

## Cole-Parmer® Serological Pipettes, PS

### Fit just about any pipettor

These serological pipettes are made from transparent polystyrene (PS), sterilized by gamma irradiation, and designed for quick and accurate fluid dispensing. The highly legible permanent graduations prevent ambiguity and guarantee precise dispensing to ±2%. Graduations show volume removed or remaining on all pipettes larger than 1 mL. Generous negative graduations provide additional pipetting volume.

Unique filter plug eliminates lint fibers and ensures plug stays in place to prevent overfilling. The uniform mouth piece fits all major pipettors and has color-coded TD rings for easy identification. Each lot is tested for endotoxins and cytotoxicity, and guaranteed nonhemolytic—ideal for your tissue culture applications.

The individually wrapped pipettes are supplied in a fiber-free paper/plastic combination that is easy to open. The dispenser box allows you to remove pipettes without opening the top. Universal stacking design requires less laboratory space and each box is color coded for quick recognition.

STERILE

Capacity (mL)	Graduation interval (mL)	Tip style	Color ring	Qty/bag	Qty/cs	Catalog number	Price/cs
<b>Individually wrapped</b>

## Pipette Helper™ Controller

### Chemical resistant

- Single-lever operation for even flow
- Fits pipettes 0.1 to 100 mL
- PP, PTFE, and silicone wetted parts

ISO9001:2008  
CERTIFIED SUPPLIER

Description	Catalog number	Price
Pipette Helper™ controller	<a href="#">GY-24549-00</a>	

[GY-24549-50](#) Replacement membrane filter, 3 µm. Pack of 10

## Pipette Controllers

### Protect against contamination

- Color-coded for quick identification
- Single-lever operation
- Fits pipettes 0.1 to 100 mL
- Autoclavable

ISO9001:2008  
CERTIFIED SUPPLIER

Colors	Catalog number	Price
Neutral	<a href="#">GY-24550-49</a>	
Blue	<a href="#">GY-24550-51</a>	
Magenta	<a href="#">GY-24550-53</a>
