Academic Integrity and Writing for Business

Course Code: DLBBAAIWB01_E

Study Level	Language of Instruction	Contact Hours	CP	Admission Requirements
BA	English		5	none

Course Description

This course facilitates key aspects of academic integrity and provides students with the skills of appropriate business writing. Therefore, this course is contributing to students' capacity to academic writing and research. Students will learn to handle academic sources developed by other authors. The issue of plagiarism will be prominently addressed. In addition, this course provides students with the skills to communicate with corporate stakeholders in writing. Students will learn how to adequately develop business communication in writing.

Course Outcomes

On successful completion, students will be able to

- understand the concept of academic integrity.
- use sources from other authors in an academically acceptable way.
- reference works of other authors correctly.
- avoid plagiarism.
- develop written communication in business appropriately.
- adequately address different corporate stakeholders.

Contents

1. Introduction to Academic Integrity
 - 1.1 Key Elements of Academic Integrity
 - 1.2 Plagiarism...
 - 1.3 How to avoid Plagiarism
2. Introduction to Academic Referencing
 - 2.1 Using Sources from other Authors in Academic Writing
 - 2.2 Citation and the List of Literature
 - 2.3 Referencing Styles
3. Work with Academic Resources
 - 3.1 How to employ Academic Data Bases
 - 3.2 Search in Data Bases
 - 3.3 Administration of Sources

4. Fundamentals of Business Writing
 - 4.1 Definition and Explanation of Business Writing
 - 4.2 Purpose of Business Writing
 - 4.3 Best Practices – Useful Hints on Business Writing
5. Developing Convincing Business Writing
 - 5.1 Considering the Recipient: What is the Target Group
 - 5.2 Considering the Objective: What do you want to achieve?
 - 5.3 Developing Your Written Communication
6. Examples for Compelling Business Writing
 - 6.1 Internal Communication to all staff via Email
 - 6.2 Warning Letter to an Employee
 - 6.3 Email to a Supplier in Delay

Introduction to Academic Work

Course Code: DLBCSIAW01

Study Level	Language of Instruction	Contact Hours	CP	Admission Requirements
BA	English		5	none

Course Description

The application of good scientific practice is one of the basic academic qualifications that should be acquired while studying. This course deals with the distinction between everyday knowledge and science. This requires a deeper understanding of the theory of science, as well as the knowledge of basic research methods and instruments for writing scientific texts. The students therefore gain initial insight into academic research and are introduced to the basic knowledge that will help them in the future to produce scientific papers. In addition, the students receive an overview of the different IU examination forms and insight into their requirements and implementation.

Course Outcomes

On successful completion, students will be able to

- understand and apply formal criteria of a scientific work.
- distinguish basic research methods and identify criteria of good scientific practice.
- describe central scientific theoretical basics and research paradigms and their effects on scientific research results.
- use literature databases, literature administration programs, and other library structures properly; avoid plagiarism; and apply citation styles correctly.
- apply the evidence criteria to scientific texts.
- define a research topic and derive a structure for scientific texts.
- compile a list of literature, illustrations, tables, and abbreviations for scientific texts.
- understand and distinguish between the different forms of scientific work at IU.

Contents

1. Theory of Science
 - 1.1 Introduction to Science and Research
 - 1.2 Research Paradigms
 - 1.3 Fundamental Research Decisions
 - 1.4 Effects of Scientific Paradigms on Research Design

2. Application of Good Scientific Practice
 - 2.1 Research Ethics
 - 2.2 Evidence Teaching
 - 2.3 Data Protection and Affidavit
 - 2.4 Orthography and Shape
 - 2.5 Identification and Delimitation of Topics
 - 2.6 Research Questions and Structure
3. Research Methods
 - 3.1 Empirical Research
 - 3.2 Literature and Reviews
 - 3.3 Quantitative Data Collection
 - 3.4 Qualitative Data Collection
 - 3.5 Mix of Methods
 - 3.6 Critique of Methods and Self-Reflection
4. Librarianship: Structure, Use, and Literature Management
 - 4.1 Plagiarism Prevention
 - 4.2 Database Research
 - 4.3 Literature Administration
 - 4.4 4.4 Citation and Author Guidelines
 - 4.5 4.5 Bibliography
5. Scientific Work at the IU – Research Essay
6. Scientific Work at the IU - Project Report
7. Scientific Work at the IU - Case Study
8. Scientific Work at the IU - Bachelor Thesis
9. Scientific Work at the IU – Oral Assignment
10. Scientific Work at the IU – Oral Project Report
11. Scientific Work at the IU - Colloquium

Module Contents

- Self-Directed and Collaborative Learning
- Networking and Cooperation
- Performance in (Virtual) Teams
- Communication, Arguments, and Being Convincing
- Potentials for Conflict and Managing Conflicts
- Self-Management and Personal Skills

Learning Outcomes

Collaborative Work

On successful completion, students will be able to

- design their own learning processes both self-directed and collaborative with analog and digital media.
- initiate face-to-face and virtual cooperation and select suitable methods for shaping collaboration even in an intercultural context and across disciplinary boundaries.
- assess different forms of communication in relation to the goals and requirements of different situations and to reflect on their own communication and argumentation behavior in order to be able to shape conducive collaboration also in an interdisciplinary context.
- recognize social diversity including cultural and professional differences as a value, and to name and apply tools to deal with them constructively.
- explain conflict potentials and the role of emotions in conflicts and to describe the use of systemic methods in the target- and solution-oriented handling of conflicts.
- analyze one's own resources, present methods of self-leadership and self-motivation, and derive appropriate strategies.

Collaborative Work

Course Code: DLBCSCW01

Study Level	Language of Instruction	Contact Hours	CP	Admission Requirements
BA	English		5	none

Course Description

The course supports the students in building up and expanding important interdisciplinary competences for our networked world, and in doing so, students can take advantage of the opportunities for constructive cooperation with others. It presents essential forms and design possibilities of collaborative learning and working, imparts basic knowledge and tools for self-managed, flexible, and creative thinking, learning and acting and familiarizes students with the topics of empathy and emotional intelligence. Students are also encouraged to use the course contents. In this way, they promote their autonomous competence to act and their competence in the interactive application of tools and in interacting in heterogeneous groups.

Course Outcomes

On successful completion, students will be able to

- design their own learning processes both self-directed and collaborative with analog and digital media.
- initiate face-to-face and virtual cooperation and select suitable methods for shaping collaboration even in an intercultural context and across disciplinary boundaries.
- assess different forms of communication in relation to the goals and requirements of different situations and to reflect on their own communication and argumentation behavior in order to be able to shape conducive collaboration also in an interdisciplinary context.
- recognize social diversity including cultural and professional differences as a value, and to name and apply tools to deal with them constructively.
- explain conflict potentials and the role of emotions in conflicts and to describe the use of systemic methods in the target- and solution-oriented handling of conflicts.
- analyze one's own resources, present methods of self-leadership and self-motivation, and derive appropriate strategies.

Contents

1. Learning for a Networked World in a Networked World
 - 1.1 Requirements and Opportunities of the VUCA World
 - 1.2 Learning, Information, and Dealing with Knowledge and Ignorance
 - 1.3 C-Model: Collective – Collaborative – Continuous – Connected
 - 1.4 Checking Your Own Learning Behaviour

2. Networking and Cooperation
 - 2.1 Finding and Winning Suitable Cooperation Partners
 - 2.2 Sustainable Relationships: Digital Interaction and Building Trust
 - 2.3 Collaboration: Organizing Locally and Virtually and Using Media
 - 2.4 Social Learning: Agile, Collaborative, and Mobile Planning of Learning Processes
3. Performance in (Virtual) Teams
 - 3.1 Goals, Roles, Organization and Performance Measurement
 - 3.2 Team Building and Team Flow
 - 3.3 Scrum as a Framework for Agile Project Management
 - 3.4 Design Thinking, Kanban, Planning Poker, Working-in-Progress-Limits & Co
4. Communicate and Convince
 - 4.1 Communication as Social Interaction
 - 4.2 Language, Images, Metaphors, and Stories
 - 4.3 It's the Attitude that Counts: Open, Empathetic, and Appreciative Communication
 - 4.4 Listen Actively - Argue - Convince - Motivate
 - 4.5 Analyze Your Own Conversational and Argumentational Skills
5. Recognize Conflict Potentials - Handle Conflicts - Negotiate Effectively
 - 5.1 Respecting Diversity - Seizing Opportunities
 - 5.2 Developing Empathy for Yourself and Others
 - 5.3 Systemic Work Solutions and Reframing
 - 5.4 Negotiate Constructively: Finding Clear Words - Interests Instead of Positions
6. Realize Your Own Projects
 - 6.1 Set Goals Effectively - Focus - Reflect
 - 6.2 The Agile Use of One's Own Time
 - 6.3 (Self-)Coaching and Inner Team
 - 6.4 Strategies and Methods for Self-Management and Self-Motivation
7. Mobilize Your Resources
 - 7.1 Recognizing Resources - Regulating Emotions
 - 7.2 Reflection and Innovation - Lateral Thinking and Creativity
 - 7.3 Transfer Strength and Willpower: Analyzing and Controlling Condition Factors

Module Contents

- Basics of Intercultural Competence
- Cultural Concepts
- Culture and Ethics
- Implications of Current Ethical Problems in the Area of Interculturality, Ethics, and Diversity
- Intercultural Learning and Working
- Case Studies for Cultural and Ethical Conflicts

Learning Outcomes

Intercultural and Ethical Decision-Making

On successful completion, students will be able to

- explain the most important terms in the areas of interculturality, diversity, and ethics.
- distinguish different explanatory patterns of culture.
- understand culture at different levels.
- plan processes of intercultural learning and working.
- understand the interdependencies of culture and ethics.
- independently work on a case study on intercultural competence.

Intercultural and Ethical Decision-Making

Course Code: DLBCSIDM01

Study Level	Language of Instruction	Contact Hours	CP	Admission Requirements
BA	English		5	none

Course Description

In this course, students acquire the necessary knowledge to understand intercultural competencies and current developments in the fields of diversity and ethics. Students will understand how to systematically plan and implement learning processes for the development of competences important in these areas. First, important terms are clarified and differentiated from each other, and cultural aspects are explained from different perspectives. In addition, students learn that cultural issues are relevant at different levels, for example, within a state, company, or other group. In this context, students also recognize the connection between ethics and culture with different interdependencies. On the basis of this knowledge, students are then familiarized with the different possibilities and potentials of intercultural and ethical learning and working. Practical cases are used to illustrate the importance of the relationships learned for today's work context in many companies. The students then work on a case study in which the acquired knowledge is systematically applied.

Course Outcomes

On successful completion, students will be able to

- explain the most important terms in the areas of interculturality, diversity, and ethics.
- distinguish different explanatory patterns of culture.
- understand culture at different levels.
- plan processes of intercultural learning and working.
- understand the interdependencies of culture and ethics.
- independently work on a case study on intercultural competence.

Contents

1. Basics of Intercultural and Ethical Competence to Act
 - 1.1 Subject Areas, Terms, and Definitions
 - 1.2 Relevance of Intercultural and Ethical Action
 - 1.3 Intercultural Action - Diversity, Globalization, Ethics
2. Cultural Concepts
 - 2.1 Hofstede's Cultural Dimensions
 - 2.2 Culture Differentiation According to Hall
 - 2.3 Locus of Control Concept to Rotter

3. Culture and Ethics
 - 3.1 Ethics - Basic Terms and Concepts
 - 3.2 Interdependence of Culture and Ethics
 - 3.3 Ethical Concepts in Different Regions of the World
4. Current Topics in the Area of Interculturality, Ethics, and Diversity
 - 4.1 Digital Ethics
 - 4.2 Equality and Equal Opportunities
 - 4.3 Social Diversity
5. Intercultural Learning and Working
 - 5.1 Acculturation
 - 5.2 Learning and Working in Intercultural Groups
 - 5.3 Strategies for Dealing with Cultural Conflicts
6. Case Studies for Cultural and Ethical Conflicts
 - 6.1 Case Study: Interculturality
 - 6.2 Case Study: Diversity
 - 6.3 Case Study: Interculturality and Ethics

Certificate Course Italian

Course Code: DLFSWI01_E

Study Level	Language of Instruction	Contact Hours	CP	Admission Requirements
BA	English		5	none

Course Description

The qualification objectives correspond to levels A1, A2, B1 and B2 according to the criteria of the Common European Framework of Reference for Languages (CEFR). Using everyday subject areas, chosen areas of specialization, and using basic and advanced grammatical structures, the use of Italian as a foreign language is taught and practiced according to a CEFR placement test. Upon successful completion, students will receive a certificate corresponding to their chosen level.

Course Outcomes

On successful completion, students will be able to

- meet the qualification objectives according to the chosen level (A1, A2, B1 or B2) according to the criteria of the Common European Framework of Reference for Languages (CEFR).
- use the foreign language Italian according to a CEFR placement test on the basis of everyday topics, selected areas of specialization and by adapting basic and advanced grammatical structures.

Contents

- Depending on the CEFR placement, students will be proficient
 - to understand and use familiar, everyday expressions and very simple phrases aimed at satisfying concrete needs. They can introduce themselves and others and ask other people questions about themselves - e.g. where they live, what kind of people they know or what kind of things they have - and they can give answers to questions of this kind. They can communicate in a simple way if the person they are talking to speaks slowly and clearly and is willing to help. (Level A1)
 - to understand sentences and frequently used expressions related to areas of immediate importance (e.g. personal and family information, shopping, work, local area). You can communicate in simple, routine situations involving a simple and direct exchange of information about familiar things. You can describe by simple means your own background and education, immediate environment and things related to immediate needs. (Level A2)
 - to understand the main points when clear standard language is used and when it's about familiar things from work, school, leisure, etc. You can handle most situations encountered while traveling in the language area. You can express yourself simply and coherently on familiar topics and personal areas of interest. You can talk about experiences and events, describe dreams, hopes and goals, and give brief reasons or explanations for plans and opinions. (Level B1)

- to understand the main content of complex texts on concrete and abstract topics; and to understand specialist discussions in their own area of specialization. You can communicate so spontaneously and fluently that a normal conversation with native speakers is quite possible without major effort on either side. You can express yourself clearly and in detail on a wide range of topics, explain a point of view on a topical issue and state the advantages and disadvantages of various options. (Level B2)
- Grammar:
 - Level A1 - present and past tenses, sentence structure, prepositions, etc.
 - Level A2 - among other things tenses of the past, differences in the past tenses, imperative, subordinate clauses, pronouns (dative, accusative)
 - Level B1 - including introduction of past perfect, conjunctions, introduction of passive voice, adverbs, adjectives (difference), future tense
 - Level B2 - among others verb constructions, conditional clauses, indirect speech

Certificate Course Spanish

On successful completion, students will be able to

- meet the qualification objectives according to the chosen level (A1, A2, B1 or B2) according to the criteria of the Common European Framework of Reference for Languages (CEFR).
- use the foreign language Spanish according to a CEFR placement test on the basis of everyday topics, selected areas of specialization and by adapting basic and advanced grammatical structures.

Foreign Language Spanish

On successful completion, students will be able to

- meet the qualification objectives according to the chosen level (A1, A2, B1 or B2) according to the criteria of the Common European Framework of Reference for Languages (CEFR).
- use the foreign language Spanish according to a CEFR placement test on the basis of everyday topics, selected areas of specialization and by adapting basic and advanced grammatical structures.

Certificate Course Spanish

Course Code: DLFSWS01_E

Study Level	Language of Instruction	Contact Hours	CP	Admission Requirements
BA	English		5	none

Course Description

The qualification objectives correspond to levels A1, A2, B1 and B2 according to the criteria of the Common European Framework of Reference for Languages (CEFR). Using everyday subject areas, chosen areas of specialization, and using basic and advanced grammatical structures, the use of Spanish as a foreign language is taught and practiced according to a CEFR placement test. Upon successful completion, students will receive a certificate corresponding to their chosen level.

Course Outcomes

On successful completion, students will be able to

- meet the qualification objectives according to the chosen level (A1, A2, B1 or B2) according to the criteria of the Common European Framework of Reference for Languages (CEFR).
- use the foreign language Spanish according to a CEFR placement test on the basis of everyday topics, selected areas of specialization and by adapting basic and advanced grammatical structures.

Contents

- Depending on the CEFR placement, students will be proficient
 - to understand and use familiar, everyday expressions and very simple phrases aimed at satisfying concrete needs. They can introduce themselves and others and ask other people questions about themselves - e.g. where they live, what kind of people they know or what kind of things they have - and they can give answers to questions of this kind. They can communicate in a simple way if the person they are talking to speaks slowly and clearly and is willing to help. (Level A1)
 - to understand sentences and frequently used expressions related to areas of immediate importance (e.g. personal and family information, shopping, work, local area). You can communicate in simple, routine situations involving a simple and direct exchange of information about familiar things. You can describe by simple means your own background and education, immediate environment and things related to immediate needs. (Level A2)
 - to understand the main points when clear standard language is used and when it's about familiar things from work, school, leisure, etc. You can handle most situations encountered while traveling in the language area. You can express yourself simply and coherently on familiar topics and personal areas of interest. You can talk about experiences and events, describe dreams, hopes and goals, and give brief reasons or explanations for plans and opinions. (Level B1)

- to understand the main content of complex texts on concrete and abstract topics; and to understand specialist discussions in their own area of specialization. You can communicate so spontaneously and fluently that a normal conversation with native speakers is quite possible without major effort on either side. You can express yourself clearly and in detail on a wide range of topics, explain a point of view on a topical issue and state the advantages and disadvantages of various options. (Level B2)
- Grammar:
 - Level A1 - present and past tenses, sentence structure, prepositions, etc.
 - Level A2 - among other things tenses of the past, differences in the past tenses, imperative, subordinate clauses, pronouns (dative, accusative)
 - Level B1 - including introduction of past perfect, conjunctions, introduction of passive voice, adverbs, adjectives (difference), future tense
 - Level B2 - among others verb constructions, conditional clauses, indirect speech

Digital Skills

Course Code: DLBDS01_E

Study Level	Language of Instruction	Contact Hours	CP	Admission Requirements
BA	English		5	none

Course Description

Whether social work, marketing, management or nursing professions – the digital transformation as a megatrend determines a profound change that affects every individual and all levels of society. This course is about understanding the causes of change and change as such with its effects. From this understanding, skills – Digital Skills – are developed to deal with digitalization in different (professional) contexts. Fundamentally, aspects of digital transformation and digital communication are discussed and how the economy, society and communication have changed and are changing are presented. Among other things, this affects work and collaboration. Methods such as design thinking, tools such as Slack or content management systems such as WordPress have interdisciplinary relevance. Social media and mobile are an integral part of everyday life, shaping (media) socialization and digital marketing. Under the aspect "Digital in the enterprise", selected scenarios are considered, such as Digital HR or Digital and Social. A basic understanding of digital technologies such as cloud computing or big data is essential in order to be able to accompany and control digital processes and assess trends such as quantum computing.

Course Outcomes

On successful completion, students will be able to

- apply and classify the acquired basic knowledge.
- apply methodical knowledge to control and accompany digital processes.
- apply the acquired deeper understanding of digital technologies in practice.
- classify the digital holistically and to design interfaces innovatively.
- apply the digital skills they have learned to their work and career environment and use them in a goal-oriented manner.
- develop a vision of what the development of Digital Skills will look like in the future and to decide for themselves how they want to gain further knowledge in this area.

Contents

1. Digital Transformation
 - 1.1 Basics, Causes, Consequences
 - 1.2 Infrastructure and Technologies
 - 1.3 Implications for the Economy and Society
 - 1.4 Concepts

2. Digital communication
 - 2.1 Basics
 - 2.2 The Online Communication Process
 - 2.3 Communication Tools
 - 2.4 Bot Communication
 - 2.5 Text vs. Voice
3. Methods for Digital Work
 - 3.1 Agile Methods: Agile Basics, SCRUM, Kanban
 - 3.2 Design Thinking
 - 3.3 Game Thinking
 - 3.4 Lean Startup and Lean Management
4. Distributed and Collaborative Work
 - 4.1 Basics
 - 4.2 Tools and Systems
 - 4.3 (Green) Web Design and Content Management Systems
 - 4.4 Presentation Techniques
5. Social Media and Mobile
 - 5.1 Social Media and Social Media Marketing
 - 5.2 Social Media Channels
 - 5.3 Responsive Design and Mobile Websites
 - 5.4 Apps and Messengers
 - 5.5 QR Codes and Location-Based Services
 - 5.6 Mobile First and Mobile Only
6. Selected technologies
 - 6.1 Cloud Computing
 - 6.2 Big Data / Data Analytics
 - 6.3 AI / Machine Learning
 - 6.4 Internet of Things
 - 6.5 Application Programming Interfaces (APIs)
 - 6.6 Smart Services
 - 6.7 Robotics
 - 6.8 Blockchain
 - 6.9 Virtual and Augmented Reality
 - 6.10 3D / 4D Printing

7. Digital in the Enterprise: Selected Scenarios
 - 7.1 Digital Business
 - 7.2 Digital Marketing
 - 7.3 Digital Design
 - 7.4 Digital HR
 - 7.5 Digital and Social

8. Trends and Outlook
 - 8.1 Acquiring and Expanding Competencies for the Digital Age
 - 8.2 Trends and Outlook for Digital Communication, Social Media and Mobile
 - 8.3 Trends and Outlook for Distributed and Collaborative Working
 - 8.4 Trends and Outlook for Selected Technologies

Business Mathematics

Course Code: BWMA01_E

Study Level	Language of Instruction	Contact Hours	CP	Admission Requirements
BA	English		5	none

Course Description

Mathematics is one of the foundational courses in the field of Business Studies and provides access to quantitative methods across disciplines. These basics are required in a variety of other courses and modules, for example in the field of investment and finance theory, micro- and macroeconomics, logistics or marketing, to name some examples. Consequently, mastery in Business Mathematics is a prerequisite for business economists and political economists alike to gain access to more advanced content. Following this approach, this course in Business Mathematics focuses on the economic application of mathematical methods.

Course Outcomes

On successful completion, students will be able to

- identify basic economic mathematical tools and methods, recall them if necessary and apply them to other economic problems.
- understand mathematical derivations in later modules.
- access their own analytical conclusions.
- recognize quantitative relationships independently.

Contents

1. Basics of Analysis
 - 1.1 Arithmetic and Algebraic Basics
 - 1.2 Sums and Products
 - 1.3 Equations
 - 1.4 Inequalities
2. Functions
 - 2.1 Introduction
 - 2.2 Forms of Data Depiction
 - 2.3 Features of Functions
 - 2.4 Basic Function Types
 - 2.5 Selected Economic Applications

3. Differential Calculus I
 - 3.1 Difference and Differential Quotient
 - 3.2 Derivative Methods
 - 3.3 Higher Derivations
 - 3.4 Meaning of First and Second Derivation
4. Differential Calculus II: Applications
 - 4.1 Marginal Analysis
 - 4.2 Curve Sketching
 - 4.3 Cournot Point
5. Multivariate functions
 - 5.1 Linear and Non-Linear Multivariate Functions
 - 5.2 Partial Derivatives
 - 5.3 Determination of Extreme Values
 - 5.4 Determination of Extreme Values Subject to Constraint
6. Sequences and Series
 - 6.1 Arithmetic and Geometric Sequences
 - 6.2 Arithmetic and Geometric Sequences
 - 6.3 Financial Mathematical Applications
7. Integral Calculus
 - 7.1 Indefinite Integrals
 - 7.2 Definite Integrals

Module Contents

- Introduction to intercultural psychology and cultural psychology
- Intercultural Management
- Diversity Management as a scope of application of intercultural management
- Values in the context of intercultural management
- Intercultural communication
- Intercultural marketing
- Intercultural trainings

Learning Outcomes**Intercultural Psychology**

On successful completion, students will be able to

- take a differentiated view of the concept of culture.
- explain the methodological approaches to intercultural psychology and cultural psychology.
- deal with culture-specific behavior in a reflective manner and to react to it adequately.
- take into account the increasing importance of considering intercultural differences in a globalized world of work and life in their everyday professional life.
- understand both your own and foreign cultures.
- analyze communication and marketing messages as well as training programs for their intercultural meaning and impact.
- explain and justify the importance of a value-oriented corporate alignment.

Intercultural Psychology

Course Code: DLBWPIPS01_E

Study Level	Language of Instruction	Contact Hours	CP	Admission Requirements
BA	English		5	none

Course Description

In a globalized working world, international meetings, cooperation and activities have become a matter of course. In most cases, these encounters between culturally different people are successful and satisfying for both sides. However, it is not uncommon for critical situations to arise in which the behavior of the other person is seen as threatening, inappropriate or useless and does not meet one's own expectations. In this course, students learn to understand and react appropriately to cultural differences and to deal with them in situations relevant to their jobs. The areas of intercultural differences, specifics and cooperation in intercultural teams and organizations are addressed, as well as the orientation of advertising communication in different cultural contexts. After a presentation of the different approaches of psychology as Intercultural Psychology, Cultural Psychology and Cultural Psychology and the culture-specific research, practice-relevant topics such as Intercultural Management, Intercultural Marketing and Intercultural Training will be addressed. Particular attention is paid to the areas of diversity management and value management in the corporate environment.

Course Outcomes

On successful completion, students will be able to

- take a differentiated view of the concept of culture.
- explain the methodological approaches to intercultural psychology and cultural psychology.
- deal with culture-specific behavior in a reflective manner and to react to it adequately.
- take into account the increasing importance of considering intercultural differences in a globalized world of work and life in their everyday professional life.
- understand both your own and foreign cultures.
- analyze communication and marketing messages as well as training programs for their intercultural meaning and impact.
- explain and justify the importance of a value-oriented corporate alignment.

Contents

1. Introduction to Intercultural Psychology and Cultural Psychology
 - 1.1 Definition and Classification of the Concept of Culture
 - 1.2 Goals of Comparative Cultural Psychology
 - 1.3 Demarcation of Different Subject Areas
 - 1.4 Cultural Psychological Models and Research Approaches

2. Intercultural Management
 - 2.1 Role, Influencing Factors and Requirements of Intercultural Management
 - 2.2 Corporate Culture
3. Diversity Management as a Field of Application of Intercultural Management
 - 3.1 Definition and Objectives
 - 3.2 Significance and Spheres of Influence
4. Values in the Context of Intercultural Management
 - 4.1 Role and Meaning of Values
 - 4.2 Values in an Organizational Context
5. Intercultural Communication
 - 5.1 Communication Models and Problems
 - 5.2 Intercultural Specifics of Communication
 - 5.3 Characteristics of Different National Communication and Behavior Styles
6. Intercultural Marketing
 - 6.1 Definition and Cultural Foundations
 - 6.2 Influencing Factors
 - 6.3 Standardization vs. Differentiation of Messages
7. Intercultural Trainings
 - 7.1 Development of Content for Intercultural Training
 - 7.2 Implementation of Intercultural Training

Module Contents

This module covers a broad range of topics on humanities. It is the objective to introduce students to what makes us human, offering project topics ranging from philosophy and religion to language and culture, arts, literature, performing and visual as well as culinary arts. Students will pick one topic and elaborate the relevance of humanities against the backdrop of a society focused on productivity and efficiency.

<p>Learning Outcomes</p> <p>Project: Introduction to Humanities</p> <p>On successful completion, students will be able to</p> <ul style="list-style-type: none"> ▪ explain how humanities are relevant in society. ▪ present a written discussion of one area or aspect of the humanities in greater detail and explain, why this aspect is crucial to society. ▪ integrate their knowledge about humanities into their broader knowledge of business, economics, and math.

Project: Introduction to Humanities

Course Code: DLBMANPIH01

Study Level	Language of Instruction	Contact Hours	CP	Admission Requirements
BA	English		5	none

Course Description

This course is designed to introduce students on humanities during their general education curriculum. Students will gain a better understanding as to what makes us human. They will work on an independent project, investigating one aspect of humanities more closely (philosophy and religion to language and culture, arts, literature, performing and visual as well as culinary arts).

Course Outcomes

On successful completion, students will be able to

- explain how humanities are relevant in society.
- present a written discussion of one area or aspect of the humanities in greater detail and explain, why this aspect is crucial to society.
- integrate their knowledge about humanities into their broader knowledge of business, economics, and math.

Contents

- Students independently develop a project on one area or one aspect of the broad range of humanities. They integrate their knowledge on business, society, economics, and humanities and critically discuss the humanities' effect on and relevance in society.

Module Contents

Certificate Course Italian

To learn and deepen Italian as a foreign language at the chosen CEFR level with regard to the respective qualitative aspects of range, correctness, fluency, interaction and coherence. The module includes a combination of listening, comprehension, writing and speaking exercises as well as various course material.

Foreign Language Italian

To learn and deepen Italian as a foreign language at the chosen CEFR level with regard to the respective qualitative aspects of range, correctness, fluency, interaction and coherence. The module includes a combination of listening, comprehension, writing and speaking exercises as well as various course material.

Learning Outcomes

Certificate Course Italian

On successful completion, students will be able to

- meet the qualification objectives according to the chosen level (A1, A2, B1 or B2) according to the criteria of the Common European Framework of Reference for Languages (CEFR).
- use the foreign language Italian according to a CEFR placement test on the basis of everyday topics, selected areas of specialization and by adapting basic and advanced grammatical structures.

Foreign Language Italian

On successful completion, students will be able to

- meet the qualification objectives according to the chosen level (A1, A2, B1 or B2) according to the criteria of the Common European Framework of Reference for Languages (CEFR).
- use the foreign language Italian according to a CEFR placement test on the basis of everyday topics, selected areas of specialization and by adapting basic and advanced grammatical structures.

Certificate Course Italian

Course Code: DLFSWI01_E

Study Level	Language of Instruction	Contact Hours	CP	Admission Requirements
BA	English		5	none

Course Description

The qualification objectives correspond to levels A1, A2, B1 and B2 according to the criteria of the Common European Framework of Reference for Languages (CEFR). Using everyday subject areas, chosen areas of specialization, and using basic and advanced grammatical structures, the use of Italian as a foreign language is taught and practiced according to a CEFR placement test. Upon successful completion, students will receive a certificate corresponding to their chosen level.

Course Outcomes

On successful completion, students will be able to

- meet the qualification objectives according to the chosen level (A1, A2, B1 or B2) according to the criteria of the Common European Framework of Reference for Languages (CEFR).
- use the foreign language Italian according to a CEFR placement test on the basis of everyday topics, selected areas of specialization and by adapting basic and advanced grammatical structures.

Contents

- Depending on the CEFR placement, students will be proficient
 - to understand and use familiar, everyday expressions and very simple phrases aimed at satisfying concrete needs. They can introduce themselves and others and ask other people questions about themselves - e.g. where they live, what kind of people they know or what kind of things they have - and they can give answers to questions of this kind. They can communicate in a simple way if the person they are talking to speaks slowly and clearly and is willing to help. (Level A1)
 - to understand sentences and frequently used expressions related to areas of immediate importance (e.g. personal and family information, shopping, work, local area). You can communicate in simple, routine situations involving a simple and direct exchange of information about familiar things. You can describe by simple means your own background and education, immediate environment and things related to immediate needs. (Level A2)
 - to understand the main points when clear standard language is used and when it's about familiar things from work, school, leisure, etc. You can handle most situations encountered while traveling in the language area. You can express yourself simply and coherently on familiar topics and personal areas of interest. You can talk about experiences and events, describe dreams, hopes and goals, and give brief reasons or explanations for plans and opinions. (Level B1)

- to understand the main content of complex texts on concrete and abstract topics; and to understand specialist discussions in their own area of specialization. You can communicate so spontaneously and fluently that a normal conversation with native speakers is quite possible without major effort on either side. You can express yourself clearly and in detail on a wide range of topics, explain a point of view on a topical issue and state the advantages and disadvantages of various options. (Level B2)
- Grammar:
 - Level A1 - present and past tenses, sentence structure, prepositions, etc.
 - Level A2 - among other things tenses of the past, differences in the past tenses, imperative, subordinate clauses, pronouns (dative, accusative)
 - Level B1 - including introduction of past perfect, conjunctions, introduction of passive voice, adverbs, adjectives (difference), future tense
 - Level B2 - among others verb constructions, conditional clauses, indirect speech

You can talk about experiences and events, describe dreams, hopes and goals, and give brief reasons or explanations for plans and opinions. (Level B1)

- to understand the main content of complex texts on concrete and abstract topics; and to understand specialist discussions in their own area of specialization. You can communicate so spontaneously and fluently that a normal conversation with native speakers is quite possible without major effort on either side. You can express yourself clearly and in detail on a wide range of topics, explain a point of view on a topical issue and state the advantages and disadvantages of various options. (Level B2)
- Grammar:
 - Level A1 - present and past tenses, sentence structure, prepositions, etc.
 - Level A2 - among other things tenses of the past, differences in the past tenses, imperative, subordinate clauses, pronouns (dative, accusative)
 - Level B1 - including introduction of past perfect, conjunctions, introduction of passive voice, adverbs, adjectives (difference), future tense
 - Level B2 - among others verb constructions, conditional clauses, indirect speech

Foreign Language Spanish

Course Code: DLFSS01_E

Study Level	Language of Instruction	Contact Hours	CP	Admission Requirements
BA	English		5	none

Course Description

The qualification objectives correspond to levels A1, A2, B1 and B2 according to the criteria of the Common European Framework of Reference for Languages (CEFR). Using everyday subject areas, chosen areas of specialization, and using basic and advanced grammatical structures, the use of Spanish as a foreign language is taught and practiced according to a CEFR placement test.

