

# FOCIS Flex Intro to Operation

May 2017

# FOCIS Flex Intro to Operation Outline

- What's New in FOCIS Flex (May 2017 Update)
- Controls, Display and Interfaces
- Connector Adapter Tips
- Operation
  - Power-up / Power-Down (including Auto-Off)
  - AC Power and Battery Operation
  - Image Display Modes
    - Live Display Mode: Manual Focus, One-time Auto-focus, Auto-focus & Capture
    - Captured Image Display Mode
  - Main Menu Settings Mode
    - Pass/Fail Analysis Settings
    - Auto-focus Enable/Disable
    - Bluetooth Settings
    - Beeper
    - Time & Date
  - Saving & Sending captured images and pass/fail results
  - Viewing Saved Results using Results Manager
  - File Transfer via Bluetooth and USB

# What's New in FOCIS Flex?

- **Updated FOCIS Flex HW & SW!**

- **Brighter, larger display** with power save auto-dimming
- Adds **MPO/MTP Auto-focus, capture & pass/fail analysis**
- Adds **iOS-compatible Bluetooth** with MFI chip
- Adds **WiFi live video streaming** (for future tablet App)
- Adds **AT&T & IPC pass/fail** criteria
- **Updated IEC pass/fail** criteria
- Configurable **auto-save & auto-send**
- **Image-pairing** (e.g. save image before & after cleaning)
- **International languages**
- **Instant On** power-up

- **Inspection Reporting:** Supported in TRM 2.0 & **aEROS®**

- Included in both Basic and Advanced versions
- **Free download** from [www.AFLglobal.com](http://www.AFLglobal.com) → Resources → Software
- TRM 2.0 now included with FOCIS Flex & FOCIS WiFi; aeRos Basic account is free

- **Android & iOS FOCIS Flex Apps:** **Free!**

- Now available from Google Play or Apple App Store
- Accepts inspection image + pass/fail overlay via Bluetooth
- Merges image & overlay and displays on smart device
- Integrates with **aEROS®** (Setups & Reporting)

# FOCIS Flex Controls, Display, Interfaces

- Controls

- On/Off Button & LED
- Capture Button
- F1 Soft Key (typically 'Back' function)
- F2 Soft Key (typically 'Select' function)
- Navigation & Edit keys

- Display

- Display Title
- Image & Information display area

- Interfaces

- Optical Inspection Port & Dust Cover
- 5 VDC input jack and charging LED
- Micro-USB port

# Connector Adapter Tips

- FOCIS Flex available with the following adapter tips:

	UPC Connectors		APC Connectors	
Connector	Ferrule	Bulkhead	Ferrule	Bulkhead
SC	FFLX-01-U25	FFLX-01-SC	FFLX-01-A25	FFLX-01-ASC
FC	FFLX-01-U25	FFLX-01-FC	FFLX-01-A25	FFLX-01-ASC
LC	FFLX-01-U125	FFLX-01-LC	FFLX-01-A125	FFLX-01-ALC
ST	FFLX-01-U25	FFLX-01-ST	Not applicable	Not applicable

- Removing Adapter Tips:

- Turn captive nut clockwise (viewed from front / top)
- Continue until captive nut is free of adapter tip
- Remove tip

- Installing Adapter Tips:

- Raise captive nut until it engages with adapter tip threads
- Turn captive nut counter-clockwise (viewed from front / top)
- Hand-tighten (do not over-tighten)

**Note:** For proper viewing, APC connectors must be aligned with the slot in the threaded area of the adapter tip

# Identifying Connector Adapter Tips

- Tips are engraved and shipped in labeled containers
- Engraving indicates connector type and application
- Labels indicate:
  - AFL Part Number
  - Connector Type – Ferrule Type (UPC or APC) – Application
- Blue ring indicates UPC connector tip; Green ring indicates APC tip

# APC Connector Orientation

## APC Connector Orientation using Universal 2.5 mm APC Ferrule Adapter:

Align connector key with slot in ferrule adapter tip

Good contrast image when properly oriented

Poor contrast image if improperly oriented

## APC Connector Orientation using SC-APC Bulkhead Adapter:

Align bulkhead key slot with slot in bulkhead adapter tip

Good contrast image when properly oriented

# Single-Row MTP/MPO Inspection

- Press ◀ to select 'MPO-U' or 'MPO-A' connector type in Live Image mode
  - MPO-U: Multimode MPO with PC finish
  - MPO-A: Single-mode MPO with APC finish (usually green connector)
- Base + Tip is required; Base attaches to DFS1 or FOCIS Flex
- Connectors are inspected through a bulkhead as shown
- Adjustment knob scans across row

