 Selection of Samples II: Deliberate or Arbitrary
 - 2.3 Panel Samples
 - 2.4 Obtaining Samples: Recruitment and Motivation
 - 2.5 Sample Size
3. Questioning
 - 3.1 Oral Interviewing: Forms of the Interview
 - 3.2 Written Survey: Variants and Framework Conditions
 - 3.3 Online Market Research: Use of New Technologies
4. Written survey: From Conception to Implementation
 - 4.1 Scaling
 - 4.2 Questionnaire Construction I: Item Generation and Pretesting
 - 4.3 Questionnaire Construction II: Layout and Series Effects
 - 4.4 Online Survey I: Special Features of the Questionnaire Construction
 - 4.5 Online survey II: Create Questionnaire
5. Computer-aided Analysis of Quantitative Data
 - 5.1 Basics of Statistical Analysis and Data Preparation
 - 5.2 Inductive Statistics: From the Sample to the Population
 - 5.3 Standard Evaluation
 - 5.4 Compare Real and Ideal Values
 - 5.5 Positioning in the Image Space: Factor Analysis
 - 5.6 Visualization of Results
6. Presentation of Quantitative Data
 - 6.1 Final Report for Professional Audience
 - 6.2 Journal Article
 - 6.3 Data Presentation for Professional Audience: Conference
 - 6.4 Data Presentation: Public Relations and Customer-oriented Presentation
 - 6.5 Critical Reception of Study Results

Module Contents

This course imparts knowledge about the current challenges of the organizational orientation or reorientation of economically oriented companies. The course focuses on essential topics regarding the entire life cycle of an employee in the organization. In addition, the methods of cooperation between people in an operational context form another important pillar of the course. It includes case studies that show how different companies have answered industrial and organizational psychology questions for themselves.

Seminar on Current Topics in Industrial and Organizational Psychology

Course Code: DLMWPATWP01_E

Study Level	Language of Instruction and Examination	Contact Hours	CP	Admission Requirements
MA	English		5	none

Course Description

The course deals with the central topics and fields of action in industrial and organizational psychology that contribute to actively shaping the changes organizations are facing at the interface between people and companies. The focus is on selected focal points that have a special significance in connection with the digital transformation. These topics are explained, elucidated and discussed. The students learn to independently analyze selected topics and case studies and to link them to already known concepts, as well as to critically question and discuss them. They acquire the competence to identify the essential, especially new fields of action in industrial and organizational psychology. They are able to successfully deal with new types of questions in the areas of personnel, work and organization using appropriate concepts, methods and instruments. This enables students to act proactively as competent contacts for CEOs and managing directors in these subject areas and to act on their own responsibility. Examples of content may include Corporate Entrepreneurship, Intergenerational Collaboration, Ambidexterity and Deliberately Developmental Organization. Likewise, measures to promote and develop agility can also be discussed.

Course Outcomes

On successful completion, students will be able to

- identify specific selected topics in industrial and organizational psychology.
- apply the concepts covered in industrial and organizational psychology courses.
- explain the significance of industrial and organizational psychology for the changes currently taking place at the interface between people and companies by means of examples.
- discuss the organizational challenges faced by companies and the resulting tasks for industrial and organizational psychology.
- transfer theoretically acquired knowledge to real case studies.
- implement the theories into the practice of industrial and organizational psychology.
- scientifically explore and work on a selected topic.
- critically examine and discuss current topics and problems in industrial and organizational psychology.
- develop their own problem-solving processes and to work out possible solutions to the challenges and problems of industrial and organizational psychology independently with the help of appropriate concepts and to apply the corresponding instruments of industrial and organizational psychology.

Contents

- Today more than ever, companies are forced to answer complex new questions and offer innovative new solutions. To do so, they need employees with a broad portfolio of competencies. This requires a changed and different approach to tasks and thus has a direct impact on the organization, the culture and the employees. To successfully meet these challenges, new ways and methods of working must be developed and applied. This in turn requires other forms of information exchange, which in turn necessitates of new working spaces in which these methods and the associated exchange of information can be implemented.

Module Contents**Applied Marketing Research**

- The Role of Marketing Research in Managerial Decision-Making
- Problem Definition and the Marketing Research Process
- Secondary Data and Qualitative Research
- Survey Research and the Concept of Measurement
- Observational Research
- Sampling Issues, Data Processing, and Fundamental Data Analysis
- Communicating the Research Results

Seminar: User Experience and Customer Journey

The seminar provides students with knowledge about the topics of the customer journey (CX) and the user experience (UX). It shows the embedding and relevance of the topics in the product and service offering of companies. It highlights the role, importance and work of industrial and organizational psychologists in the above areas. It incorporates key themes along the 'customer journey' online, associated touchpoints and experiences. It considers a wide range of use cases. This module gives students a broad insight across the application areas of CX and UX. An up-to-date list of topics can be found in the Learning Management System.

Learning Outcomes**Applied Marketing Research**

On successful completion, students will be able to

- recognize and promote the importance of marketing research methodologies in supporting key marketing management decisions.
- identify some of the challenges of marketing research in an international environment.
- identify appropriate analysis tools for a given marketing related problem on a strategic and operational level.
- identify errors made in the research process.
- outline the stages of the marketing research process.
- identify ethical problems in a marketing research situation and propose an ethically sound approach.
- propose a research design to study a particular research question.
- compare and contrast different research methods.
- recommend good practice for a variety of research techniques.
- design questionnaires with sound measurement properties.
- interpret results of advanced marketing research efforts.
- transfer the gained insights into their future international work environment.