Course Outcomes

On successful completion, students will be able to

- meet the qualification objectives according to the chosen level (A1, A2, B1 or B2) according to the criteria of the Common European Framework of Reference for Languages (CEFR).
- use the foreign language Spanish according to a CEFR placement test on the basis of everyday topics, selected areas of specialization and by adapting basic and advanced grammatical structures.

Contents

- Depending on the CEFR placement, students will be proficient
 - to understand and use familiar, everyday expressions and very simple phrases aimed at satisfying concrete needs. They can introduce themselves and others and ask other people questions about themselves - e.g. where they live, what kind of people they know or what kind of things they have - and they can give answers to questions of this kind. They can communicate in a simple way if the person they are talking to speaks slowly and clearly and is willing to help. (Level A1)
 - to understand sentences and frequently used expressions related to areas of immediate importance (e.g. personal and family information, shopping, work, local area). You can communicate in simple, routine situations involving a simple and direct exchange of information about familiar things. You can describe by simple means your own background and education, immediate environment and things related to immediate needs. (Level A2)
 - to understand the main points when clear standard language is used and when it's about familiar things from work, school, leisure, etc. You can handle most situations encountered while traveling in the language area. You can express yourself simply and coherently on familiar topics and personal areas of interest. You can talk about experiences and events, describe dreams, hopes and goals, and give brief reasons or explanations for plans and opinions. (Level B1)

- to understand the main content of complex texts on concrete and abstract topics; and to understand specialist discussions in their own area of specialization. You can communicate so spontaneously and fluently that a normal conversation with native speakers is quite possible without major effort on either side. You can express yourself clearly and in detail on a wide range of topics, explain a point of view on a topical issue and state the advantages and disadvantages of various options. (Level B2)

Business 101

Course Code: DLBBAB01_E

Study Level	Language of Instruction	Contact Hours	CP	Admission Requirements
BA	English		5	none

Course Description

Business 101 deals with the basics of general business administration. It provides students with an understanding of the fundamental questions of doing business. In addition, basic organizational approaches of companies are shown. With the successful completion of the course, the students have gained fundamental knowledge in general business administration. This course lays the foundation for the advanced modules in the further course of their studies.

Course Outcomes

On successful completion, students will be able to

- apply business and economic thinking and working methods.
- explain economic subjects and questioning models of business administration.
- classify and formulate corporate goals.
- describe and apply a general business decision-making process.
- recognize and design the organizational structure and process organization in the company.

Contents

1. Businesses and their environment
 - 1.1 Concepts of business
 - 1.2 A system of economic relationships
 - 1.3 Business environment
2. Types of business organizations
 - 2.1 Companies in production and service
 - 2.2 Divisions of companies
3. Management and structure of business
 - 3.1 Basics of Business Management
 - 3.2 Functions of organizations, managers and control
 - 3.3 The decision making process
 - 3.4 Organizational structure of business

4. Production of goods and services
 - 4.1 Origin and development of the production process
 - 4.2 Industrial strategy of business
5. Marketing of goods and services
 - 5.1 Goals and types of marketing
 - 5.2 Marketing mix
6. Management of labor
 - 6.1 Process of management of labor
 - 6.2 Demand in labor
 - 6.3 Human relations in organizations
7. Accounting in business
 - 7.1 Functions and goals of accounting
 - 7.2 Spheres of accounting
 - 7.3 Fundamental principles of accounting

Managerial Economics

Course Code: DLBBWME01_E

Study Level	Language of Instruction	Contact Hours	CP	Admission Requirements
BA	English		5	none

Course Description

The source for (almost) all economic questions is the issue of scarcity. Building on this insight, this course considers three central elements. First, an analysis of the interplay between supply and demand on markets is made. Secondly, the course will consider the development of insights into the behaviour of consumers in markets. In a third part, the course will focus on entrepreneurial decisions that depend, among other things, on production technology available and competitive conditions in markets. These three core elements are taught from an application-oriented standpoint, in which references to (current) challenges of the management of companies are established. The course includes both the examination of economic theories and their application in business practice.

Course Outcomes

On successful completion, students will be able to

- understand basic economic interrelationships and apply them to different markets.
- explain the importance of supply, demand and market balance.
- assess the determinants of consumers' willingness to pay.
- discuss the determinants of production decisions and identify peak entrepreneurial strategies.
- assess the influence of different types of markets on production and price decisions.
- analyse strategic interactions between companies.
- critically question traditional economic models on the basis of findings from information and behavioural economics.

Contents

1. Basics
 - 1.1 Definitions & Main Topics of Economics
 - 1.2 Thinking like an Economist
2. The Invisible Hand of the Market
 - 2.1 Supply and Demand
 - 2.2 Market Balance
 - 2.3 Flexibility
 - 2.4 Applications

3. Consumer Decisions
 - 3.1 Utility Theory
 - 3.2 Willingness to Pay
 - 3.3 Demand
 - 3.4 Applications
4. Business Decisions I: Full Competition
 - 4.1 Production
 - 4.2 Costs
 - 4.3 Supply
 - 4.4 Applications
5. Business Decisions II: Partial Competition
 - 5.1 Monopoly
 - 5.2 Monopolistic Competition
 - 5.3 Oligopoly
6. Business Decisions III: Game Theory
 - 6.1 Methodology
 - 6.2 Simultaneous Games
 - 6.3 Sequential Games
7. Advanced Microeconomics
 - 7.1 Information Economics
 - 7.2 Behavioural Economics

Principles of Management

Course Code: DLBBAPM01_E

Study Level	Language of Instruction	Contact Hours	CP	Admission Requirements
BA	English		5	none

Course Description

In the fast-changing and complex environment of today's business world the economic survival and success of an organization depends highly on its management. For future managers it is indispensable to be familiar with the fundamental principles of management as the basis for the development of further managerial knowledge and skills. This course introduces necessary functions, roles and skills for managers and their decision-making process. Furthermore, it discusses the basic managerial functions of planning, organizing, leading and controlling in detail.

Course Outcomes

On successful completion, students will be able to

- understand the functions, roles and influencing-factors of management.
- explain the decision-making process.
- discuss basic corporate and competitive strategies.
- analyze organizational structures and designs.
- transfer knowledge about basic principles of management to real-world cases.

Contents

1. Introduction to Management
 - 1.1 Functions, Roles and Skills of Managers
 - 1.2 Influencing Factors on Managers' Tasks
 - 1.3 History of Management
2. Managerial Decision-Making
 - 2.1 Decision-Making Process
 - 2.2 Approaches to Decision Making
 - 2.3 Types of Decisions and Decision-Making Conditions
3. Planning and Goal-Setting
 - 3.1 The Role of Planning
 - 3.2 Goals and Plans
 - 3.3 Setting Goals and Developing Plans

4.	Strategic Planning
4.1	Strategic Management
4.2	The Strategic Management Process
4.3	Corporate Strategies
4.4	Competitive Strategies
5.	Organizing
5.1	Organizational Structures and Design
5.2	Organizational Change
5.3	Managing Change
6.	Leading
6.1	Interpersonal and Organizational Communication
6.2	Organizational Behavior
6.3	Leadership
7.	Controlling
7.1	The Control Process
7.2	Tools for Measuring Organizational Performance

Global Corporations and Globalization

Course Code: DLBLOGC101_E

Study Level	Language of Instruction	Contact Hours	CP	Admission Requirements
BA	English		5	none

Course Description

Students grasp the mechanisms that led to globalization and can classify current trends both towards globalization and, conversely, towards localization. Building on the basic knowledge that students have acquired in general business studies about the basic functions in a company, this course analyses and discusses the special requirements that a global engagement places on a company and its functions.

Course Outcomes

On successful completion, students will be able to

- present the history of globalisation and identify and explain significant stages of development.
- identify and classify current trends in globalisation and localisation.
- recall basic knowledge in the fields of business administration, marketing and human resources management and extend it to meet the special requirements in internationally operating companies .
- explain offshoring and outsourcing and outline the opportunities and risks of these placements .
- explain the particularities of international procurement and distribution and develop resulting possibilities and limits.
- identify cultural differences and assess their significance for operating in international business.

Contents

1. History and Development of Globalisation
 - 1.1 Globalization v1.0 according to Niall Ferguson
 - 1.2 History of Globalisation
 - 1.3 Influencing Factors of Economic and Cultural Globalization
 - 1.4 The Tension between Globalization and Localization
 - 1.5 Social Aspects of Globalisation and Corporate Responsibility

2. International Marketing
 - 2.1 International Consumer Behaviour
 - 2.2 Market Research
 - 2.3 Standardization and Adaptation
 - 2.4 International Branding
 - 2.5 Pricing Strategies
 - 2.6 International Marketing Communications
3. International Operation
 - 3.1 Offshoring and Outsourcing
 - 3.2 Global Production Networks
 - 3.3 Global Logistics
4. International Personnel Management
 - 4.1 Local and International Personnel Management
 - 4.2 Expatriate Management
 - 4.3 Localization of Personnel
 - 4.4 International Human Resources Development
5. International Financing
 - 5.1 Institutions in the International World of Finance
 - 5.2 International Financing and its Procedures
6. International Procurement
 - 6.1 Reasons and Strategies of Global Sourcing
 - 6.2 Risks of International Procurement
 - 6.3 International Distribution Policy

- Joint distributions
- Expectation and variance
- Inequalities and limit theorems

Learning Outcomes

Statistics: Probability and Descriptive Statistics

On successful completion, students will be able to

- define probability, random variable, and probability distribution.
- understand the concept of Bayesian statistics.
- grasp the definition of joint and marginal distributions.
- calculate expectation values and higher moments.
- comprehend important inequality equations and limit theorems.

Statistics: Probability and Descriptive Statistics

Course Code: DLBDSSPDS01

Study Level	Language of Instruction	Contact Hours	CP	Admission Requirements
BA	English		5	none

Course Description

Statistical description and analysis are the foundations for data-driven analysis and prediction methods. This course introduces the fundamentals, beginning with a formal definition of probabilities and introduction to the concepts underlying Bayesian statistics. Random variables and probability density distributions are then discussed, as well as the concept of joint and marginal distributions. The importance of various discrete and continuous distributions and their applications is stressed. Characterizing distributions is an important aspect of describing the behavior of probability distributions. Students are familiarized with expectation values, variance, and covariance. The concepts of algebraic and central moments and moment-generating functions complement the characterization of probability distributions. Finally, this course focuses on important inequalities and limit theorems such as the law of large numbers or the central limit theorem.

Course Outcomes

On successful completion, students will be able to

- define probability, random variable, and probability distribution.
- understand the concept of Bayesian statistics.
- grasp the definition of joint and marginal distributions.
- calculate expectation values and higher moments.
- comprehend important inequality equations and limit theorems.

Contents

1. Probability
 - 1.1 Definitions
 - 1.2 Independent events
 - 1.3 Conditional probability
 - 1.4 Bayesian statistics
2. Random Variables
 - 2.1 Random Variables
 - 2.2 Distribution functions and probability mass functions
 - 2.3 Important discrete probability distributions
 - 2.4 Important continuous probability distributions

3. Joint Distributions
 - 3.1 Joint distributions
 - 3.2 Marginal distributions
 - 3.3 Independent random variables
 - 3.4 Conditional distributions
4. Expectation and Variance
 - 4.1 Expectation of a random variable, conditional expectations
 - 4.2 Variance and covariance
 - 4.3 Expectations and variances of important probability distributions
 - 4.4 Algebraic and central moments
 - 4.5 Moment-generating functions
5. Inequalities and Limit Theorems
 - 5.1 Probability inequalities
 - 5.2 Inequalities for expectations
 - 5.3 The law of large numbers
 - 5.4 Central limit theorem

Project: Design Thinking

Course Code: DLBINGDT01_E

Study Level	Language of Instruction	Contact Hours	CP	Admission Requirements
BA	English		5	none

Course Description

In this course students will receive a practical introduction to Design Thinking. In addition to teaching the individual basic principles, the procedures in Design Thinking will also be examined in detail. In order not only to understand Design Thinking but also to experience it, selected methods for the individual process steps will be presented and practiced on an example project.

Course Outcomes

On successful completion, students will be able to

- know the mindset of Design Thinking.
- know the individual phases of the incremental micro cycle and carry them out on an example project.
- know the individual stages of prototyping and apply them in an example project.
- know and use methods and tools for the individual steps of the micro cycle.
- know different space concepts for Design Thinking work environments.
- know examples for the application of Design Thinking by means of business case studies.

Contents

1. Basic Principles of Design Thinking
2. The Design Thinking Micro Process
3. The Design Thinking Macro Process
4. Methods for Early Phases of the Process
5. Methods for Idea Generation
6. Methods for Prototyping and Testing
7. Examples and Case Studies

Module Contents

- International marketing strategy
- Cultural differences and their significance for marketing
- International marketing mix (product, price, promotion, and distribution decisions in an international environment)
- International market research and consumer behavior
- Ethical aspects in international marketing
- International marketing controlling and six sigma

Learning Outcomes**International Marketing**

On successful completion, students will be able to

- understand basic aspects of international strategic marketing.
- analyze cultural differences and their impact on international marketing.
- apply selected concepts of the international marketing mix.
- describe the possibilities of international market research and its influence on consumer behavior.
- recognize the necessity of international brand controlling and quality management.
- reproduce theoretical knowledge using case studies.

International Marketing

Course Code: DLBDSEIMB01

Study Level	Language of Instruction	Contact Hours	CP	Admission Requirements
BA	English		5	none

Course Description

Students are taught the necessity for strategic marketing in an international context. They will learn about essential cultural differences and their influences on international marketing management. The basic decisions, standardizations, and adaptations in international marketing are experienced by the students on the basis of different concepts in the international marketing mix. The necessity of international market research, strategic planning, and control are taught to the students, along with the ethical aspects in international marketing. The students analyze current topics in international marketing management and reflect on them in connection with the concepts they have learned in this course.

Course Outcomes

On successful completion, students will be able to

- understand basic aspects of international strategic marketing.
- analyze cultural differences and their impact on international marketing.
- apply selected concepts of the international marketing mix.
- describe the possibilities of international market research and its influence on consumer behavior.
- recognize the necessity of international brand controlling and quality management.
- reproduce theoretical knowledge using case studies.

Contents

1. Strategic International Marketing
 - 1.1 Internationalization
 - 1.2 Theoretical Foundations of International Market Entry Strategies
 - 1.3 Forms of International Market Entry
2. Cultural Differences as an Aspect of International Marketing
 - 2.1 Overview of Culture
 - 2.2 Cultural Model Based on Hofstede
 - 2.3 Cultural Model Based on Trompenaars

3. Case Studies in International Market Entry and Marketing Strategies
 - 3.1 Case Study: Nivea in South Korea
 - 3.2 Case Study: Bosch and Siemens Hausgeräte GmbH in China
 - 3.3 Case Study: Siemens Mobile in China
 - 3.4 Case Study: Siemens in China
4. International Product Management and Product Development
 - 4.1 Goals of International Product Management
 - 4.2 Framework Conditions for International Product Management
 - 4.3 International Product Decisions
 - 4.4 International Product Development
5. Exchange Rate Fluctuations and International Price Calculation
 - 5.1 Tasks and Objectives of International Price Management
 - 5.2 Factors Influencing International Price Management
 - 5.3 Instruments of International Price Management
6. International Communication and International Sales Policy
 - 6.1 International Communication Management
 - 6.2 International Sales Management
7. International Marketing and Ethics
 - 7.1 Overview of International Marketing and Ethics
 - 7.2 Business Ethics in International Companies
 - 7.3 Case Study: Nestlé
8. Applied Market Research and Its Influence on Consumer Behavior
 - 8.1 Scope of International Market Research
 - 8.2 Requirements for International Market Research Information
 - 8.3 International Secondary Research
 - 8.4 International Primary Research
9. Monitoring and Control in International Marketing
 - 9.1 Controlling in International Management
10. Six Sigma, Brand Management, and Rebranding
 - 10.1 Six Sigma: Basics, Definitions, and Processes
 - 10.2 Brand Management
 - 10.3 Rebranding

Supply Chain Management I

Course Code: DLBDESECM01

Study Level	Language of Instruction	Contact Hours	CP	Admission Requirements
BA	English		5	none

Course Description

SCM proves to be an extremely multi-faceted construct from both a theoretical and a practical point of view. An adequate understanding of the problem dimensions and modes of action of (global) cross-company value creation networks requires a multidimensional approach. It starts by considering logistical processes, with modern process, flow, and network standards forming an important basis for SCM. On the basis of such an approach, students should gain a fundamental understanding of SCM. From the point of view of a holistic approach, it also makes sense to also examine a number of other typical problem areas in addition to the logistical challenges of this concept. This includes IT aspects of SCM (e.g., APS systems), and questions to do with the collaboration and coordination of network partners. This course also considers selected industry specific SCM solutions (ECR or VMI).

Course Outcomes

On successful completion, students will be able to

- explain the importance of cross-company value creation processes.
- understand common concepts for modeling cross-company value creation processes.
- understand dynamic effects in supply chains and can systematize their causes and effects.
- explain important theoretical concepts for describing the characteristics and challenges of cross-company value creation processes.
- explain the approaches and problem categories commonly used in the context of supply chain management.
- understand important reference and/or management models for the concretization of supply chain systems.
- name and detail important roles and tasks in the SCM network.
- deal with the coordination problem of SCM and describe the common solution approaches.

Contents

1. Fundamentals of the Supply Chain Concept
 - 1.1 Terminological and Conceptual Fundamentals
 - 1.2 Supply Chain Typology According to Otto
 - 1.3 Supply Chain Typology According to Bechtel/Jayaram
 - 1.4 Dynamic Aspects of Supply Chains

2. Selected Theoretical Concepts for the Supply Chain Concept
 - 2.1 New Institutional Economics
 - 2.2 Game Theory
 - 2.3 Network Approach
 - 2.4 Other Theoretical Additions
3. Supply Chain Management
 - 3.1 Basic Information on the Goals and Scope of SCM
 - 3.2 Popular Problem Areas of the SCM
 - 3.3 Supply Chain Management as an Evolutionary Step in Logistics
 - 3.4 Supply Chain Management as Cooperation Management
4. SCM Model
 - 4.1 Basic Information on the Term SCM Models
 - 4.2 SCOR Model
 - 4.3 SCM Task Model
5. SCM as a Coordination Problem
 - 5.1 Basic Information on the Concept of Coordination
 - 5.2 Coordination Concepts, Context, and Perspectives of SCM
 - 5.3 Coordination Instruments

Module Contents

- Basics of brand management
- Framework conditions for brands in international markets
- Strategies and concepts of international brands
- Brand architectures and brand extension options
- Brand management and communication
- Brand management according to the stakeholder concept
- Brand control and protection

Learning Outcomes

International Brand Management

On successful completion, students will be able to

- recognize the significance of a brand and the general conditions under which brands operate, as well as the associated tasks of brand management.
- describe the components of a brand and its management.
- explain the positioning of brands on regional, national and international markets.
- understand the role of brand evaluation and compare the most common measurement techniques.
- give an overview of the importance of trademark protection and suggest strategies for preventing counterfeiting.
- conceive of brand strategies and measures for the avoidance or occurrence of brand crises.

International Brand Management

Course Code: DLBDSEIMB02

Study Level	Language of Instruction	Contact Hours	CP	Admission Requirements
BA	English		5	none

Course Description

The aim of this course is to deepen and expand the knowledge acquired in the introductory elective course International Marketing. The value of a brand is a decisive competitive advantage for companies in international business. Brands create long-term and profitable customer relationships. Brands are therefore valuable assets for companies and organizations. Students learn the basics of brand management before moving on to the concepts and success factors of international brand management. Students also become familiar with the structure of brand architectures and the possibilities of brand extensions. The fact that different stakeholder groups must be taken into account in brand management is communicated to the students on the basis of the stakeholder concept. In addition, the students get to know the various methods for measuring brand value and brand controlling. The aspects of trademark protection that are particularly important in an international environment will be dealt with conclusively.

Course Outcomes

On successful completion, students will be able to

- recognize the significance of a brand and the general conditions under which brands operate, as well as the associated tasks of brand management.
- describe the components of a brand and its management.
- explain the positioning of brands on regional, national and international markets.
- understand the role of brand evaluation and compare the most common measurement techniques.
- give an overview of the importance of trademark protection and suggest strategies for preventing counterfeiting.
- conceive of brand strategies and measures for the avoidance or occurrence of brand crises.

Contents

1. Basics of Brand Management
 - 1.1 Brand Significance and Brand Understanding
 - 1.2 Market Conditions
 - 1.3 Tasks and Goals of Brand Management

2. Brand Identity, Brand Positioning, and Brand Personality
 - 2.1 Brand Identity as the Basis of Brand Management
 - 2.2 Brand Positioning
 - 2.3 Brand Image
 - 2.4 Brand Personality
3. Brand Strategies
 - 3.1 The Challenges for Brand Strategies
 - 3.2 Brand Strategies for New Products
 - 3.3 Trademark Licensing
4. International Branding
 - 4.1 Importance of Branding for International Companies
 - 4.2 Brand Concepts for International Brands
 - 4.3 Factors for Successful International Brands
5. Brand Architectures and Types of Branding
 - 5.1 Brand Hierarchies
 - 5.2 Co-branding and Ingredient Branding
6. Brand Management and Communication
 - 6.1 Classic Brand Communication
 - 6.2 Brand Communication on the Internet
7. Brand Expansion
 - 7.1 Basics of Brand Extension
 - 7.2 Opportunities and Risks of Brand Extension
 - 7.3 Ideal Typical Sequence of the Brand Extension Process
8. Brand Management According to the Stakeholder Concept
 - 8.1 Basics of Brand Management According to the Stakeholder Principle
 - 8.2 Stakeholder Groups: Consumer Stakeholder Groups
 - 8.3 Stakeholder Groups: Shareholders and Financial Investors
 - 8.4 Stakeholder Groups: Employees
 - 8.5 Stakeholder Groups: Suppliers and the Public

9. Brand Control
 - 9.1 Basics of Brand Controlling
 - 9.2 Importance and Measurement of Brand Value
 - 9.3 Practical Methods for Measuring Brand Value
10. Trademark Protection
 - 10.1 Object of Trademark Protection
 - 10.2 Origin of Trademark Protection
 - 10.3 Trademark Infringements

Organizational Behavior

Course Code: DLBBWOB01_E

Study Level	Language of Instruction	Contact Hours	CP	Admission Requirements
BA	English		5	none

Course Description

Many decisions are not made solely on the basis of financial or revenue-based considerations, but due to personal agendas, personal preferences or internal competition. This course consequently aims to provide an accessible, theory-driven comprehension of behaviour, interactions and conflicts in organisations. The course deals intensively with the psychological, sociological and anthropological foundations and dynamics in organizations. Starting from the two most critical behavioral variables in the work context, performance and commitment, units and settings that have a significant influence on them are discussed. In detail, organizational, group-related and individual mechanisms as well as individual characteristics are explored as explanatory objects. The course continues with a discussion on corporate culture and organisational structure within the framework of the organisational mechanisms. In the context of group-related mechanisms, the course aims to identify aspects of leadership styles, power structures, negotiation strategies, group dynamics and heterogeneity. Individual mechanisms include job satisfaction, stress, motivation, fairness, trust and decision-making. The individual characteristics (abilities and personality) in turn have an effect on these aforementioned elements.

Course Outcomes

On successful completion, students will be able to

- establish commitment and performance as the critical dependent variables.
- explain organizational, group-related and individual mechanisms in Organizational Behavior and describe their relation to commitment and performance.
- explain the influence of individual characteristics on individual mechanisms (such as satisfaction, stress, motivation, trust and decision-making).

Contents

1. Introduction to Organizational Behavior
 - 1.1 Attitudes and Behavior as Determinants of Performance and Commitment
 - 1.2 Organizational Mechanisms
 - 1.3 Group-related Mechanisms
 - 1.4 Individual Characteristics
 - 1.5 Individual Mechanisms

2. Target Figures: Performance and Commitment

2.1 Performance

2.2 Commitment

3. Organizational Mechanisms

3.1 Corporate Structure

3.2 Corporate Culture

4. Group-Related Mechanisms

Corporate Finance and Investment

Course Code: DLBCFIE01

Study Level	Language of Instruction	Contact Hours	CP	Admission Requirements
BA	English		5	none

Course Description

This course introduces students to the targets and scope of corporate finance and the role of financial markets. The separation of ownership and control is a constituent feature of corporations; students explore the resulting agency problems and the mechanisms available to mitigate the costs of agency relationships. Students will be introduced to fundamentals of theory and practice regarding principles of modern corporate finance. They will learn to read and analyze financial statements from a financing point of view and develop a detailed understanding of concepts such as the time value of money, interest rates, and cost of capital. After introducing basic concepts, equity and debt financing will be discussed at length. The financial leverage effect on rates of return will be explored and leasing and hybrid financial instruments as an alternative to pure equity and debt financing are presented. Students will study how corporations apply short-term measures of financing and how effective cash and working capital management is used to reduce short-term financing needs and costs. This course will conclude with a discussion on the investment processes of corporations with a particular focus on the challenge of estimating expected cash flows. Students will learn how to include risk as a factor in the decision process and be able to analyse applied investment rules and methodologies.

Course Outcomes

On successful completion, students will be able to

- recognize the targets and scope of corporate finance and the role of financial markets .
- understand agency-problems in corporations and how incentives and institutional and market mechanisms are used to mitigate agency costs .
- interpret financial statements and key performance indicators and draw conclusions about financing alternatives and potentials of a corporation.
- consider the time value of money and calculate the cost of capital used to optimize future project cash flow streams.
- implement a long-term financing strategy and structure for corporations based on an appropriate mix of equity, debt, leasing, and hybrid financial instruments.
- effectively utilize cash management and working capital management to reduce short-term financing needs and costs.
- prepare investment decisions, estimate expected project cash flows and incorporate cash flow related risks into the decision process.
- apply investment decision methodologies to evaluate and select favorable corporate investment projects.

Contents

Module Contents

- In this course, students work independently on a project in the field of cross media marketing and thus transfer their knowledge into practice. They go through all the necessary phases and present their results orally with the support of adequate visualization. A current list of topics can be found in the Learning Management System.

Learning Outcomes**Project: Cross Media Marketing**

On successful completion, students will be able to

- understand integrated marketing communication (cross media marketing) in conjunction with practical media planning in a holistic way.
- decisively optimize marketing strategies of a company with well-founded marketing knowledge and its application-safe handling.
- recognize the different ways in which media planning works.
- allocate specific costs to the planning.
- independently carry out a project in the field of cross media marketing and present it in an addressee-oriented manner in a project presentation.

Study Level	Language of Instruction	Contact Hours	CP	Admission Requirements
BA	English		5	none

Course Description

Today, communication takes place via many channels: via print and on the web, on all kinds of digital end devices and in many different applications. What is self-evident for the user requires a lot of attention on the company side. Because good integrated communication does not mean feeding the same content into all channels: Optimal impact is only achieved when the media complement each other and highlight different facets of the same message depending on their specific characteristics. Cross-media or integrated marketing communication means the coordinated action of a company with regard to the design of its own offer and corporate design, the communication instruments and media used and the timing - in B2B as well as in B2C. From product development to packaging, all measures are subject to consistent premises; in the marketing channels, the messages complement each other and lead to a uniform perception by the target group. Or, to paraphrase a famous advertising slogan: "Are you still advertising or are you already communicating?"

Course Outcomes

On successful completion, students will be able to

- understand integrated marketing communication (cross media marketing) in conjunction with practical media planning in a holistic way.
- decisively optimize marketing strategies of a company with well-founded marketing knowledge and its application-safe handling.
- recognize the different ways in which media planning works.
- allocate specific costs to the planning.
- independently carry out a project in the field of cross media marketing and present it in an addressee-oriented manner in a project presentation.

Contents

- The focus of this course is the independent planning and implementation of a project in the field of cross media marketing. Students test their knowledge in practice and deepen it. Special attention is paid to the individual components of cross-media communication as well as the basics of media planning, selection and attribution.

Module Contents

- Introduction to Corporate Governance and Strategy
- Perspectives of Corporate Governance
- Monitoring Concepts for Corporate Governance
- Perspectives of Strategy
- Tools for Strategy Development
- Aligning Corporate Governance and Strategy

Learning Outcomes**Corporate Governance and Strategy**

On successful completion, students will be able to

- define and explain fundamentals of Corporate Governance.
- explain different understandings of Corporate Governance.
- understand the possible compositions of governance mechanisms and governance systems.
- define and explain strategy.
- distinguish different approaches to strategy.
- describe various strategy instruments.
- comprehend the link between strategy and governance.

Corporate Governance and Strategy

Course Code: DLBBACGS01_E

Study Level	Language of Instruction	Contact Hours	CP	Admission Requirements
BA	English		5	none

Course Description

This course addresses major frameworks under which companies are established and operated. It explains key elements of Corporate Governance and outlines different patterns of governance. In particular, it refers to different approaches to management and control. Furthermore, it links the concept of management and control to corporate strategy. Students are familiarized with different understandings of strategy and how they relate to corporate governance. This course facilitates tools of strategic market analysis and subsequent strategies to enter markets successfully. This course also explains the implications of corporate governance frameworks on strategy development of a firm.

Course Outcomes

On successful completion, students will be able to

- define and explain fundamentals of Corporate Governance.
- explain different understandings of Corporate Governance.
- understand the possible compositions of governance mechanisms and governance systems.
- define and explain strategy.
- distinguish different approaches to strategy.
- describe various strategy instruments.
- comprehend the link between strategy and governance.

Contents

1. Introduction to Corporate Governance and Strategy
 - 1.1 Fundamentals of Corporate Governance
 - 1.2 Fundamentals of Strategy
 - 1.3 The link between Strategy and Corporate Governance
2. Perspectives of Corporate Governance
 - 2.1 The Corporate Governance Debate
 - 2.2 Underlying Approaches to Corporate Governance
 - 2.3 The Concept of Control and its Interpretation

3. Monitoring Concepts for Corporate Governance
 - 3.1 Governance Mechanisms
 - 3.2 Governance Systems
 - 3.3 Corporate Governance Codes
4. Perspectives of Strategy
 - 4.1 Market-based View on Strategy
 - 4.2 Resources-based and Network-based View on Strategy
 - 4.3 Market-Analysis Tools
5. Tools for Strategy Development
 - 5.1 Product-Market Strategies
 - 5.2 Market-Entry Strategies
 - 5.3 Managing Corporate Strategy
6. Aligning Corporate Governance and Strategy
 - 6.1 Implications of National Governance Codes on Strategy
 - 6.2 Corporate Governance and Vision, Mission and Values of the Firm
 - 6.3 Real Life Case of Strategy and Governance Alignment

Service Operations Management

Course Code: DLMSM01

Study Level	Language of Instruction	Contact Hours	CP	Admission Requirements
BA	English		5	none

Course Description

The goal of service operations management is to create and improve service processes to achieve increases in productivity and quality. These strategies are applicable across a wide variety of industries and departments. Managers must understand how service companies create efficient service production and delivery systems while adhering to customer expectations. Proper operations management uses various interdependent tools and subsystems to increase efficiency, effectiveness, and productivity at the lowest possible cost. Forecasting, capacity management, resource management, supply chain management, process management, quality management, and project management strategies are used interchangeably by effective managers to design and implement a service to optimum customer satisfaction levels.

Course Outcomes

On successful completion, students will be able to

- create efficient service production delivery systems.
- forecast and use capacity, resource, and supply chain management strategies.
- transform service inputs into service outputs effectively.
- understand various service operations subsystems and tools.
- use process, quality, and project management concepts.
- develop an operations strategy.
- design a service to optimum customer satisfaction level.

Contents

1. The Characteristics of Service Operations Management
 - 1.1 The Values of Operations Management
 - 1.2 Operations Strategy
 - 1.3 Strategic Fit
 - 1.4 Operational Views
 - 1.5 Competitive Priorities

2. Process Strategy
 - 2.1 Process Structure
 - 2.2 Process Decisions
 - 2.3 Process Analysis
 - 2.4 Theory of Constraint
 - 2.5 Process Documentation and Improvement
3. Service Design Decisions
 - 3.1 Customer Expectation Extraction
 - 3.2 Designing and Delivering Services
 - 3.3 Job Design and Work Organization
 - 3.4 Organizational Integration
4. Forecasting
 - 4.1 Demand Management
 - 4.2 Forecasting Decisions
 - 4.3 Forecasting Methodologies
 - 4.4 The Forecasting Process
 - 4.5 Forecasting Error
5. Capacity Management
 - 5.1 Capacity Planning
 - 5.2 Resource Planning and Scheduling
 - 5.3 Customer Management
 - 5.4 Revenue Management
6. Facilities Management
 - 6.1 Front and Back Office Facilities Management
 - 6.2 Facility Location Models
 - 6.3 Designing the Servicescape
 - 6.4 Ergonomics and Productivity
 - 6.5 Information Systems and Networks

7. Improvement
 - 7.1 Total Quality Management
 - 7.2 Operational Improvement
 - 7.3 Continuous Improvement
 - 7.4 System Failure, Prevention, and Recovery
 - 7.5 Complaint Management
8. Supply Chains in Services
 - 8.1 Supply Chain Design
 - 8.2 Performance Metrics
 - 8.3 Integration
 - 8.4 Supply Chain Risks
 - 8.5 Sustainability
9. Customer Experience
 - 9.1 Competitive Advantage
 - 9.2 Delivery Metrics
 - 9.3 Communication
 - 9.4 Success Parameters

Digital Business Models

Course Code: DLBLODB01_E

Study Level	Language of Instruction	Contact Hours	CP	Admission Requirements
BA	English		5	none

Course Description

A business model contains the depiction of the logic of how a company generates, delivers and secures value. The progressing digitalization of many processes, products and services has made possible a large number of innovations in the area of business models in recent years. The subject of this course rounds up the presentation, the underlying patterns and the main factors that influence these digital business models. Starting from a general definition of the concept of a business model, a system is developed to describe the essential factors of a business model. An overview of the historical development of important business models and in particular the influence of digitization on newer business models allows a classification of the concept and an understanding of the framework. Then the most important alternative digital business models of recent years are systematically presented, analyzed and evaluated with regard to their respective strengths and weaknesses. Finally, the role of business models in the creation process of a business plan is described. Students learn the central approaches to developing an independent corporate positioning and are enabled to examine and evaluate the central factors influencing corporate success in digital business.

