**Individually tested**

The handle/blade system - Kraftform Kompakt VDE

Each Kraftform Kompakt VDE set has been tested individually at 10,000 volts, in accordance with IEC 60900. This ten-times-higher testing load guarantees safe working at their maximum permitted load of 1,000 volts.

**Quick torque setting**

Quick setting of the selectable tightening torque values.

**Excess-load signal**

Distinctly audible and noticeable excess-load signal when the pre-set torque is reached.

**Safe torque transfer**

The slip-over torque mechanism for clockwise/counterclockwise torque operation prevents unintentional application of excessive torque.

**Handle/interchangeable blade system**

The handle/interchangeable blade system allows rapid exchange of the blades required for a wide range of applications.

**VDE interchangeable blade with reduced shaft diameter**

Reduced blade diameter with integrated protective insulation, allows sunken screws and spring elements to be accessed and actuated, individually tested as per IEC 60900.

**PlusMinus screwdrivers**

For the use in terminal blocks, control cabinets, switches, relays, sockets etc.