Seminar: User Experience and Customer Journey

On successful completion, students will be able to

- name selected current topics on the Customer Journey (CX) and User Experience (UX).
- apply the concepts covered in the Consumer Behavior and Customer Loyalty courses.
- explain the importance of the customer journey and the user experience for the success of a product or service on the market using examples.
- apply the learned theories and knowledge to case studies and to the practice of a customer journey.
- scientifically explore and work on a selected topic in this field.
- critically question and discuss current challenges and problems of the customer journey and user experience.
- develop own problem-solving processes and possible solutions as well as independently develop approaches to issues and problems related to the "customer journey through the enterprise" based on known concepts, applying customer loyalty tools and knowledge of consumer behavior.

Applied Marketing Research

Course Code: DLMBCBR02

Study Level	Language of Instruction and Examination	Contact Hours	CP	Admission Requirements
MA	English		5	none

Course Description

In a global economy characterized by greater competition, companies operating internationally need comprehensive market-driven strategies in order to survive in the market place. The course allows students to explore marketing research, the information-gathering arm of marketing practice. The topic is viewed primarily from the perspective of a consumer of marketing research, i.e. a busy manager who needs information to guide decision making. Given their role in decision-making regarding marketing and sourcing marketing research, it is helpful for managers to understand how producers of research approach the process. This background will help you as a manager to become a better-informed consumer of research who is able to participate in research design, evaluate the quality of marketing information that crosses your desk, and conduct marketing research projects yourself when appropriate.

Course Outcomes

On successful completion, students will be able to

- recognize and promote the importance of marketing research methodologies in supporting key marketing management decisions.
- identify some of the challenges of marketing research in an international environment.
- identify appropriate analysis tools for a given marketing related problem on a strategic and operational level.
- identify errors made in the research process.
- outline the stages of the marketing research process.
- identify ethical problems in a marketing research situation and propose an ethically sound approach.
- propose a research design to study a particular research question.
- compare and contrast different research methods.
- recommend good practice for a variety of research techniques.
- design questionnaires with sound measurement properties.
- interpret results of advanced marketing research efforts.
- transfer the gained insights into their future international work environment.

Contents

1. The Role of Marketing Research in Managerial Decision-Making
 - 1.1 The Importance of Marketing Research in Decision-Making
 - 1.2 The Institutions Involved in Marketing Research
 - 1.3 Common Challenges in Conducting Marketing Research
2. Problem Definition and the Marketing Research Process
 - 2.1 From Problem Recognition to Research Objectives: Step One
 - 2.2 From Research Design to Follow-Up: Steps Two to Six
 - 2.3 Forward and Backward Linkages in the Marketing Research Process
3. Secondary Data and Qualitative Research
 - 3.1 Advantages and Limitations of Secondary Data
 - 3.2 Definition and Types of Qualitative Research
 - 3.3 Limitations of Qualitative Research
4. Survey Research and the Concept of Measurement
 - 4.1 Survey Errors and Their Impact on Research Outcomes
 - 4.2 Measurement Scales
 - 4.3 Questionnaire Design
5. Observational Research
 - 5.1 Observational Research Defined
 - 5.2 Approaches to Observational Research
 - 5.3 Advantages and Limitations of Observational Research
6. Sampling Issues, Data Processing, and Fundamental Data Analysis
 - 6.1 Sampling Methods and Types of Samples
 - 6.2 Data Processing Issues
 - 6.3 Fundamental Data Analysis
7. Communicating the Research Results
 - 7.1 The Major Steps in Communicating the Results
 - 7.2 Organization of the Research Report
 - 7.3 The Marketing Research Presentation

Seminar: User Experience and Customer Journey

Course Code: DLMWPWCJ01_E

Study Level	Language of Instruction and Examination	Contact Hours	CP	Admission Requirements
MA	English		5	none

Course Description

The course "Customer Journey and User Experience" deals with the central topics in connection with the "customer journey" through the Internet and the associated contact points as well as the experiences before and after the purchase of a product/service. The focus is on the collection and evaluation of user-relevant data and the resulting recommendations for product development, marketing and sales. Industrial and organizational psychologists are here service providers for a deeper understanding of the customer and a resulting orientation of the company's offerings from the customer's point of view. The course deals with specific topics of the customer journey and the user experience. It highlights the approach to this topic and the implementation of essential measures in this context. The students learn to independently analyze selected topics and case studies and to link them to already known concepts, as well as to critically question and discuss them and to develop new approaches.

Course Outcomes

On successful completion, students will be able to

- name selected current topics on the Customer Journey (CX) and User Experience (UX).
- apply the concepts covered in the Consumer Behavior and Customer Loyalty courses.
- explain the importance of the customer journey and the user experience for the success of a product or service on the market using examples.
- apply the learned theories and knowledge to case studies and to the practice of a customer journey.
- scientifically explore and work on a selected topic in this field.
- critically question and discuss current challenges and problems of the customer journey and user experience.
- develop own problem-solving processes and possible solutions as well as independently develop approaches to issues and problems related to the "customer journey through the enterprise" based on known concepts, applying customer loyalty tools and knowledge of consumer behavior.

Contents

- The course provides students with key knowledge regarding the "customer journey" before making a purchase decision on the Internet. The consumer usually does not decide to buy immediately after he has heard about a product for the first time. In most cases, he or she comes into contact with a product or brand several times before deciding on an action.

These points of contact are called "touchpoints". In order to persuade the customer to buy a product or service, it is therefore important to find out how a customer's "Customer Journey (CX)" proceeds and what experience (User Experience/UX) they have in the process. In addition, it is also very important for a company to ensure that the customer has an as positive experience as possible while using the product. The goal here is to retain the customer (repurchase/additional sales/extension) and to increase the net promoter score (NPS) or recommendation rate.