Course Outcomes

On successful completion, students will be able to

- understand what a business model is and how to describe it systematically.
- outline the basic features of the historical development of business models.
- describe key digital business models and evaluate their advantages and disadvantages.
- establish the relationship between a business model and a business plan to independently derive and analyse the positioning of a company.

Contents

1. Meaning, Origin and Definition of the Term "Digital Business Model">
 - 1.1 Goals and Functions of Digital Business Models
 - 1.2 Business Model - Origin of the Term and its Meaning in the Digital Economy
 - 1.3 Definition of the terms Business Model and Digital Business Model
 - 1.4 Differentiation from Other Terminologies of the Digital Economy

2. Basic Concepts for the Description of Business Models
 - 2.1 Value Chain by Porter
 - 2.2 Value-added Chain
 - 2.3 Dominant Logic
 - 2.4 Revenue Model
 - 2.5 Unique Selling Proposition
 - 2.6 Transaction
 - 2.7 Product or Service Range
3. Tools for the Description of Business Models
 - 3.1 Business Model Canvas
 - 3.2 St. Gallen Business Model Navigator
 - 3.3 MIT Framework
4. Patterns of Digital Business Models
 - 4.1 Long Tail
 - 4.2 Multi-Sided Pattern
 - 4.3 Free and Freemium
 - 4.4 OPEN API Pattern
5. Digital Business Models and Business Plans
 - 5.1 Integration of the Business Model into the Business Plan
 - 5.2 Company Positioning and the Digital Business Model
 - 5.3 Digital Business Models as Innovation Drivers for the Development of New Businesses

Management Accounting

Course Code: DLBMAE01

Study Level	Language of Instruction	Contact Hours	CP	Admission Requirements
BA	English		5	none

Course Description

Management accounting is an important function to operate an organization. Managers need to understand this function in order to be able to run an organization efficiently. In most organizations, decisions, actions and human behavior are directly linked to the feature, use and focus of management accounting information. This course is about understanding the preparation and use of information provided by management accounting. Cost accounting as a central part of the management accounting informs the management about the profitability of its core business. The cost and performance measurement serves the internal decision, control and budgeting process.

Course Outcomes

On successful completion, students will be able to

- differentiate the management accounting and control function from the financial accounting and the financial management function.
- understand the cost structure and discuss the cost aspects of business operation.
- analyze and apply the tools for viewing and differentiating costs and utilize them to ameliorate business decision-making.
- discuss how the budgeting process and variance analysis works to implement the management control function.

Contents

1. Introduction to Management Accounting
 - 1.1 Financial vs. Management/Cost Accounting
 - 1.2 Definition of Cost
 - 1.3 Considering the Contemporary Business World Context
 - 1.4 Cost Behavior: Fixed and Variable Costs
2. Cost-Volume-Profit Analysis
 - 2.1 Break-Even Analysis
 - 2.2 Cost Structure and Operating Leverage
 - 2.3 Cost Structure and Variabilization

3. Simplistic Methods of Cost Allocation
 - 3.1 Cost Behavior: Direct and Indirect Costs
 - 3.2 The Need for Cost Allocation
 - 3.3 Predetermined Overhead Rate
 - 3.4 Departmental Overhead Rate
 - 3.5 Over- and Under-Application of Overhead
4. Activity-Based Costing
 - 4.1 The Rationale of Activity-Based Costing
 - 4.2 Implementing Activity-Based Costing
5. Overhead Analysis Sheet
 - 5.1 Departmental Cost Allocation
 - 5.2 Reciprocal Method
 - 5.3 Step Method
6. Relevant Cost Concepts
 - 6.1 Foundational Cost Concepts
 - 6.2 Replacement of Equipment
 - 6.3 Make or Buy
 - 6.4 Special Order
 - 6.5 Drop Product Line
7. Operating Budgets
 - 7.1 The Budgeting Process
 - 7.2 Sales Budget

By own application the methodical and creative process of the development of a start-up idea is imparted, with the goal to design a self-developed business idea up to the "problem-solution-fit".

Learning Outcomes**Project: Development of Business Ideas**

On successful completion, students will be able to

- identify a relevant problem for the development of a business idea and conduct a problem and environment analysis.
- know and understand the methodical and creative processes for idea development and to apply them by developing your own or a fictitious business idea.
- explain the theoretical concept of the unique selling proposition of business ideas and formulate it for the self-developed business idea in contrast to its competitors.
- define the target group of the business idea by means of a market analysis and to illustrate them as so-called personas.
- present the business idea as a whole in a project presentation as an emotional story using the methodology of storytelling.

Project: Development of Business Ideas

Course Code: DLBEPPEG01_E

Study Level	Language of Instruction	Contact Hours	CP	Admission Requirements
BA	English		5	none

Course Description

In this course, students learn to develop their own business idea. In addition to getting to know the necessary methodologies, they will also experience the process from identifying a problem to developing a fitting solution as a business idea. In order to experience this not only theoretically, a concrete start-up idea is developed by each student with the help of this process. Finally, the students present their results in a project presentation.

Course Outcomes

On successful completion, students will be able to

- identify a relevant problem for the development of a business idea and conduct a problem and environment analysis.
- know and understand the methodical and creative processes for idea development and to apply them by developing your own or a fictitious business idea.
- explain the theoretical concept of the unique selling proposition of business ideas and formulate it for the self-developed business idea in contrast to its competitors.
- define the target group of the business idea by means of a market analysis and to illustrate them as so-called personas.
- present the business idea as a whole in a project presentation as an emotional story using the methodology of storytelling.

Contents

- The course will teach the methodical and creative processes as well as the basics for developing a start-up idea. First of all, the methodical process of the steps of an idea development using current entrepreneurship methods will be discussed and their application will be instructed. The phases of the idea development process consist of the identification and analysis of a relevant problem, the creative development of possible solution approaches for the defined problem, the evaluation and selection of the most promising idea from a market point of view, the elaboration of the unique selling proposition with regard to the competition as well as the definition of the concrete target group of the business idea. The success factors for a successful idea development are not only discussed, but also directly reflected on the basis of the self-developed ideas. Finally, the basic preparation of a project presentation as an "investor pitch" is explained, using the methodology of storytelling. The project presentations will include the business idea

developed by the student. This idea will be presented in detail with the content developed from the process steps and presented in the form of an emotional story. The business ideas should be self-developed.

Learning Outcomes**International Accounting**

On successful completion, students will be able to

- understand the objectives, characteristics and principles of IFRS reporting in an international context and compare them to national accounting principles (HGB)
- apply recognition and measurement rules of IFRS
- describe IFRS standards as they relate to the recognition, measurement, presentation and disclosure requirements in general purpose financial statements
- classify and prepare elements of IFRS financial statements
- explain principles of business combinations and consolidated financial statements
- understand the requirements for a first-time adoption of IFRS and transition to IFRS
- prepare and analyze IFRS financial reports.

International Accounting

Course Code: DLFIAC01_E

Study Level	Language of Instruction	Contact Hours	CP	Admission Requirements
BA	English		5	none

Course Description

The course "International Accounting" covers financial reporting in accordance with International Financial Reporting Standards (IFRS). The objective is to provide students with a working knowledge of general purpose financial reporting under IFRS, especially in comparison to accounting consistent with the German Commercial Code (HGB). The focus is on IFRS and not US-GAAP as global reporting language as the former is becoming increasingly important for German companies (i.e. obligation of listed parent companies to prepare consolidated financial statements in accordance with IFRS from the years 2005 or 2007 onwards).

Course Outcomes

On successful completion, students will be able to

- understand the objectives, characteristics and principles of IFRS reporting in an international context and compare them to national accounting principles (HGB)
- apply recognition and measurement rules of IFRS
- describe IFRS standards as they relate to the recognition, measurement, presentation and disclosure requirements in general purpose financial statements
- classify and prepare elements of IFRS financial statements
- explain principles of business combinations and consolidated financial statements
- understand the requirements for a first-time adoption of IFRS and transition to IFRS
- prepare and analyze IFRS financial reports.

Contents

1. Development and Significance of International Accounting
 - 1.1 The Importance of International Accounting Rules
 - 1.2 The Evolution of IFRS
 - 1.3 Application of IFRS in the G-20
2. General Principles of IFRS
 - 2.1 Structure of International Financial Reporting Standards
 - 2.2 Purpose of the Conceptual Framework
 - 2.3 Basic Principles of the Conceptual Framework
 - 2.4 Overview of Individual Standards and Interpretations

3. Recognition and Measurement Rules for IFRS Financial Reports
 - 3.1 Definition of the elements of Financial Statements
 - 3.2 Recognition and Measurement of Intangible Assets and Property, Plant and Equipment
 - 3.3 Recognition and Measurement of Inventories and Financial Instruments
 - 3.4 Provisions and Deferred Taxes
 - 3.5 Revenue Recognition
4. Preparation of the Balance Sheet and Income Statement under IFRS
 - 4.1 Structure and Elements of the Income Statement
 - 4.2 Components of Profit and Loss Account
 - 4.3 Accounting Policies
5. Cash Flow Statement and Other Disclosures in Financial Statements for IFRS
 - 5.1 Cash Flow Statement in IFRS financial reports
 - 5.2 Statement of Changes in Equity According in IFRS Financial Reports
 - 5.3 Notes According to IFRS
6. Business Combinations and Consolidated Financial Statements under IFRS
 - 6.1 Principles of Business Combinations and Consolidated Financial Statements
 - 6.2 Identifying and Accounting for a Business Combination
 - 6.3 Consolidation of Individual Financial Statements
7. Other IFRS Application Areas from Practice
 - 7.1 IFRS for Small and Medium-Sized Companies
 - 7.2 Main differences between IFRS and HGB
 - 7.3 Conversion from HGB to IFRS

- SCM Practice: Tasks and Activities in the Core Process of Procurement
- SCM Practice: Tasks and Activities in the Core Process Production
- SCM Practice: Tasks and Activities in the Core Distribution Process

Learning Outcomes

Supply Chain Management II

On successful completion, students will be able to

- systematically explain the strategic relevance of enterprise-wide value creation processes.
- understand the most important tasks and problems in the SCM core process planning.
- systematize the elements and interrelationships in the CPFR model in a differentiated way.
- be familiar with the characteristics and peculiarities of contract logistics.
- understand the most important tasks and problems in the SCM core process procurement.
- explain central elements and characteristics of a procurement strategy.
- understand the most important tasks and problems in the SCM core process production.
- explain central elements and characteristics of a modern production strategy.
- understand the most important tasks and problems in the SCM core process distribution.
- explain central elements and characteristics of the so-called ECR concept.

Supply Chain Management II

Course Code: DLBDESESCM02

Study Level	Language of Instruction	Contact Hours	CP	Admission Requirements
BA	English		5	none

Course Description

From the perspective of strategic management research and practice, the activities covered by the term SCM are closely related to efforts to build and/or maintain a stable operational competitive advantage. A fundamental discussion of this relationship forms the starting point for the course. On this basis, a differentiated analysis of strategy-relevant activities and instruments in the Plan, Source, Make, Deliver, and Return process categories is then carried out using the SCOR model. Special attention is given to the practice-relevant areas of SCM, e.g., order-promising (plan), supplier-relation-management (source), postponement (make), and the ECR-concept (deliver).

Course Outcomes

On successful completion, students will be able to

- systematically explain the strategic relevance of enterprise-wide value creation processes.
- understand the most important tasks and problems in the SCM core process planning.
- systematize the elements and interrelationships in the CPFR model in a differentiated way.
- be familiar with the characteristics and peculiarities of contract logistics.
- understand the most important tasks and problems in the SCM core process procurement.
- explain central elements and characteristics of a procurement strategy.
- understand the most important tasks and problems in the SCM core process production.
- explain central elements and characteristics of a modern production strategy.
- understand the most important tasks and problems in the SCM core process distribution.
- explain central elements and characteristics of the so-called ECR concept.

Contents

1. Strategic Aspects of SCM
 - 1.1 Strategic Thinking and Action: General Information
 - 1.2 Competition Focus and SCM
 - 1.3 Competition Location and SCM
 - 1.4 Competition Rules and SCM

2. SCM Practice: Core Process Planning
 - 2.1 General Preliminary Considerations
 - 2.2 Collaborative Planning, Forecasting, and Replenishment
 - 2.3 Order Promoting
 - 2.4 Kanban
 - 2.5 Integration of X-PL Logistics Service Providers
3. SCM Practice: Core Process Procurement
 - 3.1 General Preliminary Considerations
 - 3.2 Production Synchronous Procurement
 - 3.3 Sourcing Concepts
 - 3.4 Supplier Relations Management
4. SCM Practice: Core Process Production
 - 4.1 Selected Aspects of the Problem Background
 - 4.2 Collaborative Engineering
 - 4.3 Postponement Strategies
 - 4.4 Value Added Partnership
5. SCM Practice: Core Process Distribution
 - 5.1 Basic Information on the Distribution Problem
 - 5.2 Efficient Consumer Response (ECR)
 - 5.3 Consignment Warehouse

- Cultural Concept and Approaches Towards Cultural Understanding
- Comparative Human Resources
- International Personnel Deployment
- International Assignments and Host Country Essentials
- Development of International Managers
- Application of International HRM Models to Selected Regions of the World

Learning Outcomes**International HR Management**

On successful completion, students will be able to

- understand and identify the challenges of human resource management in multinational companies.
- take into account cultural particularities in personnel management in different countries and to apply these to transnational mergers and acquisitions.
- name opportunities and risks as well as factors for success in the assignment of expatriates and to identify optimization factors.
- identify elements for developing transnationally qualified managers.
- identify specific risks and opportunities in international personnel deployment with regard to selected regions.

Study Level	Language of Instruction	Contact Hours	CP	Admission Requirements
BA	English		5	none

Course Description

The aim is to provide a bird's eye view of special features, opportunities, risks and challenges in both country-specific and cross-national human resources management. To this end, the concept of culture will be discussed and different ways of looking at culture will be debated. On this basis, the course tackles country-specific personnel management with its respective peculiarities. This is followed by a discussion on the transnational personnel management of Multinational Corporations (MNCs). Building on this, the topics of international staff deployment, secondments and the influence of host countries on the management process of MNCs and their foreign subsidiaries will be addressed. A discussion on special features of human resources management in cross-border mergers and acquisitions rounds up this part of the course. In a second thematic approach, the course looks at the requirements for the development of transnational managers in MNCs and discusses measures such as secondment and ongoing training. Finally, the introduced models and concepts will be applied to two example regions in Asia (Japan/Taiwan and China/Vietnam) and the USA.

Course Outcomes

On successful completion, students will be able to

- understand and identify the challenges of human resource management in multinational companies.
- take into account cultural particularities in personnel management in different countries and to apply these to transnational mergers and acquisitions.
- name opportunities and risks as well as factors for success in the assignment of expatriates and to identify optimization factors.
- identify elements for developing transnationally qualified managers.
- identify specific risks and opportunities in international personnel deployment with regard to selected regions.

Contents

1. Culture and Intercultural Perspectives
 - 1.1 Positivist View
 - 1.2 Interpretative View
 - 1.3 Critical View

2. Comparative Human Resources
 - 2.1 Globalisation and its Effects on Human Resources Management
 - 2.2 Contextual Effects
 - 2.3 Requirements
3. Multinational Companies and International HR Models
 - 3.1 Challenges in Multinational Corporations
 - 3.2 Resolution Methods
 - 3.3 International HR Models
4. International Personnel Deployment
 - 4.1 International Personnel Planning
 - 4.2 Reasons for Deployments and Job Rotation
 - 4.3 Selection of Expatriates
 - 4.4 Success Determinants
5. International Missions and Host Countries
 - 5.1 Variance in Environmental Variables
 - 5.2 Host Country Effects for Multinational Corporations
 - 5.3 HRM in Cross-Border Mergers and Acquisitions
 - 5.4 Integration
6. Development of International Managers
 - 6.1 Personnel Development in an International Context
 - 6.2 Preparation, Support and Reintegration of Expatriates
7. Application in Sample Markets
 - 7.1 Asia: Japan and Taiwan
 - 7.2 Asia: China and Vietnam
 - 7.3 USA
 - 7.4 European Countries

Leadership 4.0

Course Code: DLBWPLS01_E

Study Level	Language of Instruction	Contact Hours	CP	Admission Requirements
BA	English		5	none

Course Description

Today, competitiveness depends more than ever on continuous innovation. This puts new demands on the management of companies. The task of successful leaders in innovation and business is no longer to offer direction and solutions, but to create a framework in which others develop innovations. This change, which is currently taking place with full force in companies, requires further developments on classic leadership concepts and its principles. Against the background of digital change and the advance of artificial intelligence, established business models are constantly being put to the test. On the one hand, it is important to work on several projects simultaneously and to adapt flexibly to changing conditions at any time; on the other hand, employees want to be integrated into the work process in a different way. Consideration and flexibility for their personal and family situation play an increasing role. Innovation and business leaders can only meet all these diverse challenges with Leadership by inspiring others to think ahead and act inter-divisionally, in other words, to be visionary. This course tries to convey knowledge, understanding and tools for this challenging field of work.

Course Outcomes

On successful completion, students will be able to

- understand the classical theories of leadership and new leadership models.
- distinguish between the terms leadership and management.
- reflect on the understanding of successful leadership models against the background of economic changes.
- develop an understanding of the need for alternative forms of organizational directing.
- implement appropriate leadership methods according to a company's level of complexity.
- draw upon a sound theoretical understanding that they can practice in applied research.

Contents

1. Basics of the Leadership Concept
 - 1.1 Definition of the Leadership Concept and Leadership Actions
 - 1.2 Development of the Understanding of Leadership
 - 1.3 The Role of Communication in Leadership
 - 1.4 New Challenges for Leadership

2. Leadership Versus Management
 - 2.1 Distinctions between these Concepts
 - 2.2 Relevance of Leadership in the Context of Technological Change
 - 2.3 New Forms of Work as a Challenge for Leadership 4.0
3. Organizational Prerequisites for Successful Leadership
 - 3.1 Launching Corporate Governance Initiatives
 - 3.2 From Process to Project Management
 - 3.3 Managing Limited Resources
4. Personal Factors for Successful Leadership
 - 4.1 Personal Characteristics
 - 4.2 Technological Know-how
 - 4.3 Policy and Compliance
5. Management Tools
 - 5.1 Definition, Differentiation and Challenges
 - 5.2 Use of Direct Management Tools
 - 5.3 Use of Indirect Management Tools
6. Leadership 4.0 Models
 - 6.1 Transformational Leadership
 - 6.2 Leadership as an Agile Role
 - 6.3 Authentic Leadership
7. Leadership 4.0 Case Studies
 - 7.1 Allsafe Jungfalk
 - 7.2 Automattic

Sustainability

Course Code: DLBBAS01_E

Study Level	Language of Instruction	Contact Hours	CP	Admission Requirements
BA	English		5	none

Course Description

This course gives students insights into sustainability. It presents fundamentals and definitions and explains the ethical and economic context of sustainability, the various levels of its occurrence and relevant international frameworks. Furthermore, students will familiarize themselves with product development, product life cycle planning and triple bottom line reporting from a sustainability viewpoint. Real life cases of corporate sustainability programs provide insights into different examples from professional practice, thus linking theory and practice.

Course Outcomes

On successful completion, students will be able to

- understand the concept sustainability.
- contextualize sustainability in ethical and economical terms.
- explain international frameworks of sustainability.
- understand the technical implications of sustainability.
- develop corporate reporting along the triple bottom line.
- critically analyze sustainability management examples from professional practice.

Contents

1. Fundamentals of Sustainability
 - 1.1 Introduction and Definition
 - 1.2 Sustainability in the Context of Ethics
 - 1.3 Sustainability in the Context of Business: Corporate Social Responsibility
2. Levels of Sustainability
 - 2.1 Societal Level
 - 2.2 Corporate Level
 - 2.3 Individual Level
3. Frameworks for Sustainability
 - 3.1 Sustainable Development Goals
 - 3.2 ISO 14001 and ISO 26000
 - 3.3 Industry Standards on Sustainability

4. Technical Aspects of Sustainability
 - 4.1 Research and Product Development
 - 4.2 Product Life Cycle
 - 4.3 Life Cycle Assessment
5. Sustainability Reporting
 - 5.1 Global Reporting Initiative
 - 5.2 Key Aspects of Triple Bottom Line Reporting
 - 5.3 Challenges of Triple Bottom Line Reporting
6. Examples of Corporate Sustainability Management Programs
 - 6.1 Case 1
 - 6.2 Case 2
 - 6.3 Case 3

Module Contents

The course deals with the managerial, organizational and workplace changes affecting companies as a result of megatrends.

Learning Outcomes

Project: New Work

On successful completion, students will be able to

- define and explain the term New Work.
- develop a grasp for changes in work, leadership and organization in the wake of important megatrends and their effects.
- explain the stages of change processes in the context of the New Work concept and to implement them in an example project.
- apply important methods and tools in change processes.
- reflect and document the most important lessons learned for change processes.

Project: New Work

Course Code: DLBPEPNW01_E

Study Level	Language of Instruction	Contact Hours	CP	Admission Requirements
BA	English		5	none

Course Description

The term New Work, as a collective term for all changes to work, leadership and organization, is the focus of this course and will be explored by the students using practical examples. On the basis of a project from company HR practice with a focus on New Work, a portfolio will be developed in which the students reflect and document their most important learning experiences. This will allow the students to further develop their technical, methodological, personal and social skills.

Course Outcomes

On successful completion, students will be able to

- define and explain the term New Work.
- develop a grasp for changes in work, leadership and organization in the wake of important megatrends and their effects.
- explain the stages of change processes in the context of the New Work concept and to implement them in an example project.
- apply important methods and tools in change processes.
- reflect and document the most important lessons learned for change processes.

Contents

- New Work deals with changes resulting from megatrends which in turn impact the work, leadership and organizational aspects. These megatrends can be digitalization, globalization, demographic trends or changing values. Possible contents of the course are:
 - new models for workplace design (e.g. Co-Working space)
 - new models of collaboration (e.g. virtual teams, mixed-age teams)
 - new models of leadership (e.g. shared leadership, agile leadership)
 - agile organization (e.g. Holocracy)
 - Effects on staff development (e.g. shifting the responsibility for lifelong learning to the employee)

The process of change that accompanies the introduction of these new concepts is to be exemplified and the important learning experiences of the students reflected and documented.

Course Description

In the seminar "Current Issues in International Management" students write a research essay on a specific topic and present their results. The students demonstrate that they are able to autonomously familiarize themselves with a topic of international management and to document and present the knowledge gained in an organized manner.

Course Outcomes

On successful completion, students will be able to

- familiarize themselves autonomously with a given topic from the field of "International Management".
- independently research subject-specific literature and evaluate it in a targeted manner.
- elaborate important characteristics, interrelationships and findings in a written assignment.

Contents

- The seminar deals with current issues in international management. Each participant is expected to write a research paper on a topic assigned to them and present the contents of the written assignment.

Module Contents

- In this course, students are taught action competences in the field of agile project management. They will be familiarized with the values, activities, roles, and artifacts of agile procedures using Scrum as an example.

Learning Outcomes**Agile Project Management**

On successful completion, students will be able to

- explain the differences between agile and plan-driven project management.
- explain agile principles.
- work together in an agile manner according to the values defined in Scrum.
- apply the activities defined in Scrum.
- take responsibility for the roles defined in Scrum.
- create and maintain the artefacts defined in Scrum.
- consider the increasing relevance of international, intercultural and virtual collaboration in projects.

Agile Project Management

Course Code: DLBCSAPM01

Study Level	Language of Instruction	Contact Hours	CP	Admission Requirements
BA	English		5	none

Course Description

Students will receive a practical introduction to agile project management in this course. In addition to teaching its individual basic principles, the differences between agile project management and plan-driven project management will be examined in detail. In order to understand and experience agile project management, the values, activities, roles, and artefacts of typical agile procedures are presented using Scrum and then practiced on an example project.

Course Outcomes

On successful completion, students will be able to

- explain the differences between agile and plan-driven project management.
- explain agile principles.
- work together in an agile manner according to the values defined in Scrum.
- apply the activities defined in Scrum.
- take responsibility for the roles defined in Scrum.
- create and maintain the artefacts defined in Scrum.
- consider the increasing relevance of international, intercultural and virtual collaboration in projects.

Contents

- This course teaches students various skills in the field of agile project management. In contrast to plan-driven project management, the principles of agility used in modern software development are taught. Using the example of Scrum, students will acquire skills in applying an agile approach, and then apply their knowledge of respective roles and activities in a simple project to gain initial practical experience, documenting it in a project report. The content of the projects results from the individual abilities and requirements of the students.

Module Contents

This module focuses on the teaching and application of methods and instruments that support management decisions in the context of production setup and production planning. Both strategic network planning and the operation of production logistics are addressed. Strategic planning includes topics such as selection of site location and strategic production planning, while operations planning includes lot-size planning and production scheduling.

<p>Learning Outcomes</p> <p>Project: Production and Logistics</p> <p>On successful completion, students will be able to</p> <ul style="list-style-type: none"> ▪ understand the different planning tasks involved in setting up and operate production and assign the planning tasks to different decision-making levels. ▪ know optimizing and heuristic procedures for selection of site location and apply them exemplarily. ▪ distinguish methods and tools for demand forecasting and demand planning and implement quantitative methods for demand forecasting and demand planning. ▪ determine methods for material requirements in production planning and implement those methods exemplarily. ▪ know and apply optimizing and heuristic methods of lot-size planning and scheduling for production.

Project: Production and Logistics

Course Code: DLBLOPPL01_E

Study Level	Language of Instruction	Contact Hours	CP	Admission Requirements
BA	English		5	none

Course Description

There are many different questions to be answered and decisions to be made when designing and operating a production network. At the strategic level, these decisions include the structure of the production network, while at the operational level, the planning of the production logistics is addressed. Using a concrete planning example, the students learn relevant methods of decision support and can apply these methods to the use case. From the choice of site location and strategic production planning to scheduling in production, methods and instruments for all planning and decision-making levels are presented and applied as examples.

Course Outcomes

On successful completion, students will be able to

- understand the different planning tasks involved in setting up and operate production and assign the planning tasks to different decision-making levels.
- know optimizing and heuristic procedures for selection of site location and apply them exemplarily.
- distinguish methods and tools for demand forecasting and demand planning and implement quantitative methods for demand forecasting and demand planning.
- determine methods for material requirements in production planning and implement those methods exemplary.
- know and apply optimizing and heuristic methods of lot-size planning and scheduling for production.

Contents

- In this course, students learn in a business game how to the setup and operate a car plant. Applying suitable methods, instruments and procedures is necessary to successfully pass through the different phases of production planning and to make valid decisions. Starting with the selection of site location and site layout planning, students work successively on the creation of strategic production plans such as demand forecasts, production programs and material requirements plans. The strategic plans are then translated into tactical-operational planning objects such as production lots and production schedules. After successful completion of the business game, students deepened their knowledge in a project report on selected topics of production planning and production logistics.

Module Contents

During Thesis Lab, students learn and go through the various steps of writing their bachelor's thesis. They first gain an insight into the targeted structuring of a problem. They are also introduced to systematic literature research. Developing research questions and the deriving hypotheses are core concepts that are discussed in this module. Furthermore, students gain an overview of the various research methodologies that are appropriate for different research objectives.

<p>Learning Outcomes</p> <p>Thesis Lab</p> <p>On successful completion, students will be able to</p> <ul style="list-style-type: none"> ▪ independently narrow down a research field and to derive a research question according to their research objective. ▪ apply appropriate research methodologies to their own independent research project. ▪ critically reflect on their own research and identify limitations and future research potentials.

Course Description

Students are prepared to undertake their first independent research project. Building on their experience in literature research from previous seminars, they gain insight into relevant research theories and axioms as well as methods and research designs.

Course Outcomes

On successful completion, students will be able to

- independently narrow down a research field and to derive a research question according to their research objective.
- apply appropriate research methodologies to their own independent research project.
- critically reflect on their own research and identify limitations and future research potentials.

Contents

- The course provides students with the skills and knowledge in order to successfully write a scientific thesis.

Introduction to New Work

- Working world of the future
- Concept development
- New Work as an interdisciplinary approach
- Megatrends
- Effects of agile organization forms
- Leadership and cooperation in New Work
- Empowerment
- Competence development
- General conditions

Business Psychology

- General Theories of Business Psychology
- Psychology of Microeconomic Processes
- Psychology of Macroeconomic Processes
- Psychology of Change
- The Learning Organization

Learning Outcomes**Introduction to New Work**

On successful completion, students will be able to

- identify and understand the challenges of technological and societal change.
- transfer the emerging challenges to human resources management and the leadership culture in companies.
- understand the concepts of agile and fluid organizations and the resulting consequences.
- identify solutions for complex environmental factors on leadership and human resources management.

Business Psychology

On successful completion, students will be able to

- describe central economic assumptions and their influencing factors and critically question them in relation to concrete action and decision making.
- discuss important theories in the field of motivation, cognition and interaction and explain their significance for economic tasks and contexts.
- explain fundamental psychological conditioning factors and explanatory models of macroeconomic processes and phenomena and apply them to central economic issues.
- present the importance of work and essential influencing factors from a psychological perspective and derive operational possibilities for shaping work.
- differentiate essential psychological models and concepts for describing and influencing human behavior in organizations and groups.
- assess the possibilities and limits of the targeted development of organizations on the basis of central psychological theories and models and to develop behavioral recommendations.
- discuss basic psychological concepts of the learning organization and design measures for everyday working life.

Introduction to New Work

Course Code: DLBNWENW01_E

Study Level	Language of Instruction	Contact Hours	CP	Admission Requirements
BA	English		5	none

Course Description

More and more companies leave their bureaucratic systems and hierarchical structures behind and adopt an agile style of work. Knowledge is both increasing and outdated at an increasing rate. Autonomy and creativity become of greater importance in more and more companies. Increasingly, processes and departments are set up according to agile principles. Work experiences an increasing dissolution of boundaries with both positive and negative effects. The question of how structures and corporate culture adapt better and faster to shorter innovation cycles and environmental changes affects all companies and their human resources management. It is more important than ever for knowledge and qualifications to be state of the art; consequently continuous learning needs to take a more prominent role in the work place. In the context of social and demographic change, work and organizations are moving further and further away from Taylorism and towards integral, evolutionary organizations whose work is characterized by self-management, a holistic view and meaningful tasks. This is accompanied by a change in orientation, away from bureaucracy towards democratic structures and empowerment. This course provides an introduction to the complex and contemporary theme of the new working world and work structure. Starting with a classification of the topic, we will define social megatrends as essential factors influencing human resource management and organization. Building on this, we will discuss the dipole of rigid and agile organizational structures and the resulting effects on leadership, personnel management and employees. Further, we will look at the concepts of cooperation and leadership during the implementation of new work structures and methods as well as necessary competencies. Competence development addresses how learning, attitudes and abilities are set to interact to provide companies with agile processes. Finally, we will critically reflect upon the new work concept, looking at advantages and disadvantages for those involved, predominantly in the context of legal and social conditions.

Course Outcomes

On successful completion, students will be able to

- identify and understand the challenges of technological and societal change.
- transfer the emerging challenges to human resources management and the leadership culture in companies.
- understand the concepts of agile and fluid organizations and the resulting consequences.
- identify solutions for complex environmental factors on leadership and human resources management.

Contents

1. What is New Work?
 - 1.1 The World of Work of the Future
 - 1.2 Concept Development
 - 1.3 New Work as an Interdisciplinary Approach
2. Megatrends
 - 2.1 Globalization
 - 2.2 Digitalization and Connectivity
 - 2.3 Individualization and Changing Values
 - 2.4 Demographic Change and Diversity
3. Organization of New Work
 - 3.1 Fixed Organization Forms
 - 3.2 Agile Organization Forms
 - 3.3 Effects of Agile Organization Forms
4. Leadership and Cooperation in New Work
 - 4.1 Empowerment
 - 4.2 Leadership
 - 4.3 New Forms of Agile Cooperation
 - 4.4 New Frameworks, Methods and Tools for Cooperation
5. Competence Development
 - 5.1 Competencies
 - 5.2 Settings and Mindset
 - 5.3 Continuous Learning
6. General Conditions and Criticism
 - 6.1 General Conditions
 - 6.2 Critical Classification of New Work

Business Psychology

Course Code: DLBMPS01_E

Study Level	Language of Instruction	Contact Hours	CP	Admission Requirements
BA	English		5	none

Course Description

Decisions in complex situations do not follow the rules of logic, but are determined by the features of market participants' behavior. In order to better understand this behavior and to make reliable forecasts based on it, economics is recommended to include discoveries in the field of psychology. After an introduction to business psychology and its influencing factors, students are familiarized with the various theories on motivation, cognition and interaction. This course then looks into business psychology at the macro- and microeconomic level. Students learn about the psychological view on the development of countries and societies as well as the psychology of organizations and groups. In addition, the psychology of work in relation to human resources in general and job satisfaction in particular is examined. Students learn about and understand the importance of change in organizations and the principle of the learning organization. The ability to learn faster than the competition is one of the most important competitive factors. Learning organizations promote joint and individual learning and increase employee motivation towards work.