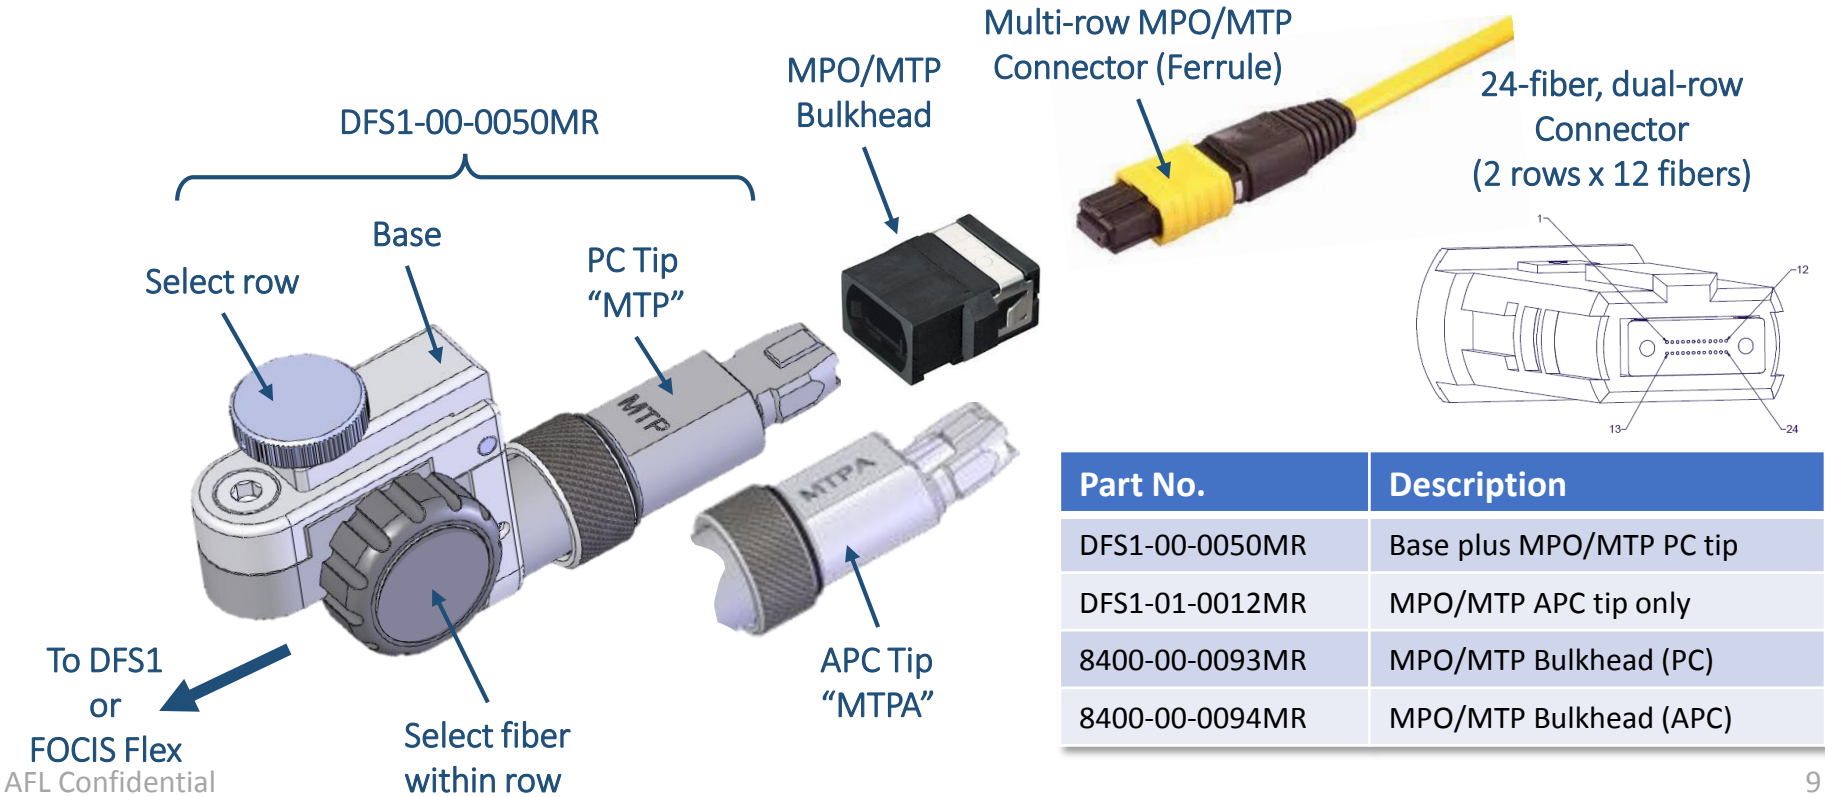

Part No.	Description
DFS1-00-0037MR	Base plus MPO/MTP PC tip
DFS1-00-0042MR	Base plus MPO/MTP PC & APC tips
DFS1-01-0010MR	Base plus MPO/MTP APC tip
DFS1-00-0041MR	MPO/MTP PC tip only
DFS1-01-0012MR	MPO/MTP APC tip only
8400-00-0093MR	MPO/MTP bulkhead (PC)
8400-00-0094MR	MPO/MTP bulkhead (APC)

# Multi-Row MTP/MPO Inspection

- Press ◀ to select 'MPO-U' or 'MPO-A' connector type in Live Image mode
  - MPO-U: Multimode MPO with PC finish
  - MPO-A: Single-mode MPO with APC finish (usually green connector)
- Connectors are inspected through a bulkhead as shown
- One adjustment knob scans across row
- Second adjustment knob selects row (up to 8 rows of 12 fibers per row)

# FOCIS Flex MPO Support

- New, enhanced FOCIS Flex supports MPO auto-focus, capture, pass/fail analysis
  - In Live Image mode, green circle identifies fiber end to be captured and analyzed
  - In Captured Image mode, three zoom levels available
  - Pass/Fail results table reports scratches & defects detected in A & B zones
- Supports both single-mode APC and multimode PC MPO connectors
- Uses the same MPO adapters previously utilized with FOCIS Flex & DFS1
- Results may be saved and included in TRM 2.0 or aeRos Test Reports
- Example FOCIS Flex MPO Images:

Live Image

Captured – Zoomed Out

Captured – Partial Zoom

Captured – Full Zoom

Pass/Fail Results

Captured @ 16:08:48		
Pass		
IEC: PC, SM, ORL ≥ 45 dB		
A B C	////	.....
A	>0 μm: 0	>0 μm: 0
B	>3 μm: 0	2-5 μm: 0 >5 μm: 0
C		
D		>10 μm: 0

# Opti-Tip / Opti-Tap Connector Inspection

- Opti-Tap Patch Cord Inspection
  - Use Universal 2.5mm APC ferrule adapter tip
- Opti-Tap Bulkhead Connector Inspection
  - Use DFS1-01-0007MR
- Opti-Tip Ribbon Patch Cord Inspection
  - Use DFS1-01-0013MR with barrel attached
- Opti-Tip Ribbon Bulkhead Connector Inspection
  - Use DFS1-01-0013MR with barrel removed

# FOCIS Flex Power Up / Down

- Power-Up
  - Press and release the On/Off Button
  - Display immediately powers up in Live Image mode
- Power-Down
  - Press and hold power button until display turns off
- Auto-Off
  - From Main Menu → Settings, select 'Power Save'
  - Select desired power save option (2, 5, 15 min or Never)

# FOCIS Flex AC Power & Battery Operation

- Operating from AC Power and Charging the Battery

- Plug the included AC Charger into AC outlet
- Connect charger plug into 5 VDC jack on FOCIS Flex
- Charging LED:
  - Off: AC not plugged in
  - Solid red: Discharged battery is being charged
  - Solid green: Battery is fully charged
  - Flashing red/green: Charging error.
    - Verify correct 5 VDC 2A charger used.

- FOCIS Flex charges while operating

- Battery Operation

- Battery status icon indicates battery state:

-  Charging, not fully charged
-  Charging, fully charged
-  Battery operation, fully charged
-  Battery operation, partially charged
-  Battery operation, <15 min operating time remaining

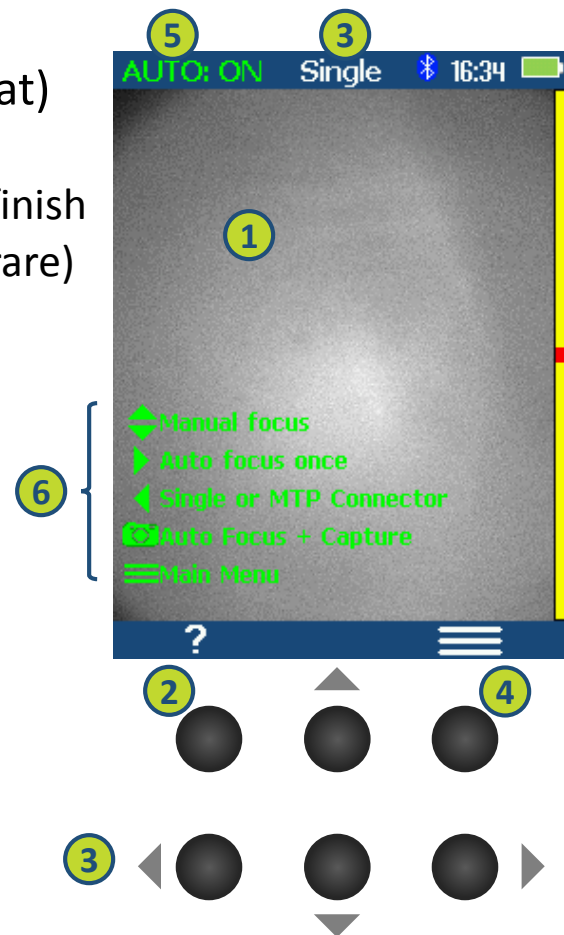

# Live Mode

1. FOCIS Flex powers up in Live Image mode
2. Help (?) soft key shows key functions
  - Popup Help displayed (6) while ? key pressed and held
3. Press ◀ to toggle connector type (Single, MPO, MPO-Flat)
  - Single = Single fiber connector inspection (UPC or APC)
  - MPO-PC/APC = MPO/MTP® multi-fiber conn.; PC or APC finish
  - MPO-Flat = MPO/MTP multi-fiber connector; Flat finish (rare)
4. Menu (≡) soft key selects Main Menu
5. When Auto-focus enabled & Capture (📷) pressed:
  - Auto-focus is initiated
  - Image is captured when auto-focus complete
  - Image is analyzed if Pass/Fail enabled
  - FOCIS Flex transitions to Captured Image Mode