The course also includes psychological aspects from the areas of perception, information processing, cognition, motivation to use and emotion when using the product/service. Within the framework of the "Go to Market", business psychologists provide essential information for the product development and the management with the help of special methods, examinations and surveys in order to win the (potential) customer for the product and to provide him with a positive user experience.

A deep understanding of the entire CX (incl. direct and indirect contact points) and UX is conveyed. This is an important prerequisite for a customer-oriented marketing and sales orientation as well as an associated cultural change in the company since the focus of action in the company must be on the perspective of the customer. This involves the recording of customer-relevant contact points, customer satisfaction using customer journey mapping (CJM), measuring behavior and determining customer expectations in e-commerce. The course gives students a broad insight into the application fields of CX and UX. The students learn to independently analyze selected topics and case studies and to link them to already known concepts, to critically question and discuss them and to develop new approaches.

- New Work - a New Working World
- Restructuring of the Organization
- New Aspects in Recruiting
- Employee Motivation and Retention
- Empowerment of Employees
- New Methods of Working
- Working Landscapes

Seminar: New Work

The course provides students with important background knowledge for the necessity of the new way of working in companies and organizations. It provides knowledge about the possibilities of the new way of working and the methods that go with it. It includes special important topics such as new ways of recruiting employees, their retention and their empowerment. As a special additional point, it addresses the issue of work environments depending on the tasks to be accomplished in each case. A wide range of use cases are included. This gives the students a broad insight to the application fields of "New Work". A current list of topics can be found in the Learning Management System.

Learning Outcomes

New Work

On successful completion, students will be able to

- classify the field of "New Work" in the context of industrial and organizational psychology.
- build an understanding of the operational and organizational changes needed in companies.
- weighing up new forms of cooperation against each other and, according to the requirements, to be introduced in companies.
- identify new ways of attracting and retaining employees and understand their need for engagement.
- discuss the new aspects of motivating employees.
- explain measures to empower and build competencies of employees.
- identify goals, methods and tools within the framework of the "New Work".
- consider and implement specific new methods of work in a differentiated way.

Seminar: New Work

On successful completion, students will be able to

- name selected topics of the "New Work".
- apply concepts covered in the New Work course.
- show the effects of a changed world of work.
- explain the requirements of an operationally reoriented working environment.
- demonstrate the influence and effects of "New Work" through the current development with the help of examples.
- transfer theoretically acquired knowledge to real case studies.
- transfer learned methods and new forms of working together into entrepreneurial practice.
- scientifically explore and work on a selected topic.
- critically question and discuss current problems of the introduction and sustainable anchoring of "New Work".
- develop own problem-solving processes and find possible solutions to the challenges of "New Work" with the help of the concepts taught and to apply the methods of "New Work" in doing so.

Course Description

Our working environment is changing rapidly right now. Societal and economic upheavals are taking place. The digital revolution is leading society into a new age. Digitization and globalization are confronting the economy with unprecedented challenges and lifting us to the next evolutionary level. This is having a considerable impact on the reality of people's work. Collaboration methods, new forms of work and changed hierarchies are becoming more and more important. Rigid corporate hierarchies based on the principle of "command and control" have had their day in a working world geared to speed, flexibility and digital offerings. However, the transformation of the working world also offers new opportunities. The most urgent task in companies is therefore to bring employees into line with the new, digitally shaped working realities. This means putting people at the center of digitization. To do this, they must be given the appropriate access, knowledge, methods and opportunities for collaboration. This understanding is built up for the students in this course. They are provided with the necessary knowledge and tools to implement the required measures conveyed in companies and organizations.

Course Outcomes

On successful completion, students will be able to

- classify the field of "New Work" in the context of industrial and organizational psychology.
- build an understanding of the operational and organizational changes needed in companies.
- weighing up new forms of cooperation against each other and, according to the requirements, to be introduced in companies.
- identify new ways of attracting and retaining employees and understand their need for engagement.
- discuss the new aspects of motivating employees.
- explain measures to empower and build competencies of employees.
- identify goals, methods and tools within the framework of the "New Work".
- consider and implement specific new methods of work in a differentiated way.

Contents

1. New Work: Basics and Approaches
 - 1.1 Old Economy versus New Work
 - 1.2 Societal Level (Macro Level)
 - 1.3 Company Level (Meso Level)
 - 1.4 Management Requirements in Companies (Micro Level)
 - 1.5 New Roles of People, Places, Tools
 - 1.6 Digital Mindset
 - 1.7 Role and Importance of Diversity
2. New Aspects in Recruiting
 - 2.1 Active Sourcing
 - 2.2 Social Media Recruiting
 - 2.3 Candidate Application via Staffing Platforms and Co.
 - 2.4 Person-Environment-Fit
 - 2.5 Selection Processes and Procedures
 - 2.6 Onboarding
3. Employee Motivation and Retention
 - 3.1 Motivation and Empowerment
 - 3.2 Self-Determination (Autonomy)
 - 3.3 Competence and Perfection (Mastery)
 - 3.4 Sense of Fulfillment (Purpose)
 - 3.5 Measures to Retain Employees in Company and Team
4. Empowering Workforce
 - 4.1 Fault-Tolerant Corporate Culture
 - 4.2 Empowering & Shared Leadership
 - 4.3 Lifelong Learning and Continuing Education
 - 4.4 Collaboration through Networked Learning and Knowledge Sharing
5. Restructuring of the Organization - New Organizational Structures
 - 5.1 Hierarchy, Heterarchy and Agile Organization
 - 5.2 Network Structures and Swarm Intelligence
 - 5.3 Holocracy
 - 5.4 Sociocracy