Course Outcomes

On successful completion, students will be able to

- describe central economic assumptions and their influencing factors and critically question them in relation to concrete action and decision making.
- discuss important theories in the field of motivation, cognition and interaction and explain their significance for economic tasks and contexts.
- explain fundamental psychological conditioning factors and explanatory models of macroeconomic processes and phenomena and apply them to central economic issues.
- present the importance of work and essential influencing factors from a psychological perspective and derive operational possibilities for shaping work.
- differentiate essential psychological models and concepts for describing and influencing human behavior in organizations and groups.
- assess the possibilities and limits of the targeted development of organizations on the basis of central psychological theories and models and to develop behavioral recommendations.
- discuss basic psychological concepts of the learning organization and design measures for everyday working life.

Contents

1. Economic Psychology of People
 - 1.1 Economic Psychology
 - 1.2 Human Behavior in the Economy
2. Influencing Factors of Basic Economic Assumptions
 - 2.1 Decision-Making Theories and Decision Anomalies
 - 2.2 Perception and Processing of Information
 - 2.3 Feelings
3. Theories of Business Psychology
 - 3.1 Theories in the Field of Motivation
 - 3.2 Theories in the Field of Cognition
 - 3.3 Theories in the Field of Interaction
4. Psychology of Macroeconomic Processes
 - 4.1 Psychology of Economic Development
 - 4.2 Psychology of Developed Societies
 - 4.3 Psychology of Markets
 - 4.4 Psychology of Money
5. Psychology of Microeconomic Processes I
 - 5.1 Psychology of Work
 - 5.2 Psychology of the Work Force
 - 5.3 Psychology of Work Design
 - 5.4 Psychology of Job Satisfaction
 - 5.5 Psychology of Workload
6. Economic Psychology of Microeconomic Processes II
 - 6.1 Psychology of Organizations
 - 6.2 Organizational Groups
 - 6.3 Organizational Power
 - 6.4 Organizational Conflicts
 - 6.5 Organizational Leadership
7. Psychology of Change
 - 7.1 Areas of Organizational Change
 - 7.2 Phases of organizational Change
 - 7.3 Organizational Development

8. The Learning Organization
 - 8.1 Systemic Thinking
 - 8.2 Personal Mastery
 - 8.3 Mental Models
 - 8.4 Visions
 - 8.5 Team Learning

Module Contents

Applied Sales I

- Fundamentals of Applied Sales
- The Distribution System
- Personal Sales
- Sales Plans
- New Customer Acquisition
- A Sales Visit
- Conversational Tactics
- Conducting Negotiations
- Other Sales Channels

Applied Sales II

- Marketing and Sales
- Customer Satisfaction as a Success Factor
- Personalities in Sales
- Customer-Oriented Communication
- Presentation and Rhetoric
- Customer Loyalty
- Networking
- Case Study

Learning Outcomes

Applied Sales I

On successful completion, students will be able to

- understand the fundamentals of applied sales and place them in the context of the company.
- understand the interaction of the individual facets of applied sales.
- differentiate between and evaluate individual sales systems.
- describe current sales types and sales characteristics.
- oversee and classify the entire sales process from customer acquisition to customer retention.
- understand the basics of sales and negotiation management and apply them.
- name the usual sales instruments, recognize their advantages and disadvantages, and reflect on essential fields of application and possibilities.

Applied Sales II

On successful completion, students will be able to

- understand the interaction and the respective areas of responsibility of marketing and sales.
- reflect on and classify the goals and measures within the framework of the applied sales system.
- assess the relevance of customer satisfaction and retention. In addition, the students will be familiar with the central design elements of CRM.
- reflect on and assess alternative approaches to customer loyalty and relationship management and apply them in business practice.
- understand the meaning of the terms customer life cycle and customer value, and develop approaches to manage them in the sense of the respective sales targets.
- use descriptive presentation techniques in order to convince customers and other sales partners.
- understand the relevance of networking and develop strategies to broaden the contact base.
- develop and evaluate their own market analyses and sales concepts on the basis of practical experience within the framework of the case study.

Applied Sales I

Course Code: DLBDSEAS01

Study Level	Language of Instruction	Contact Hours	CP	Admission Requirements
BA	English		5	none

Course Description

The demands on sales thinking are growing every day. Globalized demand combined with high competition is making it increasingly difficult for companies to compete for customers. At the same time, customers are becoming better informed, while traditional supply markets are saturated and at overcapacity. In order to be successful in such an environment, sales thinking and action are required along with a new type of salesperson. Within the course Applied Sales I (Introduction), the participants are familiarized with the basic concepts of applied sales. You will learn about sales organization, dealing with alternative sales channels, and get to know the dedicated sales planning process. The contents of the module are complemented by the successful acquisition of new customers, whereby particular attention is paid to the organization and implementation of customer visits and the conduct of discussions and negotiations.

Course Outcomes

On successful completion, students will be able to

- understand the fundamentals of applied sales and place them in the context of the company.
- understand the interaction of the individual facets of applied sales.
- differentiate between and evaluate individual sales systems.
- describe current sales types and sales characteristics.
- oversee and classify the entire sales process from customer acquisition to customer retention.
- understand the basics of sales and negotiation management and apply them.
- name the usual sales instruments, recognize their advantages and disadvantages, and reflect on essential fields of application and possibilities.

Contents

1. Fundamentals of Applied Sales and Distribution
 - 1.1 Tasks and Forms of Applied Distribution
 - 1.2 Marketing as the Basis of Sales
 - 1.3 Distribution, Sales, and Other Terms
 - 1.4 Sales in Different Economic Sectors

2. The Distribution System
 - 2.1 Forms of Sales
 - 2.2 Sales Organisation
 - 2.3 Key Account Management
 - 2.4 Multi-Channel Distribution
3. Personal Sales
 - 3.1 The "New Sellers"
 - 3.2 Requirements for Sales Personalities
 - 3.3 The Key Account Manager
 - 3.4 Task of Sales Managers
4. Sales Plan
 - 4.1 Tasks and Objectives of Sales Management
 - 4.2 Observation of Competition in the Context of Sales Management
 - 4.3 Potential Analyses and Sales Planning
 - 4.4 Sales Control and Visit Strategies
5. New Customer Acquisition
 - 5.1 Identification of New Customer Potential
 - 5.2 Customer Relationship Management and Customer Acquisition
 - 5.3 Trade Fairs and Events
 - 5.4 Networking
6. The Sales Visit
 - 6.1 Frequency and Preparation of Visits
 - 6.2 Conduct of a Visit
 - 6.3 Visit Reports and Follow-Up
 - 6.4 Aftercare and Follow-Up
7. Conversational Tactics
 - 7.1 Structured Conversation Preparation
 - 7.2 Goal-Oriented Conversation: The D.A.L.A.S Model
 - 7.3 Questioning Techniques

8. Conducting Negotiations
 - 8.1 Psychology of Negotiation
 - 8.2 Negotiation Structure
 - 8.3 Objection Handling
 - 8.4 Price Negotiations

9. Other Sales Channels
 - 9.1 Telemarketing
 - 9.2 Catalogue and Brochure Sales
 - 9.3 Internet and E-Commerce

Applied Sales II

Course Code: DLBDSEAS02

Study Level	Language of Instruction	Contact Hours	CP	Admission Requirements
BA	English		5	none

Course Description

The course Applied Sales II builds on the basics taught in the course "Applied Sales I" and broadens and deepens them. First, the tension between marketing and sales is examined in more detail. Based on this, essential backgrounds and central target figures for successful sales management (e.g., customer satisfaction and loyalty as well as the customer life cycle) are derived and operationalized in order to create the basis for efficient and effective customer relationship management. As the process progresses, attention will also be paid to mental processes and consumer behavior in general. In addition, strategies and paths to successful negotiation are deepened and supplemented by convincing communication techniques. The course concludes with a case study in the course of which the students have the opportunity to apply what they have learned in a practice-oriented manner.

Course Outcomes

On successful completion, students will be able to

- understand the interaction and the respective areas of responsibility of marketing and sales.
- reflect on and classify the goals and measures within the framework of the applied sales system.
- assess the relevance of customer satisfaction and retention. In addition, the students will be familiar with the central design elements of CRM.
- reflect on and assess alternative approaches to customer loyalty and relationship management and apply them in business practice.
- understand the meaning of the terms customer life cycle and customer value, and develop approaches to manage them in the sense of the respective sales targets.
- use descriptive presentation techniques in order to convince customers and other sales partners.
- understand the relevance of networking and develop strategies to broaden the contact base.
- develop and evaluate their own market analyses and sales concepts on the basis of practical experience within the framework of the case study.

Contents

1. Marketing and Sales
 - 1.1 Marketing Tasks and Functions
 - 1.2 Sales Marketing in Different Economic Sectors
 - 1.3 Relationship Marketing
 - 1.4 International Marketing and Sales Cooperations
2. Customer Satisfaction as a Success Factor
 - 2.1 Customer Relationship Management (CRM)
 - 2.2 The CRM Success Chain
 - 2.3 Customer Relationship Strategies
3. Personalities in Sales
 - 3.1 Sales Personalities and Differentiation
 - 3.2 Selling in Teams
 - 3.3 Negotiating With Committees
4. Customer-Oriented Communication
 - 4.1 Communication Tasks in Sales
 - 4.2 Sales Promotion by Sales Staff
 - 4.3 Team Sales Promotion
 - 4.4 Sales Promotion by the Company
5. Presentation and Rhetoric
 - 5.1 Rhetoric in Sales
 - 5.2 Presentation Techniques
 - 5.3 Nonverbal Communication
6. Customer Loyalty
 - 6.1 Customer Retention Management
 - 6.2 Customer Programs and Other Customer Loyalty Tools
 - 6.3 Complaint Management
7. Networking
 - 7.1 Network Competencies in the Company
 - 7.2 Building and Shaping Relationships
 - 7.3 Networking via Social Media

- 8. Case Study in IQ Media Marketing
 - 8.1 The Market Situation
 - 8.2 The Marketing Situation
 - 8.3 IQ Media Marketing and IQ Digital Media Marketing

Module Contents**Financial Services Management I**

- Financial Markets and Financial Intermediaries
- Financial Intermediation in Germany
- Financial Services
- Debt Financing Through Financial Intermediaries
- Equity Financing Through Financial Intermediaries

Financial Services Management II

- Fundamentals of the Monetary and Asset Situation
- Investment in Money
- Investment in Tangible Assets
- Investment Funds and Certificates
- Insurance Financial Services

Learning Outcomes**Financial Services Management I**

On successful completion, students will be able to

- know the role of a financial service provider as a financier as well as how individual markets function in the financing sector.
- understand the basic relationships between the different financial services and their (supervisory) legal frameworks.
- evaluate the potential influence of the financial services sector on the real economy.
- familiarize themselves with the financing services offered both for external financing and for self-financing.
- assess the importance of financial services in the form of debt and equity financing in the short, medium, and long term.

Financial Services Management II

On successful completion, students will be able to

- systematize the different possibilities for the investment of financial surpluses.
- with the help of knowledge gained regarding conflicts involved in making financial investments, apply different aspects of investment decision-making to financial instruments.
- assess the various forms of investment in order of their safety.
- analyze the various forms of investment in terms of risk and return.
- understand that investment funds, certificates, and derivatives are modern products of financial service providers, which bring high returns and sometimes high risk.

Financial Services Management I

Course Code: DLBDSEFSM01

Study Level	Language of Instruction	Contact Hours	CP	Admission Requirements
BA	English		5	none

Course Description

The course explains the origin and constitution of the financial market. As a result of the imperfection of the financial market, the necessity of financial intermediaries is theoretically derived, which leads to the thesis of disintermediation. Since the German financial market is determined by regulations and supervision, the legal framework is discussed. The financial services of banks and other specialized financial intermediaries are presented. The main forms of debt financing through financial intermediaries are presented as well as financing with equity capital.

Course Outcomes

On successful completion, students will be able to

- know the role of a financial service provider as a financier as well as how individual markets function in the financing sector.
- understand the basic relationships between the different financial services and their (supervisory) legal frameworks.
- evaluate the potential influence of the financial services sector on the real economy.
- familiarize themselves with the financing services offered both for external financing and for self-financing.
- assess the importance of financial services in the form of debt and equity financing in the short, medium, and long term.

Contents

1. Financial Markets and Financial Intermediaries
 - 1.1 Origin and Basic Problems of the Financial Market
 - 1.2 Appearances and Functions of Financial Intermediaries
2. Financial Intermediation
 - 2.1 The Banking System
 - 2.2 Asset Management Companies and Insurance Companies
 - 2.3 Regulations and Supervision
3. Financial Services
 - 3.1 Financing Needs
 - 3.2 The Range of Financial Services

4. Debt Financing Through Financial Intermediaries
 - 4.1 Types of Loans
 - 4.2 Lending and Collateralization
 - 4.3 Credit Substitutes

5. Equity Financing Through Financial Intermediaries
 - 5.1 Equity Financing Through Capital Participation and Venture Financing Companies
 - 5.2 Equity Capital Markets Issuance
 - 5.3 Disintermediation in Finance

Financial Services Management II

Course Code: DLBDSEFSM02

Study Level	Language of Instruction	Contact Hours	CP	Admission Requirements
BA	English		5	none

Course Description

In this course, the different possibilities of investing financial surpluses are systematized. The conflicting relationship between the risks, returns, and liquidity of a financial investment are presented, and the different aspects of decision-making for investment in one of the financial instruments are shown. The various forms of investment (monetary values, tangible assets) are presented in the order of their security. The functions that insurance companies perform as financial service providers complete the picture. The different forms of life insurance and their role in old-age provision are presented.

Course Outcomes

On successful completion, students will be able to

- systematize the different possibilities for the investment of financial surpluses.
- with the help of knowledge gained regarding conflicts involved in making financial investments, apply different aspects of investment decision-making to financial instruments.
- assess the various forms of investment in order of their safety.
- analyze the various forms of investment in terms of risk and return.
- understand that investment funds, certificates, and derivatives are modern products of financial service providers, which bring high returns and sometimes high risk.

Contents

1. Basic Information on Investing Money and Assets
 - 1.1 Basic Concepts of Money and Asset Investment
 - 1.2 Framework Conditions for Decisions on Plants
 - 1.3 Investment Products
2. Investment in Money
 - 2.1 Investment in Accounts
 - 2.2 Savings Bonds
 - 2.3 Fixed-Interest Securities

3. Investment in Tangible Assets
 - 3.1 Shares
 - 3.2 Stock Exchange Trading
 - 3.3 Investment in Real Estate
 - 3.4 Other Tangible Assets
4. Investment Funds and Certificates
 - 4.1 Mutual Funds
 - 4.2 Fund of Funds and Hedge Funds
 - 4.3 Derivatives
5. Insurance Financial Services
 - 5.1 Fundamentals of the Insurance Industry
 - 5.2 Life Insurances
 - 5.3 Insurance Products – Non-Life

Business Intelligence

Course Code: DLBCSEBI01

Study Level	Language of Instruction	Contact Hours	CP	Admission Requirements
BA	English		5	none

Course Description

Business Intelligence (BI) is used to obtain information from company data that is relevant for targeted corporate management and the optimization of business activities. This course introduces and discusses techniques, procedures, and models for data provision, information generation, and analysis, as well the distribution of the information obtained. You will then be able to explain the various subject areas of data warehousing and independently select methods and techniques to meet specific requirements.

Course Outcomes

On successful completion, students will be able to

- explain the motivation, use cases, and basics of Business Intelligence.
- identify and explain techniques and methods for providing and modeling data, as well as types of data relevant to BI, differentiating between them.
- explain techniques and methods for the generation and storage of information and independently select suitable methods on the basis of concrete requirements.

Contents

1. Motivation and Conceptualization
 - 1.1 Motivation and Historical Development
 - 1.2 BI as a Framework
2. Data Provision
 - 2.1 Operative and Dispositive Systems
 - 2.2 The Data Warehouse Concept
 - 2.3 Architectural Variations
3. Data Warehouse
 - 3.1 ETL Process
 - 3.2 DWH and Data Mart
 - 3.3 ODS and Metadata

4. Modelling of Multidimensional Data Spaces
 - 4.1 Data Modeling
 - 4.2 OLAP Cubes
 - 4.3 Physical Storage
 - 4.4 Star and Snowflake Scheme
 - 4.5 Historicization
5. Analysis Systems
 - 5.1 Free Data Research and OLAP
 - 5.2 Reporting Systems
 - 5.3 Model-Based Analysis Systems
 - 5.4 Concept-Oriented Systems
6. Distribution and Access
 - 6.1 Information Distribution
 - 6.2 Information Access

Project: Business Intelligence

Course Code: DLBCSEBI02

Study Level	Language of Instruction	Contact Hours	CP	Admission Requirements
BA	English		5	none

Course Description

Using well-known methods and techniques from the field of Business Intelligence, students will work independently on a practical question in this course. At the end of the course you will be able to independently design and prototype Business Intelligence applications based on concrete requirements.

Course Outcomes

On successful completion, students will be able to

- independently design a solution to a practical problem in the field of Business Intelligence in order to then implement a prototype and document the results.
- identify and explain typical problems and challenges in the design and practical implementation of small BI solutions.

Contents

- Implementation and documentation of practical questions regarding the use of Business Intelligence applications. Typical scenarios are, for example, "Management of BI projects", "Design of multidimensional data models" and "Prototypical implementation of small BI applications".

Module Contents

Online Marketing

- Basics of Online Marketing
- Forms and Channels of Online Marketing
- Online Marketing Strategy
- Online Media Planning
- The Online Presence
- Mobile Marketing and M-Commerce
- Online law
- Online Customer Retention and Service
- Web Analytics

Social Media Marketing

- Basics of Social-Media-Marketing
- Social-Media-Marketing in the overall Marketing Mix
- Social Media Map
- Social Media Strategy Development
- Social Media in Innovation Management
- Operational Social Media Marketing
- Legal framework of Social Media
- Developments in Social-Media-Marketing

Learning Outcomes**Online Marketing**

On successful completion, students will be able to

- classify and strategically consider the basics relevant for Online Marketing (online communication process, electronic value creation, ...)
- know the different Online Marketing channels and to evaluate digital advertising measures strategically and operationally on this basis.
- conceive an Online Marketing strategy and make strategic and operational decisions.
- attract and retain customers through Online Marketing measures.
- measure and evaluate Online Marketing programs.
- fundamentally assess the marketing chances of a company in the World Wide Web.
- consider the importance of mobile in the Online Marketing Mix.

Social Media Marketing

On successful completion, students will be able to

- understand social implications and networking communication strategies and to apply them to the field of Social Media Marketing.
- integrate Social Media Marketing into the overall Marketing Mix.
- develop a Social Media strategy and proposals for its operational implementation.
- evaluate the different Social Media channels (Facebook, Instagram...)
- use Social Media for Innovation Management and networks.
- fundamentally assess the marketing opportunities of a company in the Social Media sector and make strategic decisions in this regard.
- evaluate developments in Social Media Marketing from a sociological as well as a business perspective.

Online Marketing

Course Code: DLBMSM01-01_E

Study Level	Language of Instruction	Contact Hours	CP	Admission Requirements
BA	English		5	none

Course Description

This course uses interdisciplinary fundamentals that enable students to deal with the topic of Online Marketing in an operative and strategic way. This includes business and economic principles as well as communicative multimedia basics or the consideration of the basic tonality of Online Marketing channels. This holistic view is essential for strategic planning; In addition to considering the positioning of companies in the World Wide Web, the course will also work out how Online Marketing appearances can be optimized. The measurement of success and evaluation of relevant key figures complete the comprehensive basis for the whole module. The Online Marketing course teaches basic technical terms and concepts. These include the online communication process, added value of Online Marketing as well as electronic value creation and business models. Based on this knowledge, the course discusses aspects of product suitability, pricing policy, distribution policy, the various forms of marketing and distribution on the Internet. The course expands the understanding of the strategic and especially operational Online Marketing elements such as the planning and realization of advertising campaigns through various sales channels. In addition, the increasing development of mobile communication is taken into account and Mobile Marketing is considered as part of the Online Marketing Mix. To understand the behavior of online customers the course deals with the specific effects of advertising in regards to Online Marketing. Based on the principles of customer acquisition, the course discusses customer retention and loyalty in Online Marketing, strategies and tactics for increasing customer numbers, online campaigns and the importance of online relationships. Students learn the ropes of legal aspects and the principles of the German Data Protection Ordinance (DSGVO) relevant to Online Marketing to legally substantiate advertising campaigns and customer approaches. This course offers students the opportunity to get to know and implement the various aspects of Online Marketing Management in practice. They learn how to assess Online Media Planning through Web Analytics and targeted monitoring. For this, students learn the relevant Key Performance Indicators (KPIs) of Online Marketing, which are an essential condition for optimizing online strategies.

Course Outcomes

On successful completion, students will be able to

- classify and strategically consider the basics relevant for Online Marketing (online communication process, electronic value creation, ...)
- know the different Online Marketing channels and to evaluate digital advertising measures strategically and operationally on this basis.
- conceive an Online Marketing strategy and make strategic and operational decisions.
- attract and retain customers through Online Marketing measures.
- measure and evaluate Online Marketing programs.
- fundamentally assess the marketing chances of a company in the World Wide Web.
- consider the importance of mobile in the Online Marketing Mix.

Contents

1. Basics of Online Marketing
 - 1.1 Development and concept of Online Marketing
 - 1.2 The online communication process
 - 1.3 Added value of Online Marketing
 - 1.4 The role of Online Marketing in the Marketing Mix
 - 1.5 The electronic added value
 - 1.6 Electronic business concepts and platforms
 - 1.7 Current developments and trends
2. Forms and channels of Online Marketing
 - 2.1 Overview of the forms of Online Marketing
 - 2.2 Affiliate and Search Engine Marketing
 - 2.3 Display advertising and E-mail Marketing
 - 2.4 Social Media and Influencer Marketing
 - 2.5 Content Marketing and Storytelling
 - 2.6 Viral Marketing and Word-of-Mouth
 - 2.7 Native Advertising and Mobile Marketing
 - 2.8 Real Time Bidding and Programmatic Advertising
 - 2.9 Online PR
3. Online Marketing Strategy
 - 3.1 Setting goals and creating a basis
 - 3.2 The Customer Journey
 - 3.3 The adequate channel mix
 - 3.4 Define and analyze KPIs

4. Media planning online
 - 4.1 Principles of successful Media Planning
 - 4.2 Create and structure media budgets in a targeted manner
 - 4.3 Integrated campaigns and Cross-Media Marketing
 - 4.4 Successful media mix through campaign management

5. The Online Presence
 - 5.1 Website and web design
 - 5.2 Corporate Website
 - 5.3 Landing Page
 - 5.4 Blog
 - 5.5 Online Shop
 - 5.6 Online presentation and distribution of products and services - advantages and disadvantages

6. Mobile Marketing and M-Commerce
 - 6.1 Basics and classification of Mobile Marketing
 - 6.2 Responsive design vs. Apps vs. Mobile Web
 - 6.3 App and QR Code Marketing
 - 6.4 Location-based Services
 - 6.5 Mobile Advertising Media
 - 6.6 Mobile Commerce - definition and development
 - 6.7 Mobile Payment
 - 6.8 Success factors of mobile campaigns

7. Online law
 - 7.1 Legal aspects of Online Marketing
 - 7.2 Copyright law and the handling of user-generated content
 - 7.3 The right to your own image
 - 7.4 Basic Data Protection Ordinance (DSGVO)

8. Online Customer Retention and Service
 - 8.1 The AIDA model - extensions for Online Marketing
 - 8.2 Customer acquisition and customer retention in Online Marketing
 - 8.3 Online customer retention in the customer relationship life cycle
 - 8.4 Online customer service
 - 8.5 Excursus: Mass Customization

Social Media Marketing

Course Code: DLBMSM02-01_E

Study Level	Language of Instruction	Contact Hours	CP	Admission Requirements
BA	English		5	none

Course Description

How did Social Media become Social Media Marketing? Social Media has developed from a private communication medium to a commercialized advertising tool. A basic understanding of this development, the social implications of Social Media as well as the networked communication strategies on the Internet is the basis for an active examination of Social Media Marketing. Social Media Marketing is considered both strategically and operationally. The strategic perspective includes the aspect of strategic positioning of Social Media in the company as well as the integration into the overall marketing mix. In addition to fundamental aspects of strategy development, students will deal with the instruments of today's Social Media Marketing and the channels to use them specifically for further marketing measures and strategies in a success-oriented manner. For the active operative examination of Social Media Marketing, Social Media channels such as Facebook, Instagram, Pinterest, etc. are examined in detail in order to use them specifically for further marketing measures and strategies. Digital advertising measures that are used in Social Media are an integral part of this course. Their usage will also be considered from a legal perspective. Thus, the Social Media Marketing course teaches basic concepts such as the development of a Social Media strategy, including aspects such as content management, editorial planning or target group analysis. It deals with the usage and monitoring of different Social Media channels in a practice-oriented way and it considers the area of operative Social Media Marketing. Hence, this course provides students with a well-founded holistic view of the field of Social Media Marketing and develops the ability to use Social Media for innovation management.

Course Outcomes

On successful completion, students will be able to

- understand social implications and networking communication strategies and to apply them to the field of Social Media Marketing.
- integrate Social Media Marketing into the overall Marketing Mix.
- develop a Social Media strategy and proposals for its operational implementation.
- evaluate the different Social Media channels (Facebook, Instagram...)
- use Social Media for Innovation Management and networks.
- fundamentally assess the marketing opportunities of a company in the Social Media sector and make strategic decisions in this regard.
- evaluate developments in Social Media Marketing from a sociological as well as a business perspective.

Contents

1. Basics of Social-Media-Marketing
 - 1.1 Development of Social Media and the Concept of Social Media Marketing
 - 1.2 Social implications of Social Media
 - 1.3 Functionality, types and fields of application of Social Media Marketing
 - 1.4 Typology and activities of Social Media users
2. Social-Media-Marketing in the Overall Marketing Mix
 - 2.1 Opportunities and risks through Social Media
 - 2.2 The POST method according to Groundswell
 - 2.3 Integration into the Classic Marketing Mix
 - 2.4 Social Media as a service channel
 - 2.5 Goals of Social-Media-Marketing
 - 2.6 Relevant key figures to measure success
 - 2.7 The strategic positioning of Social Media in the company
3. Social Media Map
 - 3.1 Overview of the Social Media Map
 - 3.2 Profiles of the most relevant Social Media Channels
 - 3.3 Target Groups/User Groups
4. Social Media Strategy Development
 - 4.1 What is a Strategy? Definitions
 - 4.2 Goals of a Strategy
 - 4.3 Stages of Social Media Strategy development
 - 4.4 Online Reputation Management and Crisis Management
 - 4.5 Social Media Governance
5. Social Media in Innovation Management
 - 5.1 The Importance and Use of the Crowd
 - 5.2 Innovation through Interactive Value Creation, Branded Communities, Lead Users and Social Media Intelligence
 - 5.3 Social Media as a Market Research Tool

Organizational Development

- Organizational Development
- Framework conditions for organizational change Concepts of organizational development
Organizations in transition
- New forms of organization
- Organizational design
- Problem areas and intervention techniques
- Evaluation of success and transfer

Change Management

- Introduction to Change Management
- Understanding and shaping change
- Phase models of change management
- Phases of the change process
- Change communication
- Influencing factors and typical errors in change management
- Operational instruments in the context of change management

Learning Outcomes**Organizational Development**

On successful completion, students will be able to

- explain the basic principles of organizational development.
- name the human relation theories in organizational development.
- explain points of criticism of organizational development.
- name the implications of Systemic Organizational Development.
- outline the importance and design of corporate culture within organizational development.
- name the characteristics of a learning organization.
- show possible development paths towards the learning organization.

Change Management

On successful completion, students will be able to

- explain the management of change in its broadest sense.
- identify the characteristics and procedures by which necessary changes in companies can be identified and designed.
- grasp the basics of processes in change management and communicate them to other participants.
- identify and analyze the need for change.
- outline typical tasks of managers in initiating and accompanying change processes.
- explain essential and effective techniques and tools of change processes and apply them.
- evaluate the success of change processes and measures.
- develop meaningful ways of dealing with resistance that arises in the change process.

Organizational Development

Course Code: DLBWPOCM01_E

Study Level	Language of Instruction	Contact Hours	CP	Admission Requirements
BA	English		5	none

Course Description

To remain competitive, all organizations are subject to constant change. To shape this change positively is a key function of the responsible managers and a sign of successful management. Frequently, reasons such as the discontinuation or the development of new business fields, mergers and relocations are decisive, but also continuous company growth; technological improvements and social changes are reasons for partly far-reaching measures for the further development of organizations. This knowledge is of central importance for implementing changes. This course shows the most important human relation theories that serve as a basis for organizational development. Since the corporate culture is a central component of organizational development, both the analysis and the development of the corporate culture are presented. It also discusses the most important aspects of learning organization.

Course Outcomes

On successful completion, students will be able to

- explain the basic principles of organizational development.
- name the human relation theories in organizational development.
- explain points of criticism of organizational development.
- name the implications of Systemic Organizational Development.
- outline the importance and design of corporate culture within organizational development.
- name the characteristics of a learning organization.
- show possible development paths towards the learning organization.

Contents

1. Organizational Understanding of Organizational Development
 - 1.1 Organization concept
 - 1.2 Development of organizational theory approaches
 - 1.3 Organizational principles and forms of organization
2. Basics of Organizational Development
 - 2.1 Definition and delimitations
 - 2.2 Historical origins of organizational development
 - 2.3 Criticism of the concept of organizational development

3. Model Assumptions of Organizational Development
 - 3.1 Human relation theories in organizational development
 - 3.2 Phase models
 - 3.3 Organizational burn-out and organizational resilience
4. Systemic Organizational Development
 - 4.1 Theoretical basics
 - 4.2 Implications for systemic organizational development
5. Development of Corporate Culture
 - 5.1 Theoretical basics
 - 5.2 Culture Analysis
 - 5.3 Cultural Development
6. Development of Organizational Learning
 - 6.1 Basic ideas and definitions
 - 6.2 Learning levels: How do organizations learn?
 - 6.3 Development of the learning organization

Change Management

Course Code: DLBDBC01_E

Study Level	Language of Instruction	Contact Hours	CP	Admission Requirements
BA	English		5	none

Course Description

The pace of change in markets, technologies and customer behavior has increased significantly. These developments offer growth opportunities for companies - new business models, merging markets, changed customer behavior. To utilize future potentials, companies need to implement changes effectively and quickly. To do this, it is essential to know the meaning, structure, roles of the people involved, possible bottle neck situations and communication within the framework of change management. A great number of change programs regularly fail in the operational implementation. Therefore, knowledge of the systematic approach to the change process is necessary to successfully manage change in and of the company. People and processes play a central role in this procedure.

Course Outcomes

On successful completion, students will be able to

- explain the management of change in its broadest sense.
- identify the characteristics and procedures by which necessary changes in companies can be identified and designed.
- grasp the basics of processes in change management and communicate them to other participants.
- identify and analyze the need for change.
- outline typical tasks of managers in initiating and accompanying change processes.
- explain essential and effective techniques and tools of change processes and apply them.
- evaluate the success of change processes and measures.
- develop meaningful ways of dealing with resistance that arises in the change process.

Contents

1. Introduction to Change Management
 - 1.1 Terms and Definitions
 - 1.2 Limitations of Change Management
 - 1.3 Models of Change
2. Causes and Triggers of Change
 - 2.1 Change and Transformation
 - 2.2 External Triggers of Change
 - 2.3 Internal Triggers for Change

3. The company as an Obstacle to Change
 - 3.1 Obstacles at Organizational Level
 - 3.2 Collective Obstacles
 - 3.3 Economic Obstacles
4. Resistance at Individual Level
 - 4.1 Manifestations of Individual Resistance
 - 4.2 Causes and Triggers of Individual Resistance
 - 4.3 Actions towards Resistance
5. Change as a Management Task
 - 5.1 Success Factors of Change Management
 - 5.2 Management Tasks in Change
 - 5.3 Change Management Activity Plans
6. Leading Change
 - 6.1 Success Factor: Leadership and Manager
 - 6.2 Leadership Roles and Functions
 - 6.3 Change Communication
7. Management of Change Projects
 - 7.1 Change Management Models
 - 7.2 Organization of Change Management
 - 7.3 Controlling and Evaluation of Change Projects

Module Contents

Sustainability and Quality Management

- Fundamentals of Sustainability
- Sustainability in three Dimensions
- Sustainability in Practice
- 4 Tools and Methods of Sustainability Management
- Quality of Products, Processes and Services
- Processes, Methods and Quality Tools
- Quality Management Systems

Business Ethics

- Fundamentals of Business Ethics
- Ethics Theories at a glance
- Context of Business Ethics in the Western World
- Business Ethics Problems in Companies
- Business Ethics Concepts for Companies
- Practical Integration of Business Ethics in the Company

Learning Outcomes

Sustainability and Quality Management

On successful completion, students will be able to

- know the principles of sustainability and quality management and their significance for the company and society.
- know procedures and instruments and to implement sustainability and quality concepts in practice.
- scientifically classify the entire subject area, on the basis of the contents of the courses and with the help of supplementary scientific literature, and place it in relation to each other and evaluate it with regard to its significance for practice.
- reflect on the subject of sustainability and quality management against the background of corporate responsibility.
- know methods and applications for the realization of sustainability concepts under consideration of economic, ecological and social aspects and to apply them professionally in practice and to use them for the development of problem solutions based on sustainability criteria.
- apply quality management procedures and instruments in practice.
- present the developed solution approaches in an argumentatively well-founded and comprehensible way. Students are able to assess the role of sustainably operating companies and institutions, especially from a system perspective.
- know the legal and normative framework for sustainability and quality management.

