

VC520 Video Conference Camera System

Professional Video Collaboration for Mid to Large Conference Rooms

Plug-N-Play

Professional USB, Plug-N-Play Video Collaboration system for Mid to Large Conference Rooms

The AVer VC520 breaks the mold of traditional, expensive and complicated video conferencing systems that require a network administrator to operate. The VC520 is an affordable, professional-grade USB PTZ video collaboration camera optimized to deliver an exceptional video and audio communication experience. It is compatible with all of your favorite applications connecting to virtually any desktop or laptop, via a single USB cable. Gone are the headaches of having to modify complicated network firewalls to make a video call.

With the VC520, video conferencing is now as simple as plugging in a USB cable.

Quality and Features

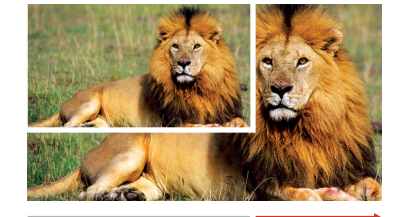

12X Optical Zoom with PTZ

With one of the fastest and smoothest true 12X optical zoom cameras available on the market today, the VC520's multi-element, multi-coating auto-focus optics and 12X true optical zoom delivers rapid and smooth pan, tilt and zoom-in performance to capture the smallest details with absolute clarity at every focal length.

Full 1080p High Definition Video

With Full 1080p High Definition Video built into the VC520, you will enjoy the highest resolution available for your video conferencing and video collaboration calls.

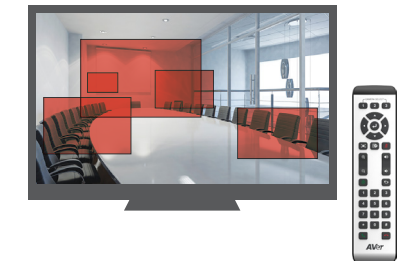

Daisy-Chain Speakerphone System

The days of having to crowd around a single speakerphone are now over! The VC520 includes a full duplex, echo cancelling and noise suppression speakerphone with the ability to daisy-chain an additional speakerphone. Each speakerphone can cover a 30ft diameter. With full duplex, you will no longer get cut off in mid-sentence, talked over or miss critical details of the conversation.

10 Camera Presets

Having only one camera preset can be extremely limiting. The VC520 allows you to customize your meetings by storing up to 10 PTZ presets. Each preset can be easily accessed with one touch of the remote, saving you time and providing flexibility to swiftly move to predetermined locations in the conference room.

Unrivaled Warranty

Ever need a replacement product quickly only to get stuck in the slow RMA process? AVer's 72 Hour Advanced Replacement Program* ensure the customer receives a replacement product within 72 hours during the first year of ownership. This combined with a 3 Year warranty, guarantees total protection and peace of mind for years to come, at no additional cost.

*Available for Continental USA/Alaska/Hawaii only

Tech Specs