6. New Working Methods
 - 6.1 Agile Working in the VUCA World
 - 6.2 Design Thinking
 - 6.3 Kanban
 - 6.4 Scrum
 - 6.5 Workhack
 - 6.6 Prototyping
7. Agile Working Landscapes in the Organization
 - 7.1 Flexible Working (Time) Models and Work-Life-Blending
 - 7.2 Flexible Working Environments and Spaces

Seminar: New Work

Course Code: DLMWPWNW02_E

Study Level	Language of Instruction and Examination	Contact Hours	CP	Admission Requirements
MA	English		5	none

Course Description

The course deals with the central issues of redesigning the nature of corporate and organizational collaboration. It addresses the need for the required changes as well as the new forms of collaboration, attracting, retaining and motivating employees. In addition, students explore new ways of working and the design of work environments for different ways of working. The course explores specific issues of "New Work". It sheds light on the approach to introducing the concept. The course is complemented by additional articles and case studies of medium-sized and large companies that have already successfully introduced new ways of working. This course also raises awareness of the "do's and don'ts" regarding the successful introduction. Students learn to independently analyze selected topics and case studies and to link them to already known concepts, as well as to critically question and discuss them.

Course Outcomes

On successful completion, students will be able to

- name selected topics of the "New Work".
- apply concepts covered in the New Work course.
- show the effects of a changed world of work.
- explain the requirements of an operationally reoriented working environment.
- demonstrate the influence and effects of "New Work" through the current development with the help of examples.
- transfer theoretically acquired knowledge to real case studies.
- transfer learned methods and new forms of working together into entrepreneurial practice.
- scientifically explore and work on a selected topic.
- critically question and discuss current problems of the introduction and sustainable anchoring of "New Work".
- develop own problem-solving processes and find possible solutions to the challenges of "New Work" with the help of the concepts taught and to apply the methods of "New Work" in doing so.

Contents

- In a new business world, the principles of "command and obedience" of employees are just as obsolete as rigid hierarchies, single offices and fixed working hours and forms. Currently, new forms of work organization, collaboration, corporate culture and workplace architecture are emerging as a result of the digitalization of entire industries and sectors driven by the

start-up economy. In addition, more and more people are asking about the meaning of their work and living time; they want all actors in companies and organizations to cooperate on an equal footing. The course deals with current and future significant aspects of "New Work" with regard to new forms of work organization and working methods.

Applied Project Management

- Applied Project Management
- The Project Management Landscape
- The Project Context
- Standardized Approaches to Project Management
- Agile Approaches to Project/Process Management
- Variations of Standardized and Agile Methods
- Tools for Project Managers

Project: Corporate Organizational Development

The course provides students with knowledge of the entire range of possible applications of company-oriented organizational development. It shows methods and instruments used in organizational development for different areas and different operational issues. It includes a wide range of application cases. This gives students a broad insight into the fields of application of organizational development.

Learning Outcomes

Applied Project Management

On successful completion, students will be able to

- understand and explain the role of project management within organizations.
- give an overview over the project management institutions worldwide.
- explain the different approaches of the most important standardized and agile project management methods.
- critically discuss the advantages and restrictions of each of these methods.
- know and apply the variety of helpful tools supporting a project manager's work.
- select the appropriate project management method for any given situation.

Project: Corporate Organizational Development

On successful completion, students will be able to

- show the range of possible applications of organizational development.
- set up and apply concepts for the design and development of organizations.
- select and apply methods and instruments based on the background of the respective task.
- design organizational development based on a socially responsible and society-oriented attitude.
- identify relevant and selected fields of application of organizational development.
- transfer theoretically acquired knowledge to real projects.
- critically question and discuss today's problems of organizational development.
- develop their own problem-solving processes and to independently work out possible approaches and solutions to questions of development and design of organizations, and to apply the instruments of organizational development.

Study Level	Language of Instruction and Examination	Contact Hours	CP	Admission Requirements
MA	English		5	none

Course Description

For many decades now, the approach of project management has played an important role worldwide, both in the private sector as well as in public administration. Over the years, a widespread and commonly used terminology has evolved. National and international project management organizations have developed various methods for managing complex projects in an organized way. These can be divided into two major categories. The traditional standardized methods all have in common that they tackle projects in a planned and well-structured way. The agile methods, on the other hand, feature a systematic but open approach, leaving vast room for changes along the way. In this course, the individual methods are being introduced to some level of detail, explaining the basic idea, and showing the advantages and restrictions of each of these methods. The typical field of application for each method will be described, enabling the student to choose the method fitting best for a given situation. Additionally, a set of practical tools will be taught, which will support a project manager in steering any given project towards the project goal.

Course Outcomes

On successful completion, students will be able to

- understand and explain the role of project management within organizations.
- give an overview over the project management institutions worldwide.
- explain the different approaches of the most important standardized and agile project management methods.
- critically discuss the advantages and restrictions of each of these methods.
- know and apply the variety of helpful tools supporting a project manager's work.
- select the appropriate project management method for any given situation.