**New!**

## When Auto-focus disabled:

- Press right arrow key (▶) to Auto-focus once
- Press Up/down keys (▲▼) to manually adjust focus
- Press Capture Key (📷) to capture image
- Image is analyzed if Pass/Fail enabled
- FOCIS Flex transitions to Captured Image Mode

# Capture Button Operation

- From Live Image Display mode:
  - Press Capture to:
    - Auto-focus image (if Auto-focus enabled)
    - Capture image
    - Analyze image (if Pass/Fail enabled)
    - Enter Captured Image Display mode
- From Captured Image Display mode:
  - Press Capture to return to Live Image mode
- From Main Menu or Settings modes:
  - Press Capture to return to most recent Live or Captured Image Display mode

# Captured Image – Image Display

- Captured Image Display (Zoomed In or Out)
  1. Filename (saved image) or 'Captured @ hh:mm:ss' (unsaved image)
  2. Pass/Fail indication (Only if Pass/Fail enabled)
  3. Display Tabs (select using left/right arrows [◀▶])
    - Zoomed Out Image
    - Partially Zoomed In Image
    - Fully Zoomed In Image
    - Pass/Fail Results Table
    - Image Information
  4. Endface Image with pass/fail region overlay
    - Failing scratches / defects highlighted in red
    - Passing scratches / defects highlighted in green
  5. Back softkey (↶)
  6. Image Layers (select using up/down keys [▼▲])
    - Endface + Overlay (Default)
    - Endface only
    - Overlay only
  7. Save/Send Menu soft key (☰)

# Captured Image – Pass/Fail Results

- Pass/Fail Results Table Display

1. Title: Filename (saved image) or 'Captured @ hh:mm:ss' (unsaved)
2. Pass/Fail indication (Only if Pass/Fail analysis enabled)
3. Pass/Fail display tab selected
4. Analysis Rule applied to determine pass/fail
5. Analysis Zone IDs (A, B, C, D)
6. Scratch analysis results for each zone
  - Reports number of detected scratches / defects
  - Failed rules highlighted in red
7. Defect analysis results for each zone
8. Back softkey (↶)
9. Save/Send Menu soft key (≡)

Captured @ 16:33:49

Fail

IEC: PC, SM, ORL ≥ 45 dB

Zone	Analysis Rule	Result
A	>0 μm:	0
A	>0 μm:	1
B	>3 μm:	0
B	2-5 μm:	16
B	>5 μm:	4
C		
D	>10 μm:	1

# Understanding IEC Pass/Fail Analysis

- IEC 61300-3-35 defines connector inspection pass/fail criteria
- Pass/Fail criteria depends on:
  - Fiber type (SMF or MMF)
  - Connector type (Single or MPO)
  - Connector finish (PC/UPC or APC)
  - Connector end face regions
    - A region: Core
    - B region: Cladding
    - C region: Adhesive (between cladding & ferrule)
    - D region: Physical contact area
  - Type of end face flaw:
    - Scratches
    - Defects (contamination, particles)
  - Size of flaw

# Example IEC Rule

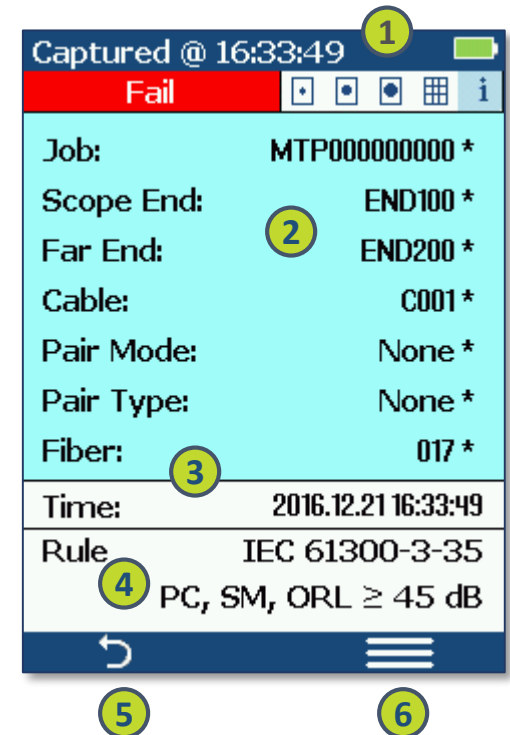

- Rules provided for each region:
  - When MPO/MTP connector inspected, C&D regions are not evaluated.
- Example provided for:
  - Single-mode PC connector with mated connector ORL  $\geq 45$  dB

Region	Scratches	Defects
A: Core	>0 $\mu\text{m}$ : 0 (No scratches > 0 $\mu\text{m}$ allowed)	>0 $\mu\text{m}$ : 0 (No defects > 0 $\mu\text{m}$ allowed)
B: Cladding	>3 $\mu\text{m}$ : 0 (No scratches > 3 $\mu\text{m}$ allowed)	2-5 $\mu\text{m}$ : 5 (Up to 5 defects 2-5 $\mu\text{m}$ diameter allowed)
		>5 $\mu\text{m}$ : 0 (No defects > 5 $\mu\text{m}$ allowed)
C: Adhesive	Blank (No limitations on scratches)	Blank (No limitations on scratches)
D: Contact	Blank (No limitations on scratches)	$\geq 10$ $\mu\text{m}$ : 0 (No defects $\geq 10$ $\mu\text{m}$ allowed)

IEC Rules		10:44	
Rule		IEC 61300-3-35	
		PC, SM, ORL $\geq 45$ dB	
A B C			
A	>0 $\mu\text{m}$ : 0	>0 $\mu\text{m}$ : 0	
B		2-5 $\mu\text{m}$ : 5	
	>3 $\mu\text{m}$ : 0	>5 $\mu\text{m}$ : 0	
C			
D			
			>10 $\mu\text{m}$ : 0

# Device Info Display

1. Title indicates saved or unsaved results
  - 'Captured @ hh:mm:ss' if unsaved
  - '<Cable>-<Fiber>' if saved
2. Blue highlighted area indicates default folder / file names if results are saved
3. Time indicates Time & Date image captured
4. Rule identifies pass/fail analysis rule applied
5. Back softkey (↶)
6. Save/Send Menu soft key (≡)

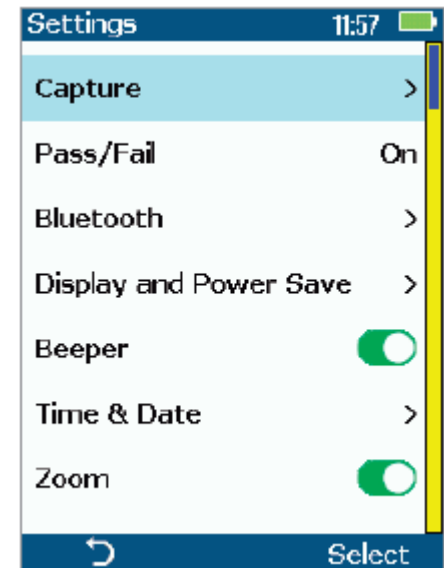

# Main Menu

- Press Menu (≡) from Live Mode
- Use up/down arrows (▲▼) to select option
  - **Settings:** Configure auto-focus, pass/fail, Bluetooth, etc.
  - **Results Manager:** View or Send saved results
  - **Last Image:** Recall most recently viewed image
  - **WiFi:** Configure WiFi for remote access (future)
  - **Device Info:** View serial number, software rev, etc.
- 'Select' and right arrow (▶) select highlighted option
- Press Back (↶) to return to Live Image mode