Business Ethics

On successful completion, students will be able to

- identify conflicting interests between profit making and ethical behavior.
- name the different ethical problem situations in the daily business.
- understand business ethics theories and concepts.
- systematically integrate aspects of business ethics in daily business routine.
- use instruments of business ethics in order to sanction misconduct and to encourage ethical decision-making.

Sustainability and Quality Management

Course Code: DLBLONQM01_E

Study Level	Language of Instruction	Contact Hours	CP	Admission Requirements
BA	English		5	none

Course Description

The students learn the basics and the operational concepts of sustainability and quality management and can contribute to the implementation in practice. The importance of sustainability and quality as a corporate task is discussed from the perspective of personal, corporate and social responsibility, among other things. Methods and systems of implementation in companies are presented and critically examined.

Course Outcomes

On successful completion, students will be able to

- know the principles of sustainability and quality management and their significance for the company and society.
- know procedures and instruments and to implement sustainability and quality concepts in practice.
- scientifically classify the entire subject area, on the basis of the contents of the courses and with the help of supplementary scientific literature, and place it in relation to each other and evaluate it with regard to its significance for practice.
- reflect on the subject of sustainability and quality management against the background of corporate responsibility.
- know methods and applications for the realization of sustainability concepts under consideration of economic, ecological and social aspects and to apply them professionally in practice and to use them for the development of problem solutions based on sustainability criteria.
- apply quality management procedures and instruments in practice.
- present the developed solution approaches in an argumentatively well-founded and comprehensible way. Students are able to assess the role of sustainably operating companies and institutions, especially from a system perspective.
- know the legal and normative framework for sustainability and quality management.

Contents

1. Fundamentals of Sustainability
 - 1.1 Basic understanding and definitions
 - 1.2 Ethical aspects and social responsibility of companies
 - 1.3 Learning from nature: Role models for business processes

2. Sustainability in three Dimensions
 - 2.1 Historical developments
 - 2.2 Developments in the natural environment
 - 2.3 Economic trends
 - 2.4 Social developments and social environment
3. Sustainability in Practice
 - 3.1 Politics and State
 - 3.2 Companies
 - 3.3 Civil Society
4. Tools and Methods of Sustainability Management
 - 4.1 System Dynamics and Technology Assessment
 - 4.2 Environmental Law
 - 4.3 Sustainability and environmental management systems
 - 4.4 Life cycle assessment and CO2 footprint
5. Quality of Products, Processes and Services
 - 5.1 Definitions and terms
 - 5.2 Developments and trends
 - 5.3 Specifics of service quality
 - 5.4 Metrics and key figure systems
6. Processes, Methods and Quality Tools
 - 6.1 Continuous improvement
 - 6.2 Failure Mode and Effects Analysis (FMEA)
 - 6.3 7Q - the seven quality tools
 - 6.4 Audits and certifications
7. Quality Management Systems
 - 7.1 Quality management according to DIN EN ISO 9000ff.
 - 7.2 Total Quality Management

Business Ethics

Course Code: BETH01_E

Study Level	Language of Instruction	Contact Hours	CP	Admission Requirements
BA	English		5	keine

Course Description

Business Ethics deals with the application of ethical principles to business activities. The actions of individuals and companies are thus integrated into a context of social and ethical responsibility. Business Ethics derives its legitimacy from the effects that all economic activities have on other people, institutions and the environment. Social justice and sustainability are therefore among the most important norms of Business Ethics and are explained and described in the course. The aim of the course is providing general guidance on how to arrive at ethical decisions, rather than offering general solutions. In that sense, students are enabled to develop moral judgment in an informed manner and then make ethical decisions accordingly.

Course Outcomes

On successful completion, students will be able to

- identify conflicting interests between profit making and ethical behavior.
- name the different ethical problem situations in the daily business.
- understand business ethics theories and concepts.
- systematically integrate aspects of business ethics in daily business routine.
- use instruments of business ethics in order to sanction misconduct and to encourage ethical decision-making.

Contents

1. Fundamentals of Business Ethics
 - 1.1 Business and ethics - an overview
 - 1.2 Important terms and definitions
 - 1.3 Developments and perspectives in ethics
2. Ethics Theories at a glance
 - 2.1 The benefits of ethics theories
 - 2.2 Categorization of ethics theories
 - 2.3 Business Ethical Concepts

3. Context of Business Ethics in the Western World
 - 3.1 The importance of the context for business ethics
 - 3.2 Discussion of various contextual factors
 - 3.3 The relevance of company size on business ethics
4. Business Ethics Problems in Companies
 - 4.1 Categories of business ethicsl problems in companies
 - 4.2 Factors that make unethical behaviour more likely
 - 4.3 Case studies for ethics problems in companies
5. Business Ethics Concepts for Companies
 - 5.1 Corporate Social Responsibility
 - 5.2 Stakeholder Theory
 - 5.3 Business ethics in an international context
6. Practical Integration of Business Ethics in the Company
 - 6.1 Corporate Governance Codes
 - 6.2 Codes of Conduct/Codes of Ethics
 - 6.3 Whistleblowing
 - 6.4 Other instruments for implementing ethics in business practice

Salesforce Fundamentals

Course Code: DLSFPM01

Study Level	Language of Instruction	Contact Hours	CP	Admission Requirements
BA	English		5	none

Course Description

Salesforce is the most used software solution for customer relationship management worldwide. Using the learning platform trailhead students will learn independently the fundamentals of Salesforce. The course introduces Salesforce and explains how to administrate it. Additionally, it presents essentials of the Salesforce platform.

Course Outcomes

On successful completion, students will be able to

- define what Salesforce and customer relationship management is.
- describe and compare the different options for importing and exporting data in Salesforce.
- create reports and visualize key business metrics in real-time in Salesforce.
- create a simple Salesforce app.
- control access to data using security tools in Salesforce.

Contents

- The content on the learning platform focuses on the features and the functionality used to maintain a Salesforce implementation. It provides general knowledge of the features available to end users and the configuration options available to a Salesforce administrator. Furthermore, the content enables to maintain a Salesforce organization, respond to common business requirements, and perform administrative functions using current Salesforce features.

CRM with Salesforce Service Cloud

Course Code: DLSFPM02

Study Level	Language of Instruction	Contact Hours	CP	Admission Requirements
BA	English		5	none

Course Description

This course facilitates key aspects of setting up customer service with Salesforce service cloud on the learning platform trailhead. The course describes how to implement Salesforce service cloud and manage it. It enables to make better business decisions based on customer service data and to create a service metrics strategy. The course shows how to create processes to help support teams become more efficient and manage large data volumes within Salesforce and prepares students for the Salesforce service cloud certification.

Course Outcomes

On successful completion, students will be able to

- set up customer service with Salesforce service cloud.
- lead a customer service team in the digital era.
- create digital engagement on multiple channels.
- define service cloud goals and metrics.
- automate case management.
- improve customer service using artificial intelligence.

Contents

- The content on the learning platform focuses on designing and deploying solutions that support customer business processes and requirements using Salesforce applications. The content enables to design solutions using the Service Cloud functionality and to lead the implementation of these solutions within a customer organization.

Literature

Mathematics: Linear Algebra

Course Code: DLBDSMFLA01

Study Level	Language of Instruction	Contact Hours	CP	Admission Requirements
BA	English		5	none

Course Description

Linear algebra is a fundamental subject in mathematics. Its historical origin lies in the development of solution techniques for systems of linear equations arising from geometric problems. Numerous scientific and engineering applications can be solved using its methods. This course introduces the foundations of linear algebra and its basic notions like vectors and matrices. It then builds upon this foundation by introducing the derivation of solution techniques for problems in analytical geometry.

Course Outcomes

On successful completion, students will be able to

- explain fundamental notions in the domain of linear equation systems.
- exemplify properties of vectors and vector spaces.
- summarize characteristics of linear and affine mappings.
- identify important relations in analytical geometry.
- utilize different methods for matrix decomposition.

Contents

1. Fundamentals
 - 1.1 Systems of linear equations
 - 1.2 Matrices as compact representations of linear equations
 - 1.3 Matrix algebra
 - 1.4 Inverse and trace
2. Vector Spaces
 - 2.1 Definition
 - 2.2 Linear combination and linear dependence
 - 2.3 Base, span, and rank
3. Linear and affine mappings
 - 3.1 Matrix representations of linear mappings
 - 3.2 Image and kernel
 - 3.3 Affine spaces and sub-spaces
 - 3.4 Affine mappings

4. Analytical Geometry
 - 4.1 Norms
 - 4.2 Inner and dot product
 - 4.3 Orthogonal projections
 - 4.4 Rotations

5. Matrix Decomposition
 - 5.1 Determinant and trace
 - 5.2 Eigenvalues and eigenvectors
 - 5.3 Cholesky decomposition
 - 5.4 Eigenvalue decomposition and diagonalisation
 - 5.5 Singular value decomposition

Operations Research

Course Code: DLBBAEFOR01_E

Study Level	Language of Instruction	Contact Hours	CP	Admission Requirements
BA	English		5	none

Course Description

The term Operations Research (OR) refers to the development and application of quantitative models and methods for decision support in companies and organizations. Applications can be found in all areas of business administration, especially in production planning, supply chain management, distribution, location planning, warehousing, personnel planning and scheduling, as well as financial planning. This course introduces OR and its applications. The terminological fundamentals of the problem, model and method are presented. Further emphasis is put on graphs and basic graph algorithms. In addition, the course focuses on linear optimization, especially linear programs, simplex methods and sensitivity analysis. A special focus is the modelling of economic problems (decision, planning and optimization problems). Basic computer skills relevant for operations research are presented by means of spreadsheet calculation (esp. Microsoft Excel).

Course Outcomes

On successful completion, students will be able to

- describe the essential methodological foundations of optimization problems and their applications in various areas.
- know basic procedures from the fields of decision analysis, linear optimization, and integer linear optimization.
- apply various methods of decision support theoretically and also tool supported.
- model operational planning and decision problems such as transport problems or network flow problems and understand algorithms to solve these problems effectively.
- know the essential properties of these algorithms and applications relevant to business management.

Contents

1. Introduction to quantitative decision support
 - 1.1 Definition: Operations Research (OR) as structured problem-solving approach
 - 1.2 Terminology: models, methods and algorithms
 - 1.3 Decision Support and Decision Theory
 - 1.4 Fields and applications of OR
 - 1.5 Software applications in OR

2. Fundamentals of linear optimization
 - 2.1 Definition: linear optimization
 - 2.2 Forms and properties of linear optimization
 - 2.3 Simplex algorithm
 - 2.4 Sensitivity analysis
 - 2.5 Game theory
3. Application of linear optimization
 - 3.1 Production program planning
 - 3.2 Supply chain management
 - 3.3 Transport problem
 - 3.4 Financing and investment
4. Further optimization approaches
 - 4.1 Integer and combinatorial optimization
 - 4.2 Application: Branch-and-bound procedures and traveling salesman problems
 - 4.3 Dynamic optimization
 - 4.4 Nonlinear optimization
5. Graph theory
 - 5.1 Fundamentals and concepts of graph theory
 - 5.2 Structural modelling using graphs
 - 5.3 Shortest paths in graphs
6. Network planning and project management
 - 6.1 Elements and methods of network planning
 - 6.2 Structure and time planning as well as Gantt charts
 - 6.3 Cost and capacity planning
7. Simulation and queuing systems
 - 7.1 Basic types of simulation
 - 7.2 Deterministic simulation: systems and model experiments
 - 7.3 Stochastic simulation: waiting queue systems and models
 - 7.4 Applications of simulation
8. Application: OR implementation with a spreadsheet
 - 8.1 Integer linear optimization
 - 8.2 Shortest paths in graphs
 - 8.3 Simulation of a queue problem

Module Contents**Smart Factory I**

- Motivation and Definition of Terms
- Development of Automation
- Technological Basics and Standards
- Basic concepts of a Smart Factory
- Reference Architectures
- Smart Factory Engineering
- Safety and Security

Smart Factory II

A catalogue with the currently provided tasks is provided on the online platform of the module. It provides the content basis of the module and can be supplemented or updated by the seminar leader.

Learning Outcomes**Smart Factory I**

On successful completion, students will be able to

- understand the term Smart Factory in the context of Industry 4.0.
- be able to trace the development of automation to a fully autonomous, non-centrally organized production plant.
- understand the basic technologies and standards used to design and operate a Smart Factory.
- understand the essential concepts of a Smart Factory.
- identify and differentiate between the individual elements of a Smart Factory using different reference architectures.
- understand the special engineering challenges in the Smart Energy context.
- understand the special safety risks of digitized and networked production plants and assign concrete recommendations for action.

Smart Factory II

On successful completion, students will be able to

- have a deeper understanding of the technologies and standards in the context of Smart Factory.
- apply technologies in the context of Smart Factory to a simple practical example.
- design a hardware or software prototype for a selected task.
- document, design, and develop activities in the form of a project report.

Smart Factory I

Course Code: DLBDESEF01

Study Level	Language of Instruction	Contact Hours	CP	Admission Requirements
BA	English		5	none

Course Description

In this course, students will gain a deeper insight into the networking and digitization of production facilities by examining a Smart Factory. For this purpose, they will be familiarized with the basic goals of a Smart Factory in the context of the research complex Industry 4.0. After a brief introduction to the history of automation, students will learn the technical basics and standards required to design and operate a Smart Factory. Building on this, they will learn how these individual technologies are used to implement the central concepts of a Smart Factory. In order to understand which components a Smart Factory consists of, different reference architectures are presented and compared. The course concludes with the special engineering challenges of an autonomously acting and decentralized production plant. Above all, this includes IT security, which is particularly relevant due to the digital networking of production facilities and products.

Course Outcomes

On successful completion, students will be able to

- understand the term Smart Factory in the context of Industry 4.0.
- be able to trace the development of automation to a fully autonomous, non-centrally organized production plant.
- understand the basic technologies and standards used to design and operate a Smart Factory.
- understand the essential concepts of a Smart Factory.
- identify and differentiate between the individual elements of a Smart Factory using different reference architectures.
- understand the special engineering challenges in the Smart Energy context.
- understand the special safety risks of digitized and networked production plants and assign concrete recommendations for action.

Contents

1. Motivation and Definition of Terms
 - 1.1 Goals of Smart Factory
 - 1.2 Internet of Things
 - 1.3 Cyber-Physical Systems
 - 1.4 Cyber-Physical Production Systems
 - 1.5 Smart Factory as a Cyber-Physical (Production) System

2. Development of Automation
 - 2.1 Automation Pyramid
 - 2.2 Networked, Decentralized Organization of Production
 - 2.3 Future Challenges
3. Technological Basics and Standards
 - 3.1 Identification of Physical Objects
 - 3.2 Formal Description Languages and Ontologies
 - 3.3 Digital Object Memory
 - 3.4 Physical Situation Recognition
 - 3.5 (Partially) Autonomous Action and Cooperation
 - 3.6 Human-Machine Interaction
 - 3.7 Machine to Machine Communication
4. Basic Concepts of a Smart Factory
 - 4.1 Order-Controlled Production
 - 4.2 Bundling of Machine and Production Data
 - 4.3 Supporting People in Production
 - 4.4 Intelligent Products and Resources
 - 4.5 Smart Services
5. Reference Architectures
 - 5.1 Purpose and Properties of Reference Architectures
 - 5.2 Overview of Standardization Initiatives
 - 5.3 CyProS Reference Architecture
 - 5.4 RAMI 4.0 (DIN SPEC 91345)
6. Smart Factory Engineering
 - 6.1 Classification of Different Engineering Tools
 - 6.2 Virtual Engineering
 - 6.3 User-Centered Design
 - 6.4 Requirements Engineering
 - 6.5 Modelling
 - 6.6 Integration of Classic and Smart Components

Smart Factory II

Course Code: DLBDESEF02

Study Level	Language of Instruction	Contact Hours	CP	Admission Requirements
BA	English		5	none

Course Description

In this course, students select a concrete task from the catalog of topics provided in consultation with the seminar leader. They will work on the task in a prototyping environment suited to the task, which can be either a hardware (e.g., prototyping boards) or software (e.g., technology-specific development environments) environment. To complete the task, students apply the concepts, methods, and tools taught in the Smart Factory I course. They document their results with a project report.

Course Outcomes

On successful completion, students will be able to

- have a deeper understanding of the technologies and standards in the context of Smart Factory.
- apply technologies in the context of Smart Factory to a simple practical example.
- design a hardware or software prototype for a selected task.
- document, design, and develop activities in the form of a project report.

Contents

- A catalogue with the currently provided tasks is provided on the online platform of the module. It provides the content basis of the module and can be supplemented or updated by the seminar leader.

Introduction to Data Science

Course Code: DLBDSIDS01

Study Level	Language of Instruction	Contact Hours	CP	Admission Requirements
BA	English		5	none

Course Description

Data science emerged as a multi-disciplinary field aimed at creating value from data. This course starts with an overview of data science and related fields and then defines data types and sources. Special focus is put on the assessment of data quality and electronic data processing. Use of data-driven methods has become vital for businesses, and this course outlines how data-driven approaches can be integrated within a business context and how operational decisions can be made using data-driven methods. Finally, this course highlights the importance of statistics and machine learning in the field of data science and gives an overview of relevant methods and approaches.

Course Outcomes

On successful completion, students will be able to

- define data science and its relation to other fields.
- comprehend data science activities.
- recognize the origins of data and the challenges of working with data.
- understand how data science methods are integrated into business settings.
- grasp fundamental statistical concepts.
- appreciate the importance of machine learning in data science.

Contents

1. Introduction to Data Science
 - 1.1 Definition of the term „data science“
 - 1.2 Data science and related fields
 - 1.3 Data science activities
2. Data
 - 2.1 Data types and data sources
 - 2.2 The 5Vs of data
 - 2.3 Data curation and data quality
 - 2.4 Data engineering

3. Data Science in Business
 - 3.1 Identification of use cases
 - 3.2 Performance evaluation
 - 3.3 Data-driven operational decisions
 - 3.4 Cognitive biases
4. Statistics
 - 4.1 Importance of statistics for data science
 - 4.2 Important statistical concepts
5. Machine Learning
 - 5.1 Role of machine learning in data science
 - 5.2 Overview of machine learning approaches

Introduction to Programming with Python

Course Code: DLBDSIPWP01

Study Level	Language of Instruction	Contact Hours	CP	Admission Requirements
BA	English		5	none

Course Description

This course provides students with a foundational understanding of the Python programming language. Following an introductory exposition to the importance of Python for data science-related programming tasks, students will be acquainted with fundamental programming concepts like variables, data types, and statements. Building on this basis, the important notion of a function is explained and errors, exception handling, and logging are explicated. The course concludes with an overview of the most widely-used library packages for data science.

Course Outcomes

On successful completion, students will be able to

- use fundamental Python syntax.
- recollect common elementary data types.
- recognize foundational programming concepts and their realization in Python.
- understand error handling and logging.
- create working programs.
- list the most important libraries and packages for data science.

Contents

1. Introduction
 - 1.1 Why Python?
 - 1.2 Obtaining and installing Python
 - 1.3 The Python interpreter , IPython, and Jupyter
2. Variables and Data Types
 - 2.1 Variables and value assignment
 - 2.2 Numbers
 - 2.3 Strings
 - 2.4 Collections
 - 2.5 Files

3. Statements
 - 3.1 Assignment, expressions, and print
 - 3.2 Conditional statements
 - 3.3 Loops
 - 3.4 Iterators and comprehensions
4. Functions
 - 4.1 Function declaration
 - 4.2 Scope
 - 4.3 Arguments
5. Errors and Exceptions
 - 5.1 Errors
 - 5.2 Exception handling
 - 5.3 Logs
6. Modules and Packages
 - 6.1 Usage
 - 6.2 Namespaces
 - 6.3 Documentation
 - 6.4 Popular data science packages

IT Service Management

Course Code: DLBCSITSM01-01

Study Level	Language of Instruction	Contact Hours	CP	Admission Requirements
BA	English		5	none

Course Description

IT service management is an approach to align and understand a company's IT as a service provider and supporter of operational and business processes. This course uses the IT Infrastructure Library (ITIL) to teach concepts, procedures and best practices in the area of IT service management (IT operations). In other words, it looks at the management of activities that take place after an IT system has been developed: IT operations as a continuous run of the productive day-to-day business of a company's IT departments.

Course Outcomes

On successful completion, students will be able to

- identify the fundamentals and challenges of IT service management.
- describe the motivation and structure of the IT Infrastructure Library (ITIL), distinguish four dimensions, apply the service value system and identify concrete practices.
- describe and apply fundamentals of IT security management.

Contents

1. IT Service Management Basics and Terms
 - 1.1 IT Services
 - 1.2 IT Service Management
 - 1.3 ITSM Frameworks
2. ITIL 4 - Basics and Four Dimensions
 - 2.1 Stakeholders, Services and Service Management
 - 2.2 Value Contribution of IT
3. ITIL 4 - Service Value System
 - 3.1 Basics and Overview
 - 3.2 Inputs, Outcome and Governance
 - 3.3 The Service Value Chain
 - 3.4 Continual Improvement

4. ITIL 4 - Principles
 - 4.1 Overview
 - 4.2 Value Orientation
 - 4.3 Iterative Procedure and Feedback
 - 4.4 Establish Collaboration and Visibility
 - 4.5 Optimize and Automate
5. ITIL 4 - Practices
 - 5.1 Overview
 - 5.2 General Management Practices
 - 5.3 Service Management Practices
 - 5.4 Technical Practices
6. Information Security Management with the IT Basic Protection Framework of the BSI
 - 6.1 Structure and Elements of BSI Basic Protection Framework
 - 6.2 Information Security Process

Project: IT Service Management

Course Code: DLBCSPITSM01

Study Level	Language of Instruction	Contact Hours	CP	Admission Requirements
BA	English		5	none

Course Description

Based on the contents of the course "IT Service Management", selected aspects of the core processes of ITIL are deepened, discussed, selected, and applied within the framework of a project in a concept-related manner. All theoretical methods are considered and evaluated.

Course Outcomes

On successful completion, students will be able to

- analyze typical problems and company situations from the area of IT service management in different project variations.
- develop, plan, and implement proposed solutions.
- convert theory into a pragmatic approach to a solution with the help of methodical tools from IT service management and project management.
- draw and apply the right conclusions in relation to their specific project environment.
- conceptually apply their theoretical knowledge to company-specific environmental factors.

Contents

- Analysis, evaluation, and development of recommendations for taking action within the scope of concrete questions concerning aspects of IT Service Management. This is aided by the creation and planning of a project in the theoretical-theme context through all phases of project management.
- The quality assurance of the artefacts created is carried out both by the tutor and by students from the project groups.

Smart Services I

Course Code: DLBINGSS01_E

Study Level	Language of Instruction	Contact Hours	CP	Admission Requirements
BA	English		5	none

Course Description

In this course, students study concepts and methods for the development of Smart Services. For this purpose, an introduction of the term in the context of digitization and Industry 4.0 will be given. Based on this, this course shows how innovative services can have a disruptive effect on existing business models or even markets using the example of digital intermediaries. Subsequently, students will be taught selected methods and techniques with which digitization potentials can be recognized and modelled. In addition, selected architectures and platforms for the integration of services are presented. Finally, relevant technologies for the implementation of smart services are taught and it is briefly described how the quality of services can be agreed upon.

Course Outcomes

On successful completion, students will be able to

- recognize the relevance of Smart Services in the context of digitization in general and Industry 4.0 in particular.
- identify special features of digital business models and demonstrate them using the example of digital intermediaries.
- apply methods to uncover digitization potentials and use the Business Model Canvas to classify them in a business model.
- know and use models for the multi-perspective specification of services.
- know selected architectures for the design and integration of services.
- distinguish different technologies that are required for the development of services.
- define the quality of services by means of Service Level Agreements.

Contents

1. Introduction and Motivation
 - 1.1 Digitization and Cyber-Physical Production Systems
 - 1.2 Smart Services in Industry 4.0
 - 1.3 Examples of Smart Services

2. Digitization and Disruption
 - 2.1 Definition: Digital Business Models
 - 2.2 Strategies for Change and Innovation
 - 2.3 Digital Intermediaries
 - 2.4 Examples of Disruptive Business Models
3. Recognizing Potential for Smart Services
 - 3.1 Business Model Canvas
 - 3.2 Personas
 - 3.3 Customer Journeys

Smart Services II

Course Code: DLBINGSS02_E

Study Level	Language of Instruction	Contact Hours	CP	Admission Requirements
BA	English		5	none

Course Description

In this course, the students select a concrete technical task from the provided topic catalogue in consultation with the seminar leader. They work on the task with the help of a prototyping environment that is suitable for the subject of the task. The environments can be hardware (e.g. prototyping boards) or software (e.g. technology-specific development environments). To complete the task, students apply the concepts, methods and tools taught in the Smart Services I course. They document their results in a project report.

Course Outcomes

On successful completion, students will be able to

- have an in-depth understanding of the technologies and standards in the context of Smart Services.
- apply technologies in the context of smart services using a simple practical example.
- design a hardware or software prototype for a selected technical task.
- document design and development activities in the form of a project report.

Contents

- A catalogue with currently available assignments is provided on the online learning platform. It provides the content basis of the module and can be supplemented or updated by the tutor.

Module Contents

Introduction to the Internet of Things

- Internet of Things Fundamentals
- Social and Economic Significance
- Communication Standards and Technologies
- Data Storage and Processing
- Design and Development
- Applicability

Product Development in Industry 4.0

- Introduction to modern product development
- Fundamentals of product development
- Methods in the product development process
- Alternative design approaches
- Digitalization of product design
- Customized mass production
- Outlook: Digital engineering and operation

Learning Outcomes

Introduction to the Internet of Things

On successful completion, students will be able to

- grasp the distinctive features of Internet of Things (IoT) and IoT systems.
- understand the social and economic importance of Internet of Things.
- identify the most important standards for communication between IoT devices.
- differentiate between various techniques for storing and processing data in IoT systems.
- identify different architectures and technologies for structuring IoT systems.
- recognize challenges of data protection and data security in IoT systems.

Product Development in Industry 4.0

On successful completion, students will be able to

- recall the historical development of industrial production.
- name current trends in the context of the "fourth industrial revolution" and their impact on product development.
- know the basic methods in product development.
- know the traditional product development process from design theory.
- differentiate alternative approaches to product development.
- name selected tools in the context of digital and virtual product design.
- explain the lot size problem and determine lot sizes for traditional production types.
- distinguish traditional production types from modern strategies such as customized mass production and rapid manufacturing.
- name current approaches to the complete digitalization of product creation and production processes in terms of digital engineering.

Introduction to the Internet of Things

Course Code: DLBINGEIT01_E

Study Level	Language of Instruction	Contact Hours	CP	Admission Requirements
BA	English		5	none

Course Description

The aim of this course is to give students an insight into technical and theoretical basics of the Internet of Things (IoT) and its fields of application. In addition to the general structure of IoT systems and the technology standards used in them, students are also taught the importance of Internet of Things for economy and society. Furthermore, this course demonstrates how data is exchanged, stored and processed in IoT.

Course Outcomes

On successful completion, students will be able to

- grasp the distinctive features of Internet of Things (IoT) and IoT systems.
- understand the social and economic importance of Internet of Things.
- identify the most important standards for communication between IoT devices.
- differentiate between various techniques for storing and processing data in IoT systems.
- identify different architectures and technologies for structuring IoT systems.
- recognize challenges of data protection and data security in IoT systems.

Contents

1. Internet of Things Fundamentals
 - 1.1 The Internet of Things - Basics and Motivation
 - 1.2 Evolution of the Internet - Web 1.0 to Web 4.0
2. Social and Economic Significance
 - 2.1 Innovations for Consumers and Industry
 - 2.2 Implications on People and the World of Work
 - 2.3 Data Protection and Data Security
3. Communication Standards and Technologies
 - 3.1 Network Topologies
 - 3.2 Network Protocols
 - 3.3 Technologies

4. Data Storage and Processing
 - 4.1 Networked Storage with Linked Data and RDF(S)
 - 4.2 Analysis of Networked Data using a Semantic Reasoner
 - 4.3 Processing of Data Streams with Complex Event Processing
 - 4.4 Operation and Analysis of Large Data Clusters using NoSQL and MapReduce
5. Design and Development
 - 5.1 Software Engineering for Distributed and Embedded Systems
 - 5.2 Architectural Patterns and Styles for Distributed Systems
 - 5.3 Platforms: Microcontrollers, Monoboard Computers, One-Chip Systems
6. Applicability
 - 6.1 Smart Home / Smart Living
 - 6.2 Ambient Assisted Living
 - 6.3 Smart Energy / Smart Grid
 - 6.4 Smart Factory
 - 6.5 Smart Logistics

Product Development in Industry 4.0

Course Code: DLBINGPE01_E

Study Level	Language of Instruction	Contact Hours	CP	Admission Requirements
BA	English		5	none

Course Description

The aim of the course is to give students an overview of current approaches to modern product development in the context of Industry 4.0. Based on traditional methods and tools of product development, relevant alternative design approaches are described, which put the consumer in the center of the design. In addition, modern tools to support product design are presented with which an engineer can digitally capture and simulate both the static/geometric and dynamic properties of a product. In addition, aspects of customized mass production will be discussed and compared with traditional production types. As an outlook on future developments, current research approaches for consistently digitalized product development are presented.

Course Outcomes

On successful completion, students will be able to

- recall the historical development of industrial production.
- name current trends in the context of the "fourth industrial revolution" and their impact on product development.
- know the basic methods in product development.
- know the traditional product development process from design theory.
- differentiate alternative approaches to product development.
- name selected tools in the context of digital and virtual product design.
- explain the lot size problem and determine lot sizes for traditional production types.
- distinguish traditional production types from modern strategies such as customized mass production and rapid manufacturing.
- name current approaches to the complete digitalization of product creation and production processes in terms of digital engineering.

Contents

1. Introduction to Modern Product Development
 - 1.1 Terms of Industrial Production
 - 1.2 The Fourth Industrial Revolution
 - 1.3 Turnaround in the Factors of Production
 - 1.4 Trends in Product Development

2. Fundamentals of Product Development
 - 2.1 Methods of Product Planning
 - 2.2 Methods of the Solution Search
 - 2.3 Selection and Evaluation of Alternatives
3. Methods in the Product Development Process
 - 3.1 Clarify Requirements
 - 3.2 Concept
 - 3.3 Draft
 - 3.4 Development
4. Alternative Design Approaches
 - 4.1 Design Thinking
 - 4.2 Personas
 - 4.3 Human-Centered Design According to ISO 9241-210
 - 4.4 Participatory Design
 - 4.5 Open Innovation
 - 4.6 Empathic Design
5. Digitalization of Product Design
 - 5.1 From Drawing Board to Digital Functional Model
 - 5.2 Computer-Aided Engineering
 - 5.3 Computer-Aided Quality
 - 5.4 Engineering and Product Data Management
 - 5.5 Simulation Data Management
6. Customized Mass Production
 - 6.1 Traditional Types of Production
 - 6.2 Lot Size Problem and Planning
 - 6.3 Mass Customization
 - 6.4 Rapid Manufacturing
7. Outlook: Digital Engineering and Operation
 - 7.1 Definition
 - 7.2 Fields of Application
 - 7.3 Data Mining
 - 7.4 Modeling of Dynamic Product Properties
 - 7.5 Provision of Information

Circular Economy

Course Code: DLBEPWITN01_E

Study Level	Language of Instruction	Contact Hours	CP	Admission Requirements
BA	English		5	none

Course Description

In contrast to the currently predominant principle of linear economy in industrial production and economy, the approach of the circular economy represents a regenerative system. The objective of the Circular Economy is to lower the use of resources and to reduce waste production, emissions and energy waste by slowing down, reducing and closing energy and material cycles. The course provides an overview of the origins, the framework conditions and the requirements of a Circular Economy. In addition, the students receive an insight into the economic transformation processes and adjustments in terms of production, technologies, supply chain, forms of organization and business models.

Course Outcomes

On successful completion, students will be able to

- understand which origins and reasons make a reshape and restructure of the current linearly organized economy towards a circular economy necessary.
- describe the most important drivers of the circular economy.
- explain important concepts and deductions of the Circular Economy and their impact on organizational forms, business models, production and technologies as well as economic activity, and to evaluate their advantages and disadvantages.
- understand and learn to shape the transformation process from a currently linearly organized economy to a circular economy.

