Short term exposure limits (STEL) are for 15 min and long term permissible exposure limits (PEL) for 8 h.

**Engineering Controls****Ventilation**

Keep airborne concentrations below the occupational exposure limits (OEL).

The silver flakes are inextricably bound to the adhesive mixture; therefore, they are not available as airborne hazards under normal use. Ensure adequate ventilation if the product is mechanically aerosolized.

**Personal Protective Equipment****Eye protection**

Wear appropriate protective eyeglasses or chemical safety goggles.

**RECOMMENDATION:** Ensure that glasses have side shields for lateral protection.

**Skin Protection**

For likely contacts, use of protective butyl rubber, latex, neoprene, or other chemically resistant gloves.

For incidental contacts, use nitrile or other chemically resistant gloves.

**8331D-A****(PART A)**

**Respiratory Protection** If exposed to fumes or dust above the exposure limit, wear a suitable respirator meeting local, regional, and national guidelines.

If the product is heated or the worker has a known allergic reaction, consider using a full mask with organic vapor cartridge or with an independent air supply.

**RECOMMENDATION:** Consult your local safety supply store to ensure that your respirator has a NIOSH (U.S.) approved filter cartridges appropriate for the ingredients listed in Section 3. The respirator should be fitted to the employee by a professional.

**General Hygiene Considerations**

Wash hands thoroughly with water and soap after handling.

**Section 12: Ecological Information**

Ecological classifications are based on the IMDG/GHS criteria in conjunction with ecotoxicological data from our suppliers, the European Chemical Agency database (<http://echa.europa.eu>), and other reliable sources.

Contains silver particles of less than a 1 mm but more than 100 nm (larger than nanoparticles), which release ionic silver levels that is very toxic to the environment. While massive silver is insoluble in water, its powders is considered sufficiently soluble to give rise to an ecological hazard by EU regulators. The classification that follows takes into account to chronic aqueous toxicity of category 1 (M = 10 for silver) of the EU.

In Europe, similar epoxy resin with CAS# 28064-14-4 is generally classified as chronic category 2 marine pollutant due to LC50 96 h of  $>1 \text{ mg/L}$  but  $\leq 10 \text{ mg/L}$ .

|----------------------------|--|
| <b>Extinguishing Media</b> | In case of fire: Use extinguishing media suitable for surrounding materials.   |
| <b>Specific Hazards</b>    | <p>Not flammable or combustible, but will burn if involved in a fire. Produces irritating smoke and toxic smoke in fires.</p> <p>Inhalation of silver oxide fumes may cause metal fever and irritate the respiratory tract. The flu-like symptoms of metal fever may be delayed, occurring 4 to 12 hours after exposure.</p> <p>Very toxic to aquatic life: Prevent fire-fighting wash from entering waterway or sewer system.</p> |
| <b>Combustion Products</b> | Produces carbon oxides (CO, CO <sub>2</sub> ), nitrogen oxides (NO <sub>x</sub> ), amines, silver oxide fumes and other toxic fumes.   |
| <b>Fire-Fighter</b>        | Wear self-contained breathing apparatus and full fire-fighting turn-out gear.  |

|----------------------------------|--|
| <b>Personal Protection</b>       | Use personal protection recommended in Section 8.  |
| <b>Precautions for Response</b>  | Avoid breathing fumes or vapors. Keep away from extreme heat or open flames.   |
| <b>Environmental Precautions</b> | Avoid releasing to the environment. Prevent spill from entering drains and waterways.  |
| <b>Containment Methods</b>       | None required—this product is not readily flowable   |
| <b>Cleaning Methods</b>          | <p>Collect liquid in a sealable container. Wipe remaining residue with a paper towel and place dirty towels in container. Wash spill area with soap and water to remove the last traces of residue.</p> <p><b>RECOMMENDATION:</b> Use a plastic, stainless steel, or carbon steel container. Avoid containers with copper, aluminum, zinc, or galvanized surfaces since the waste mater can slowly oxidize them.</p> |

**Engineering Controls**
**Ventilation**

Keep airborne concentrations below the occupational exposure limits (OEL).

**RECOMMENDATION:** Because silver is bound to the liquid mixture, it does not present an airborne hazard under normal use. If the product is heated, use of local exhaust or full mask with organic vapor cartridge or independent air supply.

*Section continued on the next page*

**8331D-B****(PART B)****Personal Protective Equipment****Eye protection**

Wear appropriate protective eyeglasses or chemical safety goggles.

**RECOMMENDATION:** Use safety glasses with lateral protection (side shields).

**Skin Protection**

For likely contacts, use of protective butyl rubber, neoprene, or other chemically resistant gloves.

For incidental contacts, use nitrile or other chemically resistant gloves.

**Respiratory Protection**

For over-exposures up to 10 x OEL of fumes and vapors, wear respirator such as a half-mask respirator with organic vapor cartridges and particulate filter.

Above 10 x OEL or if the worker is allergic, use a full mask, positive-pressure, air-supplied respirator or a self-contained breathing apparatus.

If the product is heated or worker has a known allergic reaction, consider using a full mask with organic vapor cartridge or with an independent air supply.

**RECOMMENDATION:** Consult your local safety supply store to ensure that your respirator has a NIOSH (U.S.) approved filter cartridges appropriate for the ingredients listed in Section 3. The respirator should be fitted to the employee by a professional. Ensure vapor cartridges are stored in sealed plastic bags when not being used.

**General Hygiene Considerations**

Wash hands thoroughly with water and soap after handling.

**Section 12: Ecological Information**

Ecological classifications are based on the IMDG/GHS criteria in conjunction with ecotoxicological data from our suppliers, the European Chemical Agency database (<http://echa.europa.eu>), and other reliable sources.

Contains silver particles of less than a 1 mm but more than 100 nm (larger than nanoparticles), which release ionic silver levels that is very toxic to the environment. While massive silver is insoluble in water, its powders is considered sufficiently soluble to give rise to an ecological hazard by EU48 regulators. The classification takes into account to chronic aqueous toxicity of category 1 (M = 10 for silver) of the EU.
