Typical DataView® Functional Displays

Model 5070 includes Ramp Function which allows programming of three different ramp test profiles, each containing up to five voltage steps between 40 and 5100V and time per step of up to 10 hours.

Four tabbed dialog boxes allow for clear and easy setup of all functions of the Model 5070, including setup for variable voltage and alarm set points, as well as step voltage tests and temperature compensation.

Clear and easy setup from one dialog box for Model 5060.

One button operation starts test and graphs results

Test voltage selection

Test result status box displays complete test results in real-time

Insulation resistance during the test run

Step voltage during the test run