Contents

1. Origin and Definition of the Circular Economy
 - 1.1 Background, history and definition
 - 1.2 Climate Crisis
 - 1.3 Waste of resources
 - 1.4 Negative externalities
2. Drivers of the Circular Economy
 - 2.1 Legal framework in Germany
 - 2.2 International framework conditions - Paris Climate Treaty, UN Sustainable Development Goals
 - 2.3 Technological and economic drivers, such as Sharing Economy
 - 2.4 Social and political drivers, such as Zero Waste Vision, coal exit

3. The "R-framework of circularity" - the 7 "Rs" and their application
 - 3.1 "Rethink"
 - 3.2 "Reduce"
 - 3.3 "Re-use" and "Repair"
 - 3.4 "Refurbish" and "Recover"
 - 3.5 "Recycle"
4. Requirements of the Recycling Economy
 - 4.1 Other forms and demands for raw materials
 - 4.2 Critical and scarce raw materials
 - 4.3 Example: Renewable Energies
5. Transformation towards a Circular Economy
 - 5.1 Substitution and design strategies
 - 5.2 Political and economic strategies
 - 5.3 Transformation of the production and supply chain
 - 5.4 Transformation of the "throwaway" culture
6. Examples for Approaches and Business Models of the Circular Economy
 - 6.1 Waste Management
 - 6.2 Energy Industry

Sustainable Technologies

Course Code: DLBEPWITN02_E

Study Level	Language of Instruction	Contact Hours	CP	Admission Requirements
BA	English		5	none

Course Description

Sustainable technologies differ significantly from conventional technologies, which often cause ecological and social problems due to their dependence on conventional primary energy sources (fossil or nuclear) and/or their emissions. In the course, students get an overview of the areas and applications of sustainable technologies and gain insight into methods of evaluating and comparing them based on objective criteria.

Course Outcomes

On successful completion, students will be able to

- remember the definition and concepts of the term sustainability,
- understand different systems and their interactions as well as the social significance of sustainable technologies,
- remember the areas of use and possible applications of sustainable technologies,
- analyze, evaluate and compare sustainable technologies based on objective criteria.

Contents

1. Sustainable technologies: Introduction and context
 - 1.1 Characteristics of sustainable technologies
 - 1.2 Systems and interdependencies
 - 1.3 Social relevance
 - 1.4 Economic aspects of sustainable technologies
 - 1.5 Technical challenges of sustainable technologies
2. Energy Technologies
 - 2.1 Energy forms
 - 2.2 Conventional primary energy sources
 - 2.3 Regenerative primary energy sources
 - 2.4 Energy storage technology
 - 2.5 Energy conversion technologies and conversion efficiency
 - 2.6 Energy supply grids

3. Water Technologies
 - 3.1 Water treatment and conditioning
 - 3.2 Water systems
4. Raw material and material technologies
 - 4.1 Material efficiency
 - 4.2 Optimization of material functionalities
 - 4.3 Recycling
5. Urban Technologies
 - 5.1 Building technology
 - 5.2 Supply and disposal
 - 5.3 Synergy potentials in urban centers
6. Transport Technologies
 - 6.1 Sustainable transport systems
 - 6.2 Fuels
 - 6.3 Material reduction
7. Evaluation of sustainable technologies
 - 7.1 Upstream and downstream energy chains
 - 7.2 Material flow analyses
 - 7.3 Life cycles, obsolescence and recyclability, life cycle assessment
 - 7.4 Comparisons based on individual criteria
 - 7.5 Technology impact assessment

Digital Future Commerce

Course Code: DLBLOGC201_E

Study Level	Language of Instruction	Contact Hours	CP	Admission Requirements
BA	English		5	none

Course Description

Participation in the course is designed to familiarize students with the future topics of digitization in logistics, industry and commerce. They will gain an overview of the status of technical developments and current implementation. Based on this, they will develop concepts and implementation strategies for selected operational contexts.

Course Outcomes

On successful completion, students will be able to

- explain the possibilities for mapping business processes in IT systems and assess the possible uses of workflow management systems.
- explain current trends in digitization, outline historical developments starting with the industrial revolution, and explain the innovation potential of digitization.
- describe digital value networks and their special features using examples.
- describe the implications of E-Commerce for logistics and analyze the impact of digitalization on business processes.
- explain the challenges of Big Data and develop concepts as well as solution strategies for individual fields of application, especially from the area of eCommerce.
- describe global commerce in the digitalized world against the backdrop of rapid changes and adaptation processes and to classify the "human factor" in this context.

Contents

1. Systems and Processes in Business and Logistics
 - 1.1 Logistical Systems Thinking and Economic Modeling
 - 1.2 Logistical Processes and Process Thinking in Retail
 - 1.3 Mapping of Business Processes in IT Systems
 - 1.4 Working Time Management: Demand-Oriented Personnel Logistics
2. Trends and Developments
 - 2.1 The History of Global Trade Logistics - From the Early Forms of Logistics Optimization to Digitalization
 - 2.2 The Tension between Liberalization and Protectionism
 - 2.3 Disruptive Innovations in Retail Logistics Yesterday and Today
 - 2.4 Humans in the Robotized World of Work - an Indispensable Disruptive Factor?

3. Digital Value Networks
 - 3.1 Self-Controlling Systems - Technologies and Organization - Swarm Intelligence
 - 3.2 3D Printing and Implications for Retail Logistics
 - 3.3 Logistics Processes in a Digital World
 - 3.4 E-Commerce and E-Logistics
4. Handling Large Amounts of Data
 - 4.1 Challenges and Strategies in Dealing with Big Data
 - 4.2 Technical Solutions in Various Fields of Application
 - 4.3 Cloud Services
 - 4.4 Security and Data Protection
5. Global Trade in a Digital World
 - 5.1 Adaptive Trade and Supply Chains
 - 5.2 Design and Redesign of Global Retail Chains
 - 5.3 Digitization of Global Production and Supply Networks
 - 5.4 Education for the Digitalized World

Seminar in Current Topics in Digitalization

Course Code: DLBDBATD01_E

Study Level	Language of Instruction	Contact Hours	CP	Admission Requirements
BA	English		5	keine

Course Description

In the seminar "Current Topics in Digitalization" students write a seminar paper on a specific topic and present their results. In this way, the students demonstrate that they are able to independently familiarize themselves with a topic and to document and present the knowledge gained in a structured manner.

Course Outcomes

On successful completion, students will be able to

- independently familiarize themselves with a given topic from the field of digitalization or digital transformation.
- write down important characteristics, connections and findings in form of a paper.
- remember the basics of scientific work and to implement them in the seminar paper.

Contents

- Digitalization is a wide-ranging subject area that can relate to very different aspects, depending on the specific terminology used. The seminar will meet this diversity by picking up current trends within the framework of formulated topic areas. Each participant must prepare a seminar paper for this purpose. Possible topics include new technologies that drive digitalization (e.g. deep learning), effects on the working world (e.g. crowdsourcing or new qualification requirements in the field of data science) or new digital business models (e.g. Fintechs).

Introduction to User Research

Course Code: DLBUXEUR01_E

Study Level	Language of Instruction	Contact Hours	CP	Admission Requirements
BA	English		5	None

Course Description

The goal is to teach user research techniques for the derivation of user requirements. For this purpose, the approach of User Centered Design is introduced to the students. Special attention is given to the planning of the context of use analysis. The main focus of the course is on the teaching of user research methods, which students can select and apply on a project-specific basis after completing the course. Besides interview methods, observation techniques are taught. The design of questionnaires, observation protocols as well as the development of moderation guidelines for Focus Groups are also covered. The course concludes with the derivation and consolidation of qualitative and quantitative user requirements. In addition, the approach to Service Design will be discussed and specific Service Design methods and tools are presented.

Course Outcomes

On successful completion, students will be able to

- understand the approach of User Centered Design and apply it independently
- understand the difference between different User Research methods to determine user requirements and to select project-specific methods.
- know and apply Service Design approaches to the determination and consolidation of user research results.

Contents

1. Basics and Definitions of Terms
 - 1.1 Definitions of User Research and User Requirements
 - 1.2 Goals and challenges of User Research
2. Basic Idea of the User Centered Design
 - 2.1 Understanding
 - 2.2 Design
 - 2.3 Envision
 - 2.4 Evaluate
 - 2.5 Iterative Design
 - 2.6 Implementation

3. Planning User Context Analysis
 - 3.1 Reason, goals and procedure of the user context analysis
 - 3.2 Select and recruit users for data collection
 - 3.3 Preparatory Desk Research
 - 3.4 Work products and roles in User Requirements Engineering
4. User Research Methods for the Determination of User Requirements
 - 4.1 Observation Methods
 - 4.2 Interview Methods
 - 4.3 Questionnaires
 - 4.4 Focus Groups
 - 4.5 Cultural Probes
5. From User Context Information to User Requirements
 - 5.1 Identify Requirements
 - 5.2 Qualitative and Quantitative User Requirements
 - 5.3 Derive and structure User Requirements
 - 5.4 Consolidate User Requirements
6. Service Design Methods
 - 6.1 Objectives and Approaches
 - 6.2 User Journeys and Service Blueprints
 - 6.3 System Maps
 - 6.4 Writing User Stories
 - 6.5 Writing Research Reports

Project: Prototyping and validation of a business idea

Course Code: DLBEPPP01_E

Study Level	Language of Instruction	Contact Hours	CP	Admission Requirements
BA	English		5	none

Course Description

In this course, students learn to systematically test a start-up idea on the market in order to determine and reduce the risk of implementing the business idea. The necessary prototyping and validation methods are established, learned and critically reflected with regard to their applicability to the own business idea. As a result of this process, a self-developed or fictitious business idea is validated by each student and the necessary process including results are presented in a project report.

Course Outcomes

On successful completion, students will be able to

- explain a test process for a business idea, design it independently and set it up in a start-up.
- understand the validation of a business idea as an iterative process.
- derive the relevant hypotheses, which need to be tested, from a business idea.
- transform the hypotheses into an experiential prototype and a corresponding experiment including test design and process.
- develop an experiential prototype and present it to potential customers.
- collect, evaluate and present the test results.

Contents

- The course will teach the entrepreneurship methods to transform a start-up idea into an experiential prototype ("first tangible prototype" who symbolizes the key value of the idea) and into hypotheses that can be tested on the market. First, the methodical process of the steps of an idea validation are discussed and its application is demonstrated by using an example of a business idea. The phases of the idea validation process are the conception of the test design and process, the derivation of an experiential prototype and the relevant hypotheses, the execution of the iterative tests using the test and experiment design with the target group of the business idea, and the analysis and evaluation of the test results. If necessary, several iterative test loops per business idea have to be executed to achieve the goal of the "solution-market-fit" of the business idea. The project report will contain the test concept developed and applied by the student with the following core elements: Test process including hypotheses and experiential prototypes of the self-developed or fictitious business idea as well as a comprehensive description and evaluation of the test results. The business idea can be either the students' own or a fictitious business idea.

Introduction to New Work

- Working world of the future
- Concept development
- New Work as an interdisciplinary approach
- Megatrends
- Effects of agile organization forms
- Leadership and cooperation in New Work
- Empowerment
- Competence development
- General conditions

Business Psychology

- General Theories of Business Psychology
- Psychology of Microeconomic Processes
- Psychology of Macroeconomic Processes
- Psychology of Change
- The Learning Organization

Learning Outcomes**Introduction to New Work**

On successful completion, students will be able to

- identify and understand the challenges of technological and societal change.
- transfer the emerging challenges to human resources management and the leadership culture in companies.
- understand the concepts of agile and fluid organizations and the resulting consequences.
- identify solutions for complex environmental factors on leadership and human resources management.

Business Psychology

On successful completion, students will be able to

- describe central economic assumptions and their influencing factors and critically question them in relation to concrete action and decision making.
- discuss important theories in the field of motivation, cognition and interaction and explain their significance for economic tasks and contexts.
- explain fundamental psychological conditioning factors and explanatory models of macroeconomic processes and phenomena and apply them to central economic issues.
- present the importance of work and essential influencing factors from a psychological perspective and derive operational possibilities for shaping work.
- differentiate essential psychological models and concepts for describing and influencing human behavior in organizations and groups.
- assess the possibilities and limits of the targeted development of organizations on the basis of central psychological theories and models and to develop behavioral recommendations.
- discuss basic psychological concepts of the learning organization and design measures for everyday working life.

Introduction to New Work

Course Code: DLBNWENW01_E

Study Level	Language of Instruction	Contact Hours	CP	Admission Requirements
BA	English		5	none

Course Description

More and more companies leave their bureaucratic systems and hierarchical structures behind and adopt an agile style of work. Knowledge is both increasing and outdated at an increasing rate. Autonomy and creativity become of greater importance in more and more companies. Increasingly, processes and departments are set up according to agile principles. Work experiences an increasing dissolution of boundaries with both positive and negative effects. The question of how structures and corporate culture adapt better and faster to shorter innovation cycles and environmental changes affects all companies and their human resources management. It is more important than ever for knowledge and qualifications to be state of the art; consequently continuous learning needs to take a more prominent role in the work place. In the context of social and demographic change, work and organizations are moving further and further away from Taylorism and towards integral, evolutionary organizations whose work is characterized by self-management, a holistic view and meaningful tasks. This is accompanied by a change in orientation, away from bureaucracy towards democratic structures and empowerment. This course provides an introduction to the complex and contemporary theme of the new working world and work structure. Starting with a classification of the topic, we will define social megatrends as essential factors influencing human resource management and organization. Building on this, we will discuss the dipole of rigid and agile organizational structures and the resulting effects on leadership, personnel management and employees. Further, we will look at the concepts of cooperation and leadership during the implementation of new work structures and methods as well as necessary competencies. Competence development addresses how learning, attitudes and abilities are set to interact to provide companies with agile processes. Finally, we will critically reflect upon the new work concept, looking at advantages and disadvantages for those involved, predominantly in the context of legal and social conditions.

Course Outcomes

On successful completion, students will be able to

- identify and understand the challenges of technological and societal change.
- transfer the emerging challenges to human resources management and the leadership culture in companies.
- understand the concepts of agile and fluid organizations and the resulting consequences.
- identify solutions for complex environmental factors on leadership and human resources management.

Contents

1. What is New Work?
 - 1.1 The World of Work of the Future
 - 1.2 Concept Development

Business Psychology

Course Code: DLBMPS01_E

Study Level	Language of Instruction	Contact Hours	CP	Admission Requirements
BA	English		5	none

Course Description

Decisions in complex situations do not follow the rules of logic, but are determined by the features of market participants' behavior. In order to better understand this behavior and to make reliable forecasts based on it, economics is recommended to include discoveries in the field of psychology. After an introduction to business psychology and its influencing factors, students are familiarized with the various theories on motivation, cognition and interaction. This course then looks into business psychology at the macro- and microeconomic level. Students learn about the psychological view on the development of countries and societies as well as the psychology of organizations and groups. In addition, the psychology of work in relation to human resources in general and job satisfaction in particular is examined. Students learn about and understand the importance of change in organizations and the principle of the learning organization. The ability to learn faster than the competition is one of the most important competitive factors. Learning organizations promote joint and individual learning and increase employee motivation towards work.

Course Outcomes

On successful completion, students will be able to

- describe central economic assumptions and their influencing factors and critically question them in relation to concrete action and decision making.
- discuss important theories in the field of motivation, cognition and interaction and explain their significance for economic tasks and contexts.
- explain fundamental psychological conditioning factors and explanatory models of macroeconomic processes and phenomena and apply them to central economic issues.
- present the importance of work and essential influencing factors from a psychological perspective and derive operational possibilities for shaping work.
- differentiate essential psychological models and concepts for describing and influencing human behavior in organizations and groups.
- assess the possibilities and limits of the targeted development of organizations on the basis of central psychological theories and models and to develop behavioral recommendations.
- discuss basic psychological concepts of the learning organization and design measures for everyday working life.

Module Contents

Applied Sales I

- Fundamentals of Applied Sales
- The Distribution System
- Personal Sales
- Sales Plans
- New Customer Acquisition
- A Sales Visit
- Conversational Tactics
- Conducting Negotiations
- Other Sales Channels

Applied Sales II

- Marketing and Sales
- Customer Satisfaction as a Success Factor
- Personalities in Sales
- Customer-Oriented Communication
- Presentation and Rhetoric
- Customer Loyalty
- Networking
- Case Study

Learning Outcomes

Applied Sales I

On successful completion, students will be able to

- understand the fundamentals of applied sales and place them in the context of the company.
- understand the interaction of the individual facets of applied sales.
- differentiate between and evaluate individual sales systems.
- describe current sales types and sales characteristics.
- oversee and classify the entire sales process from customer acquisition to customer retention.
- understand the basics of sales and negotiation management and apply them.
- name the usual sales instruments, recognize their advantages and disadvantages, and reflect on essential fields of application and possibilities.

Applied Sales II

On successful completion, students will be able to

- understand the interaction and the respective areas of responsibility of marketing and sales.
- reflect on and classify the goals and measures within the framework of the applied sales system.
- assess the relevance of customer satisfaction and retention. In addition, the students will be familiar with the central design elements of CRM.
- reflect on and assess alternative approaches to customer loyalty and relationship management and apply them in business practice.
- understand the meaning of the terms customer life cycle and customer value, and develop approaches to manage them in the sense of the respective sales targets.
- use descriptive presentation techniques in order to convince customers and other sales partners.
- understand the relevance of networking and develop strategies to broaden the contact base.
- develop and evaluate their own market analyses and sales concepts on the basis of practical experience within the framework of the case study.

Course Description

The demands on sales thinking are growing every day. Globalized demand combined with high competition is making it increasingly difficult for companies to compete for customers. At the same time, customers are becoming better informed, while traditional supply markets are saturated and at overcapacity. In order to be successful in such an environment, sales thinking and action are required along with a new type of salesperson. Within the course Applied Sales I (Introduction), the participants are familiarized with the basic concepts of applied sales. You will learn about sales organization, dealing with alternative sales channels, and get to know the dedicated sales planning process. The contents of the module are complemented by the successful acquisition of new customers, whereby particular attention is paid to the organization and implementation of customer visits and the conduct of discussions and negotiations.

Course Outcomes

On successful completion, students will be able to

- understand the fundamentals of applied sales and place them in the context of the company.
- understand the interaction of the individual facets of applied sales.
- differentiate between and evaluate individual sales systems.
- describe current sales types and sales characteristics.
- oversee and classify the entire sales process from customer acquisition to customer retention.
- understand the basics of sales and negotiation management and apply them.
- name the usual sales instruments, recognize their advantages and disadvantages, and reflect on essential fields of application and possibilities.

Contents

1. Fundamentals of Applied Sales and Distribution
 - 1.1 Tasks and Forms of Applied Distribution
 - 1.2 Marketing as the Basis of Sales
 - 1.3 Distribution, Sales, and Other Terms
 - 1.4 Sales in Different Economic Sectors

2. The Distribution System
 - 2.1 Forms of Sales
 - 2.2 Sales Organisation
 - 2.3 Key Account Management
 - 2.4 Multi-Channel Distribution
3. Personal Sales
 - 3.1 The "New Sellers"
 - 3.2 Requirements for Sales Personalities
 - 3.3 The Key Account Manager
 - 3.4 Task of Sales Managers
4. Sales Plan
 - 4.1 Tasks and Objectives of Sales Management
 - 4.2 Observation of Competition in the Context of Sales Management
 - 4.3 Potential Analyses and Sales Planning
 - 4.4 Sales Control and Visit Strategies
5. New Customer Acquisition
 - 5.1 Identification of New Customer Potential
 - 5.2 Customer Relationship Management and Customer Acquisition
 - 5.3 Trade Fairs and Events
 - 5.4 Networking
6. The Sales Visit
 - 6.1 Frequency and Preparation of Visits
 - 6.2 Conduct of a Visit
 - 6.3 Visit Reports and Follow-Up
 - 6.4 Aftercare and Follow-Up
7. Conversational Tactics
 - 7.1 Structured Conversation Preparation
 - 7.2 Goal-Oriented Conversation: The D.A.L.A.S Model
 - 7.3 Questioning Techniques

8. Conducting Negotiations
 - 8.1 Psychology of Negotiation
 - 8.2 Negotiation Structure
 - 8.3 Objection Handling
 - 8.4 Price Negotiations

9. Other Sales Channels
 - 9.1 Telemarketing
 - 9.2 Catalogue and Brochure Sales
 - 9.3 Internet and E-Commerce

Applied Sales II

Course Code: DLBDSEAS02

Study Level	Language of Instruction	Contact Hours	CP	Admission Requirements
BA	English		5	none

Course Description

The course Applied Sales II builds on the basics taught in the course "Applied Sales I" and broadens and deepens them. First, the tension between marketing and sales is examined in more detail. Based on this, essential backgrounds and central target figures for successful sales management (e.g., customer satisfaction and loyalty as well as the customer life cycle) are derived and operationalized in order to create the basis for efficient and effective customer relationship management. As the process progresses, attention will also be paid to mental processes and consumer behavior in general. In addition, strategies and paths to successful negotiation are deepened and supplemented by convincing communication techniques. The course concludes with a case study in the course of which the students have the opportunity to apply what they have learned in a practice-oriented manner.

Course Outcomes

On successful completion, students will be able to

- understand the interaction and the respective areas of responsibility of marketing and sales.
- reflect on and classify the goals and measures within the framework of the applied sales system.
- assess the relevance of customer satisfaction and retention. In addition, the students will be familiar with the central design elements of CRM.
- reflect on and assess alternative approaches to customer loyalty and relationship management and apply them in business practice.
- understand the meaning of the terms customer life cycle and customer value, and develop approaches to manage them in the sense of the respective sales targets.
- use descriptive presentation techniques in order to convince customers and other sales partners.
- understand the relevance of networking and develop strategies to broaden the contact base.
- develop and evaluate their own market analyses and sales concepts on the basis of practical experience within the framework of the case study.

Contents

1. Marketing and Sales
 - 1.1 Marketing Tasks and Functions
 - 1.2 Sales Marketing in Different Economic Sectors
 - 1.3 Relationship Marketing
 - 1.4 International Marketing and Sales Cooperations
2. Customer Satisfaction as a Success Factor
 - 2.1 Customer Relationship Management (CRM)
 - 2.2 The CRM Success Chain
 - 2.3 Customer Relationship Strategies
3. Personalities in Sales
 - 3.1 Sales Personalities and Differentiation
 - 3.2 Selling in Teams
 - 3.3 Negotiating With Committees
4. Customer-Oriented Communication
 - 4.1 Communication Tasks in Sales
 - 4.2 Sales Promotion by Sales Staff
 - 4.3 Team Sales Promotion
 - 4.4 Sales Promotion by the Company
5. Presentation and Rhetoric
 - 5.1 Rhetoric in Sales
 - 5.2 Presentation Techniques
 - 5.3 Nonverbal Communication
6. Customer Loyalty
 - 6.1 Customer Retention Management
 - 6.2 Customer Programs and Other Customer Loyalty Tools
 - 6.3 Complaint Management
7. Networking
 - 7.1 Network Competencies in the Company
 - 7.2 Building and Shaping Relationships
 - 7.3 Networking via Social Media

8. Case Study in IQ Media Marketing
 - 8.1 The Market Situation
 - 8.2 The Marketing Situation
 - 8.3 IQ Media Marketing and IQ Digital Media Marketing

Module Contents**Financial Services Management I**

- Financial Markets and Financial Intermediaries
- Financial Intermediation in Germany
- Financial Services
- Debt Financing Through Financial Intermediaries
- Equity Financing Through Financial Intermediaries

Financial Services Management II

- Fundamentals of the Monetary and Asset Situation
- Investment in Money
- Investment in Tangible Assets
- Investment Funds and Certificates
- Insurance Financial Services

Learning Outcomes**Financial Services Management I**

On successful completion, students will be able to

- know the role of a financial service provider as a financier as well as how individual markets function in the financing sector.
- understand the basic relationships between the different financial services and their (supervisory) legal frameworks.
- evaluate the potential influence of the financial services sector on the real economy.
- familiarize themselves with the financing services offered both for external financing and for self-financing.
- assess the importance of financial services in the form of debt and equity financing in the short, medium, and long term.

Financial Services Management II

On successful completion, students will be able to

- systematize the different possibilities for the investment of financial surpluses.
- with the help of knowledge gained regarding conflicts involved in making financial investments, apply different aspects of investment decision-making to financial instruments.
- assess the various forms of investment in order of their safety.
- analyze the various forms of investment in terms of risk and return.
- understand that investment funds, certificates, and derivatives are modern products of financial service providers, which bring high returns and sometimes high risk.

Financial Services Management I

Course Code: DLBDSEFSM01

Study Level	Language of Instruction	Contact Hours	CP	Admission Requirements
BA	English		5	none

Course Description

The course explains the origin and constitution of the financial market. As a result of the imperfection of the financial market, the necessity of financial intermediaries is theoretically derived, which leads to the thesis of disintermediation. Since the German financial market is determined by regulations and supervision, the legal framework is discussed. The financial services of banks and other specialized financial intermediaries are presented. The main forms of debt financing through financial intermediaries are presented as well as financing with equity capital.

Course Outcomes

On successful completion, students will be able to

- know the role of a financial service provider as a financier as well as how individual markets function in the financing sector.
- understand the basic relationships between the different financial services and their (supervisory) legal frameworks.
- evaluate the potential influence of the financial services sector on the real economy.
- familiarize themselves with the financing services offered both for external financing and for self-financing.
- assess the importance of financial services in the form of debt and equity financing in the short, medium, and long term.

Contents

1. Financial Markets and Financial Intermediaries
 - 1.1 Origin and Basic Problems of the Financial Market
 - 1.2 Appearances and Functions of Financial Intermediaries
2. Financial Intermediation
 - 2.1 The Banking System
 - 2.2 Asset Management Companies and Insurance Companies
 - 2.3 Regulations and Supervision
3. Financial Services
 - 3.1 Financing Needs
 - 3.2 The Range of Financial Services

4. Debt Financing Through Financial Intermediaries
 - 4.1 Types of Loans
 - 4.2 Lending and Collateralization
 - 4.3 Credit Substitutes

5. Equity Financing Through Financial Intermediaries
 - 5.1 Equity Financing Through Capital Participation and Venture Financing Companies
 - 5.2 Equity Capital Markets Issuance
 - 5.3 Disintermediation in Finance

Financial Services Management II

Course Code: DLBDSEFSM02

Study Level	Language of Instruction	Contact Hours	CP	Admission Requirements
BA	English		5	none

Course Description

In this course, the different possibilities of investing financial surpluses are systematized. The conflicting relationship between the risks, returns, and liquidity of a financial investment are presented, and the different aspects of decision-making for investment in one of the financial instruments are shown. The various forms of investment (monetary values, tangible assets) are presented in the order of their security. The functions that insurance companies perform as financial service providers complete the picture. The different forms of life insurance and their role in old-age provision are presented.

Course Outcomes

On successful completion, students will be able to

- systematize the different possibilities for the investment of financial surpluses.
- with the help of knowledge gained regarding conflicts involved in making financial investments, apply different aspects of investment decision-making to financial instruments.
- assess the various forms of investment in order of their safety.
- analyze the various forms of investment in terms of risk and return.
- understand that investment funds, certificates, and derivatives are modern products of financial service providers, which bring high returns and sometimes high risk.

Contents

1. Basic Information on Investing Money and Assets
 - 1.1 Basic Concepts of Money and Asset Investment
 - 1.2 Framework Conditions for Decisions on Plants
 - 1.3 Investment Products
2. Investment in Money
 - 2.1 Investment in Accounts
 - 2.2 Savings Bonds
 - 2.3 Fixed-Interest Securities

3. Investment in Tangible Assets
 - 3.1 Shares
 - 3.2 Stock Exchange Trading
 - 3.3 Investment in Real Estate
 - 3.4 Other Tangible Assets
4. Investment Funds and Certificates
 - 4.1 Mutual Funds
 - 4.2 Fund of Funds and Hedge Funds
 - 4.3 Derivatives
5. Insurance Financial Services
 - 5.1 Fundamentals of the Insurance Industry
 - 5.2 Life Insurances
 - 5.3 Insurance Products – Non-Life

Module Contents**Business Intelligence**

- Basics of mobile software development
- Android system architecture
- Development environment
- Core components of an Android app
- Interaction between application components
- Advanced techniques

Project: Business Intelligence

Conception, implementation, and documentation of small, mobile applications on the basis of a concrete task.

Learning Outcomes**Business Intelligence**

On successful completion, students will be able to

- explain the motivation, use cases, and basics of Business Intelligence.
- identify and explain techniques and methods for providing and modeling data, as well as types of data relevant to BI, differentiating between them.
- explain techniques and methods for the generation and storage of information and independently select suitable methods on the basis of concrete requirements.

Project: Business Intelligence

On successful completion, students will be able to

- independently design a solution to a practical problem in the field of Business Intelligence in order to then implement a prototype and document the results.
- identify and explain typical problems and challenges in the design and practical implementation of small BI solutions.

Business Intelligence

Course Code: DLBCSEBI01

Study Level	Language of Instruction	Contact Hours	CP	Admission Requirements
BA	English		5	none

Course Description

Business Intelligence (BI) is used to obtain information from company data that is relevant for targeted corporate management and the optimization of business activities. This course introduces and discusses techniques, procedures, and models for data provision, information generation, and analysis, as well the distribution of the information obtained. You will then be able to explain the various subject areas of data warehousing and independently select methods and techniques to meet specific requirements.

Course Outcomes

On successful completion, students will be able to

- explain the motivation, use cases, and basics of Business Intelligence.
- identify and explain techniques and methods for providing and modeling data, as well as types of data relevant to BI, differentiating between them.
- explain techniques and methods for the generation and storage of information and independently select suitable methods on the basis of concrete requirements.

Contents

1. Motivation and Conceptualization
 - 1.1 Motivation and Historical Development
 - 1.2 BI as a Framework
2. Data Provision
 - 2.1 Operative and Dispositive Systems
 - 2.2 The Data Warehouse Concept
 - 2.3 Architectural Variations
3. Data Warehouse
 - 3.1 ETL Process
 - 3.2 DWH and Data Mart
 - 3.3 ODS and Metadata

4. Modelling of Multidimensional Data Spaces
 - 4.1 Data Modeling
 - 4.2 OLAP Cubes
 - 4.3 Physical Storage
 - 4.4 Star and Snowflake Scheme
 - 4.5 Historicization
5. Analysis Systems
 - 5.1 Free Data Research and OLAP
 - 5.2 Reporting Systems
 - 5.3 Model-Based Analysis Systems
 - 5.4 Concept-Oriented Systems
6. Distribution and Access
 - 6.1 Information Distribution
 - 6.2 Information Access

Course Description

Using well-known methods and techniques from the field of Business Intelligence, students will work independently on a practical question in this course. At the end of the course you will be able to independently design and prototype Business Intelligence applications based on concrete requirements.

Course Outcomes

On successful completion, students will be able to

- independently design a solution to a practical problem in the field of Business Intelligence in order to then implement a prototype and document the results.
- identify and explain typical problems and challenges in the design and practical implementation of small BI solutions.

Contents

- Implementation and documentation of practical questions regarding the use of Business Intelligence applications. Typical scenarios are, for example, "Management of BI projects", "Design of multidimensional data models" and "Prototypical implementation of small BI applications".

Module Contents

Online Marketing

- Basics of Online Marketing
- Forms and Channels of Online Marketing
- Online Marketing Strategy
- Online Media Planning
- The Online Presence
- Mobile Marketing and M-Commerce
- Online law
- Online Customer Retention and Service
- Web Analytics

Social Media Marketing

- Basics of Social-Media-Marketing
- Social-Media-Marketing in the overall Marketing Mix
- Social Media Map
- Social Media Strategy Development
- Social Media in Innovation Management
- Operational Social Media Marketing
- Legal framework of Social Media
- Developments in Social-Media-Marketing

Learning Outcomes**Online Marketing**

On successful completion, students will be able to

- classify and strategically consider the basics relevant for Online Marketing (online communication process, electronic value creation, ...)
- know the different Online Marketing channels and to evaluate digital advertising measures strategically and operationally on this basis.
- conceive an Online Marketing strategy and make strategic and operational decisions.
- attract and retain customers through Online Marketing measures.
- measure and evaluate Online Marketing programs.
- fundamentally assess the marketing chances of a company in the World Wide Web.
- consider the importance of mobile in the Online Marketing Mix.

Social Media Marketing

On successful completion, students will be able to

- understand social implications and networking communication strategies and to apply them to the field of Social Media Marketing.
- integrate Social Media Marketing into the overall Marketing Mix.
- develop a Social Media strategy and proposals for its operational implementation.
- evaluate the different Social Media channels (Facebook, Instagram...)
- use Social Media for Innovation Management and networks.
- fundamentally assess the marketing opportunities of a company in the Social Media sector and make strategic decisions in this regard.
- evaluate developments in Social Media Marketing from a sociological as well as a business perspective.

Online Marketing

Course Code: DLBMSM01-01_E

Study Level	Language of Instruction	Contact Hours	CP	Admission Requirements
BA	English		5	none

Course Description

This course uses interdisciplinary fundamentals that enable students to deal with the topic of Online Marketing in an operative and strategic way. This includes business and economic principles as well as communicative multimedia basics or the consideration of the basic tonality of Online Marketing channels. This holistic view is essential for strategic planning; In addition to considering the positioning of companies in the World Wide Web, the course will also work out how Online Marketing appearances can be optimized. The measurement of success and evaluation of relevant key figures complete the comprehensive basis for the whole module. The Online Marketing course teaches basic technical terms and concepts. These include the online communication process, added value of Online Marketing as well as electronic value creation and business models. Based on this knowledge, the course discusses aspects of product suitability, pricing policy, distribution policy, the various forms of marketing and distribution on the Internet. The course expands the understanding of the strategic and especially operational Online Marketing elements such as the planning and realization of advertising campaigns through various sales channels. In addition, the increasing development of mobile communication is taken into account and Mobile Marketing is considered as part of the Online Marketing Mix. To understand the behavior of online customers the course deals with the specific effects of advertising in regards to Online Marketing. Based on the principles of customer acquisition, the course discusses customer retention and loyalty in Online Marketing, strategies and tactics for increasing customer numbers, online campaigns and the importance of online relationships. Students learn the ropes of legal aspects and the principles of the German Data Protection Ordinance (DSGVO) relevant to Online Marketing to legally substantiate advertising campaigns and customer approaches. This course offers students the opportunity to get to know and implement the various aspects of Online Marketing Management in practice. They learn how to assess Online Media Planning through Web Analytics and targeted monitoring. For this, students learn the relevant Key Performance Indicators (KPIs) of Online Marketing, which are an essential condition for optimizing online strategies.