Contents

1. The Project Management Landscape
 - 1.1 History of project management
 - 1.2 Definition of projects, programs, and processes
 - 1.3 Scope and examples of projects in today's world
 - 1.4 International project management organizations
 - 1.5 Options for specialization and certification

2. The Project Context
 - 2.1 Analyzing the environment and the project goals
 - 2.2 Distinguishing project types and categories
 - 2.3 Project culture and organization models
 - 2.4 The role of leadership and personnel management
 - 2.5 Finding the right approach – selection criteria
3. Standardized Approaches to Project Management
 - 3.1 Project management according to German DIN
 - 3.2 Project management according to PMBOK 6 by the PMI
 - 3.3 The IPMA system
 - 3.4 Organizing projects with PRINCE2®
 - 3.5 Advantages and restrictions of standardized methods
4. Agile Approaches to Project/Process Management
 - 4.1 The Agile Manifesto
 - 4.2 Fundamentals of Scrum and scaling methods
 - 4.3 Kanban and Design Thinking
 - 4.4 Advantages and restrictions of agile methods
5. Variations of Standardized and Agile Methods
 - 5.1 The critical chain project management
 - 5.2 Prince2® Agile
 - 5.3 The PMBOK 7 by the PMI
 - 5.4 Overview over further variations
6. Tools for Project Managers
 - 6.1 Objectives, milestone planning, and work packages
 - 6.2 Budgeting, resource planning, and scheduling using bar charts
 - 6.3 Analyzing project risks (FMEA) and milestone trends (MTA)
 - 6.4 Taskboards and other little tricks
 - 6.5 Stakeholder management and management reporting

Project: Corporate Organizational Development

Course Code: DLMWPWUOE01_E

Study Level	Language of Instruction and Examination	Contact Hours	CP	Admission Requirements
MA	English		5	none

Course Description

This course deals with a range of possibilities for organizational design and development of companies and organizations. Organizational development is increasingly used to change organizations and find sustainable solutions. The course shows how concepts and instruments are used and applied in practice. It presents methods and instruments of organizational development against the background of current economic developments. Proven approaches are considered which meet the requirements of practice-oriented organizational development. Intervention possibilities and design ideas are presented in connection with a practice-oriented reflection. Case studies from different industries and institutions such as media companies, health insurance companies, public administration, health care, foundations, research and theatre operations will provide students with an impressive insight into different types of organizational development projects and their implementation. Students gain insight and receive impulses on how organizations can be designed and developed in a lively way. They learn to independently analyze selected topics and case studies and to link them to already known concepts, as well as to critically question and discuss them. In addition, they acquire knowledge about which conditions, attitudes and actions support successful change in organizations and how the concepts and instruments are applied in practice.

Course Outcomes

On successful completion, students will be able to

- show the range of possible applications of organizational development.
- set up and apply concepts for the design and development of organizations.
- select and apply methods and instruments based on the background of the respective task.
- design organizational development based on a socially responsible and society-oriented attitude.
- identify relevant and selected fields of application of organizational development.
- transfer theoretically acquired knowledge to real projects.
- critically question and discuss today's problems of organizational development.
- develop their own problem-solving processes and to independently work out possible approaches and solutions to questions of development and design of organizations, and to apply the instruments of organizational development.

Contents

- In the course of digitalization and the increasing importance of artificial intelligence and virtual reality, new business areas and models are emerging. Existing companies and organizations must deal with the related questions regarding their offerings and the associated services. This has significant implications on the structure and processes in operational organizations as they must evolve to meet new demands of customers. The course provides students with knowledge about the entire range of possibilities of company-oriented organizational development. It shows methods and instruments of organizational development for different areas and different operational issues and includes a wide range of use cases. This gives students a broad insight into the fields of application of organizational development. The project deals with current topics in organizational development. Each participant must carry out a project on a topic of their choice and present the results in writing in a project report.

Customer Relationship Marketing

Course Code: MWMA02_E

Study Level	Language of Instruction and Examination	Contact Hours	CP	Admission Requirements
MA	English		5	none

Course Description

The ability of a company to permanently bind customers to its products and/or services through systematic relationship marketing and to continuously increase customer lifetime value is one of the most value-adding activities in business practice. Customer relationship marketing comprises the development, intensification and securing of lasting and profitable customer relationships. With this understanding, the course provides basic orientation knowledge that is essential for understanding the complex CRM approach. In addition to a comprehensive explanation of the essential terms and interrelationships, management concepts are presented which can be used to design the individual phases of the customer relationship in a profitable and customer-oriented manner.

Course Outcomes

On successful completion, students will be able to

- explain procedures for customer value-oriented analysis of strategic customer portfolios.
- understand the planning, implementation and control of value-oriented customer relationship strategies
- decide whether customer relationships should be systematically developed, deepened or actively terminated, taking into account the company, customer and competitive situation
- understand the high importance of the relational benefits, their brand- and personal determining factors as well as their value-enhancing character for the company.
- organize the structures and processes of relationship marketing with the help of modern business development in such a way that the contribution to value creation in the company is maximized.

Contents

International Consumer Behavior

Course Code: DLMBCBR01

Study Level	Language of Instruction and Examination	Contact Hours	CP	Admission Requirements
MA	English		5	none

Course Description

In a global economy characterized by greater competition, companies operating internationally need comprehensive market-driven strategies to survive in the market place. The course provides students with the relevant concepts for understanding the international environment of the company with focus on the demand side/the consumer. Students learn how differences in culture, economic systems, and political environments impact consumers' behavior in terms of decision-making in the fields of acquisition, consumption, and disposal of products, services, experiences, and ideas.

Course Outcomes

On successful completion, students will be able to

- outline the purchase decision-making process undertaken by the consumer.
- describe the internal and external influences on the consumer decision-making processes.
- identify the different research methods available to companies to collect relevant data regarding their consumers and their behavior
- develop a plan to generate required market research data regarding consumer behavior and decision-making.
- be able to generate, analyze, interpret and report relevant data regarding consumers.
- present the key concepts characterizing international consumer behavior and discuss their impact on global marketing strategies.

