

AVTEQ's new DynamiQ Wall Mounted Stand is a display lift system intended for large format touch panel displays where an adjustable height feature will be needed or desired.

The stand, powered by an electric lift, will allow you to safely and quietly raise and lower single displays up to 300 lbs. The system can be controlled with the touch of a button located on a mounted side panel, which includes 2 presets, or programmed to work with control panels.

Your choice of frame color from white, black or Gun Metal Gray and paneling and be custom skinned in veneer or laminate panels to match any environment. Cabling pathways throughout with 3RU of vertical rack space.

Unit MUST be anchored to the wall.