Course Outcomes

On successful completion, students will be able to

- classify and strategically consider the basics relevant for Online Marketing (online communication process, electronic value creation, ...)
- know the different Online Marketing channels and to evaluate digital advertising measures strategically and operationally on this basis.
- conceive an Online Marketing strategy and make strategic and operational decisions.
- attract and retain customers through Online Marketing measures.
- measure and evaluate Online Marketing programs.
- fundamentally assess the marketing chances of a company in the World Wide Web.
- consider the importance of mobile in the Online Marketing Mix.

Contents

1. Basics of Online Marketing
 - 1.1 Development and concept of Online Marketing
 - 1.2 The online communication process
 - 1.3 Added value of Online Marketing
 - 1.4 The role of Online Marketing in the Marketing Mix
 - 1.5 The electronic added value
 - 1.6 Electronic business concepts and platforms
 - 1.7 Current developments and trends
2. Forms and channels of Online Marketing
 - 2.1 Overview of the forms of Online Marketing
 - 2.2 Affiliate and Search Engine Marketing
 - 2.3 Display advertising and E-mail Marketing
 - 2.4 Social Media and Influencer Marketing
 - 2.5 Content Marketing and Storytelling
 - 2.6 Viral Marketing and Word-of-Mouth
 - 2.7 Native Advertising and Mobile Marketing
 - 2.8 Real Time Bidding and Programmatic Advertising
 - 2.9 Online PR
3. Online Marketing Strategy
 - 3.1 Setting goals and creating a basis
 - 3.2 The Customer Journey
 - 3.3 The adequate channel mix
 - 3.4 Define and analyze KPIs

4. Media planning online
 - 4.1 Principles of successful Media Planning
 - 4.2 Create and structure media budgets in a targeted manner
 - 4.3 Integrated campaigns and Cross-Media Marketing
 - 4.4 Successful media mix through campaign management

5. The Online Presence
 - 5.1 Website and web design
 - 5.2 Corporate Website
 - 5.3 Landing Page
 - 5.4 Blog
 - 5.5 Online Shop
 - 5.6 Online presentation and distribution of products and services - advantages and disadvantages

6. Mobile Marketing and M-Commerce
 - 6.1 Basics and classification of Mobile Marketing
 - 6.2 Responsive design vs. Apps vs. Mobile Web
 - 6.3 App and QR Code Marketing
 - 6.4 Location-based Services
 - 6.5 Mobile Advertising Media
 - 6.6 Mobile Commerce - definition and development
 - 6.7 Mobile Payment
 - 6.8 Success factors of mobile campaigns

7. Online law
 - 7.1 Legal aspects of Online Marketing
 - 7.2 Copyright law and the handling of user-generated content
 - 7.3 The right to your own image
 - 7.4 Basic Data Protection Ordinance (DSGVO)

8. Online Customer Retention and Service
 - 8.1 The AIDA model - extensions for Online Marketing
 - 8.2 Customer acquisition and customer retention in Online Marketing
 - 8.3 Online customer retention in the customer relationship life cycle
 - 8.4 Online customer service
 - 8.5 Excursus: Mass Customization

9. Web Analytics
 - 9.1 Key figures in Online Marketing
 - 9.2 Web Monitoring
 - 9.3 Big Data

Social Media Marketing

Course Code: DLBMSM02-01_E

Study Level	Language of Instruction	Contact Hours	CP	Admission Requirements
BA	English		5	none

Course Description

How did Social Media become Social Media Marketing? Social Media has developed from a private communication medium to a commercialized advertising tool. A basic understanding of this development, the social implications of Social Media as well as the networked communication strategies on the Internet is the basis for an active examination of Social Media Marketing. Social Media Marketing is considered both strategically and operationally. The strategic perspective includes the aspect of strategic positioning of Social Media in the company as well as the integration into the overall marketing mix. In addition to fundamental aspects of strategy development, students will deal with the instruments of today's Social Media Marketing and the channels to use them specifically for further marketing measures and strategies in a success-oriented manner. For the active operative examination of Social Media Marketing, Social Media channels such as Facebook, Instagram, Pinterest, etc. are examined in detail in order to use them specifically for further marketing measures and strategies. Digital advertising measures that are used in Social Media are an integral part of this course. Their usage will also be considered from a legal perspective. Thus, the Social Media Marketing course teaches basic concepts such as the development of a Social Media strategy, including aspects such as content management, editorial planning or target group analysis. It deals with the usage and monitoring of different Social Media channels in a practice-oriented way and it considers the area of operative Social Media Marketing. Hence, this course provides students with a well-founded holistic view of the field of Social Media Marketing and develops the ability to use Social Media for innovation management.

Course Outcomes

On successful completion, students will be able to

- understand social implications and networking communication strategies and to apply them to the field of Social Media Marketing.
- integrate Social Media Marketing into the overall Marketing Mix.
- develop a Social Media strategy and proposals for its operational implementation.
- evaluate the different Social Media channels (Facebook, Instagram...)
- use Social Media for Innovation Management and networks.
- fundamentally assess the marketing opportunities of a company in the Social Media sector and make strategic decisions in this regard.
- evaluate developments in Social Media Marketing from a sociological as well as a business perspective.

Contents

 - 1.1 Development of Social Media and the Concept of Social Media Marketing
 - 1.2 Social implications of Social Media
 - 1.3 Functionality, types and fields of application of Social Media Marketing
 - 1.4 Typology and activities of Social Media users
2. Social-Media-Marketing in the Overall Marketing Mix
 - 2.1 Opportunities and risks through Social Media
 - 2.2 The POST method according to Groundswell
 - 2.3 Integration into the Classic Marketing Mix
 - 2.4 Social Media as a service channel
 - 2.5 Goals of Social-Media-Marketing
 - 2.6 Relevant key figures to measure success
 - 2.7 The strategic positioning of Social Media in the company
3. Social Media Map
 - 3.1 Overview of the Social Media Map
 - 3.2 Profiles of the most relevant Social Media Channels
 - 3.3 Target Groups/User Groups
4. Social Media Strategy Development
 - 4.1 What is a Strategy? Definitions
 - 4.2 Goals of a Strategy
 - 4.3 Stages of Social Media Strategy development
 - 4.4 Online Reputation Management and Crisis Management
 - 4.5 Social Media Governance
5. Social Media in Innovation Management
 - 5.1 The Importance and Use of the Crowd
 - 5.2 Innovation through Interactive Value Creation, Branded Communities, Lead Users and Social Media Intelligence
 - 5.3 Social Media as a Market Research Tool

6. Operational Social Media Marketing
 - 6.1 Content Marketing and Native Advertising
 - 6.2 Viral Marketing and Word of Mouth
 - 6.3 Influencer Marketing
 - 6.4 Social Media in B2B Marketing
 - 6.5 Community Management und Social Media Monitoring
 - 6.6 Social Media Relations
 - 6.7 Social Media Recruiting
 - 6.8 Social Advertising
7. Legal Framework of Social Media
 - 7.1 Legal Framework of Social Media
 - 7.2 Basic Data Protection Ordinance (DSGVO)
 - 7.3 User-generated Content
 - 7.4 The Facebook Pixel
8. Developments in Social-Media-Marketing
 - 8.1 Social Media in the Digital Change - New Forms of Consumption
 - 8.2 Social Products and Brands
 - 8.3 Social Commerce and Social Selling
 - 8.4 Messengers and Bots
 - 8.5 The terms "Postfactual" and "Postdigital"
 - 8.6 Open Leadership - Dealing with loss of control

Module Contents

Organizational Development

- Organizational Development
- Framework conditions for organizational change Concepts of organizational development
Organizations in transition
- New forms of organization
- Organizational design
- Problem areas and intervention techniques
- Evaluation of success and transfer

Change Management

- Introduction to Change Management
- Understanding and shaping change
- Phase models of change management
- Phases of the change process
- Change communication
- Influencing factors and typical errors in change management
- Operational instruments in the context of change management

Learning Outcomes**Organizational Development**

On successful completion, students will be able to

- explain the basic principles of organizational development.
- name the human relation theories in organizational development.
- explain points of criticism of organizational development.
- name the implications of Systemic Organizational Development.
- outline the importance and design of corporate culture within organizational development.
- name the characteristics of a learning organization.
- show possible development paths towards the learning organization.

Change Management

On successful completion, students will be able to

- explain the management of change in its broadest sense.
- identify the characteristics and procedures by which necessary changes in companies can be identified and designed.
- grasp the basics of processes in change management and communicate them to other participants.
- identify and analyze the need for change.
- outline typical tasks of managers in initiating and accompanying change processes.
- explain essential and effective techniques and tools of change processes and apply them.
- evaluate the success of change processes and measures.
- develop meaningful ways of dealing with resistance that arises in the change process.

Organizational Development

Course Code: DLBWPOCM01_E

Study Level	Language of Instruction	Contact Hours	CP	Admission Requirements
BA	English		5	none

Course Description

To remain competitive, all organizations are subject to constant change. To shape this change positively is a key function of the responsible managers and a sign of successful management. Frequently, reasons such as the discontinuation or the development of new business fields, mergers and relocations are decisive, but also continuous company growth; technological improvements and social changes are reasons for partly far-reaching measures for the further development of organizations. This knowledge is of central importance for implementing changes. This course shows the most important human relation theories that serve as a basis for organizational development. Since the corporate culture is a central component of organizational development, both the analysis and the development of the corporate culture are presented. It also discusses the most important aspects of learning organization.

Course Outcomes

On successful completion, students will be able to

- explain the basic principles of organizational development.
- name the human relation theories in organizational development.
- explain points of criticism of organizational development.
- name the implications of Systemic Organizational Development.
- outline the importance and design of corporate culture within organizational development.
- name the characteristics of a learning organization.
- show possible development paths towards the learning organization.

Contents

1. Organizational Understanding of Organizational Development
 - 1.1 Organization concept
 - 1.2 Development of organizational theory approaches
 - 1.3 Organizational principles and forms of organization
2. Basics of Organizational Development
 - 2.1 Definition and delimitations
 - 2.2 Historical origins of organizational development
 - 2.3 Criticism of the concept of organizational development

3. Model Assumptions of Organizational Development
 - 3.1 Human relation theories in organizational development
 - 3.2 Phase models
 - 3.3 Organizational burn-out and organizational resilience
4. Systemic Organizational Development
 - 4.1 Theoretical basics
 - 4.2 Implications for systemic organizational development
5. Development of Corporate Culture
 - 5.1 Theoretical basics
 - 5.2 Culture Analysis
 - 5.3 Cultural Development
6. Development of Organizational Learning
 - 6.1 Basic ideas and definitions
 - 6.2 Learning levels: How do organizations learn?
 - 6.3 Development of the learning organization

Change Management

Course Code: DLBDBC01_E

Study Level	Language of Instruction	Contact Hours	CP	Admission Requirements
BA	English		5	none

Course Description

The pace of change in markets, technologies and customer behavior has increased significantly. These developments offer growth opportunities for companies - new business models, merging markets, changed customer behavior. To utilize future potentials, companies need to implement changes effectively and quickly. To do this, it is essential to know the meaning, structure, roles of the people involved, possible bottle neck situations and communication within the framework of change management. A great number of change programs regularly fail in the operational implementation. Therefore, knowledge of the systematic approach to the change process is necessary to successfully manage change in and of the company. People and processes play a central role in this procedure.

Course Outcomes

On successful completion, students will be able to

- explain the management of change in its broadest sense.
- identify the characteristics and procedures by which necessary changes in companies can be identified and designed.
- grasp the basics of processes in change management and communicate them to other participants.
- identify and analyze the need for change.
- outline typical tasks of managers in initiating and accompanying change processes.
- explain essential and effective techniques and tools of change processes and apply them.
- evaluate the success of change processes and measures.
- develop meaningful ways of dealing with resistance that arises in the change process.

Contents

1. Introduction to Change Management
 - 1.1 Terms and Definitions
 - 1.2 Limitations of Change Management
 - 1.3 Models of Change
2. Causes and Triggers of Change
 - 2.1 Change and Transformation
 - 2.2 External Triggers of Change
 - 2.3 Internal Triggers for Change

3. The company as an Obstacle to Change
 - 3.1 Obstacles at Organizational Level
 - 3.2 Collective Obstacles
 - 3.3 Economic Obstacles
4. Resistance at Individual Level
 - 4.1 Manifestations of Individual Resistance
 - 4.2 Causes and Triggers of Individual Resistance
 - 4.3 Actions towards Resistance
5. Change as a Management Task
 - 5.1 Success Factors of Change Management
 - 5.2 Management Tasks in Change
 - 5.3 Change Management Activity Plans
6. Leading Change
 - 6.1 Success Factor: Leadership and Manager
 - 6.2 Leadership Roles and Functions
 - 6.3 Change Communication
7. Management of Change Projects
 - 7.1 Change Management Models
 - 7.2 Organization of Change Management
 - 7.3 Controlling and Evaluation of Change Projects

Sustainability and Quality Management

- Fundamentals of Sustainability
- Sustainability in three Dimensions
- Sustainability in Practice
- 4 Tools and Methods of Sustainability Management
- Quality of Products, Processes and Services
- Processes, Methods and Quality Tools
- Quality Management Systems

Business Ethics

- Fundamentals of Business Ethics
- Ethics Theories at a glance
- Context of Business Ethics in the Western World
- Business Ethics Problems in Companies
- Business Ethics Concepts for Companies
- Practical Integration of Business Ethics in the Company

Learning Outcomes**Sustainability and Quality Management**

On successful completion, students will be able to

- know the principles of sustainability and quality management and their significance for the company and society.
- know procedures and instruments and to implement sustainability and quality concepts in practice.
- scientifically classify the entire subject area, on the basis of the contents of the courses and with the help of supplementary scientific literature, and place it in relation to each other and evaluate it with regard to its significance for practice.
- reflect on the subject of sustainability and quality management against the background of corporate responsibility.
- know methods and applications for the realization of sustainability concepts under consideration of economic, ecological and social aspects and to apply them professionally in practice and to use them for the development of problem solutions based on sustainability criteria.
- apply quality management procedures and instruments in practice.
- present the developed solution approaches in an argumentatively well-founded and comprehensible way. Students are able to assess the role of sustainably operating companies and institutions, especially from a system perspective.
- know the legal and normative framework for sustainability and quality management.

Business Ethics

On successful completion, students will be able to

- identify conflicting interests between profit making and ethical behavior.
- name the different ethical problem situations in the daily business.
- understand business ethics theories and concepts.
- systematically integrate aspects of business ethics in daily business routine.
- use instruments of business ethics in order to sanction misconduct and to encourage ethical decision-making.

Sustainability and Quality Management

Course Code: DLBLONQM01_E

Study Level	Language of Instruction	Contact Hours	CP	Admission Requirements
BA	English		5	none

Course Description

The students learn the basics and the operational concepts of sustainability and quality management and can contribute to the implementation in practice. The importance of sustainability and quality as a corporate task is discussed from the perspective of personal, corporate and social responsibility, among other things. Methods and systems of implementation in companies are presented and critically examined.

Course Outcomes

On successful completion, students will be able to

- know the principles of sustainability and quality management and their significance for the company and society.
- know procedures and instruments and to implement sustainability and quality concepts in practice.
- scientifically classify the entire subject area, on the basis of the contents of the courses and with the help of supplementary scientific literature, and place it in relation to each other and evaluate it with regard to its significance for practice.
- reflect on the subject of sustainability and quality management against the background of corporate responsibility.
- know methods and applications for the realization of sustainability concepts under consideration of economic, ecological and social aspects and to apply them professionally in practice and to use them for the development of problem solutions based on sustainability criteria.
- apply quality management procedures and instruments in practice.
- present the developed solution approaches in an argumentatively well-founded and comprehensible way. Students are able to assess the role of sustainably operating companies and institutions, especially from a system perspective.
- know the legal and normative framework for sustainability and quality management.

Contents

1. Fundamentals of Sustainability
 - 1.1 Basic understanding and definitions

Business Ethics

Course Code: BETH01_E

Study Level	Language of Instruction	Contact Hours	CP	Admission Requirements
BA	English		5	keine

Course Description

Business Ethics deals with the application of ethical principles to business activities. The actions of individuals and companies are thus integrated into a context of social and ethical responsibility. Business Ethics derives its legitimacy from the effects that all economic activities have on other people, institutions and the environment. Social justice and sustainability are therefore among the most important norms of Business Ethics and are explained and described in the course. The aim of the course is providing general guidance on how to arrive at ethical decisions, rather than offering general solutions. In that sense, students are enabled to develop moral judgment in an informed manner and then make ethical decisions accordingly.

Course Outcomes

On successful completion, students will be able to

- identify conflicting interests between profit making and ethical behavior.
- name the different ethical problem situations in the daily business.
- understand business ethics theories and concepts.
- systematically integrate aspects of business ethics in daily business routine.
- use instruments of business ethics in order to sanction misconduct and to encourage ethical decision-making.

Contents

1. Fundamentals of Business Ethics
 - 1.1 Business and ethics - an overview
 - 1.2 Important terms and definitions
 - 1.3 Developments and perspectives in ethics
2. Ethics Theories at a glance
 - 2.1 The benefits of ethics theories
 - 2.2 Categorization of ethics theories
 - 2.3 Business Ethical Concepts

3. Context of Business Ethics in the Western World
 - 3.1 The importance of the context for business ethics
 - 3.2 Discussion of various contextual factors
 - 3.3 The relevance of company size on business ethics
4. Business Ethics Problems in Companies
 - 4.1 Categories of business ethics problems in companies
 - 4.2 Factors that make unethical behaviour more likely
 - 4.3 Case studies for ethics problems in companies
5. Business Ethics Concepts for Companies
 - 5.1 Corporate Social Responsibility
 - 5.2 Stakeholder Theory
 - 5.3 Business ethics in an international context
6. Practical Integration of Business Ethics in the Company
 - 6.1 Corporate Governance Codes
 - 6.2 Codes of Conduct/Codes of Ethics
 - 6.3 Whistleblowing
 - 6.4 Other instruments for implementing ethics in business practice

Salesforce Fundamentals

Course Code: DLSFPM01

Study Level	Language of Instruction	Contact Hours	CP	Admission Requirements
BA	English		5	none

Course Description

Salesforce is the most used software solution for customer relationship management worldwide. Using the learning platform trailhead students will learn independently the fundamentals of Salesforce. The course introduces Salesforce and explains how to administrate it. Additionally, it presents essentials of the Salesforce platform.

Course Outcomes

On successful completion, students will be able to

- define what Salesforce and customer relationship management is.
- describe and compare the different options for importing and exporting data in Salesforce.
- create reports and visualize key business metrics in real-time in Salesforce.
- create a simple Salesforce app.
- control access to data using security tools in Salesforce.

Contents

- The content on the learning platform focuses on the features and the functionality used to maintain a Salesforce implementation. It provides general knowledge of the features available to end users and the configuration options available to a Salesforce administrator. Furthermore, the content enables to maintain a Salesforce organization, respond to common business requirements, and perform administrative functions using current Salesforce features.

CRM with Salesforce Service Cloud

Course Code: DLSFPM02

Study Level	Language of Instruction	Contact Hours	CP	Admission Requirements
BA	English		5	none

Course Description

This course facilitates key aspects of setting up customer service with Salesforce service cloud on the learning platform trailhead. The course describes how to implement Salesforce service cloud and manage it. It enables to make better business decisions based on customer service data and to create a service metrics strategy. The course shows how to create processes to help support teams become more efficient and manage large data volumes within Salesforce and prepares students for the Salesforce service cloud certification.

Course Outcomes

On successful completion, students will be able to

- set up customer service with Salesforce service cloud.
- lead a customer service team in the digital era.
- create digital engagement on multiple channels.
- define service cloud goals and metrics.
- automate case management.
- improve customer service using artificial intelligence.

Contents

- The content on the learning platform focuses on designing and deploying solutions that support customer business processes and requirements using Salesforce applications. The content enables to design solutions using the Service Cloud functionality and to lead the implementation of these solutions within a customer organization.

Mathematics: Linear Algebra

Course Code: DLBDSMFLA01

Study Level	Language of Instruction	Contact Hours	CP	Admission Requirements
BA	English		5	none

Course Description

Linear algebra is a fundamental subject in mathematics. Its historical origin lies in the development of solution techniques for systems of linear equations arising from geometric problems. Numerous scientific and engineering applications can be solved using its methods. This course introduces the foundations of linear algebra and its basic notions like vectors and matrices. It then builds upon this foundation by introducing the derivation of solution techniques for problems in analytical geometry.

Course Outcomes

On successful completion, students will be able to

- explain fundamental notions in the domain of linear equation systems.
- exemplify properties of vectors and vector spaces.
- summarize characteristics of linear and affine mappings.
- identify important relations in analytical geometry.
- utilize different methods for matrix decomposition.

Contents

1. Fundamentals
 - 1.1 Systems of linear equations
 - 1.2 Matrices as compact representations of linear equations
 - 1.3 Matrix algebra
 - 1.4 Inverse and trace
2. Vector Spaces
 - 2.1 Definition
 - 2.2 Linear combination and linear dependence
 - 2.3 Base, span, and rank
3. Linear and affine mappings
 - 3.1 Matrix representations of linear mappings
 - 3.2 Image and kernel
 - 3.3 Affine spaces and sub-spaces
 - 3.4 Affine mappings

4. Analytical Geometry
 - 4.1 Norms
 - 4.2 Inner and dot product
 - 4.3 Orthogonal projections
 - 4.4 Rotations

5. Matrix Decomposition
 - 5.1 Determinant and trace
 - 5.2 Eigenvalues and eigenvectors
 - 5.3 Cholesky decomposition
 - 5.4 Eigenvalue decomposition and diagonalisation
 - 5.5 Singular value decomposition

Operations Research

Course Code: DLBBAEFOR01_E

Study Level	Language of Instruction	Contact Hours	CP	Admission Requirements
BA	English		5	none

Course Description

The term Operations Research (OR) refers to the development and application of quantitative models and methods for decision support in companies and organizations. Applications can be found in all areas of business administration, especially in production planning, supply chain management, distribution, location planning, warehousing, personnel planning and scheduling, as well as financial planning. This course introduces OR and its applications. The terminological fundamentals of the problem, model and method are presented. Further emphasis is put on graphs and basic graph algorithms. In addition, the course focuses on linear optimization, especially linear programs, simplex methods and sensitivity analysis. A special focus is the modelling of economic problems (decision, planning and optimization problems). Basic computer skills relevant for operations research are presented by means of spreadsheet calculation (esp. Microsoft Excel).

Course Outcomes

On successful completion, students will be able to

- describe the essential methodological foundations of optimization problems and their applications in various areas.
- know basic procedures from the fields of decision analysis, linear optimization, and integer linear optimization.
- apply various methods of decision support theoretically and also tool supported.
- model operational planning and decision problems such as transport problems or network flow problems and understand algorithms to solve these problems effectively.
- know the essential properties of these algorithms and applications relevant to business management.

Contents

1. Introduction to quantitative decision support
 - 1.1 Definition: Operations Research (OR) as structured problem-solving approach
 - 1.2 Terminology: models, methods and algorithms
 - 1.3 Decision Support and Decision Theory
 - 1.4 Fields and applications of OR
 - 1.5 Software applications in OR

2. Fundamentals of linear optimization
 - 2.1 Definition: linear optimization
 - 2.2 Forms and properties of linear optimization
 - 2.3 Simplex algorithm
 - 2.4 Sensitivity analysis
 - 2.5 Game theory
3. Application of linear optimization
 - 3.1 Production program planning
 - 3.2 Supply chain management
 - 3.3 Transport problem
 - 3.4 Financing and investment
4. Further optimization approaches
 - 4.1 Integer and combinatorial optimization
 - 4.2 Application: Branch-and-bound procedures and traveling salesman problems
 - 4.3 Dynamic optimization
 - 4.4 Nonlinear optimization
5. Graph theory
 - 5.1 Fundamentals and concepts of graph theory
 - 5.2 Structural modelling using graphs
 - 5.3 Shortest paths in graphs
6. Network planning and project management
 - 6.1 Elements and methods of network planning
 - 6.2 Structure and time planning as well as Gantt charts
 - 6.3 Cost and capacity planning
7. Simulation and queuing systems
 - 7.1 Basic types of simulation
 - 7.2 Deterministic simulation: systems and model experiments
 - 7.3 Stochastic simulation: waiting queue systems and models
 - 7.4 Applications of simulation
8. Application: OR implementation with a spreadsheet
 - 8.1 Integer linear optimization
 - 8.2 Shortest paths in graphs
 - 8.3 Simulation of a queue problem

Module Contents**Smart Factory I**

- Motivation and Definition of Terms
- Development of Automation
- Technological Basics and Standards
- Basic concepts of a Smart Factory
- Reference Architectures
- Smart Factory Engineering
- Safety and Security

Smart Factory II

A catalogue with the currently provided tasks is provided on the online platform of the module. It provides the content basis of the module and can be supplemented or updated by the seminar leader.

Learning Outcomes**Smart Factory I**

On successful completion, students will be able to

- understand the term Smart Factory in the context of Industry 4.0.
- be able to trace the development of automation to a fully autonomous, non-centrally organized production plant.
- understand the basic technologies and standards used to design and operate a Smart Factory.
- understand the essential concepts of a Smart Factory.
- identify and differentiate between the individual elements of a Smart Factory using different reference architectures.
- understand the special engineering challenges in the Smart Energy context.
- understand the special safety risks of digitized and networked production plants and assign concrete recommendations for action.

Smart Factory II

On successful completion, students will be able to

- have a deeper understanding of the technologies and standards in the context of Smart Factory.
- apply technologies in the context of Smart Factory to a simple practical example.
- design a hardware or software prototype for a selected task.
- document, design, and develop activities in the form of a project report.

Smart Factory I

Course Code: DLBDESEF01

Study Level	Language of Instruction	Contact Hours	CP	Admission Requirements
BA	English		5	none

Course Description

In this course, students will gain a deeper insight into the networking and digitization of production facilities by examining a Smart Factory. For this purpose, they will be familiarized with the basic goals of a Smart Factory in the context of the research complex Industry 4.0. After a brief introduction to the history of automation, students will learn the technical basics and standards required to design and operate a Smart Factory. Building on this, they will learn how these individual technologies are used to implement the central concepts of a Smart Factory. In order to understand which components a Smart Factory consists of, different reference architectures are presented and compared. The course concludes with the special engineering challenges of an autonomously acting and decentralized production plant. Above all, this includes IT security, which is particularly relevant due to the digital networking of production facilities and products.

Course Outcomes

On successful completion, students will be able to

- understand the term Smart Factory in the context of Industry 4.0.
- be able to trace the development of automation to a fully autonomous, non-centrally organized production plant.
- understand the basic technologies and standards used to design and operate a Smart Factory.
- understand the essential concepts of a Smart Factory.
- identify and differentiate between the individual elements of a Smart Factory using different reference architectures.
- understand the special engineering challenges in the Smart Energy context.
- understand the special safety risks of digitized and networked production plants and assign concrete recommendations for action.

Contents

1. Motivation and Definition of Terms
 - 1.1 Goals of Smart Factory
 - 1.2 Internet of Things
 - 1.3 Cyber-Physical Systems
 - 1.4 Cyber-Physical Production Systems
 - 1.5 Smart Factory as a Cyber-Physical (Production) System

2. Development of Automation
 - 2.1 Automation Pyramid
 - 2.2 Networked, Decentralized Organization of Production
 - 2.3 Future Challenges
3. Technological Basics and Standards
 - 3.1 Identification of Physical Objects
 - 3.2 Formal Description Languages and Ontologies
 - 3.3 Digital Object Memory
 - 3.4 Physical Situation Recognition
 - 3.5 (Partially) Autonomous Action and Cooperation
 - 3.6 Human-Machine Interaction
 - 3.7 Machine to Machine Communication
4. Basic Concepts of a Smart Factory
 - 4.1 Order-Controlled Production
 - 4.2 Bundling of Machine and Production Data
 - 4.3 Supporting People in Production
 - 4.4 Intelligent Products and Resources
 - 4.5 Smart Services
5. Reference Architectures
 - 5.1 Purpose and Properties of Reference Architectures
 - 5.2 Overview of Standardization Initiatives
 - 5.3 CyProS Reference Architecture
 - 5.4 RAMI 4.0 (DIN SPEC 91345)
6. Smart Factory Engineering
 - 6.1 Classification of Different Engineering Tools
 - 6.2 Virtual Engineering
 - 6.3 User-Centered Design
 - 6.4 Requirements Engineering
 - 6.5 Modelling
 - 6.6 Integration of Classic and Smart Components

Course Description

In this course, students select a concrete task from the catalog of topics provided in consultation with the seminar leader. They will work on the task in a prototyping environment suited to the task, which can be either a hardware (e.g., prototyping boards) or software (e.g., technology-specific development environments) environment. To complete the task, students apply the concepts, methods, and tools taught in the Smart Factory I course. They document their results with a project report.

Course Outcomes

On successful completion, students will be able to

- have a deeper understanding of the technologies and standards in the context of Smart Factory.
- apply technologies in the context of Smart Factory to a simple practical example.
- design a hardware or software prototype for a selected task.
- document, design, and develop activities in the form of a project report.

Introduction to Data Science

Course Code: DLBDSIDS01

Study Level	Language of Instruction	Contact Hours	CP	Admission Requirements
BA	English		5	none

Course Description

Data science emerged as a multi-disciplinary field aimed at creating value from data. This course starts with an overview of data science and related fields and then defines data types and sources. Special focus is put on the assessment of data quality and electronic data processing. Use of data-driven methods has become vital for businesses, and this course outlines how data-driven approaches can be integrated within a business context and how operational decisions can be made using data-driven methods. Finally, this course highlights the importance of statistics and machine learning in the field of data science and gives an overview of relevant methods and approaches.

Course Outcomes

On successful completion, students will be able to

- define data science and its relation to other fields.
- comprehend data science activities.
- recognize the origins of data and the challenges of working with data.
- understand how data science methods are integrated into business settings.
- grasp fundamental statistical concepts.
- appreciate the importance of machine learning in data science.

Contents

1. Introduction to Data Science
 - 1.1 Definition of the term „data science“
 - 1.2 Data science and related fields
 - 1.3 Data science activities
2. Data
 - 2.1 Data types and data sources
 - 2.2 The 5Vs of data
 - 2.3 Data curation and data quality
 - 2.4 Data engineering

3.	Data Science in Business
3.1	Identification of use cases
3.2	Performance evaluation
3.3	Data-driven operational decisions
3.4	Cognitive biases
4.	Statistics
4.1	Importance of statistics for data science
4.2	Important statistical concepts
5.	Machine Learning
5.1	Role of machine learning in data science
5.2	Overview of machine learning approaches

Introduction to Programming with Python

Course Code: DLBDSIPWP01

Study Level	Language of Instruction	Contact Hours	CP	Admission Requirements
BA	English		5	none

Course Description

This course provides students with a foundational understanding of the Python programming language. Following an introductory exposition to the importance of Python for data science-related programming tasks, students will be acquainted with fundamental programming concepts like variables, data types, and statements. Building on this basis, the important notion of a function is explained and errors, exception handling, and logging are explicated. The course concludes with an overview of the most widely-used library packages for data science.

Course Outcomes

On successful completion, students will be able to

- use fundamental Python syntax.
- recollect common elementary data types.
- recognize foundational programming concepts and their realization in Python.
- understand error handling and logging.
- create working programs.
- list the most important libraries and packages for data science.

Contents

1. Introduction
 - 1.1 Why Python?
 - 1.2 Obtaining and installing Python
 - 1.3 The Python interpreter , IPython, and Jupyter
2. Variables and Data Types
 - 2.1 Variables and value assignment
 - 2.2 Numbers
 - 2.3 Strings
 - 2.4 Collections
 - 2.5 Files

3. Statements
 - 3.1 Assignment, expressions, and print
 - 3.2 Conditional statements
 - 3.3 Loops
 - 3.4 Iterators and comprehensions
4. Functions
 - 4.1 Function declaration
 - 4.2 Scope
 - 4.3 Arguments
5. Errors and Exceptions
 - 5.1 Errors
 - 5.2 Exception handling
 - 5.3 Logs
6. Modules and Packages
 - 6.1 Usage
 - 6.2 Namespaces

Module Contents

IT Service Management

- IT Service Management Basics and Terms
- ITIL 4 - Basics and Four Dimensions
- ITIL 4 - Service Value System
- ITIL 4 - Principles
- ITIL 4 - Practices
- Information Security Management with the IT Baseline Protection Framework of the BSI

Project: IT Service Management

Analysis, evaluation, and development of recommendations for taking action within the scope of concrete questions concerning aspects of IT Service Management. This is aided by the creation and planning of a project in the theoretical-theme context through all phases of project management. The quality assurance of the artefacts created is carried out both by the tutor and by students from the project groups.

