**Step 1: Unboxing your cart**

- 1.** Wearing protective eye wear, use wire cutter to cut green straps.

- 2.** Locate & remove screws on lid, then remove lid & set aside.

- 3.** Locate & remove screws on each corner at base of pallet.

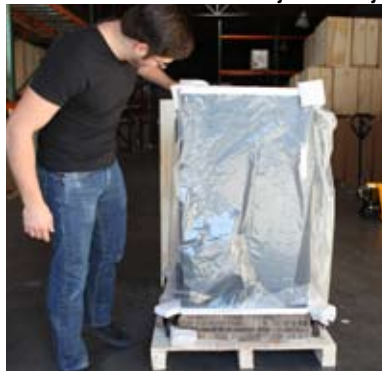

- 4.** With an assistant, carefully lift container upward & set aside.

- 5.** Inspect cart thoroughly for any shipping damage or defects.

**NOTE:** Any shipping damage claim must be submitted within 5 business days of delivery.

- 6.** Apply brakes to both front wheels.

- 7.** With an assistant, slowly tilt cart forward while removing cardboard cart support from underneath.

- 8.** Set cart back down, unlock all wheels & slowly roll cart off of pallet.

- 9.** Put all packing materials together and retain for any warranty claims.

Cable Pass-thru Slots

Adjustable Dividers

Retaining Strip & Thumbscrews

Locking ER Wheels

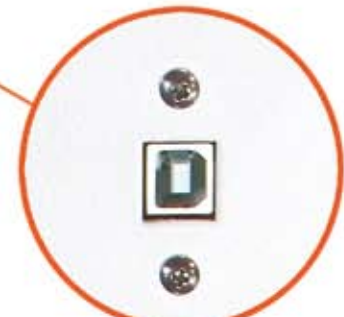

Removable Adapter Baskets

Main Power Switch

Cycle Timer

Optional Sync Port

## Step 2: Adjusting Dividers

Device slots come set at 1" wide and are adjustable in 1/2" increments to fit any device width.

1. Using a ruler, measure the thickest part of your device. If it is less than 1" thick, skip to Step 3: Power Adapter Setup.

2. If your device is thicker than 1", locate & remove thumbscrew by turning counter clockwise.

3. Slide Retaining Strip forward & out of the way. Strip can be removed if needed.

4. Pulling forward, then up, remove divider panel.

5. Adjust spacing as needed in 1/2" increments.

6. Slide retaining metal strip into place & replace thumbscrew.

## Step 3: Power Adapter Setup

1. Remove basket by pulling forward first, then pull upward.

2. If your device power adapters are "wall wart" style, plug into outlets & skip to step 5.

3. If your device power adapters are "brick" style, feed power cables thru holes on bottom & add up to 6 adapters per basket.

4. Hook basket(s) back in place & plug power cables into outlets.

5. Feed 6 device cables thru each slot.

6. Working up front, weave device cables into divider tabs.

## Step 4: Timer Operation

In **Timer** Mode, 1 LED illuminates at a time for 5 min.

In **ON** Mode, 4 LED illuminate at the same time.
