Adjustable Torque Wrenches

ATB Adjustable Breaking Torque Wrenches

ATB 10 G

ATB 25

EPA compliant, compact, versatile, and lightweight tools engineered to reduce the risk of under and over tightening in production, service, and repair. Calibrated scale allows for pre-setting of torque.

- Unique breaking technology prevents under and over tightening
- Visible micrometer style scale allows user to adjust the torque setting quickly and easily
- Compact design allows for use in restricted areas
- Some models are EPA compliant for use in electro-statically sensitive areas
- High quality, durable and ergonomic design and construction
- Reduces the likelihood of warranty and rework by assuring process control through accurate and repeatable torque