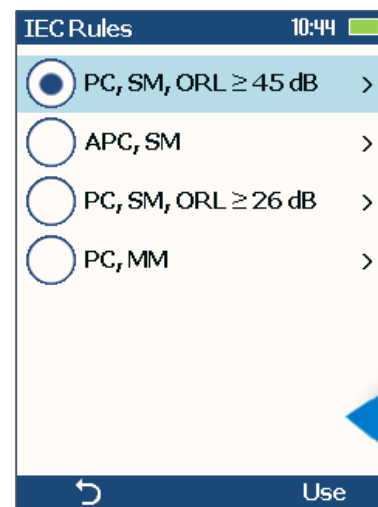

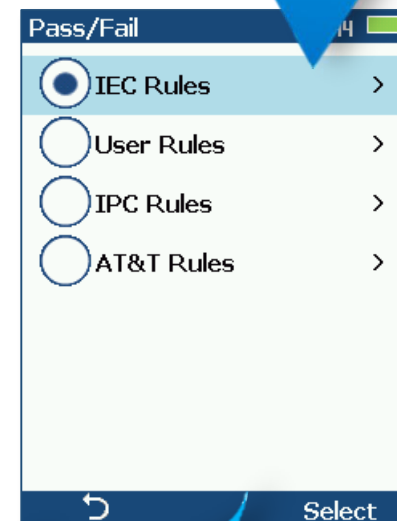

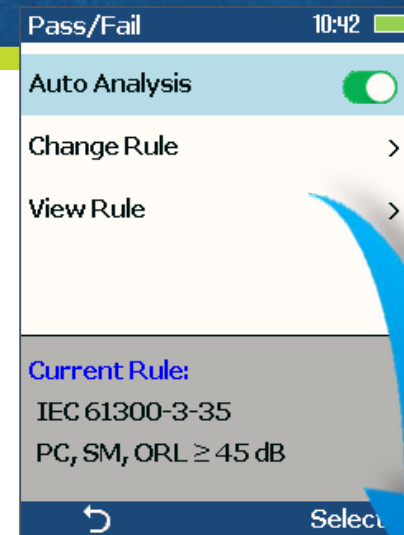

# Settings Menu

- ▲▼ scroll to highlight setting to edit
  - **Capture**: Configure Capture button settings
  - **Pass/Fail**: Configure Pass/Fail Settings
  - **Bluetooth**: Pair to Bluetooth device
  - **Power Save**: Configure display brightness & auto-off
  - **Beeper**: Enable/disable beeper
  - **Time & Date**: Adjust time and date
  - **Zoom**: 2X Zoom (helpful for subjective end-face analysis)
  - **Language**: Select user interface language
- For most settings:
  - Use 'Select' or ► to edit highlighted settings
- When Beeper highlighted:
  - 'Select' toggles setting
  - ◀ disables setting
  - ▶ enables setting
- Press Back (↶) to return to Main Menu
- Press Capture to return to previous image display

# Pass / Fail Settings

- Auto Analysis:
  - ◀ disables; ▶ enables pass/fail analysis
  - 'Select' soft key toggles pass/fail analysis state
- Change Rule:
  - Highlight 'Change Rule' & press 'Select' or ▶ to change current rule
  - Use ▲▼ to highlight, then 'Select' desired rule group
    - **IEC Rules:** Per IEC-61300-3-35
    - **User Rules:** User-settable pass/fail settings
    - **IPC:** Per IPC 610-DC-16.1.1/2
    - **AT&T:** AT&T-specific pass/fail settings
  - Use ▲▼ to highlight desired rule, then press 'Use'
- View Rule
  - Highlight & press 'Select' or ▶ to view details for highlighted rule
  - User Rules may be edited while viewing

# Bluetooth Settings

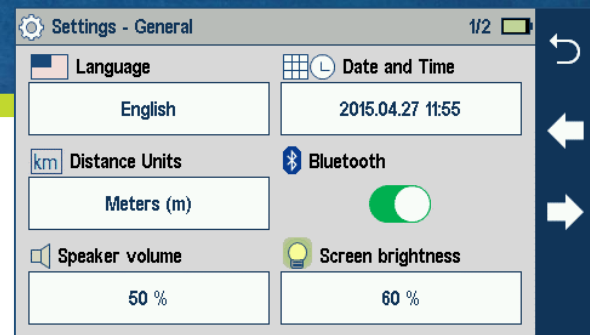

- Auto Send (to FlexTester):

- ◀ disables; ▶ enables auto send
- 'Select' soft key toggles auto send state
- Cannot enable unless paired to another Bluetooth device

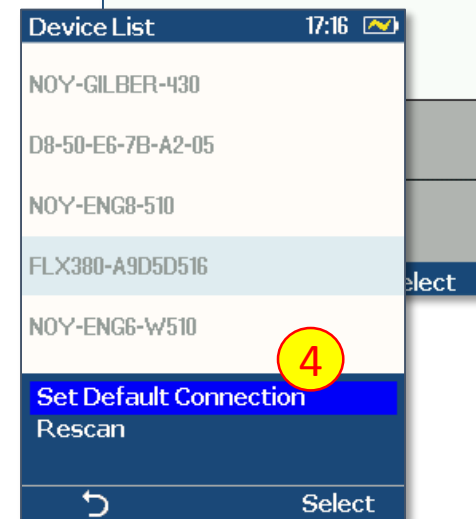

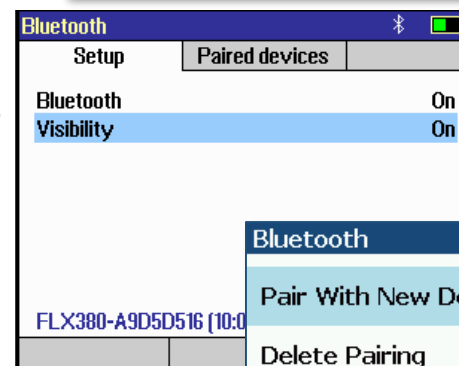

- To pair with FLEXSCAN or FlexTester:

- 1 Enable Bluetooth in FLEXSCAN Settings
- 2 Or configure FlexTester for pairing:
  - Select 'Bluetooth' from FlexTester 'Settings' screen
  - Set Bluetooth = ON; Set Visibility = ON
- 3 From FOCIS Flex, highlight & 'Select' Pair With New Device
  - Wait for list of visible devices to be shown
  - Use ▼▲ keys to select FLEXSCAN or FlexTester to pair
- 4 Select 'Set Default Connection' to complete pairing
  - After pairing, set FlexTester Visibility = OFF