Contents

1. Consumer Behavior
 - 1.1 Consumer Behavior and International Marketing
 - 1.2 Consumer Decision-Making in the Marketplace
2. The Consumer Decision-Making Process
 - 2.1 The Pre-Purchase Stage
 - 2.2 The Purchase Stage
 - 2.3 The Post-Purchase Stage

3. Internal Influences on Consumer Behavior
 - 3.1 Motives and Motivation
 - 3.2 Perception
 - 3.3 Attitude
4. External Influences on Consumer Behavior
 - 4.1 Culture
 - 4.2 Subculture
 - 4.3 Groups and Families
5. International Consumer Behavior
 - 5.1 Cultural Dimensions
 - 5.2 The Influence of Social Media on Consumer Decision-Making
6. International Marketing Strategy and Consumer Behavior
 - 6.1 International Market Segmentation and Product Positioning
 - 6.2 Consumer Behavior and Product Strategy
 - 6.3 Consumer Behavior and Communication Strategy
 - 6.4 Consumer Behavior and Pricing Strategy
 - 6.5 Consumer Behavior and Distribution Strategy

Talent Management & HR Development

- Theoretical Models of Organizational Development
- Theoretical Models of Change Management
- Tools and Methods
- The Praxis of Talent Management and its Organizational Implementation
- The Process of Success Control
- Talent Management in International Companies – a comparative Analysis

Learning Outcomes

Employer Branding and Recruiting

On successful completion, students will be able to

- place the areas of employer branding and recruiting in the overall context of HR management.
- identify the goals, methods and instruments of employer branding and recruiting.
- comprehend the current specifics and the change of employer branding and recruiting.
- designate alternative ways of organizing employer branding and recruiting.
- explain the instruments and problems of measuring the success of employer branding and recruiting.
- explain the specifics of international employer branding and recruiting.
- reflect current application examples and best practices on employer branding and recruiting.

Talent Management & HR Development

On successful completion, students will be able to

- put talent management and HR development in the overall context of human resources management.
- define the ethical framework of talent management and HR development.
- explain the goals, methods and tools of talent management and HR development.
- identify the current challenges and changes of talent management and HR development both within the national as well as international context.
- understand the various ways of talent management and HR development.
- explain the tools that measure talent management and people development success, as well as the difficulties involved.
- describe specific examples as well as best practices of the application of talent management and HR development.

Employer Branding and Recruiting

Course Code: DLMEBR01_E

Study Level	Language of Instruction and Examination	Contact Hours	CP	Admission Requirements
MA	English		5	none

Course Description

Demographic change means that companies are being forced more than ever to position themselves on the labor market as attractive employers and to increasingly professionalize their recruiting activities. Only those organizations that succeed in securing access to qualified employees on the external labor market with employer branding tools will be successful in the long term. After the first contact with potential new employees, it is then very important to organize recruiting effectively and efficiently and to make a professional impression on applicants. This understanding is going to be presented to the students in the course and they will be given the necessary tools to implement employer branding and recruiting activities.

Course Outcomes

On successful completion, students will be able to

- place the areas of employer branding and recruiting in the overall context of HR management.
- identify the goals, methods and instruments of employer branding and recruiting.
- comprehend the current specifics and the change of employer branding and recruiting.
- designate alternative ways of organizing employer branding and recruiting.
- explain the instruments and problems of measuring the success of employer branding and recruiting.
- explain the specifics of international employer branding and recruiting.
- reflect current application examples and best practices on employer branding and recruiting.

Contents

1. Personnel Marketing in HR Management
 - 1.1 Change in Human Resources
 - 1.2 Definition and Basic Requirements for Successful Personnel Marketing
 - 1.3 Employer Branding - the Employer Brand as the Center of Personnel Marketing
2. Development of an Employer Brand
 - 2.1 The Employer Branding Cycle
 - 2.2 Target Group Definition
 - 2.3 The Employer Branding Strategy

3. Communication in Employer Branding
 - 3.1 Employer Branding and Talent Attraction
 - 3.2 The Communication Strategy
4. Recruiting
 - 4.1 The Recruiting Process
 - 4.2 Methods of Personnel Selection
 - 4.3 Cooperation with Personnel Consultants
5. Recruiting and Communication Channels
 - 5.1 Candidate Experience and Applicant Management
 - 5.2 Recruiting Channels Online
 - 5.3 Recruiting Channels Offline
6. International Recruiting and Employer Branding
 - 6.1 Recruiting and Employer Branding from a Global Perspective
7. Measurability of Employer Branding & Recruiting
 - 7.1 Measurable Success Factors in Employer Branding and Recruiting

Talent Management & HR Development

Course Code: DLMTUP01_E

Study Level	Language of Instruction and Examination	Contact Hours	CP	Admission Requirements
MA	English		5	none

Course Description

Demographic change has forced companies to find, nurture, develop and retain their talent. As a result, the HR manager must continuously revise and organize talent management and development as efficiently as possible. The course is designed to help students understand the importance of talent management and human resource management and to teach them the tools necessary to implement activities related to talent management and human resource development.

Course Outcomes

On successful completion, students will be able to

- put talent management and HR development in the overall context of human resources management.
- define the ethical framework of talent management and HR development.
- explain the goals, methods and tools of talent management and HR development.
- identify the current challenges and changes of talent management and HR development both within the national as well as international context.
- understand the various ways of talent management and HR development.
- explain the tools that measure talent management and people development success, as well as the difficulties involved.
- describe specific examples as well as best practices of the application of talent management and HR development.