Learning Outcomes

IT Service Management

On successful completion, students will be able to

- identify the fundamentals and challenges of IT service management.
- describe the motivation and structure of the IT Infrastructure Library (ITIL), distinguish four dimensions, apply the service value system and identify concrete practices.
- describe and apply fundamentals of IT security management.

Project: IT Service Management

On successful completion, students will be able to

- analyze typical problems and company situations from the area of IT service management in different project variations.
- develop, plan, and implement proposed solutions.
- convert theory into a pragmatic approach to a solution with the help of methodical tools from IT service management and project management.
- draw and apply the right conclusions in relation to their specific project environment.
- conceptually apply their theoretical knowledge to company-specific environmental factors.

IT Service Management

Course Code: DLBCSITSM01-01

Study Level	Language of Instruction	Contact Hours	CP	Admission Requirements
BA	English		5	none

Course Description

IT service management is an approach to align and understand a company's IT as a service provider and supporter of operational and business processes. This course uses the IT Infrastructure Library (ITIL) to teach concepts, procedures and best practices in the area of IT service management (IT operations). In other words, it looks at the management of activities that take place after an IT system has been developed: IT operations as a continuous run of the productive day-to-day business of a company's IT departments.

Course Outcomes

On successful completion, students will be able to

- identify the fundamentals and challenges of IT service management.
- describe the motivation and structure of the IT Infrastructure Library (ITIL), distinguish four dimensions, apply the service value system and identify concrete practices.
- describe and apply fundamentals of IT security management.

Contents

1. IT Service Management Basics and Terms
 - 1.1 IT Services
 - 1.2 IT Service Management
 - 1.3 ITSM Frameworks
2. ITIL 4 - Basics and Four Dimensions
 - 2.1 Stakeholders, Services and Service Management
 - 2.2 Value Contribution of IT
3. ITIL 4 - Service Value System
 - 3.1 Basics and Overview
 - 3.2 Inputs, Outcome and Governance
 - 3.3 The Service Value Chain
 - 3.4 Continual Improvement

4. ITIL 4 - Principles
 - 4.1 Overview
 - 4.2 Value Orientation
 - 4.3 Iterative Procedure and Feedback
 - 4.4 Establish Collaboration and Visibility
 - 4.5 Optimize and Automate
5. ITIL 4 - Practices
 - 5.1 Overview
 - 5.2 General Management Practices
 - 5.3 Service Management Practices
 - 5.4 Technical Practices
6. Information Security Management with the IT Basic Protection Framework of the BSI
 - 6.1 Structure and Elements of BSI Basic Protection Framework
 - 6.2 Information Security Process

Project: IT Service Management

Course Code: DLBCSPITSM01

Study Level	Language of Instruction	Contact Hours	CP	Admission Requirements
BA	English		5	none

Course Description

Based on the contents of the course "IT Service Management", selected aspects of the core processes of ITIL are deepened, discussed, selected, and applied within the framework of a project in a concept-related manner. All theoretical methods are considered and evaluated.

Course Outcomes

On successful completion, students will be able to

- analyze typical problems and company situations from the area of IT service management in different project variations.
- develop, plan, and implement proposed solutions.
- convert theory into a pragmatic approach to a solution with the help of methodical tools from IT service management and project management.
- draw and apply the right conclusions in relation to their specific project environment.
- conceptually apply their theoretical knowledge to company-specific environmental factors.

Contents

- Analysis, evaluation, and development of recommendations for taking action within the scope of concrete questions concerning aspects of IT Service Management. This is aided by the creation and planning of a project in the theoretical-theme context through all phases of project management.
- The quality assurance of the artefacts created is carried out both by the tutor and by students from the project groups.

Smart Services I

Course Code: DLBINGSS01_E

Study Level	Language of Instruction	Contact Hours	CP	Admission Requirements
BA	English		5	none

Course Description

In this course, students study concepts and methods for the development of Smart Services. For this purpose, an introduction of the term in the context of digitization and Industry 4.0 will be given. Based on this, this course shows how innovative services can have a disruptive effect on existing business models or even markets using the example of digital intermediaries. Subsequently, students will be taught selected methods and techniques with which digitization potentials can be recognized and modelled. In addition, selected architectures and platforms for the integration of services are presented. Finally, relevant technologies for the implementation of smart services are taught and it is briefly described how the quality of services can be agreed upon.

Course Outcomes

On successful completion, students will be able to

- recognize the relevance of Smart Services in the context of digitization in general and Industry 4.0 in particular.
- identify special features of digital business models and demonstrate them using the example of digital intermediaries.
- apply methods to uncover digitization potentials and use the Business Model Canvas to classify them in a business model.
- know and use models for the multi-perspective specification of services.
- know selected architectures for the design and integration of services.
- distinguish different technologies that are required for the development of services.
- define the quality of services by means of Service Level Agreements.

Contents

1. Introduction and Motivation
 - 1.1 Digitization and Cyber-Physical Production Systems
 - 1.2 Smart Services in Industry 4.0
 - 1.3 Examples of Smart Services

2. Digitization and Disruption
 - 2.1 Definition: Digital Business Models
 - 2.2 Strategies for Change and Innovation
 - 2.3 Digital Intermediaries
 - 2.4 Examples of Disruptive Business Models
3. Recognizing Potential for Smart Services
 - 3.1 Business Model Canvas
 - 3.2 Personas
 - 3.3 Customer Journeys
 - 3.4 Domain-Driven Design
4. Development and Specification of Smart Services
 - 4.1 Modelling of the System Context
 - 4.2 Modelling of Business Processes
 - 4.3 Modelling of Technical Interfaces
 - 4.4 Tools for API Specification
5. Service Architectures
 - 5.1 Infrastructure/Platform/Software-as-a-Service
 - 5.2 Everything-as-a-Service
 - 5.3 Service-oriented Architectures
 - 5.4 Micro Services
6. Integration Platforms
 - 6.1 Features and Purpose of Integration Platforms
 - 6.2 Enterprise Integration Patterns
 - 6.3 External Integration with Zapier, IFTTT & Others
7. Technologies for Smart Services
 - 7.1 Formats for Data Exchange
 - 7.2 Internet Communication Protocols
 - 7.3 Semantic Descriptions
 - 7.4 Complex Event Processing
 - 7.5 Security

- | |
|--|
| 8. Quality and Operation of Smart Services |
| 8.1 Quality Characteristics and Maturity of APIs |
| 8.2 Service Level Agreements |
| 8.3 Service Level Management |

Smart Services II

Course Code: DLBINGSS02_E

Study Level	Language of Instruction	Contact Hours	CP	Admission Requirements
BA	English		5	none

Course Description

In this course, the students select a concrete technical task from the provided topic catalogue in consultation with the seminar leader. They work on the task with the help of a prototyping environment that is suitable for the subject of the task. The environments can be hardware (e.g. prototyping boards) or software (e.g. technology-specific development environments). To complete the task, students apply the concepts, methods and tools taught in the Smart Services I course. They document their results in a project report.

Course Outcomes

On successful completion, students will be able to

- have an in-depth understanding of the technologies and standards in the context of Smart Services.
- apply technologies in the context of smart services using a simple practical example.
- design a hardware or software prototype for a selected technical task.
- document design and development activities in the form of a project report.

Contents

- A catalogue with currently available assignments is provided on the online learning platform. It provides the content basis of the module and can be supplemented or updated by the tutor.

Introduction to the Internet of Things

- Internet of Things Fundamentals
- Social and Economic Significance
- Communication Standards and Technologies
- Data Storage and Processing
- Design and Development
- Applicability

Product Development in Industry 4.0

- Introduction to modern product development
- Fundamentals of product development
- Methods in the product development process
- Alternative design approaches
- Digitalization of product design
- Customized mass production
- Outlook: Digital engineering and operation

Learning Outcomes

Introduction to the Internet of Things

On successful completion, students will be able to

- grasp the distinctive features of Internet of Things (IoT) and IoT systems.
- understand the social and economic importance of Internet of Things.
- identify the most important standards for communication between IoT devices.
- differentiate between various techniques for storing and processing data in IoT systems.
- identify different architectures and technologies for structuring IoT systems.
- recognize challenges of data protection and data security in IoT systems.

Product Development in Industry 4.0

On successful completion, students will be able to

- recall the historical development of industrial production.
- name current trends in the context of the "fourth industrial revolution" and their impact on product development.
- know the basic methods in product development.
- know the traditional product development process from design theory.
- differentiate alternative approaches to product development.
- name selected tools in the context of digital and virtual product design.
- explain the lot size problem and determine lot sizes for traditional production types.
- distinguish traditional production types from modern strategies such as customized mass production and rapid manufacturing.
- name current approaches to the complete digitalization of product creation and production processes in terms of digital engineering.

Introduction to the Internet of Things

Course Code: DLBINGEIT01_E

Study Level	Language of Instruction	Contact Hours	CP	Admission Requirements
BA	English		5	none

Course Description

The aim of this course is to give students an insight into technical and theoretical basics of the Internet of Things (IoT) and its fields of application. In addition to the general structure of IoT systems and the technology standards used in them, students are also taught the importance of Internet of Things for economy and society. Furthermore, this course demonstrates how data is exchanged, stored and processed in IoT.

Course Outcomes

On successful completion, students will be able to

- grasp the distinctive features of Internet of Things (IoT) and IoT systems.
- understand the social and economic importance of Internet of Things.
- identify the most important standards for communication between IoT devices.
- differentiate between various techniques for storing and processing data in IoT systems.
- identify different architectures and technologies for structuring IoT systems.
- recognize challenges of data protection and data security in IoT systems.

Contents

1. Internet of Things Fundamentals
 - 1.1 The Internet of Things - Basics and Motivation
 - 1.2 Evolution of the Internet - Web 1.0 to Web 4.0
2. Social and Economic Significance
 - 2.1 Innovations for Consumers and Industry
 - 2.2 Implications on People and the World of Work
 - 2.3 Data Protection and Data Security
3. Communication Standards and Technologies
 - 3.1 Network Topologies
 - 3.2 Network Protocols
 - 3.3 Technologies

4. Data Storage and Processing
 - 4.1 Networked Storage with Linked Data and RDF(S)
 - 4.2 Analysis of Networked Data using a Semantic Reasoner
 - 4.3 Processing of Data Streams with Complex Event Processing
 - 4.4 Operation and Analysis of Large Data Clusters using NoSQL and MapReduce
5. Design and Development
 - 5.1 Software Engineering for Distributed and Embedded Systems
 - 5.2 Architectural Patterns and Styles for Distributed Systems
 - 5.3 Platforms: Microcontrollers, Monoboard Computers, One-Chip Systems
6. Applicability
 - 6.1 Smart Home / Smart Living
 - 6.2 Ambient Assisted Living
 - 6.3 Smart Energy / Smart Grid
 - 6.4 Smart Factory
 - 6.5 Smart Logistics

Product Development in Industry 4.0

Course Code: DLBINGPE01_E

Study Level	Language of Instruction	Contact Hours	CP	Admission Requirements
BA	English		5	none

Course Description

The aim of the course is to give students an overview of current approaches to modern product development in the context of Industry 4.0. Based on traditional methods and tools of product development, relevant alternative design approaches are described, which put the consumer in the center of the design. In addition, modern tools to support product design are presented with which an engineer can digitally capture and simulate both the static/geometric and dynamic properties of a product. In addition, aspects of customized mass production will be discussed and compared with traditional production types. As an outlook on future developments, current research approaches for consistently digitalized product development are presented.

Course Outcomes

On successful completion, students will be able to

- recall the historical development of industrial production.
- name current trends in the context of the "fourth industrial revolution" and their impact on product development.
- know the basic methods in product development.
- know the traditional product development process from design theory.
- differentiate alternative approaches to product development.
- name selected tools in the context of digital and virtual product design.
- explain the lot size problem and determine lot sizes for traditional production types.
- distinguish traditional production types from modern strategies such as customized mass production and rapid manufacturing.
- name current approaches to the complete digitalization of product creation and production processes in terms of digital engineering.

Contents

1. Introduction to Modern Product Development
 - 1.1 Terms of Industrial Production
 - 1.2 The Fourth Industrial Revolution
 - 1.3 Turnaround in the Factors of Production
 - 1.4 Trends in Product Development

2. Fundamentals of Product Development
 - 2.1 Methods of Product Planning
 - 2.2 Methods of the Solution Search
 - 2.3 Selection and Evaluation of Alternatives
3. Methods in the Product Development Process
 - 3.1 Clarify Requirements
 - 3.2 Concept
 - 3.3 Draft
 - 3.4 Development
4. Alternative Design Approaches
 - 4.1 Design Thinking
 - 4.2 Personas
 - 4.3 Human-Centered Design According to ISO 9241-210
 - 4.4 Participatory Design
 - 4.5 Open Innovation
 - 4.6 Empathic Design
5. Digitalization of Product Design
 - 5.1 From Drawing Board to Digital Functional Model
 - 5.2 Computer-Aided Engineering
 - 5.3 Computer-Aided Quality
 - 5.4 Engineering and Product Data Management
 - 5.5 Simulation Data Management
6. Customized Mass Production
 - 6.1 Traditional Types of Production
 - 6.2 Lot Size Problem and Planning
 - 6.3 Mass Customization
 - 6.4 Rapid Manufacturing
7. Outlook: Digital Engineering and Operation
 - 7.1 Definition
 - 7.2 Fields of Application
 - 7.3 Data Mining
 - 7.4 Modeling of Dynamic Product Properties
 - 7.5 Provision of Information

Innovative Technologies and Sustainability

Module Code: DLBEPWITN_E

Module Type	Admission Requirements	Study Level	CP	Student Workload
see curriculum	none	BA	10	300 h

Semester / Term	Duration	Regularly offered in	Language of Instruction
see curriculum	Minimum 1 semester	WiSe/SoSe	English

Module Coordinator

Prof. Dr. Mirko Bendig (Circular Economy) / Prof. Dr. Lars Meinecke (Sustainable Technologies)

Contributing Courses to Module

- Circular Economy (DLBEPWITN01_E)
- Sustainable Technologies (DLBEPWITN02_E)

Module Exam Type

Module Exam

Split Exam

Circular Economy

- Study Format "Distance Learning": Exam, 90 Minutes

Sustainable Technologies

- Study Format "Distance Learning": Exam, 90 Minutes

Weight of Module

see curriculum

Module Contents**Circular Economy**

- Origin and Definition of the Circular Economy
- Drivers of the Circular Economy
- The "R-framework of circularity" - the 7 "Rs" and their application
- Requirements of the Circular Economy
- Transformation towards a Circular Economy
- Examples of Approaches and Business Models of the Circular Economy

Sustainable Technologies

- Energy technologies
- Water technologies
- Raw material and material technologies
- Urban technologies
- Transport technologies
- Evaluation of sustainable technologies

Learning Outcomes**Circular Economy**

On successful completion, students will be able to

- understand which origins and reasons make a reshape and restructure of the current linearly organized economy towards a circular economy necessary.
- describe the most important drivers of the circular economy.
- explain important concepts and deductions of the Circular Economy and their impact on organizational forms, business models, production and technologies as well as economic activity, and to evaluate their advantages and disadvantages.
- understand and learn to shape the transformation process from a currently linearly organized economy to a circular economy.

Sustainable Technologies

On successful completion, students will be able to

- remember the definition and concepts of the term sustainability,
- understand different systems and their interactions as well as the social significance of sustainable technologies,
- remember the areas of use and possible applications of sustainable technologies,
- analyze, evaluate and compare sustainable technologies based on objective criteria.

Circular Economy

Course Code: DLBEPWITN01_E

Study Level	Language of Instruction	Contact Hours	CP	Admission Requirements
BA	English		5	none

Course Description

In contrast to the currently predominant principle of linear economy in industrial production and economy, the approach of the circular economy represents a regenerative system. The objective of the Circular Economy is to lower the use of resources and to reduce waste production, emissions and energy waste by slowing down, reducing and closing energy and material cycles. The course provides an overview of the origins, the framework conditions and the requirements of a Circular Economy. In addition, the students receive an insight into the economic transformation processes and adjustments in terms of production, technologies, supply chain, forms of organization and business models.

Course Outcomes

On successful completion, students will be able to

- understand which origins and reasons make a reshape and restructure of the current linearly organized economy towards a circular economy necessary.
- describe the most important drivers of the circular economy.
- explain important concepts and deductions of the Circular Economy and their impact on organizational forms, business models, production and technologies as well as economic activity, and to evaluate their advantages and disadvantages.
- understand and learn to shape the transformation process from a currently linearly organized economy to a circular economy.

Contents

1. Origin and Definition of the Circular Economy
 - 1.1 Background, history and definition
 - 1.2 Climate Crisis
 - 1.3 Waste of resources
 - 1.4 Negative externalities
2. Drivers of the Circular Economy
 - 2.1 Legal framework in Germany
 - 2.2 International framework conditions - Paris Climate Treaty, UN Sustainable Development Goals
 - 2.3 Technological and economic drivers, such as Sharing Economy
 - 2.4 Social and political drivers, such as Zero Waste Vision, coal exit

3. The "R-framework of circularity" - the 7 "Rs" and their application
 - 3.1 "Rethink"
 - 3.2 "Reduce"
 - 3.3 "Re-use" and "Repair"
 - 3.4 "Refurbish" and "Recover"
 - 3.5 "Recycle"
4. Requirements of the Recycling Economy
 - 4.1 Other forms and demands for raw materials
 - 4.2 Critical and scarce raw materials
 - 4.3 Example: Renewable Energies
5. Transformation towards a Circular Economy
 - 5.1 Substitution and design strategies
 - 5.2 Political and economic strategies
 - 5.3 Transformation of the production and supply chain
 - 5.4 Transformation of the "throwaway" culture
6. Examples for Approaches and Business Models of the Circular Economy
 - 6.1 Waste Management
 - 6.2 Energy Industry

Sustainable Technologies

Course Code: DLBEPWITN02_E

Study Level	Language of Instruction	Contact Hours	CP	Admission Requirements
BA	English		5	none

Course Description

Sustainable technologies differ significantly from conventional technologies, which often cause ecological and social problems due to their dependence on conventional primary energy sources (fossil or nuclear) and/or their emissions. In the course, students get an overview of the areas and applications of sustainable technologies and gain insight into methods of evaluating and comparing them based on objective criteria.

Course Outcomes

On successful completion, students will be able to

- remember the definition and concepts of the term sustainability,
- understand different systems and their interactions as well as the social significance of sustainable technologies,
- remember the areas of use and possible applications of sustainable technologies,
- analyze, evaluate and compare sustainable technologies based on objective criteria.

Contents

1. Sustainable technologies: Introduction and context
 - 1.1 Characteristics of sustainable technologies
 - 1.2 Systems and interdependencies
 - 1.3 Social relevance
 - 1.4 Economic aspects of sustainable technologies
 - 1.5 Technical challenges of sustainable technologies
2. Energy Technologies
 - 2.1 Energy forms
 - 2.2 Conventional primary energy sources
 - 2.3 Regenerative primary energy sources
 - 2.4 Energy storage technology
 - 2.5 Energy conversion technologies and conversion efficiency
 - 2.6 Energy supply grids

3. Water Technologies
 - 3.1 Water treatment and conditioning
 - 3.2 Water systems
4. Raw material and material technologies
 - 4.1 Material efficiency
 - 4.2 Optimization of material functionalities
 - 4.3 Recycling
5. Urban Technologies
 - 5.1 Building technology
 - 5.2 Supply and disposal
 - 5.3 Synergy potentials in urban centers
6. Transport Technologies
 - 6.1 Sustainable transport systems
 - 6.2 Fuels
 - 6.3 Material reduction
7. Evaluation of sustainable technologies
 - 7.1 Upstream and downstream energy chains
 - 7.2 Material flow analyses
 - 7.3 Life cycles, obsolescence and recyclability, life cycle assessment
 - 7.4 Comparisons based on individual criteria
 - 7.5 Technology impact assessment

Module Contents**Digital Future Commerce**

- Systems and Processes in Business and Logistics
- Trends and Developments
- Digital Value Networks
- Handling Large Amounts of Data
- Global Trade In a Digital World

Seminar in Current Topics in Digitalization

The seminar deals with current topics of digitalization and digital transformation. Students candiscuss the effects on the economy and society, or gather information on current technological developments.

Learning Outcomes**Digital Future Commerce**

On successful completion, students will be able to

- explain the possibilities for mapping business processes in IT systems and assess the possible uses of workflow management systems.
- explain current trends in digitization, outline historical developments starting with the industrial revolution, and explain the innovation potential of digitization.
- describe digital value networks and their special features using examples.
- describe the implications of E-Commerce for logistics and analyze the impact of digitalization on business processes.
- explain the challenges of Big Data and develop concepts as well as solution strategies for individual fields of application, especially from the area of eCommerce.
- describe global commerce in the digitalized world against the backdrop of rapid changes and adaptation processes and to classify the "human factor" in this context.

Seminar in Current Topics in Digitalization

On successful completion, students will be able to

- independently familiarize themselves with a given topic from the field of digitalization or digital transformation.
- write down important characteristics, connections and findings in form of a paper.
- remember the basics of scientific work and to implement them in the seminar paper.

Digital Future Commerce

Course Code: DLBLOGC201_E

Study Level	Language of Instruction	Contact Hours	CP	Admission Requirements
BA	English		5	none

Course Description

Participation in the course is designed to familiarize students with the future topics of digitization in logistics, industry and commerce. They will gain an overview of the status of technical developments and current implementation. Based on this, they will develop concepts and implementation strategies for selected operational contexts.

Course Outcomes

On successful completion, students will be able to

- explain the possibilities for mapping business processes in IT systems and assess the possible uses of workflow management systems.
- explain current trends in digitization, outline historical developments starting with the industrial revolution, and explain the innovation potential of digitization.
- describe digital value networks and their special features using examples.
- describe the implications of E-Commerce for logistics and analyze the impact of digitalization on business processes.
- explain the challenges of Big Data and develop concepts as well as solution strategies for individual fields of application, especially from the area of eCommerce.
- describe global commerce in the digitalized world against the backdrop of rapid changes and adaptation processes and to classify the "human factor" in this context.

Contents

1. Systems and Processes in Business and Logistics
 - 1.1 Logistical Systems Thinking and Economic Modeling
 - 1.2 Logistical Processes and Process Thinking in Retail
 - 1.3 Mapping of Business Processes in IT Systems
 - 1.4 Working Time Management: Demand-Oriented Personnel Logistics
2. Trends and Developments
 - 2.1 The History of Global Trade Logistics - From the Early Forms of Logistics Optimization to Digitalization
 - 2.2 The Tension between Liberalization and Protectionism
 - 2.3 Disruptive Innovations in Retail Logistics Yesterday and Today
 - 2.4 Humans in the Robotized World of Work - an Indispensable Disruptive Factor?

3. Digital Value Networks
 - 3.1 Self-Controlling Systems - Technologies and Organization - Swarm Intelligence
 - 3.2 3D Printing and Implications for Retail Logistics
 - 3.3 Logistics Processes in a Digital World
 - 3.4 E-Commerce and E-Logistics

4. Handling Large Amounts of Data
 - 4.1 Challenges and Strategies in Dealing with Big Data
 - 4.2 Technical Solutions in Various Fields of Application
 - 4.3 Cloud Services
 - 4.4 Security and Data Protection

5. Global Trade in a Digital World
 - 5.1 Adaptive Trade and Supply Chains
 - 5.2 Design and Redesign of Global Retail Chains
 - 5.3 Digitization of Global Production and Supply Networks
 - 5.4 Education for the Digitalized World

Seminar in Current Topics in Digitalization

Course Code: DLBDBATD01_E

Study Level	Language of Instruction	Contact Hours	CP	Admission Requirements
BA	English		5	keine

Course Description

In the seminar "Current Topics in Digitalization" students write a seminar paper on a specific topic and present their results. In this way, the students demonstrate that they are able to independently familiarize themselves with a topic and to document and present the knowledge gained in a structured manner.

Course Outcomes

On successful completion, students will be able to

- independently familiarize themselves with a given topic from the field of digitalization or digital transformation.
- write down important characteristics, connections and findings in form of a paper.
- remember the basics of scientific work and to implement them in the seminar paper.

Contents

- Digitalization is a wide-ranging subject area that can relate to very different aspects, depending on the specific terminology used. The seminar will meet this diversity by picking up current trends within the framework of formulated topic areas. Each participant must prepare a seminar paper for this purpose. Possible topics include new technologies that drive digitalization (e.g. deep learning), effects on the working world (e.g. crowdsourcing or new qualification requirements in the field of data science) or new digital business models (e.g. Fintechs).

Introduction to User Research

Course Code: DLBUXEUR01_E

Study Level	Language of Instruction	Contact Hours	CP	Admission Requirements
BA	English		5	None

Course Description

The goal is to teach user research techniques for the derivation of user requirements. For this purpose, the approach of User Centered Design is introduced to the students. Special attention is given to the planning of the context of use analysis. The main focus of the course is on the teaching of user research methods, which students can select and apply on a project-specific basis after completing the course. Besides interview methods, observation techniques are taught. The design of questionnaires, observation protocols as well as the development of moderation guidelines for Focus Groups are also covered. The course concludes with the derivation and consolidation of qualitative and quantitative user requirements. In addition, the approach to Service Design will be discussed and specific Service Design methods and tools are presented.

Course Outcomes

On successful completion, students will be able to

- understand the approach of User Centered Design and apply it independently
- understand the difference between different User Research methods to determine user requirements and to select project-specific methods.
- know and apply Service Design approaches to the determination and consolidation of user research results.

Contents

1. Basics and Definitions of Terms
 - 1.1 Definitions of User Research and User Requirements
 - 1.2 Goals and challenges of User Research
2. Basic Idea of the User Centered Design
 - 2.1 Understanding
 - 2.2 Design
 - 2.3 Envision
 - 2.4 Evaluate
 - 2.5 Iterative Design
 - 2.6 Implementation

3. Planning User Context Analysis
 - 3.1 Reason, goals and procedure of the user context analysis
 - 3.2 Select and recruit users for data collection
 - 3.3 Preparatory Desk Research
 - 3.4 Work products and roles in User Requirements Engineering
4. User Research Methods for the Determination of User Requirements
 - 4.1 Observation Methods
 - 4.2 Interview Methods
 - 4.3 Questionnaires
 - 4.4 Focus Groups
 - 4.5 Cultural Probes
5. From User Context Information to User Requirements
 - 5.1 Identify Requirements
 - 5.2 Qualitative and Quantitative User Requirements
 - 5.3 Derive and structure User Requirements
 - 5.4 Consolidate User Requirements
6. Service Design Methods
 - 6.1 Objectives and Approaches
 - 6.2 User Journeys and Service Blueprints
 - 6.3 System Maps
 - 6.4 Writing User Stories
 - 6.5 Writing Research Reports

Project: Prototyping and validation of a business idea

Course Code: DLBEPPP01_E

Study Level	Language of Instruction	Contact Hours	CP	Admission Requirements
BA	English		5	none

Course Description

In this course, students learn to systematically test a start-up idea on the market in order to determine and reduce the risk of implementing the business idea. The necessary prototyping and validation methods are established, learned and critically reflected with regard to their applicability to the own business idea. As a result of this process, a self-developed or fictitious business idea is validated by each student and the necessary process including results are presented in a project report.

Course Outcomes

On successful completion, students will be able to

- explain a test process for a business idea, design it independently and set it up in a start-up.
- understand the validation of a business idea as an iterative process.
- derive the relevant hypotheses, which need to be tested, from a business idea.
- transform the hypotheses into an experiential prototype and a corresponding experiment including test design and process.
- develop an experiential prototype and present it to potential customers.
- collect, evaluate and present the test results.

Contents

- The course will teach the entrepreneurship methods to transform a start-up idea into an experiential prototype ("first tangible prototype" who symbolizes the key value of the idea) and into hypotheses that can be tested on the market. First, the methodical process of the steps of an idea validation are discussed and its application is demonstrated by using an example of a business idea. The phases of the idea validation process are the conception of the test design and process, the derivation of an experiential prototype and the relevant hypotheses, the execution of the iterative tests using the test and experiment design with the target group of the business idea, and the analysis and evaluation of the test results. If necessary, several iterative test loops per business idea have to be executed to achieve the goal of the "solution-market-fit" of the business idea. The project report will contain the test concept developed and applied by the student with the following core elements: Test process including hypotheses and experiential prototypes of the self-developed or fictitious business idea as well as a comprehensive description and evaluation of the test results. The business idea can be either the students' own or a fictitious business idea.

Internship

Course Code: OPTINTER110

Study Level	Language of Instruction	Contact Hours	CP	Admission Requirements
	English		10	On campus offer only

Course Description

This module consists of three parts: preparation tutorials. During these tutorials, students will learn about the intention of the internship and about the intellectual as well as social requirements of the working environment. the internship itself, and Workshops that accompany the internship by presentations and give an insight into different companies and working environments by the students.

Course Outcomes

On successful completion, students will be able to

- apply skills and knowledge they have obtained during the first three semesters of the programme in an entrepreneurial environment.
- develop his / her practical and analytical skills in order to improve his / her employability.
- have practical knowledge and learn to work within an organization.
- acquire a first deep insight into organisational structures and communication procedures.
- apply communication skills, social skills, problem solving, time and project management which will shape their general management skills.
- shape their personality with the help of the interdisciplinary nature of the course especially in the area of the key qualifications like interpersonal skills or intercultural skills.

Contents

Studium Generale I

Course Code: DLBSG01_E

Study Level	Language of Instruction	Contact Hours	CP	Admission Requirements
BA	English		5	None

Course Description

In the course "Studium Generale I", students deepen their knowledge in a self-selected subject area by completing an IU course outside their applicable curriculum. This gives them the opportunity to look beyond their own subject area and acquire further competencies. The associated option enables students to self-determine their study content to focus even more on issues relevant to them and/or to strengthen or develop selected competencies.

Course Outcomes

On successful completion, students will be able to

- apply acquired key competencies to issues in their field of study and/or in their professional environment.
- to deepen one's own skills and abilities in a self-directed manner.
- to look beyond the boundaries of their own area of expertise.

Contents

- The course "Studium Generale I" offers students the opportunity to take courses outside of their curriculum and the result can be credited as an elective subject. In principle, all IU bachelor courses that fulfill the following requirements can be chosen for this purpose:
 - They are not part of an integral part of the applicable mandatory curriculum.
 - They do not have admission requirements or students can prove that they have met the admission requirement.
- The examination of the selected courses must be taken in full and finally passed in order to be credited as part of the 'Studium Generale'.

Colloquium**Learning Outcomes****Bachelor Thesis**

On successful completion, students will be able to

- work on a problem from their major field of study by applying the specialist and methodological skills they have acquired during their studies.
- independently analyze selected tasks with scientific methods, critically evaluate them, and develop appropriate solutions under the guidance of an academic supervisor.
- record and analyze existing (research) literature appropriate to the topic of their bachelor's thesis.
- prepare a detailed written elaboration in compliance with scientific methods.

Colloquium

On successful completion, students will be able to

- present a problem from their field of study using academic presentation and communication techniques.
- reflect on the scientific and methodological approach chosen in their bachelor's thesis.
- demonstrate that they can actively answer subject-related questions from the subject experts (reviewers of the bachelor's thesis).

Bachelor Thesis

Course Code: DLBBT01

Study Level	Language of Instruction	Contact Hours	CP	Admission Requirements
BA	English		9	none

Course Description

The aim and purpose of the bachelor's thesis is to successfully apply the subject-specific and methodological competencies acquired during the course of study in the form of an academic dissertation with a thematic reference to the major field of study. The content of the bachelor's thesis can be a practical-empirical or theoretical-scientific problem. Students should prove that they can independently analyze a selected problem with scientific methods, critically evaluate it, and work out proposed solutions under the subject-methodological guidance of an academic supervisor. The topic chosen by the student from their respective field of study should meet the acquired scientific competences, deepening their academic knowledge and skills in order to meet the future needs of the field.

Course Outcomes

On successful completion, students will be able to

- work on a problem from their major field of study by applying the specialist and methodological skills they have acquired during their studies.
- independently analyze selected tasks with scientific methods, critically evaluate them, and develop appropriate solutions under the guidance of an academic supervisor.
- record and analyze existing (research) literature appropriate to the topic of their bachelor's thesis.
- prepare a detailed written elaboration in compliance with scientific methods.

Contents

- The bachelor's thesis must be written on a topic that relates to the content of the respective major field of study. In the context of the bachelor's thesis, the problem, as well as the scientific research goal, must be clearly emphasized. The work must reflect the current state of knowledge of the topic to be examined by means of an appropriate literature analysis. The student must prove their ability to use the acquired knowledge theoretically and/or empirically in the form of an independent and problem-solution-oriented application.

Colloquium

Course Code: DLBBT02

Study Level	Language of Instruction	Contact Hours	CP	Admission Requirements
BA	English		1	none

Course Description

The colloquium will take place after the submission of the bachelor's thesis. This is done at the invitation of the experts. During the colloquium, students must prove that they have independently produced the content and results of the written work. The content of the colloquium is a presentation of the most important work contents and research results by the student as well as the answering of questions by experts.

Course Outcomes

On successful completion, students will be able to

- present a problem from their field of study using academic presentation and communication techniques.
- reflect on the scientific and methodological approach chosen in their bachelor's thesis.
- demonstrate that they can actively answer subject-related questions from the subject experts (reviewers of the bachelor's thesis).

Contents

- The colloquium includes a presentation of the most important results of the bachelor's thesis, followed by the student answering the reviewers' technical questions.
