- The VK236 6-Port IR/Serial Expansion Box provides six additional IR/Serial ports for a flexible expansion of the ATEN Control System. This allows users to control additional IR/serial devices in an environment where more devices are required. With the advantage of an Ethernet-based connection, the expansion box can be easily connected to the VK2100 Control Box via a LAN connection from a variety of locations across a network.

Features

- Provides 6 IR/Serial ports to expand the ATEN Control System
- Up to eight VK236 expansion boxes can be added to a single VK2100 Control Box
- Flexible Deployment: Connects to a VK2100 Control Box via an Ethernet connection
- ID Switch pairs the VK236 with a controller to instantly configure the network settings
- Supports Power over Ethernet (PoE) or DC power supply
- Firmware upgradable through USB or Web interface

Highlights

PoE Single Cable Installation	The VK236 is built with PoE which supplies power through the same Ethernet cable that connects it to the LAN – eliminating the need of an extra power source and extra wiring. In addition, the VK236 can be powered via a 5 VDC power adapter.
Expansion via Ethernet	With an Ethernet-based connection, the expansion boxes easily install close to the devices you need to control – anywhere across a network to the VK2100 Control Box.