1  
FLEXSCAN  
Settings

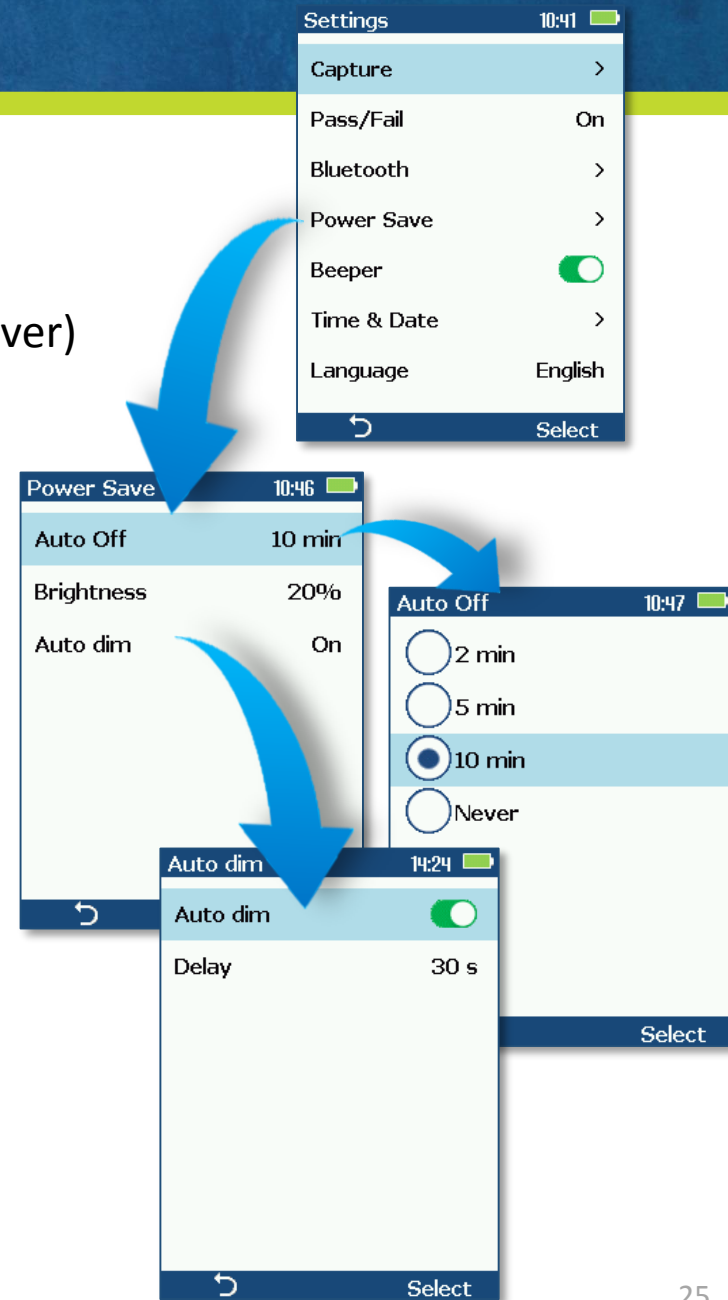

2  
FlexTester  
Settings

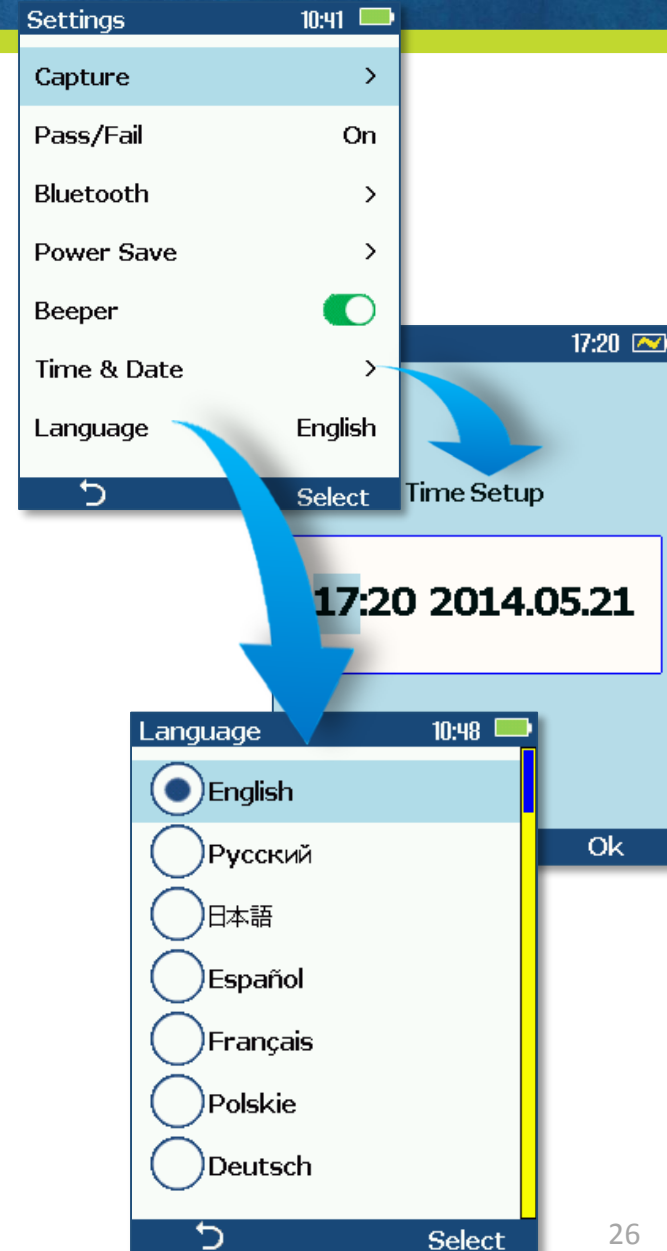

# Power Save Settings

- Select Power Save from Settings
  - Highlight & Select Auto Off
    - Highlight and select desired Auto-off time (or Never)
  - Highlight & Select Brightness
    - Use ▲▼ to increase or decrease brightness
    - Dimmer display extends battery life
  - Highlight and Select Auto dim:
    - Select Auto dim
    - Use ◀▶ to enable/disable auto-dimming
    - Select Delay
      - Use ▲▼ to increase / decrease auto dim time