Contents

1. Fundamentals of Talent Management and Human Resources Development
 - 1.1 Concepts and Definitions
 - 1.2 Basic Legal Regulations
 - 1.3 The Challenge of Demographic Change
 - 1.4 Ethical Frameworks
2. Competence and Performance Management
 - 2.1 Competence and Skills Management
 - 2.2 Performance and Potential

3. E-learning and Blended Learning
 - 3.1 Special Characteristics and Framework Conditions
 - 3.2 Planning, Design and Control
 - 3.3 IT Basics
4. Management Development
 - 4.1 Leadership Development
 - 4.2 360° Feedbacks
 - 4.3 Coaching and Mentoring
5. Talent Relationship Management
 - 5.1 Target Group Definition
 - 5.2 Employer Branding and Employer Promise
 - 5.3 Search Strategies
 - 5.4 Candidate Experience and Engagement
6. Organizational Implementation
 - 6.1 Responsibilities and Structure
 - 6.2 The Role of Managers
 - 6.3 IT Systems for Talent Management and HR Development
 - 6.4 Talent Management and Human Resources Development in Large Companies and SMEs Using the Example of Financial Institutions/Banks
7. Monitoring the Success of Talent Management and HR Development
 - 7.1 Key Figures and KPIs
 - 7.2 The Problem of Success Control
8. International Talent Management and International Human Resources Development
 - 8.1 International HR Development
9. An Application Example: ABB
 - 9.1 Talent Management and Human Resources Development at ABB

Module Contents

Tools in Organizational Analysis

- The Organization
- Organizational Research
- Organization Diagnostics
- Organization Analysis
- Practical application in specific areas

Change Management

- The context and meaning of change
- The change process
- Perspectives for understanding change
- Implementing change

Learning Outcomes

Tools in Organizational Analysis

On successful completion, students will be able to

- deal with the concept of organization in a differentiated way.
- evaluate the possibilities of organizational diagnostics.
- use selected instruments of organizational and team diagnosis.
- carry out, evaluate and reflect on organizational diagnostic measures.
- work on specific organizational analyses.

Change Management

On successful completion, students will be able to

- recognize common features of organizational change and anticipate some of the standard difficulties encountered when an organization engages in change processes.
- explain the importance of organizational change.
- develop a conceptual framework for planned and improvised organizational change, and differentiate between anticipated, emergent, and opportunity-based change.
- utilize and redesign formal organizational structures to facilitate change processes.
- recognize the role of informal organizational structures and identify key stakeholders to promote change processes.
- analyze the social networks that exist within an organization, map independencies and motives/interests, and plan how to distribute information and redesign work flows.
- differentiate between groups of stakeholders and identify the most suitable strategy to adopt with each group.
- recognize the role of the change leader as a political broker and build social capital through informal methods.
- utilize stories and symbols when communicating with others in an organization to maximize leverage as a cultural change leader.
- draw on empirical evidence to plan and implement change processes in an organization.

Tools in Organizational Analysis

Course Code: DLMWPWOAE01_E

Study Level	Language of Instruction and Examination	Contact Hours	CP	Admission Requirements
MA	English		5	none

Course Description

Organizations are more than ever like living organisms, which due to external changes must also change internally and adapt to new conditions. This course deals with a differentiated view of entrepreneurially oriented organizations, their goals, possible strategies, their function and performance. It sheds light on the possibilities of organizational research and its fields of research, in order to then address the goals, possibilities and fields of application of the diagnosis of organizations. Various methods and instruments of organizational diagnosis are presented with the aim of using them in the organizational analysis process. This enables students to initiate and implement change measures on the basis of diagnostic instruments and to evaluate such measures. The course also deals with the practical application of topics that arise in everyday business life, such as the analysis of change management processes, of careers and in connection with risk assessment in the acquisition of companies or company investments (due diligence). In this way, students are taught the spectrum and possible applications of the measures and methods of a targeted organizational analysis through diagnostic measures.

Course Outcomes

On successful completion, students will be able to

- deal with the concept of organization in a differentiated way.
- evaluate the possibilities of organizational diagnostics.
- use selected instruments of organizational and team diagnosis.
- carry out, evaluate and reflect on organizational diagnostic measures.
- work on specific organizational analyses.

Contents

1. The Organization
 - 1.1 The concept of organization
 - 1.2 Goals and strategies of an organization
 - 1.3 Function and performance of organizations
 - 1.4 Role of people in organizations
 - 1.5 Differences between organizations

2. Organizational Research
 - 2.1 Perspectives of organizational research
 - 2.2 Fields of research
 - 2.3 Empirical research on organizations
3. Organization Diagnostics
 - 3.1 Definition and goals of organizational diagnostics
 - 3.2 Fields of application of surgical diagnostics
 - 3.3 The Organizational Diagnosis as a Management Tool
 - 3.4 Target groups of organizational diagnostic findings
 - 3.5 Selected instruments of team and organization diagnosis
4. Organization Analysis
 - 4.1 The organizational analysis
 - 4.2 Preliminary considerations and analysis process
 - 4.3 Conception and operationalization
 - 4.4 Data collection methods
 - 4.5 Survey and evaluation
 - 4.6 Presentation of the analysis and reflection
5. Practical application in specific areas
 - 5.1 Analysis of change processes
 - 5.2 Network analysis
 - 5.3 Analysis of careers in organizations
 - 5.4 Organizational Analysis and Due Diligence

Change Management

Course Code: DLMBCM01

Study Level	Language of Instruction and Examination	Contact Hours	CP	Admission Requirements
MA	English		5	none

Course Description

We live in a world characterized by constant change. This affects not only individuals but also organizations. Even successful organizations need to constantly reinvent themselves in order to remain successful. This course presents a discussion of change in relation to the complexities of organizational life, with an emphasis on applying theory to actual practice. Organizational change is an international phenomenon and the course includes many international case examples. With a focus on organizational change as opposed to personal change and/or entrepreneurship, this course has a distinctly different focus from the related modules “Leadership” and “Innovation and Entrepreneurship.” The first part of the course considers the nature of change and different change models. The second part focuses on how different perspectives complement one another and can be used to better understand, analyze, and diagnose change processes. The course deals with issues of structure, culture, and politics. In the later part of the course, the implementation of change is considered in detail. Given that many change processes fail, this part is an important learning component to complement an in-depth understanding of change.

