

GS Series 1075 User Manual Addendum

This document is an addendum to the GS Series 1075 User manual.

The following topics in the GS Series 1075 User manual contain updates:

- Optional accessories topic in the *GS Series 1075 User manual (P/N: 020-001225-XX)*
- Adjusting the projector position topic in the *GS Series 1075 User manual (P/N: 020-001225-XX)*

Adjusting the projector position

When you select a position for the projector, consider the size and shape of your screen, the location of your power outlets, and the distance between the projector and the rest of your equipment. Follow these general guidelines:

- Position the projector on a flat surface at a right angle to the screen. The projector (with the standard lens) must be at least 4.27 feet (1.3 m) from the projection screen.
- Position the projector to the required distance from the screen. The distance from the lens of the projector to the screen, the zoom setting, and the video format determine the size of the projected image.
- Determine the lens throw ratio:
 - Lens 0.65~0.75:1 (WU)
 - Lens 0.75~0.95 (WU)
 - Lens 0.95~1.22 (WU)
 - Lens 1.22~1.52 (WU)
 - Lens 1.52~2.9 (WU)
 - Lens 2.9~5.5 (WU)
 - Lens 0.36 (120" screen, WU)
- 360 degree free orientation operation
