Anywhere Cart is a world-class manufacturer of secure charging and storage carts for Chromebooks, iPads, Tablets & Laptops designed specifically with you, the educator in mind. With over 300 school districts in 40 states making Anywhere Cart their new standard, its no wonder why we are the fastest growing cart company in the country. Our innovative features and superior build quality have set us apart from the established brands. With a wide range of classroom solutions, all of our models feature:

- Fully Assembled, Welded All-Metal Construction
- Integrated Cable Management
- UL listed electrical components
- Lifetime Frame Warranty

Our History

For over 20 years, we have helped provide state-of-the-art technology to the educational market. Our goal has always been to find solutions for our customer’s individual needs, while at the same time providing cost-effective, reliable and user-friendly products.

After speaking with technology integrators, tech directors, support staff and installation teams at various districts across the country, it became clear that our customers needed a cart that would fit multiple device types, sizes, widths & power adapters. In the past, customer’s bought device-specific carts which now won’t work with their current devices. They also expressed a need for a cart durable enough to go anywhere on campus. Since each school is unique, our goal was to build a cart that could go ANYWHERE.

After months of development and testing, we launched our first Anywhere Cart which featured all-metal construction, integrated cable management, oversized wheels and steel skid plates along the bottom, an industry first.

Anywhere Cart has built its reputation on a commitment to providing high quality products while rapidly responding to your needs. We analyzed your feedback to develop a full range of products to help you do what you do best; teach!

Manufacturing

Since its inception in 2013, Anywhere Cart has successfully grown to become a multi-national manufacturer, reflecting the demand for its cutting-edge products.

We are committed to certification under ISO 9001 and ISO 14001 worldwide standards for quality.

Our continuing success has come about through our ability to learn from you, our customers. We are constantly working to make your job easier by using technology with the promise of an even brighter future for our children, a future that will provide greater opportunities in learning.

We hope you will join us in setting the new standard for secure charging carts across the country and we welcome you as a part of the Anywhere Cart family.

Thank you,

Todd McKelvie
President

TECH-TIPS:

Removable AC Adapter Baskets

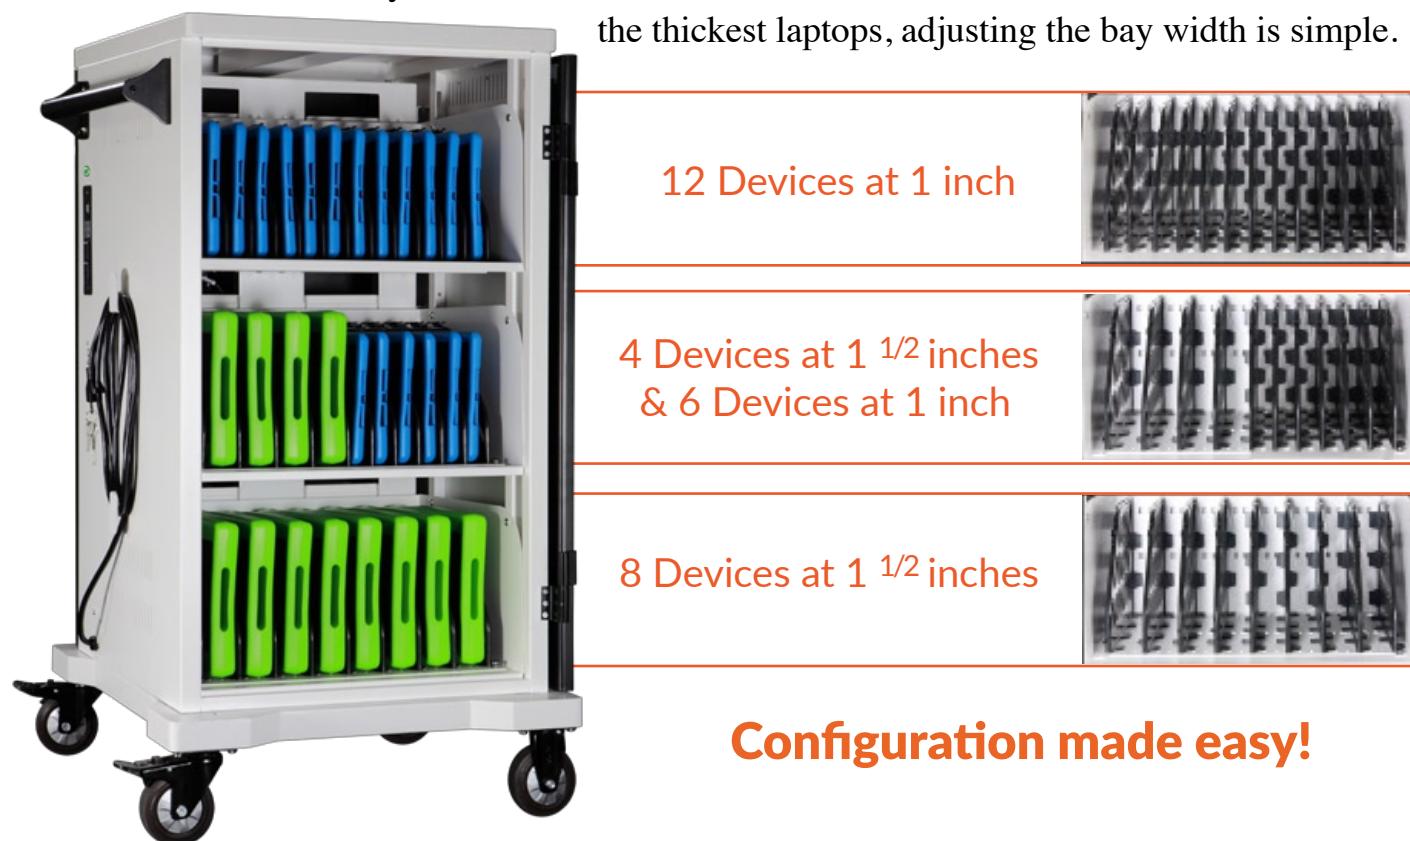

Ever feel like you're working harder than you should? We've heard stories of banged-up knuckles, sore knees and aching backs from being hunched over; taking up to 2 hours for a single cart.

