argus[®] thermal imaging from e2v

argus®

The Argus®4-160 is a member of the next generation of highly successful Argus® Thermal Imaging Camera (TIC) from e2v.

The Argus[®]4-160 uses an uncooled high-resolution 160 x 120 pixel, Amorphous Silicon (ASi) Microbolometer Detector. It has been designed using advanced digital imaging technology for a sharper picture and provides superior performance.

The Argus[®]4-160 is a simple-to-operate, self-contained and robust camera, which can be used in a fully automatic mode of operation.

The Argus[®]4-160 has been specifically designed to help fire fighters to see in conditions of zero visibility including complete darkness, and smoke. It allows them to identify and rescue casualties, locate hot spots and the seat or spread of the fire.

The camera is also lightweight, ergonomic and capable of withstanding harsh environments.

The Argus®4-160 can be used with all the Argus®4 camera accessories including Truck Mounts, Transmitters and Video accessories.

No end-user maintenance is required other than recharging of batteries and post-use external cleaning with a soft cloth.