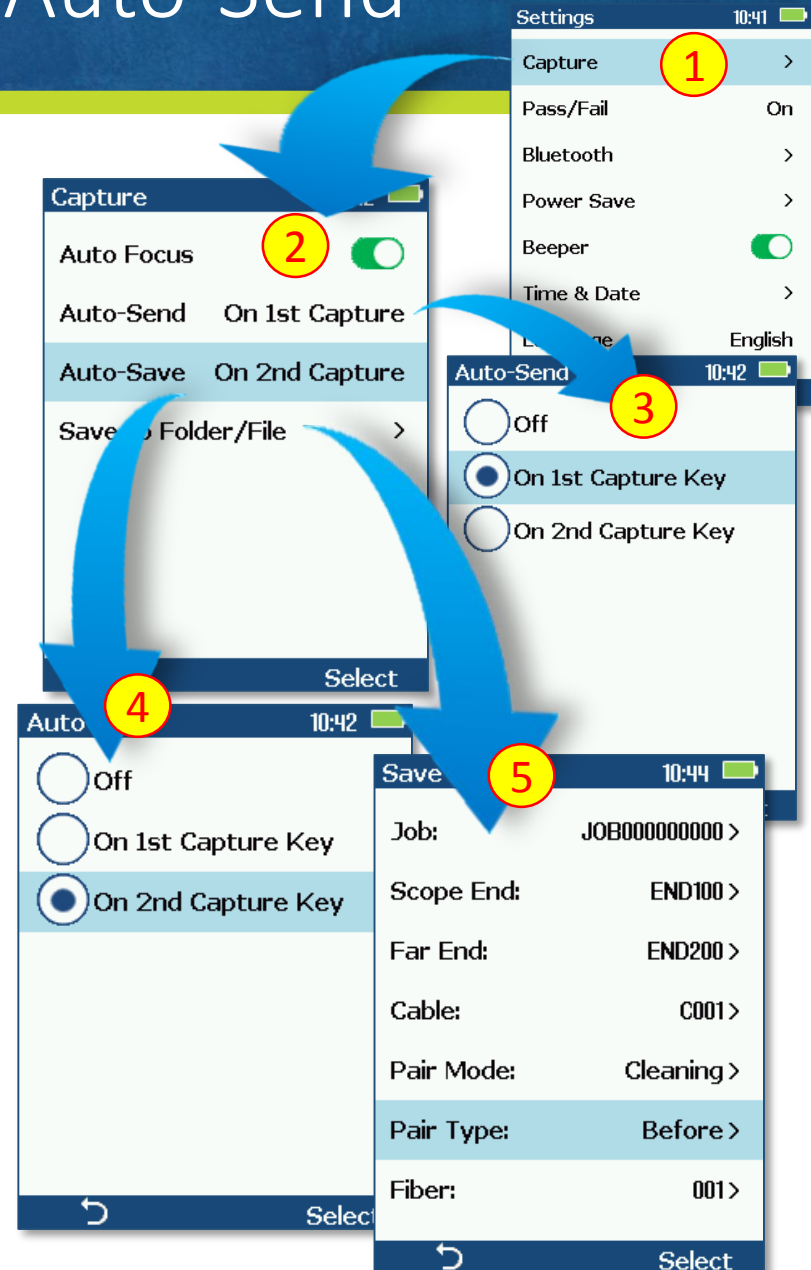

# Set Time & Date; Select Language

- Set Time & Date:
  - Highlight and 'Select' Time & Date from Settings
  - Use ◀▶ to select time/date field to edit
  - Adjust setting using ▼▲
  - Select 'Ok' to complete time/date setting
- Select Language
  - Highlight and 'Select' Language from Settings
  - Highlight and 'Select' desire language

# Configuring Auto-Save & Auto-Send

- 1 Select Capture from Settings Menu
- 2 Highlight Auto Focus
  - Use ◀▶ to enable or disable auto-focus
- 3 Highlight and Select Auto-Send
  - Use ▲▼ to disable auto-send, enable on first Capture, or enable on second Capture
- 4 Highlight and Select Auto-Save
  - Use ▲▼ to disable auto-send, enable on 1st Capture, or enable on 2nd Capture
- 5 Highlight and Select Save to Folder/File
  - Use ▲▼ to select & edit folder/file fields
  - When Auto-Send/Save is enabled:
    - Press Capture from Live Image mode to auto-focus (if enabled), capture image, analyze pass/fail (if enabled), then send image and pass/fail results to paired device and save image and pass/fail results to configured Job/Cable folder.

# Configuring Image-Pairing

- What is Image Pairing?
  - Allows user to capture and save two images for each fiber
- Pairing Modes & Pairing Types:

Pairing Mode	Pairing Type
<b>None</b>	<b>None</b> – Image pairing disabled
<b>Cleaning</b>	<b>Before</b> – image before connector cleaned <b>After</b> – image after connector cleaned
<b>Input / Output</b>	<b>Input</b> – network input connector image <b>Output</b> – network output connector image
<b>Documentation</b>	<b>As built</b> – image of connector when network built <b>As found</b> – connector as found when troubleshooting
<b>Mating</b>	<b>Jumper</b> – image of patch cord connector <b>Bulkhead</b> – image of panel-mounted bulkhead connector

Save As... 10:44

Job: JOB000000000 >

Scope End: END100 >

Far End: END200 >

Cable: C001 >

Pair Mode: Cleaning >

Pair Type: Before >

Fiber: 001 >

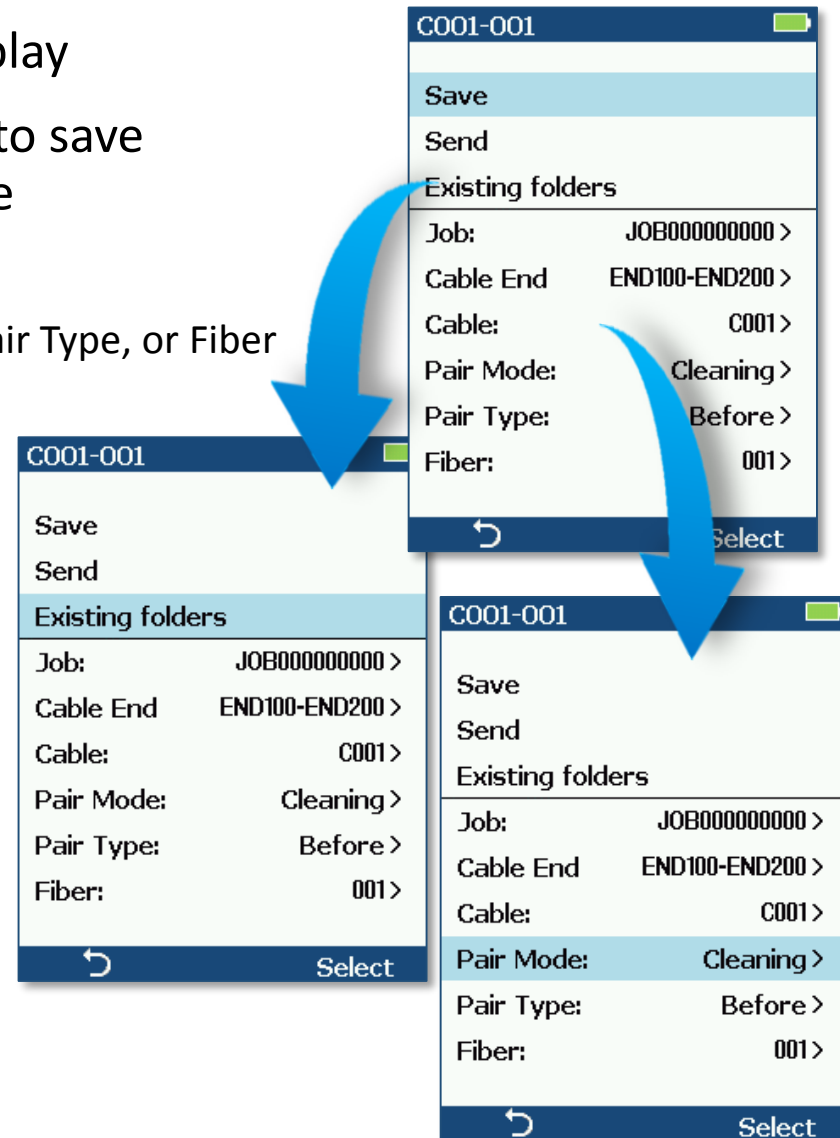

Select

- TRM 2.0 allows user to prepare reports containing paired images

# Saving Captured Images

- Press 'Menu' (≡) from Captured Image Display
- Highlight 'Save' and press 'Select' soft key to save image and results to currently indicated file
- To edit file name:
  - Navigate to Job, Cable End, Cable, Pair Mode, Pair Type, or Fiber to edit using ▲▼ keys
  - Press ► or 'Select'
  - Use ◀▶▲▼ keys to edit field
  - Press 'Ok' soft key
- To save to an existing folder:
  - Highlight 'Existing folders'
  - Press ► or 'Select'
  - Use ▲▼ to select desired Job folder
  - Press ► to open selected Job folder
  - Repeat for desired Cable folder & Fiber
  - Press 'Use' soft key
  - Highlight 'Save' and press 'Select'