With our exclusive **Removable AC Adapter Baskets**, you can allocate time and resources more efficiently, plus eliminate personal injuries caused by traditional cart setups. With an Anywhere Cart, deploying carts has never been safer, faster or easier.

Deploy 36 devices in just 45 minutes!

User-Configurable Device Dividers

How long does it take for your latest device to become obsolete? With our ultra strong **User Configurable Device Dividers** (except on AC-PLUS), you can be assured that both now and in the future, your devices will fit. From ultra-thin tablets and Chromebooks to even the thickest laptops, adjusting the bay width is simple.

Intelli-Timer: 3 Modes That Matter In The Classroom

Why is everyone talking about our **Intelli-Timer**? We asked educators around the country to tell us what features they needed and left out what they didn't.

Being able to charge your devices right before a long weekend and automatically shutting OFF after 8 hours in **Mode A** gives you peace of mind that your cart isn't drawing any load when you go home.

Or how about making sure all your devices are charged for you when you get to work in the morning? Switching to **Mode B** allows all of your devices to be charged by cycling between half the devices for the duration you set.

Imagine you need all your devices charged at the same time during recess or before state testing? **Mode C** allows all of your devices to be charged at once.

Have you ever heard of students ripping the power cord out of the wall? We have. Our Intelli-Timer comes standard with a **User-Replaceable Power Cord**. In the event of damage, your cart can be back in operation in 5 minutes.

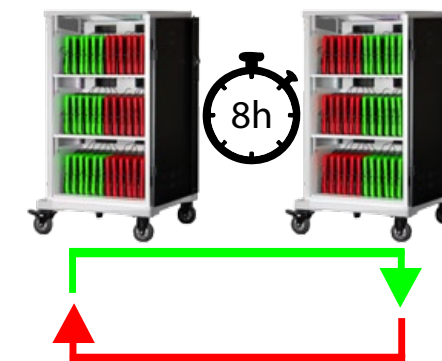

Adjustable cycles from 15 to 240 minutes

**Mode C is recommended only if your device's TOTAL power draw does not exceed 1875 watts.*

Constant Power

Strength & Security

In a perfect world, we wouldn't have to lock our front door at home, lock our cars at the grocery store, or keep our valuables in a safe. But as we all know, keeping expensive devices under lock and key is as important as using the devices themselves. Considering both strength and security in your next tech storage unit doesn't have to be difficult. In fact, buying a cart with security in mind correlates directly to having a cart that will last a lifetime.

Don't be fooled by carts that are built with pressed wood board or MDF, even just the top or bottom. Would you feel comfortable placing jewelry in a wooden safe? Any wooden panel may allow easy access to your devices by a low skilled intruder.

All Anywhere Cart models offer 12 gauge steel and fully welded frames, making it impossible to pry the top, bottom or sides off. This also prevents easy puncturing and drilling, often deterring thieves from attempting a break-in.

Hinges are another important factor to consider when comparing the security and durability of a cart. They should feature no visible fasteners whatsoever. If fasteners are visible, hinges can be easily drilled, giving instant access to your devices. Hinges which are capable of supporting the door isn't enough; they should also be hardened steel to help prevent intruders from prying them off.

The type of locking mechanism is probably the most critical element of a good quality cart. Make sure doors have more than one locking point. All Anywhere Carts feature multi-point locking doors (3 points on carts, 2 points on the AC-MINI cabinet), which prevents access from single point pry damage. Anywhere Cart models also feature a padlock loop which allows you to use a padlock on your carts. Having both a keyed, multi-point lock as well as a padlock loop means you could use a dual locking system for additional security in higher risk environments.

Since the overall construction of a cart directly impacts its strength and security, making sure your next cart is an Anywhere Cart, ensures both longevity and security for a lifetime.

The HearSay

Over 300 School Districts Have Now Standardized on Anywhere Carts... Including School Districts Near You!

"Will you please send me a quote for 8 of those fantastic AC-SLIM carts? Those carts really are amazing and more people should know it!"

Dennis W.
Technology Coordinator
Southern Georgia

"These carts are 'fracking' awesome! The timer is great and way easier than the egg timers on others. The locks, extra plugs and sub chargers are all great."

Jared J.
Director of Technology
Central California

"Finally, a cart that easily moves throughout our school!"

Denise C.
Kindergarten Teacher
Central Kansas

"Setting up an Anywhere Cart is so much faster than our previous carts."

David P.
Instructional Technology Specialist
Southern Florida

"We can get Chromebooks into the hands of our students 3 times faster than before."

Tamara L.
Middle School Science Teacher
Central Nebraska

"Can you please send me price quotes for 3 more AC-SLIM Anywhere Carts? We like them and are going to be switching to these!!! Thanks and we appreciate all you do for us up here!"

Melea M.
Network Support Specialist
Central Indiana