Course Outcomes

On successful completion, students will be able to

- recognize common features of organizational change and anticipate some of the standard difficulties encountered when an organization engages in change processes.
- explain the importance of organizational change.
- develop a conceptual framework for planned and improvised organizational change, and differentiate between anticipated, emergent, and opportunity-based change.
- utilize and redesign formal organizational structures to facilitate change processes.
- recognize the role of informal organizational structures and identify key stakeholders to promote change processes.
- analyze the social networks that exist within an organization, map independencies and motives/interests, and plan how to distribute information and redesign work flows.
- differentiate between groups of stakeholders and identify the most suitable strategy to adopt with each group.
- recognize the role of the change leader as a political broker and build social capital through informal methods.
- utilize stories and symbols when communicating with others in an organization to maximize leverage as a cultural change leader.
- draw on empirical evidence to plan and implement change processes in an organization.

Contents

1. Organizational Change
 - 1.1 What is Organizational Change About?
 - 1.2 Organizational Change is Ubiquitous
 - 1.3 Change is Difficult

2. Change Management
 - 2.1 The Context of Organizational Change
 - 2.2 Planned Versus Improvisational Change Management
 - 2.3 The Congruence Model of Change

3. Designing Structure
 - 3.1 Formal Structure in Organizations
 - 3.2 Grouping
 - 3.3 Linking
 - 3.4 The Change Leader as an Architect

4. Social Networks
 - 4.1 What are Social Networks?
 - 4.2 Key Terms of Social Network Analysis
 - 4.3 Unique Characteristics of Social Networks
 - 4.4 Social Networks and Organizational Change

5. Politics
 - 5.1 Organizations as Political Arena
 - 5.2 Politics and Change
 - 5.3 The Importance of a Political Perspective on Change

6. Sense-Making
 - 6.1 Organizational Culture
 - 6.2 Sense-Making in Organizations
 - 6.3 The Change Leader as Shaman

7. Change Implementation
 - 7.1 How to Implement Change Successfully
 - 7.2 Four Perspectives on Change

Module Contents**Master Thesis**

- Master's thesis

Colloquium

- Colloquium on the Master's thesis

Learning Outcomes**Master Thesis**

On successful completion, students will be able to

- work on a problem from their major field of study by applying the specialist and methodological skills they have acquired during their studies.
- analyse selected tasks with scientific methods, critically evaluate them and develop appropriate solutions under the guidance of an academic supervisor.
- record and analyse existing (research) literature appropriate to the topic of the Master's thesis.
- prepare a detailed written elaboration in compliance with scientific methods.

Colloquium

On successful completion, students will be able to

- present a problem from their field of study under consideration of academic presentation and communication techniques.
- reflect on the scientific and methodological approach chosen in the Master's thesis.
- actively answer subject-related questions from subject experts (experts of the Master's thesis).

Master Thesis

Course Code: MMTHE01

Study Level	Language of Instruction and Examination	Contact Hours	CP	Admission Requirements
MA	English		27	none

Course Description

The aim and purpose of the Master's thesis is to successfully apply the subject-specific and methodological competencies acquired during the course of study in the form of an academic dissertation with a thematic reference to the major field of study. The content of the Master's thesis can be a practical-empirical or theoretical-scientific problem. Students should prove that they can independently analyse a selected problem with scientific methods, critically evaluate it and work out proposed solutions under the subject-methodological guidance of an academic supervisor. The topic to be chosen by the student from the respective field of study should not only prove the acquired scientific competences, but should also deepen and round off the academic knowledge of the student in order to optimally align his professional abilities and skills with the needs of the future field of activity.

Course Outcomes

On successful completion, students will be able to

- work on a problem from their major field of study by applying the specialist and methodological skills they have acquired during their studies.
- analyse selected tasks with scientific methods, critically evaluate them and develop appropriate solutions under the guidance of an academic supervisor.
- record and analyse existing (research) literature appropriate to the topic of the Master's thesis.
- prepare a detailed written elaboration in compliance with scientific methods.

Contents

- Within the framework of the Master's thesis, the problem as well as the scientific research goal must be clearly emphasized. The work must reflect the current state of knowledge of the topic to be examined by means of an appropriate literature analysis. The student must prove his ability to use the acquired knowledge theoretically and/or empirically in the form of an independent and problem-solution-oriented application.

Colloquium

Course Code: MMTHE02

Study Level	Language of Instruction and Examination	Contact Hours	CP	Admission Requirements
MA	English		3	none

Course Description

The colloquium will take place after submission of the Master's thesis. This is done at the invitation of the experts. During the colloquium, the students must prove that they have fully independently produced the content and results of the written work. The content of the colloquium is a presentation of the most important work contents and research results by the student, and the answering of questions by the experts.

Course Outcomes

On successful completion, students will be able to

- present a problem from their field of study under consideration of academic presentation and communication techniques.
- reflect on the scientific and methodological approach chosen in the Master's thesis.
- actively answer subject-related questions from subject experts (experts of the Master's thesis).

Contents

- The colloquium includes a presentation of the most important results of the Master's thesis, followed by the student answering the reviewers' technical questions.