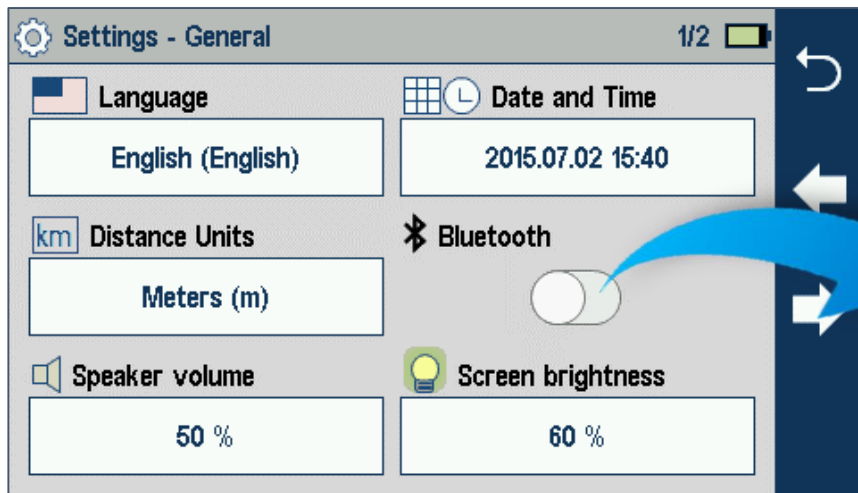

# Using FOCIS Flex with FLEXSCAN OTDR

- Inspection is completed using FOCIS Flex
  - Auto-focuses on connector end-face
  - Captures end-face image
  - Auto-centers image and applies IEC or user-selected pass/fail criteria
  - Displays image and pass/fail results on FOCIS Flex
  - Optionally automatically transfers image and pass/fail results to FLEXSCAN
- Transferred Image and pass/fail results may be displayed on FLEXSCAN
  - Image and results can be stored in FLEXSCAN, associated with OTDR results
- Process:
  - Enable Bluetooth on FLEXSCAN
  - Enable Bluetooth on FOCIS Flex and pair FOCIS Flex to FLEXSCAN
  - Select Connector Inspection on FLEXSCAN
  - Press 'Capture' on FOCIS Flex; View image & results on FLEXSCAN

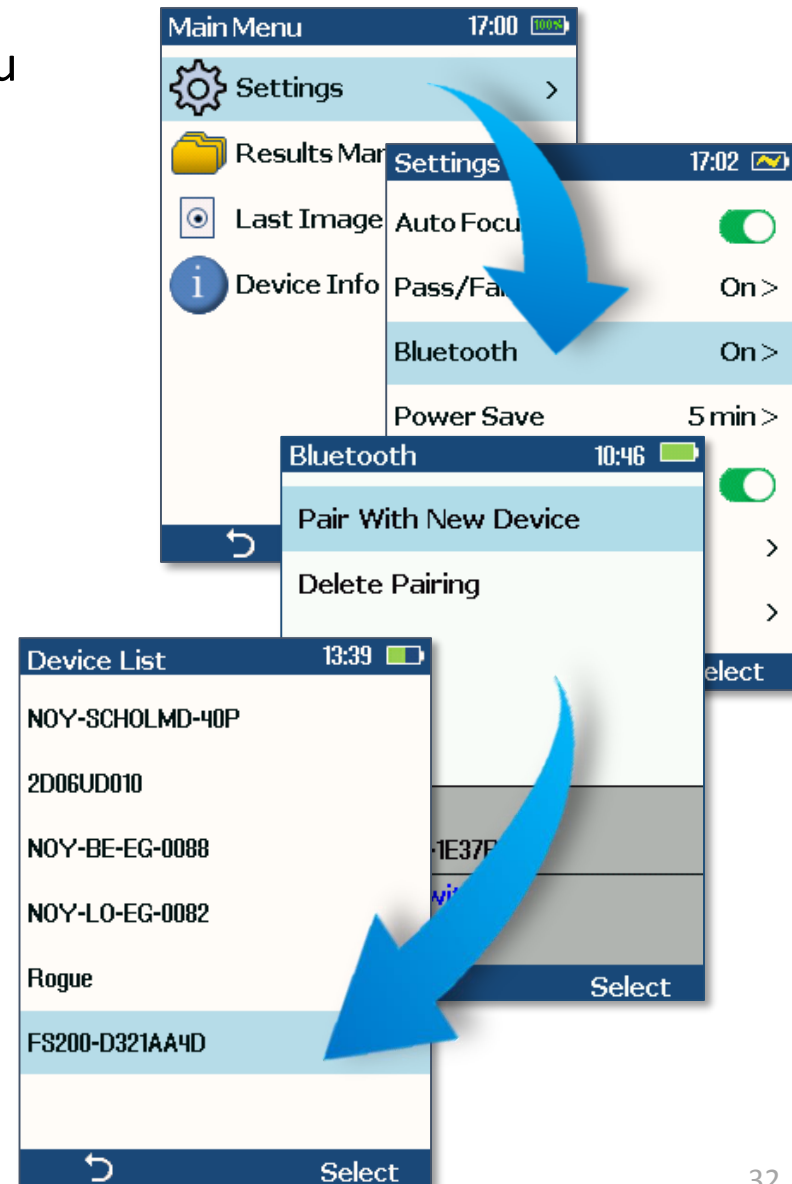

# Enable Bluetooth on FLEXSCAN

- Select 'Settings' from Home screen
- Select 'Bluetooth' from Settings screen
- Enable 'Bluetooth radio' on Bluetooth screen

# Pair FOCIS Flex to FLEXSCAN

- Select 'Settings' from FOCIS Flex Main Menu
- Select 'Bluetooth' from Settings Menu
- Select 'Pair with New Device'
- Wait for list of devices to be displayed
- Select displayed 'FS200' device and 'Set as Default Device'

# Capture and View Results

- Press 'Capture' on FOCIS Flex
- FOCIS Flex auto-focuses, captures, analyzes, and sends to FLEXSCAN
- FLEXSCAN displays image and pass/fail results (assuming pass/fail enabled on FOCIS Flex)
- Touch 'Save' folder to save results on FLEXSCAN

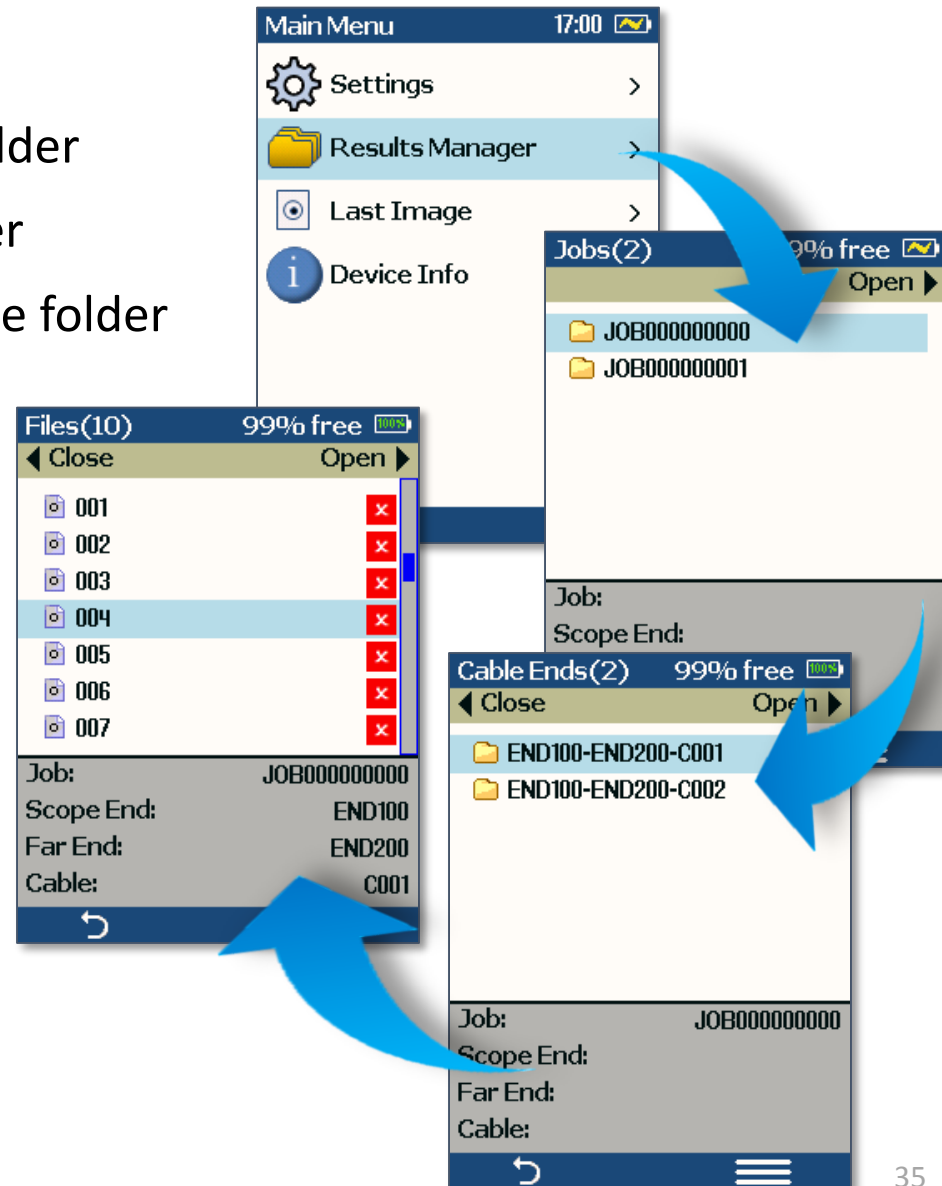

# Manually Send Results to FlexTester

- Select FlexTester Settings → Bluetooth...
- Enable Bluetooth with Visibility = 'On'
- Pair FOCIS Flex with FlexTester
  - See slide [Bluetooth Settings](#)
  - Enable Auto Send in Bluetooth Settings
- Capture an Image or Recall Saved Image
  - See slide [Capture Button Operation](#)
  - See slide [Results Manager – View Saved Images](#)
- Press Menu (≡) from Captured Image mode
- Highlight 'Send' and press 'Select'
- After a few seconds, captured image will appear on FlexTester
  - Press ⇨ key on FlexTester to view pass/fail results table

# Results Manager – View Saved Images

- ‘Select’ Results Manager
- Use ▼▲ to navigate to desired Job folder
- Press ► to select highlighted Job folder
- Use ▼▲ and ► to select desired Cable folder
- Use ▼▲ and ► to select desired File

# Transferring Results via USB

- Turn FOCIS Flex Off
- Using provided USB cable, connect FOCIS Flex's micro-USB port to PC's USB port
- Verify FOCIS Flex displays:
  - Video
  - Mass storage
- Select Mass storage mode
- At PC, select 'My Computer'
- Verify device labeled 'PROBE (E:\)' appears in My Computer window
  - Note: Drive letter assigned to PROBE device may be different
- Double-click PROBE (E:\) device to view contents of FOCIS Flex internal memory
- Double-click on RESULTS folder
- Drag, copy, or move some or all of the results to your PC
- When finished, disconnect USB cable, then turn off FOCIS Flex

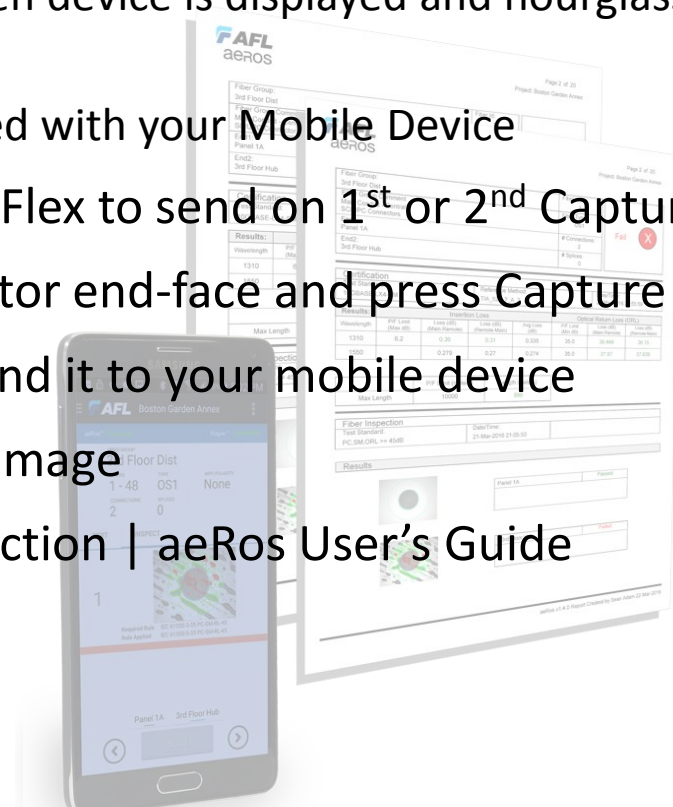

# Inspection Reporting using TRM 2.0

- Upload inspection results to PC using supplied USB cable (see previous slide)
- Install and run TRM 2.0
- Select Report Wizard
- Navigate to uploaded FOCIS Flex Results
  - Select entire [Cable] for all results
  - Select individual fiber for single result
- Select desired inspection template (2 or 12 results per page)
- Select Finish and print or save as .PDF

# Using FOCIS Flex with FOCIS Flex App

- Download FOCIS Flex App to your Mobile Device
- Pair FOCIS Flex to your mobile device
  - In mobile device Bluetooth Settings, make device visible
  - In FOCIS Flex Bluetooth Settings, select 'Pair to new device'
  - Select displayed mobile device (when device is displayed and hourglass disappears)
  - Select 'Set as Default'
  - Verify FOCIS Flex indicates it is paired with your Mobile Device
- In Capture Settings, configure FOCIS Flex to send on 1<sup>st</sup> or 2<sup>nd</sup> Capture Key
- From Live Image mode, view connector end-face and press Capture
- FOCIS Flex will capture image and send it to your mobile device
- FOCIS Flex App will display received image
- For App details, see FOCIS Flex Inspection | aeRos User's Guide
